I. PREFACE

This is the twenty-fourth edition of the Delaware Nursing Home Utilization Statistical Report. The report presents characteristics of Delaware's nursing homes and their patients. The data in this report does not include Intermediate Care Facilities for the Mentally Retarded (ICFMR). ICFMR facilities provide active treatment services to people with mental retardation and other related conditions causing adaptive behavior similar to that of the mentally retarded person which manifests before the person reaches the age of 22. Also, the report does not include data from facilities that serve the population under 18.

The Bureau of Health Planning & Resource Management has contracted with the University of Delaware's Center for Applied Demography & Survey Research to collect the data, provide data entry and verification services along with data tabulation and analysis.

The source of information for year 2009 encompassed in this document is monthly utilization statistical reports by Delaware nursing homes submitted to the University of Delaware's Center for Applied Demography & Survey Research. The center obtained a list of licensed nursing facilities at the beginning of the year from the Bureau of Health Planning & Resource Management. All changes to the list of licensed facilities, including name changes and changes in the number of licensed beds were communicated to the center by the bureau. Facilities were contacted on a monthly basis with requests sent the first day of the month. A combination of methods was used to contact the facilities on the list. The method was a combination of standard mail and e-mail, followed up by fax and phone. Using these methods, the center achieved full compliance from all facilities for all 12 months. When reports were received from individual facilities, the reports were checked for internal inconsistencies or unexpected changes in reported statistics. These discrepancies were immediately communicated back to the facilities with explanation and a request to update the data. Once an updated report was received by the center, the data was keyed into a database using a double entry system. Once the data was keyed, it was then verified. At the end of the reporting year, the data was recoded as needed and tabulated.

This report presents the collected data in two sections. The Facility Characteristics section of this report focuses on data from 1999 through 2009. Most of the summary presented here focuses on aggregated data for all nursing homes in Delaware, particularly:

- (1) Facility characteristics (number of homes and beds by ownership)
- (2) Utilization data (patient days, occupancy, admissions and discharges)
- (3) Patient characteristics (age, gender and source of payment)

The section entitled Tables presents summary characteristics such as total patient days, occupancy rate, and patients by source of payment, along with number of admissions and discharges for each facility.

Note:

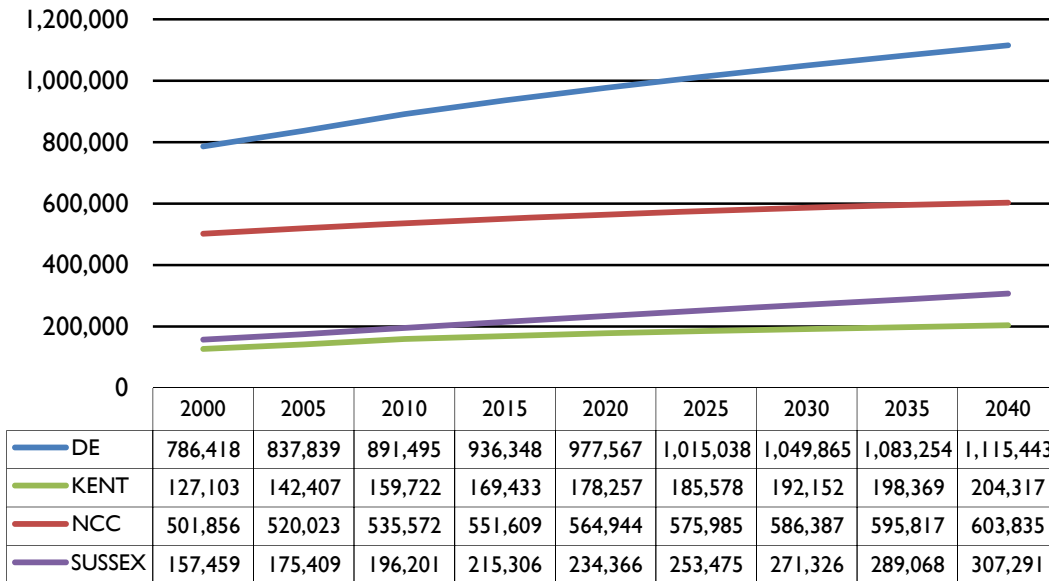

Percentages in the report may not add up to 100% due to rounding.

When making year to year comparisons, refer to Appendix A for changes in facility names and/or number of licensed beds.

STATE POPULATION

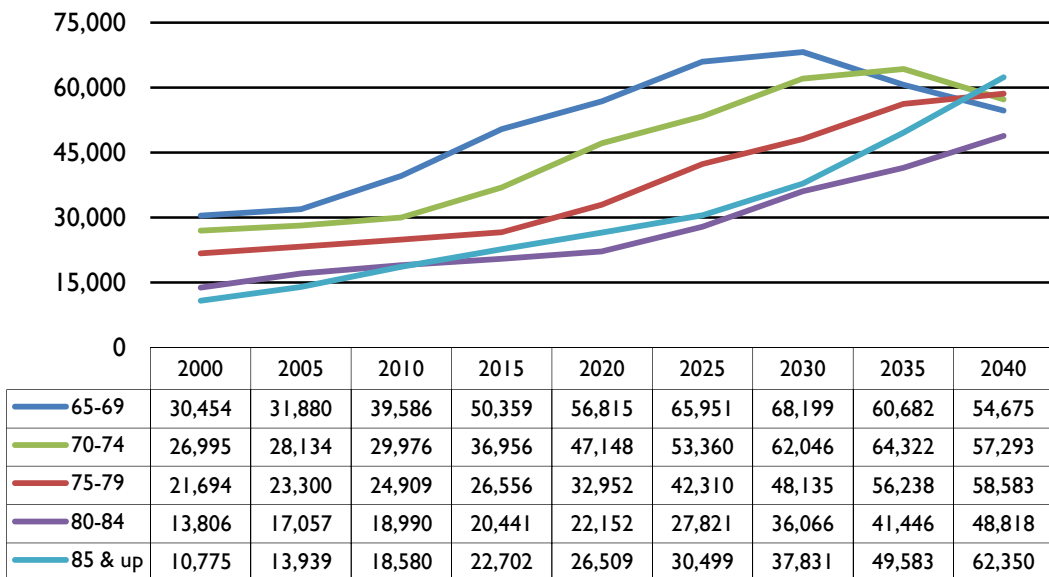

The growing size and the changing demographics of Delaware's population is central to the understanding of the distribution of nursing homes (and for that matter assisted living and rest residential facilities), the number of licensed nursing home beds and their utilization. To provide the context within which to evaluate the availability of facilities for the elderly, we are including two charts. The first chart presents the growing trend in the size of Delaware's total population. Chart two presents the growing number of those who are aged 65 and above. In both cases, significant increases are estimated. First, the estimates by the Delaware Population Consortium indicate a 41% jump in the total number of Delawareans from 2000 to 2040. The growth is distributed unevenly across counties. Sussex County's total population growth during this time period is estimated at 95%, with Kent County following at 61% and New Castle County following at 20%. Looking at the total number of Delawareans aged 65 and above, the change is even more dramatic. Based on the numbers from the Delaware Population Consortium, it is estimated that the population of Delawareans aged 65 and above will grow 170% (103,724 to 281,719) from 2000 to 2040.

II. FACILITY CHARACTERISTICS

NUMBER OF NURSING HOME BEDS

The number of nursing homes in Delaware decreased from 48 in 2008 to 47 in 2009. The number of licensed beds decreased from 5,089 in 2008 to 5,021 in 2009. Of the total beds, approximately 87.7% were privately owned in 2008, with a slight decrease to 87.5% in 2009. Correspondingly, the percentage of beds in public facilities increased from 12.3% to 12.5%.

UTILIZATION

For private and public facilities together, the number of patient days increased by 0.8% between 2008 and 2009. The number of patient days in private facilities increased by 1.3%. Looking at private facilities by county, the growth was unevenly distributed - there was a 1.1% decrease in New Castle County, a 5.2% increase in Kent and a 4.3% increase in Sussex County. The public facilities experienced a decrease of 4.2% from 2008 to 2009.

OCCUPANCY

Between 2008 and 2009, the overall occupancy rate for all facilities combined increased from 84.7% to 86.5%. Private facilities' occupancy rate in New Castle County decreased from 91.4% to 89.6%. The occupancy rate for private facilities in Kent County increased from 88.9% to 93.5%. The occupancy rate for private facilities in Sussex County increased from 80.3% to 89.7%. The occupancy rate for public facilities across the state decreased from 62.9% to 60.2%.

Occupancy rates presented here are calculated as: $(\text{Number of Patient days}/(\text{Number of beds} \times 365)) \times 100$. This calculation assumes that all facilities were open 365 days and that number of licensed beds did not vary throughout the year.

* The occupancy rate for year 2009 presented here is identical with the weighted occupancy rate based on actual number of days facility was open, see Table 2 in Section III. Tables. Please note that a couple of facilities had changes in the number of licensed beds which can influence the above occupancy rates. For details on these licensed bed changes please see Appendix A.

ADMISSIONS

Between 2008 and 2009 there was virtually no change in the number of admissions among private facilities in Delaware. Admissions to private facilities increased by 0.4% while admissions to public facilities decreased 28.6% between 2008 and 2009. Comparing admissions from a decade ago, the number of admissions combined for all facilities increased by about 63%. Admissions at public facilities declined 35%, while admissions at private facilities grew by about 65%.

The percent of patients admitted to Delaware nursing homes by race within specific age groups is presented in the figure below. About 11% of whites admitted to Delaware’s nursing homes are under age 65, while about 27% of blacks admitted to nursing home are in this age group. Clearly, the age of patient admission to nursing homes in Delaware varies by race. Blacks tend to enter nursing homes in Delaware at a younger age than whites. Of the black admissions in 2009, 53.8% were less than 75 years of age, compared to 27.8% for whites.

Although blacks are admitted to Delaware nursing homes at a younger age, the percent of black admissions (from all admissions) is lower than white admissions in all age groups as indicated in the figure below. This figure shows the percent of all patients admitted to Delaware nursing homes in the year 2009 by race and age. From all admissions to Delaware nursing homes, only 4.7% were black and under 65 while almost double (9.1%) are whites in the same age category.

DISCHARGES

The number of patients discharged from nursing homes across Delaware increased from 9,919 in 2008 to 10,006 in 2009 (0.9% increase). The number of patients discharged from private facilities increased 1.1% while the number of patients discharged from public facilities declined by 18% (from 127 in 2008 to 104 in 2009). The change in the number of discharges between 2008 and 2009 from private facilities varies significantly across counties. Discharges in New Castle County decreased marginally (0.8%), while discharges from private facilities in Kent County increased 19.3%, and declined 0.7% in Sussex County.

The proportion of patients discharged to different destinations varies by the type of facility. For example, patients in public facilities are less likely to be discharged to home (7.7% from public and 50.5% from private) or hospital (15.4% from public, 28% from private) and more likely to be

discharged due to death (54.8% from public, 12.9% from private) than their counterparts in private facilities.

The percent of patients discharged from Delaware’s nursing homes by race within specific age groups is presented in the figure below. About 10.2% of whites discharged from Delaware’s nursing homes are under age 65, while 24.6% of blacks discharged are in this age group. Clearly, the age of patients discharged from nursing homes in Delaware varies by race. Blacks tend to be discharged from nursing homes in Delaware at a younger age than whites. Of the black discharges in 2009, 49.7% were less than 75 years of age, compared to 27.1% for whites.

SOURCES OF PAYMENT

The source of payment for nursing home care varies by type of facility. In private facilities, approximately 53% of the residents had Medicaid as the source of payment, while 74.2% of patients in public nursing homes were paid by Medicaid in 2009. About 23.7% of patients in private facilities were self-pay in 2009, while only 17.3% of patients in public facilities were self-pay. Medicare is not a major payer of nursing home care. In 2009, Medicare was the source of payment for 16% of all patients. In private facilities, about 17% of patients were paid by Medicare, and in public facilities only 3.8% were paid by Medicare. However, the percent of Medicare patients has changed considerably since 1999 when the percentage of patients with Medicare as a source of payment stood at 8.8%. Today, Medicare pays for nursing home care for 16% of patients.

The chart below tabulates the estimates of Medicaid patient days for Delaware’s public and private facilities for the period of 1999 to 2009. Please note that the counts of Medicaid days are based on end of month reporting. To estimate the patient days, it was assumed that those who were reported to be at the facility at the end of the month were also there for the whole month. This assumption very likely overstates the number of Medicaid patient days. However, the expectation is that the assumption does not impact the magnitude of the difference between private and public facilities.

Occupancy rates for individual facilities are calculated as ratio of Billable Patient days and Licensed bed days. Licensed bed days are calculated as Licensed beds (December) multiplied by the Total (actual) days facility was open during the year. The **Occupancy rates (weighted)** at County, State level, Type is calculated as the ratio of Billable Patient Days (sum for each facility in the geography) and Licensed Bed days (sum for each facility in the geography).

Center for Applied Demography & Survey Research (CADSR) is a project - oriented, policy analysis and survey research center. The Center's primary mission is to ensure that the best possible data and information on important public issues are developed and made available to members of the College, its clients, and, most importantly, to the policy-makers who affect the way we all live and work in Delaware. This mission is accomplished in four different ways: by acting as a clearinghouse for large data sets supplied by local, state, regional, and federal agencies; by maintaining an active survey research capability; by developing and designing custom databases of text, graphical information (including both raster and vector data), drawn from client files; and by using an array of information system technologies.

An Equal Opportunity/Affirmative Action Employer

The University of Delaware is committed to assuring equal opportunity to all persons and does not discriminate on the basis of race, color, gender, religion, ancestry, national origin, sexual preference, veteran status, age, or disability in its educational programs, activities, admissions, or employment practices as required by Title IX of the Educational Amendments of 1972, Title VI of the Civil Rights Act of 1964, the Rehabilitation Act of 1973, the Americans with Disabilities Act, other applicable statutes, and University policy. Inquiries concerning these statutes and information regarding campus accessibility and Title VI should be referred to the Affirmative Action Officer, 305 Hullihen Hall, 302/831-2835 (voice), 302/831-4552(TDD).
