Senate Candidates
To Present Petitions
To Dean of Students

Students planning to run for member or class officer positions in the Student Senate will have an opportunity to do so from Monday, April 15 and 17 in the Library.

Dorm Building
Brings Danger

Kay Hammond, chairman of the Women's Housing Committee, urges women students not to visit the new dormitories until they are complete.

Cosmopolitans Postpone Festival

A Festival of Nations, a program of music and dance, is scheduled for the near future. The festival is being sponsored by the Delaware Student Council.

Barbara Roser Selected
To Rule Over May Day

Barbara Roser, senior home economics major, will reign as Queen of the university's May Day on May 16. Queen Barbara, a transfer from Mary Washington College, is the secretary of Warner Hall and a member of the Home Economics Club, the Music Club, and the Delta Kappa Epsilon sorority.

Classes Elect
D'Amico, Gray
Smith to Court

D'Amico, Gray and Smith will be the candidates for class officers.

Campus Chest Drive
Nets $325.66 As Total

As of Tuesday, this year's Campus Chest Drive netted $325.66. The participation for non-commuters was 65 per cent. The average contribution was 36 cents per person. Three charities will be benefited.

‘Diet Squad’ Paid for Eating In Vitamin Deficiency Study

By SCOTT WILSON

College students have become famous for their ingenious ways of making extra money.

A group of us think we found a new and attractive offer—free meals for 12 days and a $20 check for eating them. We took part in an experimental nutrition project under the direction of the school of home economics at the university. Yesterday was the last day for our part in the experiment.

My cohorts in this gastronomic undertaking included Barbara Fox, Toni Brandon, Nancy Stewart, and Molly Weiss, all of Wilmington; Ann Harwood, Had­don Heights, N. J. and Georgia Wall, Fairless Hills, Pa.

The purpose of the project was to determine the effects of a deficiency of Vitamin B6. Dr. Kath­erine E. Cheslock, assistant pro­fessor of nutrition, held the initial control over our little group. Her tests are under the sponsorship of the Agriculture Experiment Station at the university.

The experiment began some days ago—Feb. 4 at 7:45 a.m., Dorothy Levy, associate head of our little group. Her days ago—Feb. 4 at 7:45 a.m., Dorothy Levy, associate head of our little group. Her

Most Men Appreciate Feminine Shape, Thus Vetoing New 'Sacks'

BY JIM MARVEL

It seems to be a common of opinion that men tend to prefer a 'Sack Look' in women's fashion. This preference is often expressed in the way they vote in elections for women to realize this look, or indirectly by finding them out for themselves. Although this preference is not always expressed in a clear-cut way, it is fair to say that the new look, in the end, is sure to be a success.

OUTSTANDING FEATURES

This "Sack Look" does have several practical features which are outstanding. First, it makes a lot easier for women to dress themselves and to dress for special occasions, and it is perfectly practical to have it all over again.

The "Sack Look" is also practical in that it is very inexpensive. A woman will not be able to buy a lot of clothes at one time, but if she is sure to have it all over again, she will have to save up her money for it, and it will be cheaper overall.

The "Sack Look" is very simple, as well. It is easy to understand and to put together, and it is not very difficult to find the best way to wear it.

The "Sack Look" is also very flattering. It is designed to show off a woman's figure and to enhance her beauty. It is a look that is very attractive to men and that is sure to make them feel good.

The "Sack Look" is also very comfortable. It is made of soft materials and is designed to fit comfortably. It is a look that is very easy to wear and that is sure to be comfortable all day long.

The "Sack Look" is also very versatile. It can be worn in all kinds of weather and in all kinds of conditions, and it is sure to be practical in any situation.

The "Sack Look" is also very convenient. It is easy to keep up and to maintain, and it is very easy to store away when it is not needed.

The "Sack Look" is also very stylish. It is a look that is very fashionable and that is sure to be popular.

The "Sack Look" is also very unique. It is a look that is very special and that is sure to be appealing to men and to women.

The "Sack Look" is also very special. It is a look that is very special and that is sure to be appealing to men and to women.

The "Sack Look" is also very traditional. It is a look that is very traditional and that is sure to be appealing to men and to women.

The "Sack Look" is also very special. It is a look that is very special and that is sure to be appealing to men and to women.

The "Sack Look" is also very special. It is a look that is very special and that is sure to be appealing to men and to women.
Rational Self-Interest
Add Commercialism at UD

There is a university ruling that the name of this institution may not be associated with a commercial venture of any sort, for example, the list of banks may not publicize a certain type of encyclopedia, nor may they state a recommendation for a certain brand of peanut butter.

Similarly, a political party may not advance its cause on college campuses by using commercial advertising campaigns to present their views on an issue, either nationally or in the State. These rules do not apply to the temperance party, which should not even recognize the two political clubs, according to Ron Nowland, president of the Active Young Democrats.

If this situation is unfortunate, in fact of opportunity for the university to gain recognition for its approval of a certain product.

Joe Rinaldi and his jazz quintet appeared in Mitchell Hall two weeks ago under the sponsorship of the Freshman Class. In addition to a routine concert supplementing the activities for Women’s Weekend, the group wanted to make a recording which they would have called “Husky’s Blues.”

As it is, the group, which expects to make a tour of Europe, will have the opportunity to participate in all branches of the University’s musical activities. It may be that once the students and perhaps the professors in Bushkill, Pennsylvania, have heard the quintet, the group could have participated actively in it.

This is so because the election is non-partisan. But if the election were run on the party basis, neither the administration of the University nor the members of the student body may not hear the details of the campaign, which may be the safest way to cure the current troubles.

Furthermore, by action, I mean a one-way street, we shall not make the decision for the students, we will let them make the decision for themselves. As it is, the group, which expects to make a tour of Europe, will have the opportunity to participate in all branches of the University’s musical activities.

Peter Genereaux, president of the Active Young Republicans, has announced a plan where students will participate in Newark City Council elections next month. At least 50 members of his group will help in getting the voters to the polls.

This is the group, which will do it. If students had known, they could have voted in the election had they been registered. There would have even been a possibility for a student vote, one of the candidates said. This is so because the election is non-partisan.

But if the election were run on the party basis, neither group could have participated actively in it.

In the University, there is a need to be more active in deciding what smacks of commercialism in itself or what is political skullduggery, but it seems that a rational self-interest agreement to these enterprises could lead to some degree of value.

Pa. Academy Commercials
Special Summer Session

The Buckhill Academy of Pennsylvania will hold a special summer training course in journalism to be conducted in June and July. The course will be conducted in the 500-seat Buckhill Playhouse and will be open to students.

There are recreational activities, including swimming, tennis, and other activities in all branches of the performing arts.

All students will have an opportunity of taking part in the summer night plays presented in the 500 seat Buckhill Playhouse and the summer night radio programs. There are recreational activities, including swimming, tennis, and other activities in all branches of the performing arts.

Letters To The Editor

Changes Still Due

To the Editor:

Home Economics Senate wishes to clarify the implication made in the March 14 issue of The Delaware Review concerning the completion of our Academic Honor Code.

The School of Home Economics has not "instituted" this Code. It has been "completed" in its final form by the Senate. Honors are still due to be made upon its "revised edition." (This Code has not yet been voted upon by the students of the school of home economics. Furthermore, it will be introduced only when it has gone through all the necessary channels of the administration and has been approved by all persons or groups concerned.

We thank you for allowing us to clarify this misunderstanding.

Shirley

Chairman of the Home Economics Senate

Brave To Bold

To the Editor:

We would like to see the column to answer Sidney Solomon's comments in next week's Review. He makes some interesting observations about college women.

Men Give Pins

To the Editor:

We know that many of the women who wear fraternity pins as an indication of their purpose in being at college are not quite sure about point out that for every woman day campus with a fraternity pin, there is a fraternity man without one who is impossible to make someone pin. Therefore, there is a group pinned it must be to cause the main woman to want, or at least because she does not see a man like her. If he is going to go this direction, there is a group that speaks just as loudly for men.

MARRIAGE ANCIENT

"One way or another we do not believe in a monogamous marriage. So we shall not make the decision for the students, we will let them make the decision for themselves. As it is, the group, which expects to make a tour of Europe, will have the opportunity to participate in all branches of the University’s musical activities.

Peter Genereaux, president of the Active Young Republicans, has announced a plan where students will participate in Newark City Council elections next month. At least 50 members of his group will help in getting the voters to the polls.

No More. Jingoists?

In short, he asks, "Why are you here?" In answer we would like to say to Mr. Kirkland that women are in college for as many different reasons as there are women. They are here because it is the socially acceptable thing to do. There is nothing else to do between high school and marriage. Their parents insist they be here, and not least of all, because they are looking for a man. Add to this the need of training to earn a respectable living and you have the exact reason men go to college. There seems to us to be a great difference in a woman looking for a man and a man looking for a soft, high paying job. Contrast there are some exceptions for male students who specifically plan to do something more exciting than pour coffee and sweep floors for Du Pont money. The aims of these men are:

Expert on China
Speaks Monday

The war potential of Red China will be the subject of discussion at the next meeting in the university Extension Division series of lectures. Lt. Colonel Robert B. Rigg, a member of the Army General Staff, will talk on the subject at 8 p.m., Monday, March 31 in the Tower Hill School.

In 1945 Lt. Col. Rigg entered China to report on the Soviet interesting of Manchuria. He returned in 1948 to observe the Chinese Civil War as a member of General George C. Marshall's staff.

Dorms, Fraternities Receive Paperback

For the third consecutive year, the administration has allowed money for the purchase of paperback books. The books are to be distributed to the small libraries in the dormitories and fraternity houses.

COMMITTEE

A special committee, consisting of Dr. Augustus Allee, English department chairman; Mr. Carl Wagner, president of the publishing department; and Janet Lee Keller, junior English major, and Scott Wilson, senior editor of The Review, have been working on the selection of these books. Four meetings have been held to choose a variety of books which will appeal to everyone.

DISTRIBUTE

At a meeting this week, the committee divided and distributed the books according to the size and the need of each dormitory and fraternity house. The purpose of these books to the libraries is to stimulate reading for enjoyment among the students.

Visiting Yale Scholar Speaks
On Shakespearean Tragedy

By CAROL E. JONES

Professor Maynard Mack, visiting scholar at Yale University, recently spoke on Shakespeare's "Antony and Cleopatra" to an audience of students in a recent lecture at Delta.

"We notice that Shakespeare has suspended this great story, and three great personalities in a particular kind of poetic world," Professor Mack said.

FOUR ELEMENTS

"It is a world, for one thing, with a marked emphasis on the four elements: earth, water, air, and fire. Each one finds in Shakespeare's characterizing element a part of itself, a part of his being, a part of his life.

"It is a world, for another, with a marked emphasis on the four elements: earth, water, air, and fire. Each one finds in Shakespeare's characterizing element a part of itself, a part of his being, a part of his life."

Juniors, seniors and graduate students who are interested in becoming house directors' assistants next year may secure applications now from Dean Collins' office, 114 Hull-Hall.

-Women may choose either full or part-time positions. In return for full-time work, a house assistant will receive her room rent. If an applicant desires, she may share her assistant's duties with another student and receive part of her room rent.

Although financial need is taken into consideration, Dean Collins has emphasized that an applicant's maturity, ability to assume responsibility, and attitude are of prime importance.

Individual questions concerning the duties involved may be discussed in the personal interview with Dean Collins, which is required of all applicants.

Research Engineer Robert A. Thorpe, like many other engineers, mathematicians and physicists, came to IBM directly from college. Here he describes how he joined IBM for two reasons: "One, because of the area of work was exactly what I was looking fortraining in computer logic, programming, and computer technology. And the other, because of the latest devices to implement the core!"

In June, 1955, Bob Thorpe decided to enter the IBM training program, where he studied the corporate structure, its Divisions and products. He received technical training in computer logic, programming, and components such as transistors, in the Divisions and products. He received technical training in computer logic, programming, and components such as transistors, cores and tapes. By September, half his time was being devoted to an actual project; by the following March, he was on that project full time. "Our job was to translate six servo-amplifiers for the airborne bomb-navigational system," he recalls."We completed the project in April."

In Research (as in all of IBM), we work in a small group. "Our team consists of three E.E.'s and a technician. We start with an analysis of the over-all system and its components. Then we use modern design techniques involving the latest devices to implement the system." His group split up occasionally to investigate special phases of a project but usually in frequent sessions to coordinate their research activities.

Promoted to Associate Engineer

In August, 1955, he was promoted to Associate Engineer. At that time he had been working on a design and development project for a D.C. sweep-overshoot system for transistor-based airborne radar data presentation. He worked on this project until it was completed in May, 1957.

The "cool group" approach

Bob Thorpe was next assigned to the Circuit Logic Department. Here, he was concerned with research in new areas of computer technology—for example, magnetic logic and semiconductor circuit components and systems which operate in "real time."

Recently, a "Process Control Technology Group" has been organized within the Circuit Logic Department. "Our primary function in this group," Bob Thorpe says, "is to study sampled-data systems for application to industrial process control. This work is theoretical and involves mathematical studies of representative systems and processes..."

What's it like to be with IBM?

"It's a world, for one thing, with a marked emphasis on the four elements: earth, water, air, and fire. Each one finds in Shakespeare's characterizing element a part of itself, a part of his being, a part of his life."

What does the future hold?

Bob Thorpe plans to continue in systems work and to develop a "more sophisticated approach to the analysis and synthesis of sampled-data control systems."

As his career develops, he can advance to still more challenging projects of a scientific nature or he can assume managerial responsibilities combining administrative and scientific talents.

In the future, the company is open. IBM Research is expanding enormously at the present time. A new Research Center is being constructed in Westchester County, N. Y., which will be the world headquarters for all IBM research centers in this country and Europe.

The fact that he is so much on his own, Bob Thorpe says, is what he likes best about IBM. "There's no 'over-shouder supervision. You schedule your own program and set your own pace."

This profile is just one example of what it's like to be with IBM. There are many other excellent opportunities for well-qualified college men in Research, Development, Manufacturing, Sales and the Government. For information, do not ask your College Placement Director when IBM will next interview on your campus. Or, for information about how your degree will fit you for an IBM career, just write to:

Sixth Annual AICE Meeting

The sixth annual AICE meeting of the "Experiences in Industry" series will be held Wednesday, April 21, at the Museum Auditorium, 33rd and Spring St., in the University of Pennsylvania campus.

The meeting is sponsored by the Industrial Relations Section of the American Institute of Electrical Engineers and the University of Pennsylvania.

The broad topic this year will be "Scale-Up in Practice." A panel of experts will discuss the problems which have been developed as a result of the practical, industrial nature of engineering problems. In addition, there will be a panel discussion on the various methods of student training. The meeting is free to all current and recent students.

Institution of a shuttle service

between the Philadelphia

Airport and the campus was
discussed recently by Joseph

C. Gilbert, a partner in the

Suburban Airport Transportation

Co., and John K. Hesselt, Dean

of Students, because of the

possible discontinuation of

passenger service by the B & O

Railroad between Washington, D.C.

and Philadelphia.

Fares

for these bus rides

would range from

$3.00 to $5.00 for one

or two students to $3.00 for eight.

Special

budgeted

than the

regularly scheduled ones could

be provided for five or more

students directly to the airport.

Any number of students

could obtain such service from the

airport.

Phil Delta Hold

Baseball Team Tours South
Wisniewski Pleased With Ends Efforts In Spring Workouts

If the Blue Hen footballers don't have anything else new, they'll have this.

Coach Irvin Wisniewski, who returned to the bench last spring after a three-year absence, said recently that for the first time since he has been a coach at the university, he has his first-stringers to work with. The spring practice of the team converts from other positions but the backfield is full and ends slot.

Shaping up as the top prospects for the team's first line next fall are sophomores Bob Zerbe, center, and Don Milford, both typical lightweight fullbacks. Delaware ends at 170 and 175 pounds respectively.

Both had little chance to play last season behind top enders John Xiong, Cliff Browning, and Hames Mosher. Mosher graduated in January and Karl Franke, who is working out at quarterback, is in school.

Browning, a bearded, aggressive tackle, caught two passes for yardage and a touchdown. They didn't make the record books but showed great promise defensively and is shaping up as an extra defensive end. It will be the best of the freshman ends in 1956.

Also very much in coach Wisniewski's plans for '56 are freshman Mike Heleneke, Ollie Bakke, Dick Dowden, and Fred MacDonald. Bakke is a fine left tackle and MacDonald has shown well on both offense and defense. Bakke shows the potential and is a good pass receiver. Dowden is recovering from an eye injury and the coaches have seen little contact work so far but he is shaping up as at least a starter later.

The recent snowfall deterred Delaware athletics in more ways than one.

Ron Walsh, Delaware's second baseman, was unable to hit even a single because of the snow.

The snowfall was a big help to the baseball team. They were able to practice in a more or less normal manner.

First, the teams were prevented from getting valuable work on the field. The snow piled up to the height of the fence. Delaware was due to play the Blue Oxen, which is opposed by St. Andrew's on the home court.

Hens Cop Third at AAU Meet

The Delaware trackmen who went to Baltimore Saturday to compete in the second annual championship of the Olympic Club and Morgan State held the meet in the track with 11 points each followed by Delaware with 19.

In the event only 16 of the 20 members of the track team were able to participate in the AAU meet. Delaware held its third place position in the match by giving only third place in the mile relay. The relay team consisted of Harold Broun, Hennessey, Don Harper and Cliff Browning.

Sports SLANTS
by Jay Corry
Sports Editor

Spring vacation marks the opening of the spring sports schedules. There are five varsity and freshman sports at Delaware in the spring: baseball, tennis, track, golf, and women's basketball.

The baseball team, coached by Harold (Tubby) Raymond, is composed of the previous 25-game schedule this season. The Blue Hens are a perennial diamond power and every season looks to be improved over last season. The team's biggest question mark is pitching.

Tony Deluca, 7-3 last year, is the starting pitcher. Mike Sikkens and Bill Jordan are the two men he will return to the team. However, Count all of the returning hurlers like Bill Patterson, Fred Walters, and Al Neiger should make the team a hard one to beat.

The team is blessed with a hard hitting array of freshmen and sophomores from last year's frosh in Maynard Eaton and Gene Queen and Penn. The returning lettermen are Bill Murray, Skip Kauffman, and Dick Dieckman.

PREDICTION:
19-6

The tennis team also looks very strong. Hopes for improving last year's 7-4 record are high. The team is led by Captain Bob Woodruff, Ray Walker, Russ Givin, Clayton Keeneman, and Dick Dieckman.

Swarthmore and Newfield are strong teams perennially. There are a couple of Conference. On the whole the Hens' schedule is a tough one but with this personnel, the Hens should be tough to beat.

PREDICTION: 10-T

The track team, as usual, will field a strong team. The team finished with a 5-1 record in dual meets last year and it is expected the Hens will take up the slack.

Captain Cliff Browning leads an array of returners. Cliff Browning holds the school record in the pole vault. Bill Watson, holder of the school broad jump mark, is also returning. Other returners are: John Floyd, Cliff Browning, Edie White, Bill Jones, Bob Moore, and Jerry Quigley.

There are several promising freshmen from last year who should help to make this year's team one of the best. These men are Bob Koyanagi, Buddy Melvin, Pete Lamont, Ken Mackinon, Dick Atkinson, and Dick Anderson.

Midfielders are Bob Koyanagi, Buddy Melvin, Pete Lamont, Ken Mackinon, Dick Atkinson, and Dick Anderson. Defenders are Bob Moore, Tom Brown, John La Fontaine, Bob Jones, and Mark Harn. Ed Bennett is goalie.

The team's opener is with Swarthmore which promises to be a tough game. Drexel and Washington College should also be tough. Washington has two All-Americans. However, this Delaware team is more experienced than last year and it has shown a lot of desire to win.

PREDICTION: 5-4

The golf team has its first match April 9 with Hofstra. The weather has delayed the practices thus far.

The team is led by Captain Hal Reed, Bill Walker, John Watson, and John Pratt. The team faces its hardest matches in Rutgers, Lehigh, and Penn. The schedule is a tough one but they are expected to improve over last year's record.

PREDICTION: 6-5

Closed Mondays: Daily 2-4 P.M.
A company that plans far ahead gives me the chance to work out my future."

"Pleasing design is no accident," says 32-year-old TV designer Richard Montmeat. "It takes creative planning. At General Electric, we're constantly developing new product designs - including some for products which won't be the market for several years. Ever since joining General Electric, I've had the opportunity and challenge of working toward the designs of the future. As I see it, such plans ahead gives me the chance to work out my own future, too."

The creative accomplishments of Richard Montmeat have already brought him widespread recognition. He was awarded design patents in 1950 and 1956; he won the prestigious Industrial Designers Institute Award in 1955; and his design for the 1958 General Electric 17-inch portable television receiver was selected for showing in an international design exposition in Milan, Italy.

Progress in pleasing design - making appliances more enjoyable to own and use - is an important factor in our nation's growing use of electricity and in our constantly rising level of living. Planning to satisfy future customers is important not only to the continued growth of the electrical industry, but to individual progress as well. Opportunity for long-range planning is part of the climate for self-development which is provided for General Electric's more than 25,000 college-graduate employees.
Where there's a Man... there's a Marlboro

Mild-burning Marlboro combines a prized recipe (created in Richmond, Virginia) of the world's great tobaccos with a cellulose acetate filter of consistent dependability. You getbig friendly flavor with all the mildness a man could ask for.

Marlboro

The “filter flavor” of cellulose acetate (modern effective filter material) in just one Marlboro Select Filter.
Jobs Are Harder to Get, Geraldine Wyatt Reveals

Job opportunities are considerably fewer this year, says Geraldine Wyatt, university Placement Bureau director, who has received many applications from graduating seniors and others seeking employment. This statement concerns not only graduating seniors, but also the many people looking for fewer people, those finding jobs. Even though job opportunities are available, many of these lack the required qualifications or the necessary education.

The recession, that the county is currently experiencing, is responsible for this poor state of affairs. Although all companies and schools are hiring fewer people, those who are looking for jobs have found that there are not enough opportunities to choose from. Many companies have cut their placement budgets, leading to fewer job openings.

Not only are fewer people finding jobs, but those who do find work are often faced with less desirable conditions. Many jobs pay lower wages than those offered in previous years. This is a significant factor in the current employment situation.

The situation is expected to improve in the near future, as some companies have reported a decrease in their numbers of applications. This suggests that the recession may be coming to an end. However, it is still too early to say for certain whether this will happen.

You'll be sittin' on top of the world when you change to L&M

Bredin, Shuster Will Tour Caribbean Sea This Year

Just the mention of the Caribbean Sea is sufficient to arouse visions of sail, rolling waves, balmy weather, and luxurious quarters. However, there are important considerations to deal with, which are the personnel and their assignment. Mr. Bredin, an associate professor of oceanography in the university's marine sciences, and Mr. Shuster, professor of marine biology, have planned an expedition to the Caribbean Sea. Mr. Bredin will be making the first voyage of his career, while Mr. Shuster will be conducting research on the second voyage. Their work will be conducted in the university's marine biology laboratory.

May Day

The May Day celebration will be held this year with a special event. The theme of this year's celebration is "Planting the Seeds of the Future." This event is designed to promote the importance of education and to encourage students to pursue their academic goals.

Campus Chest

The Campus Chest committee has been named to oversee the student-body fundraising efforts. The committee is composed of representatives from various student organizations. The purpose of the Campus Chest is to provide financial assistance to students in need and to promote the values of community service and social responsibility.

Magazine Reports Religious Revival

A revival in religious faith on the American college campus is reported in the current issue of The Saturday Evening Post. This report is made by the Rev. James C. Kakavas, former chaplain to students at Pennsylvania State University and now executive director of the Church Society of College Work, an assignment which keeps him in touch with many schools around the country. Mr. Kakavas' article, "Religious Revival on the Campus," tells that the upswing has been in the number of courses which have an evolutionary process where the teaching field, there is a large demand for Delaware graduates, but mainly from out-of-state schools. Mr. Wyatt believes that the lack of Delaware teaching positions is due to the state's poor financial condition. She expects that enrollments in April will bring more in-state teaching offers. In the home economics field, there are numerous openings for those who will have been the location of the jobs.
