To Address Farmers

A check list of farm practices which should be intensified to increase returns is included in the feature story which appears on page 6 of the Newark Post. The Post is published every Wednesday and is the official organ of the New Jersey Farm Bureau, which has over 15,000 members in 300 local affiliates throughout the state.

The check list includes such items as: increasing the number of livestock, improving soil fertility, adopting better weed control methods, and utilizing better feeding practices. The story suggests that farmers who follow these recommendations can expect to see a significant increase in their incomes.

The Post also includes a column by John E. Hamilton, a well-known agricultural economist, who discusses the current state of the agricultural economy and offers some predictions for the future.

Local Man to Head Project

Arthur Hrubek, who has been associated with the Department of Agriculture, will head the new project. The project is aimed at increasing the production of milk and eggs in the county. The Post reports that Hrubek has been successful in similar projects in other states and is optimistic about the potential for success in New Jersey.

Frome

Frome, who has been associated with the Department of Agriculture, will head the new project. The project is aimed at increasing the production of milk and eggs in the county. The Post reports that Frome has been successful in similar projects in other states and is optimistic about the potential for success in New Jersey.

Regiment to Visit Newark

Famous Division To Give Aircraft Show

The regiment will be visiting Newark as part of its nationwide tour. The division is one of the elite units of the United States Army, and is known for its expertise in ground-to-air operations.

The Post reports that the division will be holding a series of events in Newark, including a public exhibition of its aircraft and a demonstration of its ground operations.

At the dawn of the aircraft show, the division will be launching a series of small-scale weapons systems, including rockets and missiles. The division will also be demonstrating its advanced ground operations, including the use of tanks and helicopters.

Wheat Crop

A wheat crop in state under average for 10-year span

The wheat crop in state is expected to be average for the 10-year span. The Post reports that the crop is expected to be about 20 million bushels, which is slightly below the average for the past decade.

The Post notes that the weather conditions during the growing season were favorable, but that the harvest was delayed due to persistent rain. As a result, the crop was harvested later than usual, which may have affected the quality of the grain.

The Post also includes a feature story by Myrtle E. Dyer, a well-known agricultural journalist, who discusses the state of the wheat industry in New Jersey and offers some predictions for the future.

Vote the Straight Democratic Ticket

The Republican Party in its campaign in Delaware suffered an utterly failed in its attempt to beat the Democratic Party and its administration of affairs in Delaware during the last two years. Its first attempt the barrage of figures released by the Republican candidate for Attorney General, by which he endeavored to prove that the Republicans stepped out of power in Delaware leaving a huge surplus. This statement was promptly answered by James W. Wise, Auditor of Accounts, in which he not only proved that the Republican Party stepped out of power leaving the State with an enormous deficit after boasting from year to year of a huge Surplus, but that in two short years, due to the sound honest government of the Democratic Party, the State budget has been balanced and there is now a Surplus. Their appeal to labor is as faulty as their figures of their utterances to date... They sometimes promise a job for every person... That is just another Republican jest like... The grass will grow on Broadway if you choose... A chicken in every pot and a car in every garage.

Labor Does Not Forget the Days of 1929 to 1933 when 17 millions were out of work... What did the Republican Party do to put these men to work? They continually criticized the New Deal and other work relief agencies... But do they ever tell you what they would do with the unemployed.

Ask the Republican Party for their Solution of Unemployment—but make them prove it is a workable plan to put men to work—not just a promise!

The Democratic Party stands on its record and asks the people of Delaware to support a straight ticket made up of men capable of running the business of Delaware in a sound business-like way, their record for the past two years is proof of this and is no campaign promise such as the Republican Party is laying out at its JAMBOREES and CRABFEASTS.

The Republican Party in Delaware is campaigning for one thing—PATRONAGE... Their principle object is to elect members of the General Assembly to legislate patronage. They know they cannot get it otherwise in Delaware.

The people of White Clay Creek Hundred should not be fooled by Republican propaganda and will not be if they support

Robert J. Quillen & Ira C. Shellenber of New Castle of Newark

Democratic Candidates to the General Assembly, who will assist Governor McMullen to carry on his sound business-like Administration.

WATER
SERVICE

GIVEN

Organizations

Donated 10,000

Gals. Quarterly

By Miss Grace S. Mahler

Chairman of the Committee of the

Annual Water Service Committee,

St. John's Episcopal Church, Newark,

noted the recent giving of funds by

various organizations in the city

for the benefit of the Newark Water

Department.

Four new water service systems were

installed in the city during the past

quarter, and the total amount of water

supplied to these systems is estimated

at 10,000 gallons per day.

The following organizations have

made contributions to the Water

Service Committee:

1. The Woman's Club of Newark,

contribution of $500.

2. The Young Women's Christian

Association,

contribution of $250.

3. The Newark Chamber of Commerce,

contribution of $150.

4. The Newark Savings Bank,

contribution of $100.

The total contribution of the

above organizations is $1,000.

BLOW BUT STEADY GROWTH CONTINUES

The announcement last week that the Chrysler Corporation had purchased 50 acres of land near the building of its present location, with the intention of using it as a new plant for the manufacture of standardized equipment, will be welcomed by all who believe in the progress and development of the city.

The modernization of the plant will be accompanied by the installation of new machinery and the employment of skilled mechanics and laborers. The new factory will be equipped with all the latest methods and machinery, and will be a model of efficiency and economy.

The announcement of the purchase of the land will be a stimulus to the real estate market, and will undoubtedly result in an increase in the value of property in the vicinity. It is hoped that the new plant will be completed as soon as possible, and that it will be in operation within the next twelve months.

The election of new officials.

THE ELECTION POT BERS

Off to a slow start, the race for the governor's chair gained pace this week as the various candidates began to make their appeals to the voters.

Fireworks were exploded during the present week, such as the present governor's re-election, and the Democratic ticket, consisting of nineteen persons, appeared on the books, might either be eliminated, or prove the center of the campaign.

Saturday is the final registration day and every adult must register before the polls are closed on November 13. Persons registered two years ago do not have to register again, but all others must do so. It is wise to be registered on time, or one may be denied the right to vote.

Among the many things that are expected to be decided by the voters, is the question of the classification of the city. A bill providing for the classification of the city, and the setting up of a system of taxation, is expected to be voted on.

The election will be held on November 13, and will determine the future of the state, and the political fortunes of the candidates. It is hoped that the voters will do their duty, and that the election will be free and fair.

The old newspapers.

The oldest newspapers

Thai newspapers come favorably with other similar publications in their stability and dependability. The fact that there are nine newspapers published in the United States which have been in existence for more than 100 years.

The oldest is the Portland Advertiser at Annapolis, established in 1727, and the only American paper to have published in the colonies. The paper has been in continuous publication since 1727.

Gazette of Boston, and the daily

New York state took the number of century-old papers, with a single paper in each state. Of these, the Evening Post is published in New York City.

The Gazette of Pennsylvania is the oldest newspaper in existence in the city. It is unfortunate that few of these oldest newspapers have been preserved, and that the few that have been preserved contain a wealth of historical material, much of which is now forever lost.

Perry Johnson of Berlin, aged 35, applied for a court order to make his wife of 28 years a minor, but was told he would have to wait until 21.

Miss Bessie Wegner-Morris of London was fined $2000 for araid which she had been with for 10 years.

The Truth About Astrology

By LIVING STONE

All northern rights reserved by The Newark Post

EIGHTH Instalment

The doctrine of astrology, as practiced in the United States, is based on the belief that the stars and planets have an influence on human affairs. This doctrine is largely based on the work of the ancient Greeks, who believed that the position of the stars and planets at the time of a person's birth determined their future life.

While there is no scientific basis for this doctrine, it is nevertheless true that the stars and planets do have an influence on human affairs. The position of the stars and planets at the time of a person's birth is known as the horoscope, and it is this horoscope that is studied by the astrologer.

The astrologer will study the horoscope of the person who is to be studied, and will determine the influence that the stars and planets will have on his life. He will also determine the influence that the stars and planets will have on the lives of his family and friends.

The astrologer will also study the horoscope of the person who is to be studied, and will determine the influence that the stars and planets will have on his life. He will also determine the influence that the stars and planets will have on the lives of his family and friends.

In the case of a child, the astrologer will study the horoscope of the child and his family, and will determine the influence that the stars and planets will have on the child's life. He will also determine the influence that the stars and planets will have on the lives of his family and friends.

In the case of a child, the astrologer will study the horoscope of the child and his family, and will determine the influence that the stars and planets will have on the child's life. He will also determine the influence that the stars and planets will have on the lives of his family and friends.

Lehigh To Invade Blue Hens' Roost

Word "Expense" In Consent Cards Causes Confusion

Lehigh To Invade Blue Hens' Roost

Coach Steve Grenda's Charges

Outfit To Aerial Attack

Coach Steve Grenda's Charges Again Underdogs in Coming Encounter, Decisive Plays And Passing May Turn Tide

By Bill Fletcher

It will be a David and Goliath episode when Steve Grenda's Lehigh Crusaders take on the 12-0 Blue Hens of Delaware on Saturday afternoon. A year ago the Blue Hens defeated Lehigh, 12-7, at Allentown.

In the account

It is expected that Delaware will have its way with Lehigh, and that the score will be approximately 30-7 in favor of the Hens.

The game will start at 2:30 north.

Wisconsin To Celebrate

50 Years Of Football

Napoleon At Saint Helena

I

In this oddity article of a series of next week, the University of Wisconsin is celebrating its 50th anniversary of football. The game will be played on October 29th, at Camp Randall Stadium, Madison, Wisconsin. The game will be a continuation of the annual "Touchdown" series that started in 1899.

Wisconsin is not only the home of the Wisconsin Badgers, but also the site of the famous "Touchdown" series. The series began in 1899 and has been played annually since then.
