  - Hotel, Restaurant and Institutional Management

- TEXTILES, DESIGN AND CONSUMER ECONOMICS
  - Textiles and Clothing: Merchandising
  - Textile Science
  - Apparel Design
  - Interior Design
  - Consumer Economics

- INTERDEPARTMENTAL MAJOR
  - Interdisciplinary Studies in Human Resources

The College of Human Resources' programs combine professional preparation with a strong liberal arts curriculum. The diversified baccalaureate programs provide opportunities for a variety of challenging careers in business; industry; public, private, and government agencies; and education.

In addition to the specialized college courses necessary for competence in one's selected professional major, the curricula includes courses in the humanities, the sciences, and the social sciences. Each academic program also provides practicum/internship experiences that enhance employability; or for those planning to pursue a graduate program, research apprenticeship experience is available.

Students in the College of Human Resources also have a variety of other opportunities to enhance their undergraduate experience. Each student’s academic advisor, a faculty member with expertise in the student’s field of interest, will assist in selecting courses and experiences that focus on the student’s interest and professional goals. For example, careful selection of liberal arts requirements and elective courses allow students to pursue a minor or an area of interest outside of the college, a double degree, double major, or interdepartmental major.

Human Resources’ students are also encouraged to enrich their academic program by participating in the college’s visiting student programs, study abroad experiences, seminars, and the college’s numerous student organizations.

There are also several special academic opportunities for exceptionally talented and highly motivated students. Students in each academic program are eligible to participate in the University's Honors Program, undergraduate research, and Degree with Distinction. Also, the college’s Dean’s Scholar Program provides qualified students with the opportunity to share the responsibility of developing an individualized program focusing on the student’s academic interests.

In addition to the many opportunities to individualize the academic program, Human Resources’ students also interact with outstanding faculty in excellent facilities. Not only is the College of Human Resources committed to undergraduate education, its faculty is recognized for their excellence in teaching and advisement. The expanded facilities in the college’s new building include studio space, computer-aided design laboratory, historic costume and textile collection space, display areas, and instructional resource center.
STUDENT HONORS AND AWARDS

The college is committed to encouraging and rewarding superior academic achievement. Students who have earned recognition for superior leadership, service, and scholarship throughout their college careers may be elected to the Alpha Upsilon Chapter of Kappa Omicron Nu, a national Home Economics academic honor society. Human Resources majors are also eligible for election to University-wide honor societies such as Phi Kappa Phi, Mortar Board, and Kappa Delta Pi. Some examples of other honors for students include:

**Alumni Scholarships for Entering Freshmen.** Two scholarships of $1,000 each are presented by the College of Human Resources Alumni Association to entering freshman students. Information regarding these scholarships are sent to every newly admitted freshman student. One scholarship is awarded to a Delaware resident and one to a nonresident. Recipients are selected on the basis of scholastic achievement, interests and activities in the school and community, and future professional goals and aspirations.

**Irma Ayers Scholar Award** is a $750 award presented to the sophomore with the highest cumulative index for the first three semesters of enrollment at the University, including a minimum of nine credit hours of course work in the College of Human Resources.

**Amy Rextrew Award** is a $600 award presented to a senior and a junior in the College of Human Resources who possess outstanding qualities of scholarship, leadership, and character plus an appreciation of the values that are basic to success in their chosen field.

**Mildred Steel Clark Scholarship** awards $250 to a senior in the College of Human Resources and is based upon scholarship and financial need.

Other awards include the Delaware Dietetic Association Student Award, the American Association of Textile Chemist and Colorists Award, the Grange Award, the Delaware Association of the Education of Young Children Student Leadership Award, the Delaware Restaurant Association Scholarship, the Marriott Corporation Scholarship, and the Fashion Merchandising Award. Awards especially designated for returning students include the Wallace H. Maw Award and the Outstanding Part-time Undergraduate Student Award.

INDIVIDUAL AND FAMILY STUDIES

The Department of Individual and Family Studies offers three majors for students interested in understanding life-span development within the family. Each of the majors provides career alternatives in community service or teaching, or development of a professional identification in which research is a significant component.

The Family and Community Services major is designed for students wishing to work within public and private agencies serving clients, infants through the aged, and their families. Combining course work and clinical experiences, the program of study prepares graduates for positions in direct client services and/or management and administration in a variety of institutional and community settings.

The major in Early Childhood Development and Education is designed for students who plan on working with young children in school, family, and institutional settings. Certification options allow students to pursue careers as teachers, child life specialists, and early interventionists. The emphasis of the program is developmental with students learning how to monitor instructional strategies and materials to children's social-psychological and cognitive and physical maturity. The program further emphasizes families in their role of caring for and socializing children.

Certification requirements for the state approved programs in Nursery/Kindergarten or Young Exceptional Children can be met by completing the identified course work for each certification option. Students are strongly encouraged to work closely with academic advisors in designing their program.

The major in Human Development and Family Processes is designed for students whose career goals require subsequent graduate education in Human Development and Family Processes or related areas. With an emphasis broadly on research and theory rather than professional practica, the student is afforded the opportunity to engage in a significant research apprenticeship including an honors component for qualified students.

Selection and retention policies for all majors in this department have been established and must be followed. In addition, there are limitations on the number of students that can be enrolled in each major. Students are responsible for travel arrangements and costs for clinical/internship experiences.

CREDITS TO TOTAL A MINIMUM OF 129

Nutrition and Dietetics

Dietetics is a health care profession. Integrating basic courses such as chemistry, biology, social science, and business with food science and nutrition, dietetics prepares individuals to be responsible for the nutritional well-being of others. Positions in administrative dietetics, nutrition education, wellness, clinical nutrition, and community nutrition are available in hospitals, schools, and other institutions and in community and government programs. Opportunities exist for positions with target groups of all age ranges and with a variety of cultural, ethnic and economic backgrounds.

Two majors in Dietetics lead to the attainment of certification as Registered Dietitian by the American Dietetic Association (ADA). The Coordinated Undergraduate Program in Dietetics (CUPD) has accredited program status by ADA and includes both academic and professional practice requirements as part of the baccalaureate degree. The Dietetics major meets the academic requirements of an Approved Program—Plan V (ADA). Students in this major complete the professional practice requirement after the Bachelor of Science degree by completing an ADA dietetic internship or alternative.

Students are admitted to the majors of Dietetics or Coordinated Undergraduate Program in Dietetics after successful completion of three semesters of course work in the Applied Nutrition major. A 2.5 cumulative grade point average is included in the criteria for admission.

The Applied Nutrition major is for the student with a creative idea that combines nutrition study with another focus of study. The curriculum is flexible so that a focus such

Superior figures indicate year or years in which the course should be taken, i.e. 1freshman year, 2sophomore year, etc

#This requirement may be fulfilled through a course taken to complete major, group, breadth, or elective requirements. See page 27.
as Gerontology, Communication, Food service Management, or Fitness may be incorporated. The Applied Nutrition major also serves as the entry major for students who later apply to either Dietetics or the Coordinated Undergraduate Program in Dietetics in their sophomore year. Students who plan on becoming a Registered Dietitian and on conducting counseling and the related activities of a dietitian/nutrition counselor should complete a dietetics curriculum.

The Nutritional Sciences major meets the needs of students who want to focus strongly on the science aspects of human nutrition. As a premedical program, it prepares students for careers in dentistry, veterinary and human medicine, laboratory research in nutrition, or positions with companies or agencies requiring the extensive use of a strong science and human nutrition background. It provides students with a strong foundation for graduate work in human nutrition and related fields and as such may be considered primarily as a preprofessional degree. Students planning on career-related employment upon graduation are encouraged to plan their electives in a concentrated area of interest such as journalism, dietetics, food science, child development, chemistry, biological sciences, or other related fields.

The department has a Nutrition Clinic that serves as an educational resource, providing opportunities for students to acquire clinical experience. The Nutrition Clinic educates students in skills such as counseling, nutrition education, resource development and interpersonal relations. The clinic enables the program to teach dietetics and nutritional science students the theory of nutrition intervention skills and to give them practical laboratory experience in applying theory to practice. The clinic is also an ongoing laboratory resource providing a departmental research base. Finally, it contributes to the wellness of the University and community by being a facility where individuals can obtain authoritative information for nutrition-related health situations.

Opportunities exist for students to participate in the American Dietetic Association and the Society of Nutrition Education.

Selection and retention policies for all majors in this department have been established.

**MINOR IN NUTRITION**

Requirements for a minor in nutrition requires NTDT 200, NTDT 400, NTDT 401 plus 6 credits in Nutrition and Dietetics at the 300 level or higher. A 2.5 grade point average is required for admission; a minimum grade of C is required in all courses in the minor. Note that CHEM 214 and CHEM 216 are necessary prerequisites for NTDT 400 and NTDT 401.

---

*Superior figures indicate year or years in which the course is normally taken, i.e., 1 freshman year, 2 sophomore year, etc.

#This requirement may be fulfilled through a course taken to complete majors, group, breadth, or elective requirements. See page 27
NOTE: A 2.5 grade-point average is required of all internal transfer students.

The Hotel, Restaurant and Institutional Management Program curriculum is based in liberal arts, business and specialized courses in technical applications for the hotel and restaurant industries. The program is designed to produce tomorrow’s leaders in the hospitality industry. Students are provided a foundation in the traditional academic areas to complement the state-of-the-art business and hospitality courses. The curriculum is structured to provide both a practical and a theoretical education. An integral part of the curriculum is the hospitality related work experience. A documented and paid student work requirement of 800 hours is required prior to the Level I and II internships (practicums) during the senior year. These combined work experiences assist in the preparation of students for the increasingly complex and challenging hospitality industry.

The emphasis of this new program is on educational excellence and quality with a selective admissions process. One unique feature is the Hospitality Mentor System whereby students not only receive academic advisement from dedicated faculty, but are encouraged and enriched by preselected personal mentors from industry who share an interest in their professional growth and development. This linkage between academics and industry ensures the best possible guidance for students in pursuit of successful hospitality careers.

The University of Delaware is ideally located for a hospitality program. Job opportunities in the Delaware, Pennsylvania, New Jersey and Maryland metropolitan areas are unlimited. Students who desire part-time work will find outstanding employment opportunities in the local area.

TEXTILES, DESIGN AND CONSUMER ECONOMICS

Textiles and Clothing Merchandising emphasizes the business aspects of buying and selling textile and apparel products, including retail management and fashion promotion. Textile Science addresses the fundamental connections between the structure of textile products (from fibers through finishes) and their end use properties. Both the Interior and Apparel Design programs prepare students to apply creative design techniques to aesthetic endeavors as well as functional problems. The Interior Design program focuses on fundamental design, design analysis, and space planning as it relates to all interior spaces. Apparel Design majors apply design techniques to human function and apparel forms. The Consumer Economics major prepares students to analyze and evaluate the economic, social and political impacts of consumer decisions. This major prepares students for consumer affairs positions in business or government.

There are limitations on the number of students that can be enrolled in each major. Students wanting to transfer into the department will need to investigate department selection policies. Students are responsible for travel arrangements and costs for internships and some field experiences.

243
Interdisciplinary Studies in Human Resources

This major combines science, humanities, and social science requirements with a breadth of courses in the College. In addition to the core requirements in the College of Human Resources, the student also selects twenty-one additional credit hours from the three departments. These credits can provide depth in one content area within the College or they can be selected from various content areas. If the Human Resource courses are focused in one content area, and if available, the student may also declare a minor within the college. (The Department of Nutrition and Dietetics has a minor in nutrition.) Those courses that the student does select should reflect his or her personal and career objectives.

The student also has an opportunity to individualize the academic program through eighteen credit hours required in an area of interest outside the College. These courses should support a specialized program within the college and enhance the student's personal and career
goals. If approved by the appropriate department, these courses may also fulfill the requirements for a minor.

Because of the opportunity to individualize the academic program, the Interdisciplinary Studies major is appropriate for students:

- whose career or personal goals can best be achieved by combining University-wide liberal arts courses, our College's area of specialization, and an area of interest/minor outside the College; or
- seeking Home Economics teacher certification.

Students desiring certification for teaching home economics grades 5-12 in Delaware schools can major in Interdisciplinary Studies in Human Resources or another home economics related program in the College of Human Resources. As part of their academic program they will complete necessary content and professional course requirements. (Note: Professional courses are not offered each semester. Students must work with their academic advisor to determine availability.) These requirements which are necessary for the Standard Certificate include:

- A minimum of 15 semester hours including human development, methods of teaching, and clinical and/or field experiences including student teaching at the appropriate level (7-12); and
- A minimum of 30 semester hours with at least one course from each of the following areas:
  - Housing, home furnishings and home equipment
  - Consumer and family economics
  - Home management
  - Family relations and child development
  - Foods and nutrition
  - Textiles and clothing

In addition, if a student has already received a bachelor's degree from an accredited college (which includes a general studies component) they can fulfill the requirements above and apply for certification.

For additional details, see Teacher Education Programs in the College of Education section of this catalog.
