The college offers baccalaureate degrees in accounting, business administration, and economics. Within the business administration program, students may choose to major in finance, management, marketing, or operations management. Honors degrees are available in selected degree programs; and, through the Department of Foreign Languages and Literatures, a foreign language certificate (with an optional Honors component) may also be earned in conjunction with the baccalaureate degree.

Minors are offered in business administration and economics. In addition, for students enrolled in majors within the College, minors are also available in international business and management information/decision support systems.

At the graduate level, the College offers degree programs leading to the Master of Science degree in Accounting, Master of Business Administration, Master of Arts and Master of Science degrees in Economics, and the Ph.D. in Economics.

Undergraduate students are admitted as new students into either the Accounting, Business Administration, or Economics degree programs. Students already admitted to the University of Delaware matriculated in other programs may apply to change their degree program to accounting, business administration, or economics after earning 30 credits at the University. Applications are reviewed each October 15 and March 15 by the departments within the College. The chief criteria used in selection is academic performance with the average grade point of those accepted over the past five years being around a 2.8. Applications for admission to the minors are also reviewed and have similar criteria. Additional information and application forms are available in the four departments. (Note that students who are applying for re-admission to the University who were previously dropped for academic deficiency may be readmitted to their degree program in the College of Business and Economics assuming that they 1) had a minimum of 60 earned hours at the time they were dropped, 2) were enrolled as a Business and Economics student at the time of the termination, and 3) now have a deficit of 6 or less.)

ACCOUNTING
The undergraduate accounting program is designed to prepare the student for an accounting career in industry,
in government, or in public accounting. During the first two years, the accounting major follows a format of courses that enables the student to acquire a broad liberal arts background. The accounting program is designed to provide flexibility in the selection of humanities and social and natural science courses from broad groupings to augment the professional development of the student. The only courses that are specifically designated are either required by the University or needed to support the professional program. The undergraduate accounting major includes work in accounting information systems, intermediate, cost, income tax, advanced accounting, and auditing.

Case studies and practical exercises give students the opportunity to work directly with accounting problems. The program provides preparation for the Uniform Certified Public Accountant Examination, the Certificate in Management Accounting and other professional certifications.

The State Education Department, Division of Professional Education of the State of New York, under Section 15 of the regulations of the Commissioner of Education, has registered the four-year curriculum in accounting leading to the degree of Bachelor of Science in Accounting. Graduates who have completed the full curriculum meet the education requirements for admission to the New York State license examination for certified public accountancy.

The major in accounting leads to the degree of Bachelor of Science in Accounting. Each candidate for a Bachelor of Science degree must: (1) earn a minimum of 128 credits, (2) achieve a minimum cumulative grade-point average of C (2.0) on all work undertaken at the University of Delaware, (3) fulfill the course requirements of the degree program, and (4) achieve at least a C in specified business, finance, economics and accounting courses. In order to receive a B.S. in Accounting, a student transferring in credit must take at least five of the seven required technical junior-senior-level accounting courses (ACCT 302, 315, 316, 327, 413, 415 and 417) at the University of Delaware.

Students majoring in accounting must take a broad range of nonbusiness courses (courses offered in colleges outside of the College of Business and Economics) including a specified number of courses in the humanities, science and/or mathematics, social sciences, and in other disciplines that develop specific skills. Fourteen credits of free electives are required to give each student the opportunity to choose courses most consistent with his or her interests and career goals.

ELECTIVES

Electives 14

Fourteen credits of elective subjects of which six credits may be taken outside the College of Arts and Science. Six credits from the College of Business and Economics may be elected in the elective category. Economics courses must be at the 200 level or higher and Business Administration, Finance, and Accounting courses must be at the 300 level or higher. A student who elects ROTC may apply twelve credits of ROTC to the elective category. No more than two credits can be from PHED 120.

CREDITS TO TOTAL A MINIMUM OF 128

BUSINESS ADMINISTRATION

Professional education in business administration serves to develop the capabilities of students so that they may assume positions of leadership and responsibility at all levels of management in our society.

The undergraduate degree program in business administration reflects the growing demand for greater management capability in every field of endeavor: private industry, government, or nonprofit institutions. Since most of the skills and techniques of management originate in private industry, much of the curriculum focuses on the private business sector.

The faculty of the Departments of Business Administration and Finance develop each student through a variety of teaching techniques: lectures, case studies, role playing, seminars, and directed study. No single teaching technique is emphasized to the exclusion of others. To enhance the instructional process, the departmental faculty is actively involved with business and governmental leaders through research, seminars, and consulting activities.

Students pursuing a program of study leading to the degree of Bachelor of Science in Business Administration will select one of four majors: management, marketing, finance, or operations management. The major in finance is administered by the Department of Finance within the College of Business and Economics. Students may also pursue a minor in international business and/or apply to the minors in management information/decision support systems, economics or a variety of other fields. A minor in business administration is also available to students majoring in other fields.

Each candidate for a degree must: (1) earn a minimum of 128 credits, (2) achieve a minimum cumulative grade point average of C (2.0) on all work undertaken at the University of Delaware, (3) fulfill the course requirements of the degree program, and (4) achieve at least a C in specified business, finance, accounting and economics courses. Students seeking a Bachelor's Degree in Business Administration may take only one of the four required upper-level courses in their major at another institution.

Students also take a broad range of nonbusiness courses (courses offered in colleges outside of the College of Business and Economics) including a specified number of courses in the humanities, sciences, social and behavioral sciences, and in disciplines that develop specific skills in mathematics, statistics, and written and oral communication. Additional electives are also required to give each student the opportunity to choose courses most consistent with his or her interests.

It is recommended that students take BUAD 301, 306, 309, FINC 311 and ACCT 261 during the first semester of the junior year. A major is selected after taking these introductory courses.

All 400-level courses are restricted to Business Administration and Accounting degree candidates and to students whose programs require the course. Preference is given to majors.

Requirements for the Minor in Business Administration

The minor in business administration provides students in degree programs other than in business with an opportunity to acquaint themselves with the basic concepts of business administration. Completion of the requirements for the minor provides a basic understanding of the language and major functional areas of business. The minor is awarded only to students who have applied and been admitted to the program. Applications are reviewed each October 15 and March 15. This program is not available to students whose major program requires all of the following courses. Students seeking a minor in Business Administration may only take one of the required Business or Finance courses at another institution.

Required courses for the minor are:

<table>

CREDITS TO TOTAL A MINIMUM OF ... 42

Requirements for the Minor in International Business

The minor in international business is designed to give increased understanding of the important international dimension of business to students with a minor or a major in business administration or a major in accounting. The minor in International Business is open only to BSBA and BSAC degree candidates. The 18 credits required for the minor may also be used to meet other distribution requirements. Students meeting the following requirements will be awarded the minor. To qualify, a change of classification form must be filed in the office of the Dean of the College of Business and Economics upon enrollment in the last required course; this application must be filed no later than the end of the sixth week of student’s final term. Students seeking the minor will not be given preference in registration for these courses. Students seeking a minor in International Business may only take one of the required Business or Finance courses at another institution.

**A grade of C or better is required in these courses.
†Students must take a total of six credits in any combination of the courses marked with a dagger as professional electives (except ACCT 350 and ACCT 351).
‡A grade of C or better is required in all but one of these courses.
§Only one of the following courses will count towards graduation: ACCT 261, ACCT 302 or BUEC 325.
The program leading to a Bachelor of Arts degree with a major in economics for a student enrolled in the College of Arts and Science has the same group and language requirements as other Bachelor of Arts programs offered in the College of Arts and Science.

Both a Bachelor of Arts and Bachelor of Science degree are available to students enrolled in the College of Business and Economics. The group and language (Bachelor of Arts) or quantitative proficiency (Bachelor of Science) requirements for students enrolled in the College of Business and Economics are described below in addition to the concentration and related work requirements that apply to all economics majors.

A minor program in economics is also available.

Students majoring in economics will be advised by the faculty of the Department of Economics.

Application for Major:

Any University student who is not an economics major but wishes to become one must apply for admission into the major.

The principal criterion for acceptance is academic achievement, although it is also helpful to have taken some or all of the economics and quantitative courses required for the major. No student whose index is less than 2.0 at the University will be considered, and it is unlikely that a student will be accepted unless his or her index exceeds 2.25.

Students may apply at the Office of the Department of Economics, 406 Purnell Hall. The department office will obtain a transcript to accompany your application. Applications must be submitted no later than October 15 and March 15 for consideration. Decisions about acceptance will be announced by November 15 and April 15 and will be made only at these times. Students not accepted may reapply the following semester; no waiting list is maintained.

The number of students admitted into the Department of Economics during a semester is limited because of constraints imposed by the size of the faculty, the number of sections of economics courses offered to our majors, and the sizeable number of sections offered servicing students majoring in other departments.

The remaining six credits may be chosen from other Mathematics courses at or above the 200 level, ACCT 208, 261, Statistics and Computer Science courses at or above the 300 level and BUAD 306, 346, and 446, BUEC 430 and 431, and ECON 415, 422, 423 and 428. A maximum of one economics course may be used to satisfy this requirement and used to satisfy Economics concentration requirements.

Breadth Requirements† (See page 84)

Group A ....................................................................................................................... 12 1, 4

Understanding and appreciation of the creative arts and humanities. Twelve credits representing at least two areas.

Group B ....................................................................................................................... 12 1, 4

The study of culture and institutions over time. Twelve credits representing at least two areas.

Group C ....................................................................................................................... 9 1, 4

Empirically based study of human beings and their environment. Cannot be satisfied by an Economics course.

Group D ....................................................................................................................... 15 1, 4

The study of natural phenomena through experiment and analysis. A minimum of thirteen credits representing at least two areas including a minimum of one course with an associated laboratory.

Six Economics courses, three of which are at or above the 400 level.

ELECTIVES

Electives ......................................................................................................................... 29-38 1, 4

CREDITS TO TOTAL A MINIMUM OF ............................................................................. 124

Certain corresponding courses offered at different levels of difficulty will not both be counted toward a degree. These corresponding courses include ECON 311 and ECON 411, ECON 392 and ECON 435, ECON 340 and ECON 445, ECON 360 and ECON 461 or ECON 463, and ECON 381 and ECON 483.

Departmental requirements and course descriptions are subject to continual revision. Up-to-date statements of requirements, course descriptions, and departmental policies are available in the department office.

DEGREE: BACHELOR OF ARTS

MAJOR: ECONOMICS

CURRICULUM

CREDITS

UNIVERSITY REQUIREMENTS

ENGL 110 Critical Reading and Writing ........................................................................... 3 1

Three credits in an approved course or courses stressing multicultural, ethnic, and/or gender-related content #

MAJOR REQUIREMENTS

External to the College: General Requirements

Skill Requirements

Writing

A writing course involving significant writing experience including two papers with a combined minimum of 3,000 words to be submitted for extended faculty critique of both composition and content.

Mathematics:

MATH 114 or 170 Elementary Mathematics and Statistics ........................................... 3 1
(designed for students who do not intend to continue the study of mathematics)

or

MATH 115 or 171 Pre-Calculus ...................................................................................... 3 1
(designed for students who intend to continue the study of mathematics)

or

One of the following:

MATH 221 Calculus I .................................................................................................. 3 1
MATH 241 Analytic Geometry and Calculus A ............................................................. 4 1

Successful performance on the college proficiency exam.

Quantitative Proficiency Requirements ........................................................................... 12 1, 2

Twelve credits of course work in the quantitative area. At least six credits must be taken in Mathematics at or above the 200 level except MATH 251 and 252. The remaining six credits may be chosen from other Mathematics courses at or above the 200 level, ACCT 208, 261, Statistics and Computer Science courses at or above the 300 level and BUAD 306, 346, and 446, BUEC 430 and 431, and ECON 415, 422, 423 and 428. A maximum of one economics course may be used to satisfy this requirement and used to satisfy Economics concentration requirements.

†A course may be applied toward both the major requirements and a breadth requirement (unless otherwise indicated), but credits are counted only once toward the total credits for graduation.

174
THE MINOR IN ECONOMICS

The minor in economics provides students in other degree programs an opportunity to study at a fairly intensive level the basic concepts and methodology in economics and to gain formal recognition for their efforts. The emphasis of the minor on upper-level courses is to help ensure that minors can claim a reasonable level of competence in the field.

Required courses in minor:

Six courses (18 credits) with a grade of C or better, including ECON 151, 152, 302, 300 or 301, 303, and one more course at or above the 400 level.

Application for minor:

Same as application for major. (see page 173)

DOUBLE MAJOR
IN BUSINESS ADMINISTRATION AND ECONOMICS

Overall requirements:

For graduation, 131 credits are required rather than 128 (business majors) or 124 (economics majors).

Application and advisement:

Students must apply to both degree programs for this option. The student’s double major program will be developed in consultation with an adviser.

INTERDEPARTMENTAL MAJOR IN ECONOMICS

The interdepartmental major consists of 51 credit hours selected from related fields with a minimum of 21 credit hours selected from each major field. In general, the Economics Department requires that the 21 hours of economics include ECON 151, 152, 302, 300 or 301, and 303. Before considering an interdepartmental major program, the student should strongly consider the option of a major in one field and a minor in the other.

International Relations is an established interdepartmental major in the College of Arts and Science. Interdepartmental majors have also been established for Economics and either French or Spanish, Economics and Political Science, and Economics and Mathematics.

Students wishing to explore the possibility of developing an interdepartmental major with other departments should arrange conferences with their faculty advisers and the department chairpersons concerned to plan their programs. Approval of the program is also required by the dean of the college or colleges in which the student is registered.

See also the section on Interdepartmental Major (page 89) in the College of Arts and Science section of this catalog for the requirements for an interdepartmental major combining economics with any field in the College of Arts and Science. The application process for an interdepartmental major in economics is the same as the application for a major in economics.

†A course may be applied toward both the major requirements and a breadth requirement, but credits are counted only once toward the total credits for graduation.
REQUIREMENTS FOR THE MINOR IN MANAGEMENT INFORMATION/DECISION SUPPORT SYSTEMS

This minor was created to provide students within the College of Business and Economics with the opportunity to acquaint themselves with the rapidly expanding field of computer-based management information systems. Applications to be admitted to the Management Information/Decision Support Systems minor are reviewed each October 15 and March 15. Admission is limited to College of Business and Economics students. The minor requires the following five 3-credit courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Modern Business Computing, BUED 325</td>
<td>3</td>
</tr>
<tr>
<td>Systems Analysis and Implementation, BUED 330</td>
<td>3</td>
</tr>
<tr>
<td>Information Planning and Data Management, BUED 430</td>
<td>3</td>
</tr>
<tr>
<td>Decision Support Systems, BUED 431</td>
<td>3</td>
</tr>
<tr>
<td>Systems Development, BUED 432</td>
<td>3</td>
</tr>
</tbody>
</table>

Note that selected course substitutions are made for the MI/DSS minor. Students completing the minor need not take ACCT 261 (if BSBA candidates) or ACCT 302 (if BSAC candidates).

*A grade of C or better is required in 12 of the 15 credits and an overall C average for all five courses in the minor.
