COLLEGE OF
PHYSICAL EDUCATION, ATHLETICS AND RECREATION

- Lifetime Activities Program
- Intramural Sports
- Intercollegiate Athletics Program
- Dean’s Scholar Program
- Bachelor of Science in Physical Education and Health Education
- Bachelor of Science in Physical Education Studies
- Bachelor of Science in Recreation and Park Administration
- Athletic Training Education Program

The activities of the college include elective lifetime sports courses, intramural sports, intercollegiate athletics, and three degree programs.

LIFETIME ACTIVITIES PROGRAM
A varied activity program featuring more than twenty different offerings each semester is available to all students on a credit basis. Courses are provided for all levels of ability and interests including beginners, intermediate, and advanced.

The objectives of the lifetime activities program are: (1) to provide students with knowledge and skills essential for leisure-time enjoyment, (2) to develop healthy exercise habits in students as well as a sound knowledge base in the scientific principles of physical activity, and (3) to provide an enjoyable atmosphere for learning skills that encourage lifetime participation.

INTRAMURAL SPORTS
The University provides an extensive intramural athletic program for men and women as an alternative to intercollegiate competition. The Intramural Council, made up of representatives from campus organizations participating in the program and the Associate or Assistant Director, meet once a week to organize schedules and set up ground rules for the various sports. Usually, more than half the students compete in some phase of the intramural program. There are leagues, tournaments, and contests established for the men’s, women’s, and coed divisions in the following sports: badminton, basketball, billiards, field hockey, golf, indoor soccer, inner tube water polo, lacrosse, racquetball, soccer, softball, street hockey, table tennis, 10K run, tennis, flag football, ultimate frisbee, volleyball and walleyball.

INTERCOLLEGIATE ATHLETICS PROGRAM
There are 22 intercollegiate varsity sports, 11 for men and 11 for women. All programs, except football and women’s lacrosse, compete for overall athletic excellence within the North Atlantic Conference each year. Delaware competes for athletic championships in NCAA Division I except for the football program which competes in Division I-AA through the Yankee Conference and women’s lacrosse which is a Division I independent. Among Delaware’s varsity sports are nationally-recog-
nized programs in football, baseball, men’s and women’s basketball, men’s and women’s lacrosse, women’s field hockey, and volleyball. In recent years, 26 University athletes have been named CoSIDA Academic All-Americans and six have been awarded the prestigious NCAA Post-Graduate Scholarship. Delaware also competes for championships as a member of the ECAC and IC4A.

DEAN’S SCHOLAR PROGRAM

Each year the College of Physical Education, Athletics and Recreation selects a number of highly motivated students who have clear educational goals and the ability to achieve those goals and appoints them as Dean’s Scholars. These students are freed of all college requirements so that they can build their entire program with faculty advisers. They are generally selected after they have finished their freshman year. Additional information is available from the Physical Education Advisement Office upon request.

DEGREE PROGRAMS

The college features a physical education program with three Bachelor of Science degree options: physical education and health education, physical education studies, and recreation and park administration. Each curriculum features a liberal arts base and opportunities for in-depth study in a specialty field. Internships or clinical experiences are available in each degree option.

BACHELOR OF SCIENCE IN PHYSICAL EDUCATION AND HEALTH EDUCATION

Students interested in teacher preparation should review curriculum guidelines for this program. It provides K-12 certification in both physical education and health.

BACHELOR OF SCIENCE IN PHYSICAL EDUCATION STUDIES

Students interested in graduate study, exercise physiology, biomechanics, athletic training, fitness management or figure skating science enroll in this program.

BACHELOR OF SCIENCE IN RECREATION AND PARK ADMINISTRATION

This program is designed to accommodate students interested in preparing for careers in the leisure service industry.

CREDITS TO TOTAL A MINIMUM OF 134

#Superior figures indicate year or years in which the course is normally taken, i.e., 1 sophomore year, 2 senior year, etc.

†This requirement may be fulfilled through a course taken to complete major, group, breadth, or elective requirements. See page 56

‡Students must have a minimum g.p.a. of 2.0, a major g.p.a. of at least 2.75, and have completed all skills courses prior to enrolling in the methods courses

††Students may take a maximum of two beginning-level PHED 120 activity courses prior to enrolling in a similar activity within the major skill blocks; e.g., if the student feels a weakness in tennis, that person might wish to do a PHED 120 Tennis I course before enrolling in the major block tennis activity. After having completed a particular skill in the major program, students must register for the advanced-level course if desiring to do the same skill in the nonmajors (PHED 120) curriculum; e.g., Tennis II, Self Defense II, etc. Major students are permitted four credits of PE 120 work under the above guidelines that may be counted toward graduation credit.

§Minimum number of credit hours required. An additional 12 credit hours is to be selected so that work completed in college requirements (Areas A, B, C, D, and E) will total 54 credit hours.

ATHLETIC TRAINING EDUCATION PROGRAM

The athletic training education program at the University of Delaware is a National Athletic Trainers' Association (N.A.T.A.) approved undergraduate program awarding the Bachelor of Science Degree in Athletic Training (B.S.A.T.)

Incoming freshmen and transfer students interested in the athletic training major at the University of Delaware are admitted to "Athletic Training Interest." At the completion of the freshman year, students desiring admission into the athletic training major must have completed the following:

(1) Freshman Year – B.S.A.T. Curriculum:

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>

</tr>
<tr>
<td>RPAD 310</td>
<td>3</td>
</tr>
</tbody>
</table>

(4) Complete a minimum of 100 hours of direct observation in the University of Delaware training room under the supervision of qualified faculty/professionals;

(5) Three letters of recommendation;

(6) Completion of N.A.T.A. taping checksheet;

(7) Successful interview with the Athletic Training Education Program Director and faculty.

N.A.T.A. guidelines state the student-clinical instructor ratio shall not exceed eight (8) students to one (1) clinical instructor during the course of an academic year. Acceptance into the program is based upon the stated criteria and the number of available openings in the program. Meeting the minimum admission requirements does not guarantee acceptance into the program. Offers of admission into the athletic training education program are presented on a competitive basis to those individuals who are most qualified. Students may apply for admission to the program at the end of each fall and spring semester (January 15th and June 15th). Acceptance/rejection letters will be mailed to each candidate by February 1 and July 1, respectively.

Students interested in transferring from another institution, another College at the University of Delaware or another major within the College of P.E.A.R. must meet University and College of P.E.A.R. transfer requirements and complete the same requirements as freshmen in the Pre-Athletic Training Program.

Students enrolled in the University of Delaware Athletic Training Education Program meet with the Program Director to plan the clinical education experience. Students are required to gain clinical experience in the training room and at practices and home and away games in the men’s and women’s athletic program. The clinical experience is structured so the student trainer gains progressive development of technical skills and knowledge. Once students are admitted to the program, they are required to work five weeks in the training room. When this requirement is completed, they begin working with individual teams. Students are required to work with at least one men’s high-risk sport, one men’s low-risk sport, one women’s high-risk sport and one women’s low-risk sport. Students are required to work a minimum of five weeks with each of the sports selected. Once this requirement is completed, the student, in consultation with the Program Director, is allowed to select specific sports for future assignments until completion of their clinical education experience. In addition, all candidates for NATA Certification must verify that at least 25% of their clinical hours credited in fulfilling the NATA Certification Requirements were attained in actual (on location/site) practice and/or games coverage with one or more of the following sports: football, soccer, hockey, wrestling, basketball, volleyball and lacrosse. The Athletic Training Faculty formally evaluates each student’s progress at the end of each semester.

Once students are admitted to the program, they are required to maintain the following minimum standards:

1. complete 200 clinical hours per semester;
2. cumulative index of 2.0;
3. satisfactory clinical education evaluations.

Students who do not maintain the above minimum standards are placed on probation and are required to correct all deficiencies by the end of the next semester. Students who do not correct deficiencies are dropped from the curriculum.

1 Students must obtain the University of Delaware Athletic Training Education Program Admission Recommendation Form from the program director.
2 During the interview, students will be evaluated by the Athletic Training Education Program faculty, a senior student trainer enrolled in the program and/or a certified athletic trainer working in the profession. All evaluators will use a standardized evaluation form.
A minimum of 3 credits; course(s) may be selected from: Anthropology (physical and biological), Chemistry, Computer Information Science, Entomology, Geography (physical and meteorology), Geology, Health Sciences (natural science courses), Mathematics (excluding MATH 251 & 252), Medical Technology, Physics, Plant Science, Science, Statistics, and specific courses from the Department of Nutrition and Dietetics, the College of Engineering and the College of Marine Studies.
