The College of Health and Nursing Sciences includes the Departments of Health and Exercise Sciences, Medical Technology, Nursing, and Nutrition and Dietetics, and the Biomechanics and Movement Science Program. Undergraduate degree programs are offered in applied nutrition, athletic training, dietetics, exercise and sport science, health and physical education, medical technology, nursing, nutritional sciences, and recreation and parks administration. In addition, there are graduate degree programs in biomechanics and movement science, exercise physiology, human nutrition, and nursing, and a post-baccalaureate internship program for registered dietitians.

The College encourages students to engage in undergraduate research projects, internships, study abroad, seminars, and the college's numerous student organizations. Students interested in such opportunities should consult with their faculty advisor. For more information, contact Dean Betty Paulanka, 345 McDowell Hall, or send email to chns@udel.edu.

**ADVICEMENT**

Students are assigned a faculty advisor in their major department to provide advice on course selection, degree requirements, career opportunities, and graduate study. Faculty advisors can also assist with setting up special opportunities such as internships and research experience. It is recommended that students meet with their faculty advisors at least once each semester.

Students may also schedule appointments with the professional and administrative staff in the College's Advisement Resource Center. Advisement Resource Center staff will assist students with issues such as withdrawal due to illness or other difficulty, registration problems, and other special requests that require approval by the dean. The Advisement Resource Center at 343 McDowell Hall is open weekdays from 9 a.m. to 4 p.m.; for more information call (302) 831-2381 or visit the Center's website at [http://www.udel.edu/shoes/ARC/arc.htm](http://www.udel.edu/shoes/ARC/arc.htm).

**HONORS OPPORTUNITIES AND DEAN'S SCHOLAR PROGRAM**

Students in all of the college's majors are eligible to participate in the University's Honors Program, undergraduate research, and Degree with Distinction. Honors Degrees are available to students in programs offered by the Department of Nutrition and Dietetics. Also, the college's Dean's Scholar Program provides qualified students in Health and Exercise Sciences or Nutrition and Dietetics with the opportunity to share the responsibility of developing an individualized program focusing on the student's academic interests. Additional information is available from the Advisement Resource Center.

**BIOMECHANICS AND MOVEMENT SCIENCE**

The Biomechanics and Movement Science (BIOMS) program is a graduate level interdisciplinary program that combines faculty and physical resources from several different units including the Departments of Mechanical Engineering, Physical Therapy, Health and Exercise Sciences, and Computer and Information Sciences, as well as the Applied Sciences and Engineering Laboratory and the A.I. duPont Hospital for Children. By implementing an interdisciplinary approach involving faculty members with backgrounds in sport biomechanics, physical therapy, applied physiology, engineering, and computer science, students are afforded a diverse educational environment. In addition, the collective research laboratories of the participating units provide outstanding facilities. Programs of study are created to serve the interests of both the student and sponsoring faculty member, and may focus on topics in the areas of biomechanics, motor control, applied physiology, exercise physiology, and rehabilitation technology. Students enrolled in the graduate program come from a variety of undergraduate disciplines including all areas of engineering, computer science, physical therapy, biology, physics,
mathematics, and exercise science. Undergraduate students interested in pursuing graduate work in biomechanics should consider prerequisite undergraduate coursework in anatomy, physiology, linear algebra, calculus, and computer programming. For more information, contact Professor James G. Richards, Program Director, Blue Ice Arena, telephone (302) 831-6796; or email jimr@udel.edu.

HEALTH AND EXERCISE SCIENCES

The activities of the Department of Health and Exercise Science include elective lifetime activity courses, intramural sports, four degree programs, and a minor in Coaching Science.

LIFETIME ACTIVITIES PROGRAM

A varied activity program is available to all students on a credit basis. Courses are provided for all levels of ability and interests.

The objectives of the lifetime activities program are: (1) to provide students with knowledge and skills essential for leisure-time enjoyment, (2) to develop healthy exercise habits in students as well as a sound knowledge base in the scientific principles of physical activity, and (3) to provide an enjoyable atmosphere for learning skills that encourage lifetime participation.

DEGREE PROGRAMS

The Department features a health and exercise sciences program with four majors—athletic training, exercise and sports physical education studies, health and physical education, and recreation and park administration (with concentrations in Parks and in Programming and Leadership)—as well as a minor in coaching science. Each curriculum features a liberal arts base and opportunities for in-depth study in a specialty field. Internships or clinical experiences are available in each degree option.

The athletic training program at the University of Delaware is a National Athletic Trainers’ Association (N.A.T.A.) approved undergraduate program awarding the Bachelor of Science Degree in Athletic Training (B.S.A.T.)

Students interested in preparing for careers in the recreation or leisure service industry can major in the program leading to a Bachelor of Science in Recreation and Park Administration, concentrating either in parks or programming and leadership.

For more information, contact Professor David Barlow, Chair, 110 Carpenter Sports Building, telephone (302) 831-2265, or visit the department website at http://www.udel.edu/shoes/phys_ed/pefacts.html

---

DEPARTMENT GENERAL STUDIES REQUIREMENTS

Second Writing Course

A writing course involving significant writing experience including two papers with a combined minimum of 3,000 words to be submitted for extended faculty critique of both composition and content. Appropriate writing courses are normally designated in the semester’s Registration Booklet as “Satisfies Arts and Science Second Writing Course Requirement.” See list of courses approved for Arts and Science second writing requirement, page 69.

BREADTH REQUIREMENTS

Students in all majors within the Department of Health and Exercise Sciences must complete a minimum number of credits (listed with each major following) within Groups A through D below.

Group A—Communication/Writing Skills

Courses from Cognitive Science (COSC 495), Communication [COMM], Educational Studies (EDST 521, 522, 523), English [ENGL—must state that course “meets A&S Second Writing Requirement”), Foreign Language (includes ARAB, CHIN, FERN, GREEK, GRMN, HEBR, ITAL, JAPN, LATIN, PORT, RUSS, SPAN, and SWAH), and Linguistics [LING]

Group B—Humanities/Fine Arts

Courses from Art [ART], Art History [ARTH], Arts and Science [ARSC 125, 126, 127, 130, 295, 296, 360], Art Conservation [ARTC], Science and Culture (CSCC 206, 229, 241, 246, 250, 330, 365, 368, 369, 444), Comparative Literature [CML], Consumer Studies (CNST 114, 213, 214, 221, 225, 233), English [ENGL], English Language (ENGL 450), Foreign languages and literatures (FLIT), all courses except 100, 105, 106, 107, Museum Studies (MST), Music (MUSC), Philosophy (PHIL), Theater (THEA), and Women’s Studies (WOMS 203, 205, 210, 216, 222, 242, 320, 325, 326, 328, 330, 338, 353, 380, 381, 382, 389, 390, 401, 440, 442, 465, 471, 480).

Group C—History/Social Sciences

Courses from Accounting (ACCT 352), Anthropology [ANTH], all courses except 102, 104, 202, 404), Block American Studies [BAMS], Business Administration (BUAD 309), Cognitive Science (COSC 270), Criminal Justice [CRJ], Economics [ECON], Educational Studies (EDST 304, 305), Food and Resource Economics [FREC], Geography [GEOG 102, 120, 203, 210, 225, 226, 227, 230, 236, 240, 270, 310, 320, 325, 326, 330, 345, 346, 351, 380, 422, 425, 428, 430, 438, 440, 445, 446, 454, 455, History [HIST], Human Resources [HURE 401], Individual and Family Studies [IFST], Jewish Studies [JST], Legal Studies [LEST], Political Science and International Relations (POSC), Psychology [PSYC— all courses except 306, 309, 314, 380, 411, 412, 414, 481], Sociology [SOC], and Women’s Studies (WOMS).

Group D—Natural Sciences/Mathematics

Must include an approved 3-credit mathematics course at the 100-level or higher and additional courses from Accounting [ACCT 160, 261], Animal Science [ANSC 101, 111, 121, 250, 300, 310, 322, 345, 404, 417, 418, 421, 431, 441], Anthropology [ANTH 102, 104, 202, 404], Biological Sciences [BISC], Chemistry [CHEM], Computer and Information Sciences [CISC], Engineering (Includes Chemical [CHEG], Civil and Environmental [CIEG], Computer [CPEG], Electrical [ELEG], Engineering/ Graphics and General [EGGG], Engineering Technology [EGTE], Materials Science [MASC], Mechanics [MECH], and Mechanical Engineering [MEENG]), Entomology and Applied Ecology [ENTO], Food Science [FOSC], Geography [GEOG 101, 152, 206, 220, 255, 272, 330, 342, 343, 351, 357, 370, 372, 412, 420, 423, 430, 451, 452, 453, 470, 472, 505], Geology [GEOL], Marine Studies [MAST], Mathematics [MAITH—all courses except 251, 252, 253, 379, 380, 381], Medical Technology (MDTI), Nutrition and Dietetics (NUTD), Physics and Astronomy (PHYS), Plant and Soil Sciences (PLSC), Psychology [PSYC 309, 314, 380, 411, 412, 414, 481], Science (SCEN), and Statistics [STAT]

**ELECTIVES**

After required courses are completed, sufficient elective credits must be taken to meet the minimum credits required for the degree.

**CREDITS TO TOTAL A MINIMUM OF: 120**

Incoming freshmen and transfer students interested in the athletic training major at the University of Delaware are admitted to “Athletic Training Interest.” At the completion of the freshman year, students desiring admission into the athletic training major must have completed the following:

1. **Freshman Year – B.S.A.T. Curriculum:**
   - BISC 106/116 (or BISC 207) 4
   - ENGL 110 3
   - HPER 210 3
   - HPER 220 3
   - HPER 276 2
   - Elective 3
   
   
   Total: 15

2. **Minimal overall cumulative index of 2.75**

3. **Academic performance in the following courses will be evaluated for admission consideration into the B.S. in Athletic Training: BISC 106/116 (or BISC 207), ENGL 110, HPER 210, HPER 220, HPER 276, HPER 305, HPER 214.**

4. **Complete a minimum of 100 hours of direct observation in the University of Delaware training room under the supervision of qualified faculty/professionals.**

5. **Three letters of recommendation; Students must obtain the University of Delaware Athletic Training Admission Recommendation Form from the program director.**

6. **Completion of N.A.T.A. taping check sheet.**

7. **Successful interview with the Athletic Training Program Director and faculty. During the interview, students will be evaluated by the Athletic Training Program faculty, a senior student trainer enrolled in the program and/or a certified athletic trainer working in the profession. All evaluators will use a standard evaluation form.**

8. **Submission of a written essay.**

N.A.T.A. guidelines state the student-clinical instructor ratio shall not exceed eight (8) students to one (1) clinical instructor during the course of an academic year. Acceptance into the program is based upon the stated criteria and the number of available openings in the program. Meeting the minimum admission requirements does not guarantee acceptance into the program. Offers of admission into the athletic training education program are presented on a competitive basis to those individuals who are most qualified. Students may apply for admission to the program at the end of each fall and spring semester (January 15th and June 15th). Acceptance/rejection letters will be mailed to each candidate by February 1 and July 1, respectively.

Students interested in transferring from another institution or from another major at the University of Delaware must meet University and College of Health and Nursing Sciences transfer requirements and complete the same requirements as freshmen in the Pre-Athletic Training Program.

Students enrolled in the Athletic Training Program meet with the Program Director to plan the clinical education experience. Students are required to gain clinical experience in the training room and at practices and home and away games in the men’s and women’s athletic program. The clinical experience is structured so the student trainer gains progressive development of technical skills and knowledge. Once students are admitted to the program, they are required to work five weeks in the training room. When this requirement is completed, they begin working with individual teams. Students are required to work with at least one men’s high-risk sport, one men’s low-risk sport, one women’s high-risk sport and one women’s low-risk sport, for a minimum of five weeks with each of the sports selected. Once this requirement is completed, the student, in consultation with the Program Director, is allowed to select specific sports for future assignments until completion of their clinical education experience. In addition, all candidates for NATA Certification must verify that at least 25% of their clinical hours credited in fulfilling the NATA Certification Requirements were attained in actual (on location/site) practice and/or games coverage with one or more of the following sports: football, soccer, hockey, wrestling, basketball, volleyball and lacrosse. The Athletic Training Faculty formally evaluates each student’s progress at the end of each semester.

Once students are admitted to the program, they are required to maintain the following minimum standards:

1. complete 200 clinical hours per semester;
2. cumulative index of 2.0;
3. satisfactory clinical education evaluations.

Students who do not maintain the above minimum standards are placed on probation and are required to correct all deficiencies by the end of the next semester. Students who do not correct deficiencies are dropped from the curriculum.

**N.A.T.A. GUIDELINES FOR CERTIFICATION**

1. Completion of the Athletic Training Program.
2. Minimum of 800 hours practical work under the supervision of the training room staff. The hours must be accumulated over a minimum of two years and not more than four years. No more than 400 hours may be accumulated in one year.
3. Completion of the NATA Competency Evaluation Checklist.
4. Proof of current American National Red Cross Advanced First Aid Certification and CPR. Must be current on examination date.
5. Proof of graduation (official transcript).

**EXERCISE AND SPORT SCIENCE ADMISSION REQUIREMENTS AND GUIDELINES**

The Department of Health and Exercise Sciences offers a major program in Exercise and Sports Science. Students in the major must choose one of five concentrations: Exercise Physiology, Figure Skat-
ing Science, Fitness Management, Physical Education Studies, or Strength and Conditioning. Admission to and completion of the major and the concentrations requires that students fulfill the following requirements:

1. Completion of at least 28 credits at the University of Delaware.

2. Successful completion of the following courses: ENGL 110; HPER 210; HPER 214; HPER 220; HPER 276; HPER 305; BISC course with lab, and a MATH course.

3. Completion of the appropriate application form for the chosen concentration. Applications are due by June 15th of each year for admission the following fall. Forms are available in and must be returned to the Advisement Resource Center, 343 McDowell Hall.

a. Only students matriculated in the Department of Health and Exercise Sciences may apply for admission to the concentrations.

b. Meeting the minimum admission requirements does not guarantee admission to the concentration. Offers of admission to Exercise Physiology, Figure Skating Science, Fitness Management, and Strength and Conditioning are presented on a competitive basis to those individuals who are most qualified.

c. Exercise Physiology: Admission will be based on cumulative and major GPA, as well as the criteria listed in 1-3 above, with selection on a competitive basis.

d. Figure Skating Science: After the criteria listed in 1-3 above have been met, each student must meet with the Director of the Figure Skating Science Concentration to determine eligibility.

e. Fitness Management: Requires a minimum grade-point average of 2.00. Students will be evaluated and offered admission based on the following criteria: Cumulative and major grade-point averages; application; written essay; and interview (if necessary). Approximately 20 seats are available each year. Once admitted to the program, students will be required to maintain a cumulative index of at least 2.00 or be dropped from the program upon review. Students must complete HPER 354 Fitness Management and all courses in the concentration before enrolling in HPER 464 Internship Experience.

f. Physical Education Studies: Upon completion of HPER 235 Professional Transitions and a conference with the faculty advisor, students must declare either two University-approved minors or one University-approved minor and one area of study, approved by the advisor.

g. Strength and Conditioning: Students desiring admission must have a minimum grade-point average of 2.00 and must have completed 100 hours of direct observation in the Chuck Hall Weight Room under the supervision of the Director of the program. Students will be evaluated and offered admission based on the following criteria: Cumulative and major grade-point averages; application; written essay; written log of direct observation hours; and interview (if necessary). Approximately 3 to 5 seats are available each year. Once admitted to the program, students will be required to maintain a cumulative index of at least 2.00 or be dropped from the program upon review. A minimum of 300 hours of clinical experience must be obtained upon acceptance into the program. The hours must be accumulated over a minimum of three semesters (100 hours per semester) and students cannot participate in clinical experience for more than five semesters. Students must complete HPER 416 Practicum in Strength and Conditioning, the United States Weightlifting Federation Certification course, and the 300 hours of clinical experience before enrolling in HPER 464 Internship Experience.

FREC 201 Records and Accounts
HPER 103 Foundations of Recreation and Leisure Services
HPER 164 Practicum in Recreation and Parks
HPER 210 Safety, First Aid and Emergency Care
HPER 214 Wellness: A Way of Life
HPER 260 Leisure Service Programming
HPER 270 Recreation Leadership

Students must have a minimum cumulative g.p.a. of 2.500.

DEGREE: BACHELOR OF SCIENCE IN HEALTH AND EXERCISE SCIENCES
MAJOR: HEALTH AND PHYSICAL EDUCATION

CURRICULUM

CREDITS

See University and Department requirements (page 152) for additional degree requirements.

BREADTH REQUIREMENTS

Group A—Communication/Writing Skills

Group B—Humanities/Finance Arts

Group C—History/Social Sciences
Must include courses from two different departments

Group D—Natural and Biological Sciences/Mathematics
Must include an approved 3-credit MATH course at the 100-level or higher.

Additional credits from Groups A-D

MAJOR REQUIREMENTS

C- or better required in all courses except EDST
EDST 201 Diversity in the Classroom (fulfills University multicultural requirement)
EDST 304 Educational Psychology—Social Aspects
EDST 305 Educational Psychology—Cognitive Aspects
EDSV 400 Student Teaching

Students must have a minimum cumulative g.p.a. of 2.500.

DEGREE: BACHELOR OF SCIENCE IN HEALTH AND NURSING SCIENCES • HEALTH AND EXERCISE SCIENCES
After required courses are completed, sufficient elective credits must be taken to meet the minimum credits required for the degree. Students must register for HPER 354 two semesters before registering for HPER 464, and must complete all courses in the "Major Requirements" before enrolling in HPER 464.

Coaching Science Minor

This minor will help students develop a personal coaching philosophy, an understanding of the body, how it performs, injury and injury prevention, teaching of skills and progressions, sport psychology, and a variety of team responsibilities. A practicum or field experience will be required in the student's chosen sport in order to further enhance the development of coaching skills and philosophy.

The Coaching Science Minor requires 18 credits. Students applying for the minor must have completed at least one semester of full-time study with a minimum GPA of 2.25. A minimum grade of C- is required in all courses for the minor.

This minor requires the following courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>HPER 210 Safety, First Aid, and Emergency Care</td>
<td>3</td>
</tr>
<tr>
<td>HPER 220 Anatomy and Physiology</td>
<td>3</td>
</tr>
<tr>
<td>HPER 320 Strength and Conditioning</td>
<td>3</td>
</tr>
<tr>
<td>HPER 390 Principles of Coaching</td>
<td>3</td>
</tr>
<tr>
<td>HPER 360 Psychology of Coaching</td>
<td>1</td>
</tr>
<tr>
<td>HPER 460 Coaching/Performance Practicum</td>
<td>2</td>
</tr>
<tr>
<td>Sport Specific Electives in Skills/Coaching</td>
<td>3</td>
</tr>
</tbody>
</table>

A total of twenty-six elective options exist to meet the 3 credits of Skills/Coaching requirement. Selection will be made with minor advisor's approval.

Medical Technology

Medical Technology is clinical laboratory science related to the prevention, diagnosis and therapy of disease. The Medical Technology major is accredited by the National Accrediting Agency for Clinical Laboratory Sciences (8410 West Bryn Mawr Ave., Suite 670, Chicago, IL 60631-3415; telephone 773-714-8880). The four-year B.S. degree curriculum offers an undergraduate professional education designed to prepare students for career entry positions in hospital clinical laboratories and industry as well as graduate study in medical technology and related areas.

During the first two years at the University, students interested in medical technology should take courses in the basic sciences and liberal arts, including prerequisite courses in biology and chemistry. The professional and clinical courses in the third and fourth years include a final period of supervised clinical education in the Christiana Care Health Services and other affiliated institutions. One required Winter Session is included in the B.S. curriculum.

During the clinical rotation period (fall of junior year and winter and spring terms of the senior year), students should plan for the possibility of 1) added expense for transportation and uniforms and 2) added expense for living off-campus at the clinical site for at least a five-week rotation during the senior year when the commuting distance is excessive.

Freshman or transfer students may be admitted to the University with a declared interest in medical technology. Students will be evaluated for admission to the Medical Technology major after completion of the prerequisite courses. Priority will be given to full-time University sophomores.

Class size is limited to 26 medical technology majors, and any interested student should talk with the Department Chair as early as possible.

Eligibility for admission to the junior year of the Medical Technology major will be based on the following criteria:

1. Minimal cumulative index of 2.0 in first four semesters of coursework.
2. Minimal grade point index of 2.0 computed from specified courses in biological sciences and chemistry, including laboratories: BISC 207, 208, 276, 371, and CHEM 103, 104, 213, and 214-216.
3. Completion of at least 60 credits, including the courses listed above.

4. Within the pool of eligible students, admission to the major courses will be determined by academic achievement. All applicants will be evaluated by the Medical Technology Undergraduate Program Committee.

The following course sequence is recommended. These courses may be subject to change, so it is essential that students meet regularly with their faculty advisors. A minimal grade of C- is required in each MEDT course in the Medical Technology major. In order to meet degree requirements, medical technology majors must have a minimum cumulative grade point average of 2.0 to progress in the medical technology sequence. A student who earns a grade lower than C- in a medical technology course must repeat the course and achieve a grade of at least C- before enrolling in any medical technology course which has the prior course as a prerequisite. Students are not permitted to repeat any medical technology course more than once. Further, students who earn a grade lower than C- in more than one medical technology course will not be permitted to continue in the major.

Anna P. Guillo, Chair, Associate Professor Office: 050 McKinly Laboratory Telephone: (302) 831-2849 Website: http://www.udel.edu/diehman/mt.html

DEGREE: BACHELOR OF SCIENCE
MAJOR: MEDICAL TECHNOLOGY

CURRICULUM

CREDITS

UNIVERSITY REQUIREMENTS
ENGL 110 Critical Reading and Writing (minimum grade C) ........................................ 3
Three credits in an approved course or courses stressing multicultural, ethnic, and/or gender-related content (see p. 22) .................................................. 3

MAJOR REQUIREMENTS
Writing: (minimum grade C) ........................................................................ 3
A second writing course involving significant writing experience including two papers with a combined minimum of 3,000 words to be submitted for extended faculty critique of both composition and content. This course must be taken after completion of 60 credit hours. Appropriate writing courses are normally designated in the semester’s Registration Booklet. (See list of courses approved for second writing requirement; page 69.)

One of the following .................................................................................. 3-4
MATH 114 College Mathematics and Statistics
(for students who do not intend to continue the study of mathematics)
MATH 115 Precalculus
(for students who intend to continue the study of mathematics)
MATH 221 Calculus I
MATH 241 Analytic Geometry and Calculus A
Successful performance on the college proficiency exam (0 credits awarded).

Breadth Requirements
(follow College of Arts and Science standards, see page 70.)

Group A: Understanding and appreciation of the creative arts and humanities .. 6
Group B: The study of culture and institutions over time ................................ 6
Group C: Empirically based study of human beings and their environment 6

(minimum grade of C- required in all MEDT courses)

NURSING

The Department of Nursing offers a four-year baccalaureate degree program in nursing and an accelerated nursing degree program for those who already hold a baccalaureate degree in another field. There is also a baccalaureate degree program (BRN) for registered nurses with associate degrees or diplomas. Returning nurses may complete some course work at home or in the worksite via video. In addition, the Department offers a master’s program in nursing, with concentrations in Family Nurse Practitioner, Nursing Administration, Clinical Nurse Specialist, and a combined Clinical Nurse Specialist/Specialty Nurse Practitioner option.

The four-year Bachelor of Science in Nursing program is designed to develop the knowledge, understanding and skill essential for the practice of professional nursing and to provide the basis for graduate education. The program is accredited by the National League for Nursing and information on program requirements is available from the League at 350 Hudson St., New York, NY, 10014; telephone 1-800-669-1656. The first two years of the program include foundation courses in the natural, social, and behavioral sciences, liberal arts, and three introductory nursing courses. The third and fourth years of study include clinical and nonclinical nursing courses as well as elective courses. The Department of Nursing uses many health care agencies in the Wilmington-Newark and nearby areas for clinical teaching.

During clinical rotations, students are exposed to many different experiences in a variety of health care settings. These include the major hospitals in New Castle County as well as regional community hospitals, a variety of extended care facilities, independent living facilities, and various community-based providers who offer a range of services across the life span. Students graduate as nurse generalists with experiences in pediatric, maternity, psychiatric, medical-surgical, and community health nursing.

Nursing students are encouraged to participate in the College chapter of the National Student Nurses’ Association. Students who have earned recognition for superior academic achievement may be invited for membership in Beta Xi Chapter of Sigma Theta Tau, the International Honor Society of Nursing. Qualified students are encouraged to pursue the program requirements for a degree with distinction, and honors courses are available at the upper levels. Research opportunities are available to all undergraduates.
POLICIES
In order to meet degree requirements, nursing majors must have a minimum cumulative grade point average of 2.0 to progress in the nursing sequence. A student who earns a grade lower than C- in a nursing course must repeat the course and achieve a grade of at least C- before enrolling in a more advanced nursing course.

Students are not permitted to repeat any nursing course more than once. Further, students who earn a grade lower than C- in more than one nursing course will not be permitted to continue in the program. Program policies are currently under review, and all students must meet regularly with their faculty advisor to ensure that all requirements are being met.

Students are expected to provide their own transportation to all required clinical laboratories.

LICENSURE
Graduates are eligible for registered nurse licensure in Delaware or other states upon satisfactory completion of the National Council Licensure Examination for Registered Nurses (NCLEX-RN). If the examination is passed and licensure granted in one state, application may be made to other states for licensure by endorsement.

Janice A. Seleknim, Chair, Professor Office: 357 McDowell Hall Telephone: (302) 831-2193 Website: http://www.udel.edu/nursing/udnursing.html

ACCELERATED NURSING DEGREE PROGRAM
The Accelerated Degree Program is a course of study leading to a Bachelor of Science in Nursing and is designed for individuals who have a previously earned degree in another field and would like to pursue a career in nursing. Students in this program must complete all of the non-nursing requirements by transfer credit from their first degree, completion of coursework at the University of Delaware or by transfer of pre-approved equivalent courses from other accredited institutions. The program begins in the fall with one course which is offered in a video delivery format. Students will be required to come to campus for course examinations. If a student is unable to relocate until beginning full-time study in January, special testing arrangements may be made on an individual basis. In January, students begin their full-time studies with a five week winter session. Coursework continues in the spring semester, followed by a ten week summer session, fall semester, and concluding with the following January winter session. All non-nursing coursework must be completed prior to the first winter session.

Students taking courses in an accelerated mode are sometimes out of sequence with on-campus course offerings. In these instances, lecture will be provided via videotape, augmented by small group discussion sessions. Each student will receive a complete set of video tapes for specified courses permitting greater flexibility in scheduling study time. Six courses incorporate video delivery plus discussion sessions.

Eligibility for this course of study includes the following:
1. An earned baccalaureate degree
2. GPA of 3.0 or greater
3. Completion of all non-nursing courses prior to first Winter session.

The College of Health and Nursing Sciences holds information sessions periodically to present an overview of the program and answer questions. If you would like to attend an information session, please contact the College at 302-831-2381 (E-mail: ud-chns@udel.edu) to be placed on our mailing list. You may wish to bring unofficial copies of your transcripts to a session if you have not submitted them previously. The exact curriculum plan will be tailored to each student's needs by an advisor; a sample plan may be viewed at the Accelerated Degree Program website (http://www.udel.edu/nursing/accel.html). Students who may need financial assistance in pursuing a second degree should contact the Financial Aid Office at 302-831-1534. In addition, students are encouraged to seek non-traditional opportunities for aid. Reference books on private financial aid sources are available in libraries or local academic institutions in your community.

If you have further questions, please contact The Department of Nursing, 302-831-2193; e-mail: ud-chns@udel.edu.

DEGREE: BACHELOR OF SCIENCE IN NURSING
MAJOR: NURSING

CURRICULUM

UNIVERSITY REQUIREMENTS
ENGL 110 Critical Reading and Writing (minimum grade C-) 3
Three credits in an approved course or courses stressing multicultural, ethnic, and/or gender-related content (see p. 22) 3

MAJOR REQUIREMENTS
BISC 207/208 Introductory Biology I and II 8

NURS 411 Topics in Health Care Delivery 3
NURS 417 Practicum V 3
NURS 418 Practicum VI or NURS 419 Practicum VII 3
NURS 420 Practicum VIII 6

ELECTIVES
After required courses are completed, sufficient elective credits must be taken to meet the minimum credits required for the degree.

CREDITS TO TOTAL A MINIMUM OF 126

Most nursing courses are offered once each academic year. Students must complete required lower division courses before enrolling in nursing courses. Nursing courses must be taken in sequence.
BACCALAUREATE FOR THE REGISTERED NURSE (BRN)

Licensed registered nurses who are graduates of associate degree or diploma programs may apply for admission to this program. Graduates of National League for Nursing (NLN) accredited associate degree programs may directly transfer up to 30 credits in nursing as evidence of their basic nursing knowledge. Graduates of diploma schools of nursing and graduates of non-NLN accredited associate degree programs must complete validation examinations. Upon successful completion of these examinations, the student will be awarded 30 credits for basic nursing knowledge. Before enrollment in any nursing courses, students must meet the following criteria:

- Completion of 36 credits of non-nursing requirements which must include 24 credits in science and up to 6 credits of free electives.
- GPA of 2.5 or higher for non-nursing prerequisite courses
- Validation of basic nursing knowledge
- Validation of clinical competence

All required nursing courses in the BRN major, with the exception of three weekend courses (NURS 343, 441, and 445), are offered in a distance-learning video or web-enhanced format. Many of the support courses are also available in a distance-learning format.

DEGREE: BACHELOR OF SCIENCE IN NURSING
MAJOR: BACCALAUREATE FOR THE REGISTERED NURSE (BRN)

CURRICULUM CREDITS

UNIVERSITY REQUIREMENTS

ENGL 110 Critical Reading and Writing (minimum grade C) 3
Three credits in an approved course or courses stressing multicultural, ethnic, and/or gender-related content (see p. 22) 3

MAJOR REQUIREMENTS

24 credits, to include a minimum of one course in each of the following five categories: (1) biology, (2) microbiology, (3) chemistry, (4) anatomy and physiology, and (5) nutrition. 24
STAT 200 Basic Statistical Practice 3
English course (second English composition course) 3
Literature course 3
Philosophy course 3
Psychology course 3
Sociology course 3

NURS 446 Leadership/Organizational Behavior 2

ELECTIVES

After required courses are completed, sufficient elective credits must be taken to meet the minimum credits required for the degree.

CREDITS TO TOTAL A MINIMUM OF 125

NUTRITION AND DIETETICS

The Department of Nutrition and Dietetics offers majors in Applied Nutrition, Dietetics, and Nutritional Sciences, all with Honors Degree options, as well as a minor in Nutrition. The programs integrate chemistry, biology, social science and business courses with the study of nutrition. The baccalaureate programs in Nutrition and Dietetics provide opportunities for careers in business; industry; public, private, or government agencies; and education. In addition to the specialized courses necessary for competence in one’s selected professional major, the curricula include courses in the humanities, sciences, and the social sciences.

The Dietetics major leads to the attainment of certification as Registered Dietitian by the American Dietetic Association (ADA) and has approval status by the Commission on Accreditation/Approval for Dietetics Education. Students in this major complete the professional practice requirement after the Bachelor of Science degree by completing an ADA dietetic internship or alternative. See the Graduate Catalog for information on the Dietetic Internship Program.

A second major in the Department is Applied Nutrition. The first two years of coursework is nearly identical for the Applied Nutrition and the Dietetics majors. The students are admitted to the Dietetics major after successful completion of three semesters of course work in the Applied Nutrition major. A 2.5 cumulative grade point average is included in the criteria for admission.

The Applied Nutrition major is designed for the student who can creatively combine the study of nutrition with other academic areas. The curriculum is flexible so that a focus such as Gerontology, Communication, Food Service Management, or Fitness may be incorporated. The Applied Nutrition major also serves as the entry major for students who later apply to Dietetics in their sophomore year. Students who plan on becoming a Registered Dietitian and on conducting counseling and the related activities of a dietitian/nutrition counselor should complete the Dietetics major.

The Nutritional Sciences major meets the needs of students who want to focus strongly on the science aspects of human nutrition. As a premedical program, it prepares students for careers in dentistry, veterinary and human medicine, laboratory research in nutrition, or positions with companies or agencies requiring the extensive use of a strong science and human nutrition background. It provides students with a strong foundation for graduate work in human nutrition and related fields (e.g., physical therapy) and as such may be considered primarily as a preprofessional degree. Students planning on career-related employment upon graduation are encouraged to plan their electives in a concentrated area of interest such as journalism, dietetics, food science, child development, chemistry, biological sciences, or other related fields.

Each student’s academic advisor, a faculty member with expertise in the student’s field of interest, will assist in selecting courses and experiences that focus on the student’s interests and professional goals. For example, careful selection of liberal arts requirements and elective courses allows students to pursue a minor or area of interest outside of the college, a double degree, double major, or interdisciplinary major. Students are encouraged to meet with their faculty advisors at least once each semester.

Nutrition and Dietetics students are encouraged to enrich their academic program by participating in the college’s visiting student programs, study abroad experiences, seminars, and student organizations, such as the Nutrition and Dietetics Club. To enhance employment prospects, students are encouraged to seek experiences outside the classroom. For those planning to pursue a graduate program, research apprenticeships are available. Opportunities exist for students to participate in the American Dietetic Association and the Society of Nutrition Education.
There are several special academic opportunities for exceptionally talented and highly motivated students. Students in each Nutrition and Dietetics major may participate in the University’s Honors Program, undergraduate research, and the Degree with Distinction program. Also, the College’s Dean’s Scholar Program provides qualified students with the opportunity to develop an individualized program focusing on the students’ academic interests.

Selection and retention policies for all majors in this department have been established and are available from the department office.

Jack Smith, Chair
Office: 238 Alison Hall
Telephone: (302) 831-8729
Website: http://napantdtudel.edu/index.html

GENERAL EDUCATION COURSES
The following courses have been approved to fulfill humanities and social science electives for students in majors offered by the Department of Nutrition and Dietetics.

HUMANITIES

SOCIAL SCIENCE

HONORS DEGREES IN THE DEPARTMENT OF NUTRITION AND DIETETICS
Students can earn an Honors Bachelor of Science Degree in Applied Nutrition, Dietetics, or Nutritional Sciences by completing the following requirements:
1. All requirements for the Bachelor of Science Degree in the respective major.
2. All the University’s generic requirements for the Honors Baccalaureate Degree (see page 27 of this catalog).

DEGREE: BACHELOR OF SCIENCE
MAJOR: APPLIED NUTRITION
CURRICULUM

UNIVERSITY REQUIREMENTS
ENGL 110 Critical Reading and Writing (minimum grade C) .................................................. 3

MAJOR REQUIREMENTS

Humanities electives .................................................................................................... 9

CHEM 103/104 General Chemistry ................................................................. 8
CHEM 214/216 Elementary Biochemistry with Lab ............................................. 4
CHEM 220/221 Quantitative Analysis I with Lab ................................................. 4
CHEM 321/322 Organic Chemistry ................................................................. 4
BISC 207/208 Introductory Biology I and II ......................................................... 8
BISC 276 Human Physiology ........................................................................ 4
BISC 315 Introduction to Microbiology ............................................................. 4
PHYS 201 Introductory Physics I ................................................................. 4
ECON 100 Economic Issues and Policies
or
ECON 151 Introduction to Microeconomics: Prices and Markets ............ 3

Social Science electives .................................................................................. 12

FOSC 305/306 Food Science with Lab (minimum grade C) ....................... 3
FREC 408 Research Methods ........................................................................ 3
MATH 221/222 Calculus I and II ................................................................ 6
or
ECON 241/242 Analytic Geometry and Calculus A and B .......................... 6

A minimum grade of C must be achieved for credits to count toward the fulfillment of 29 credits in NTDT; a minimum grade of C in 200-level courses must be achieved to proceed to upper-level courses; only 300-level courses and a maximum of four credits of Special Problems/Independent Study (NTDT x66) may count toward the fulfillment of this requirement.

NTDT 200 Nutrition Concepts ................................................................. 3
NTDT 201 Food Principles ................................................................. 2
NTDT 211 Food Principles Laboratory ......................................................... 1
NTDT 321 Quantity Food Production and Service ........................................ 2
NTDT 400 Macronutrients ........................................................................ 3
NTDT 401 Macronutrients ........................................................................ 3
NTDT 421 Nutrition Assessment Methods .................................................. 2
NTDT 440 Nutrition and Disease ............................................................... 3
NTDT courses [300-level or higher] ......................................................... 9
NTDT course ......................................................................................... 3

ELECTIVES

After required courses are completed, sufficient elective credits must be taken to meet the minimum credits required for the degree. They may include Military Science, Music, or Physical Education. Only two credits of activity-type Physical Education and four credits of Music and four credits of 100- and 200-level courses in Military Science/Air Force may be counted toward the degree.

CREDITS TO TOTAL A MINIMUM OF .......................... 120

MINOR IN NUTRITION

Requirements for a minor in nutrition requires NTDT 200, NTDT 400, and NTDT 401 plus 6 credits in Nutrition and Dietetics at the 300-level or higher. A 2.0 grade point average is required for admission; a minimum grade of C- is required in all courses in the minor. Note that CHEM 214 and CHEM 216 are necessary prerequisites for NTDT 400 and NTDT 401.
