KIDS COUNT IN DELAWARE

KIDS COUNT in Delaware is housed within the University of Delaware’s Center for Community Research & Service.

CENTER FOR COMMUNITY RESEARCH & SERVICE
297 Graham Hall, University of Delaware, Newark, DE 19716, USA
Phone: (302) 831-6780
Email: ccrs-ud@udel.edu
Welcome to Delaware’s 2019 Legislative Session! KIDS COUNT in Delaware is pleased to present this daily calendar as a resource on the well-being of our state’s children.

We’d like to give a special thanks to Nemours Health and Prevention Services for supporting the costs related to the design and printing of this calendar.

Policy change is rarely quick, simple or easy. Yet, policy matters. Making kids a priority in our budgets matters. Tracking outcomes for kids across time matters. KIDS COUNT in Delaware is proud to be part of a network of KIDS COUNT organizations across the United States who work to strengthen families and communities that create access to opportunities for each and every child in our state.

Delaware Afterschool Network
A place where all Delaware K-12 youth can access a high-quality learning experience before and after the school day, preparing them for academic success, tomorrow’s workforce, and to become engaged citizens.

2019 Special Events
- We Love Afterschool Valentine Campaign (February 14)
- Afterschool Professionals Appreciation Week (April 22-26)
- 2019 Building Bridges Conference (May 15 and 16)
- Afterschool for All Challenge (June 2019)
- Summer Learning Kick-Off (July 2019)
- Attendance Awareness Month (September 2019)
- Lights On Afterschool (October 24)

Our Mission
To expand and support high-quality out-of-school programs, so that Delaware’s children and youth are safe, supervised, and prepared for leading productive lives.

Our Purpose
The Delaware Afterschool Network is a driving force that develops partnerships, brings stakeholders together, and shares best practices to ensure that affordable, sustainable afterschool, out-of-school, and summer learning programs are available.

Delaware’s future depends on the well-being of our state’s child population, which is becoming increasingly diverse each year. This growing diversity, combined with disparities along racial and ethnic lines in nearly every indicator of child well-being, will challenge our collective prosperity if not addressed. We must find ways to tear down barriers to opportunity and create pathways to success for each child in our state.

- **Health and Health Behaviors**
- **Educational Involvement and Achievement**
- **Economic Security**
- **Family & Community**

For more information go to: dekidscount.org
The Police Athletic League of Delaware’s mission is to provide youth between the ages of 8-18 with supervised activities in athletics, education, and social development. The PAL of DE currently reaches out to Delaware’s youth from four sites in New Castle County; New Castle, Hockessin, Delaware City, and Eisenberg Elementary.
KIDS COUNT is driven by research showing that the consequences of the events kids experience in childhood and the disparities that exist in those experiences are carried with them the rest of their lives. This year, we explore that theme further with a focus on adverse childhood experiences (ACEs) and ask the question: what can be done to minimize the risks associated with ACEs? Despite a significant prevalence of ACEs in our state, we can create environments that counteract those experiences. For example, the Delaware First Chance Initiative includes work to recognize and respond to adverse childhood experiences.
Resilience noun re·sil·i·ence \ riˈzil-i ən(t)s \ adapting well in the face of adversity, trauma, tragedy, threats or significant sources of stress.

Protective factors noun pro·tec·tive fac·tor \ pr ˈtekтив ˈfaktər \ conditions or attributes (skills, strengths, resources, supports, or coping strategies) in individuals, families, communities, or the larger society that help people deal more effectively with stressful events and mitigate or eliminate risk in families and communities.

When trying to measure how individuals respond to adversity, researchers examine resilience. Protective factors- a combination of supportive relationships, adaptive skill-building and positive experiences- can build resilience.

For more information go to: dekidscount.org
Understanding why some children do well despite adverse early experiences is crucial, because it can inform more effective policies and programs that help more children reach their full potential.

For more information go to: dekidscount.org
Helping Delaware schools and districts implement trauma-informed approaches to build resilience in children and families through creative workshops, innovative tools, and hands-on support.

A partnership between the Office of the Child Advocate, Children & Families First, and Casey Family Programs.

For information, contact:

Ensuring that every child has experiences that lead to good outcomes is more than a moral issue— it’s also an economic issue. Children are our future. When we retire, they will be the business leaders that keep our economy vibrant; they will be the policymakers sitting in Legislative Hall and the Governor’s Office. They will be our entrepreneurs, our educators and our nonprofit directors. They will be the leaders who guide Delaware in the next century. In one short generation, today’s children will be the parents, workers, volunteers, leaders, and changemakers determining the social and economic vitality of our state.

For more information go to: dekidscount.org
Does your child/client have an unmet need? We can help you!

Target Population:
Children who have a financial need under the age of 21 who reside in Delaware.

Who may request funds?
Staff from public or private community agencies, including faith-based organizations, who work directly with youth. Applications are only accepted through these organizations.

Grants are for an individual child. Funding is not meant for teams and programs.

Looking for that special or unique need, but can’t afford the extra cost in the budget right now? A grant from the 21st Century Fund for Delaware’s Children can help you!

There are two categories for which you can apply:

Regular Grants for children are awarded for up to $150.
Special Needs grants are awarded for up to $500, when a special situation/circumstance arises in a child’s life.

Examples
- Summer camp related expenses
- Music lessons
- Educational enrichment activities
- Recreational or cultural activities that promote self-awareness and development
- School extra-curricular expenses such as class trips
- Job Interview attire for children aging out of foster care

For further information regarding a grant from the 21st Century Children’s Fund, please contact: Calisa Emerson: 21childrensfund.appl@gmail.com

Please apply here: http://www.21childrensfund.org/grant-application/
Children can’t vote and they can’t lobby for public resources, yet their well-being and development directly impact the future economic and social health of our state.

The University of Delaware Community Engagement Initiative supports Delaware communities through five partnerships:

- Partnership for Public Education
- Partnership for Healthy Communities
- Partnership for Arts and Culture
- Wilmington Partnership
- Newark Partnership

Our partnerships serve as an entry point to the university, produce policy recommendations to strengthen Delaware communities, and incubate new ideas to make an impact, local to global. We strive to improve the lives of children in Delaware through many efforts, such as the Beat Goes On through the Service Learning Scholars program, featured here.

For more information, visit: udel.edu/engage
By coordinating the initiatives of policymakers with the resources of local communities and creating career pathways for youth by supporting public and private investment that produces new jobs, we can reconnect youth to the labor market and meet their needs for economic stability. Economic inclusion of young people is beneficial to youths themselves and to society as a whole.

According to an analysis released by the Archives of Pediatrics and Adolescent Medicine, nearly 50% of all US children and 90% of black children will be on food benefits at some point during childhood. The Supplemental Nutrition Assistance Program provides food benefits and nutrition assistance to eligible low-income families, enabling children to receive the nutrition they need to flourish.

The tax system has a significant impact on financial security for all families in Delaware, both directly through its role in the distribution of society’s resources and indirectly through its effects on the incentives for economic decisions such as working, spending, and saving. Many families benefit directly or indirectly from different tax credits in Delaware. Poverty has profound impacts on a child’s development and tax credits are an effective anti-poverty measure with bipartisan support.
The Earned Income Tax Credit (EITC) is the nation’s most effective anti-poverty program for working families. In Delaware, the state EITC is non-refundable meaning it can only be used to offset income tax liability, even though sales and property taxes are usually more burdensome for low-income working taxpayers. This means that refundable credits are more valuable to the lowest earning workers because they have little to no income tax liability and as a result, do not get the benefits of the full amount of a non-refundable credit.

On a national level, the State Children’s Health Insurance Program (CHIP) faced threats during 2017, including a Congressional standoff when it looked like CHIP might no longer exist. Finally, in the 2018 tax bill that was passed, there was a final verdict on CHIP: it now has federal funding for 10 years.

The Delaware Child Death Review commission has been reviewing infant unsafe sleep deaths and tracking factors associated with these types of deaths. Did you know the following?

**The main contributors to sleep-related deaths in Delaware are:**

- infants not sleeping in a crib or bassinet,
- infants sleeping with other people,
- and infants sleeping with unsafe bedding or toys.

These findings illustrate why the ABC’s of safe sleep are important: Babies should sleep Alone, on their Back, and in a Crib.
Given the structural barriers that have historically excluded them from the labor market, women of color are both more likely to lack health insurance coverage and more likely to live in poverty. High costs and limited resources mean many women cannot seek prenatal care as early or as often as they should.

Historical discrimination makes children of color more likely to be born into families where financial hardship creates barriers to accessing health care in the earliest years. Policies and practices continue to isolate children of color in high-poverty neighborhoods where nutritious foods and healthy infrastructure can be hard to come by. All of these things have an impact, including on a baby’s weight at birth, which is closely associated with infant mortality.

Body mass index (BMI) is a calculation that uses height and weight to estimate body fat. BMI can help doctors identify people who are overweight and at risk of developing medical problems like high cholesterol, high blood pressure, and diabetes. The KidsHealth BMI calculator also uses the child’s age and calculates percentiles as well as BMI. It is available online at https://kidshealth.org/en/parents/bmi-charts.html

We have served Delaware’s pregnant and parenting teens for 50 years. Since we opened our doors, we have served over 10,000 families at our 3 locations throughout the state of Delaware. We ensure that DAPI Daughters become economically self-sufficient with a full high school diploma and with an aspirational hope to go beyond high school. Now, each DAPI Daughter has her own success plan in place when she leaves our program. We instill academics, strong parenting skills, healthy lifestyle habits and ensure healthy births - a major problem in Delaware for teen parents. Go to www.dapi.org to support our DAPI Daughters.
Multiple studies have shown that access to comprehensive sexual health information and resources decreases risk behaviors associated with STDs, including HIV as well as unplanned pregnancy. Senate Bill 157 was passed which provides youth with sexual health information and treats the sex partners of patients diagnosed with a sexually transmitted disease.

According to the CDC, evidence-based programs and clinical services to prevent teen pregnancy through individual behavior change are important, but research also shows the role social determinants of health play in the overall distribution of disease and health, including teen pregnancy. Efforts that focus on social determinants of health in teen pregnancy prevention, particularly at the community level, play a critical role in addressing racial/ethnic and geographic disparities observed in teen births in Delaware.

Happy World Health Day!

For more information go to: dekidscount.org
This week, we celebrate the “Week of the Young Child” sponsored by the National Association for the Education of Young Children (www.NAEYC.org). The first five years of a child’s life are an important time for growth and development, and lay the foundation for language, academic ability, habits and socio-emotional development.

From birth, a child’s brain goes through an amazing period of development, creating more than a million neural connections each second. Responsive, engaging relationships and learning environments support this optimal health and development.

In the 2014-15 school year, Delaware’s assessment program was renamed the Delaware System of Student Assessments (DeSSA). DeSSA assessments include Smarter English Language Arts/Literacy (ELA) and Mathematics assessments. The Smarter assessments are designed to measure the progress of Delaware students in ELA/Literacy and Mathematics standards in grades 3-8 and 11. Beginning in the 2015-16 school year, the SAT is the 11th grade accountability measure.

School libraries are among the supports often provided to improve student success. Strong libraries become the “hub” of a school and are used by students in a variety of ways. Research has shown that quality libraries are correlated with higher student achievement. Dimensions of quality include items such as staffing, funding, collections, technology, integration into curriculum and flexible scheduling.

According to research from the Center on the Developing Child at Harvard University, toddlers who have secure, trusting relationships with parents or caregivers experience minimal stress hormone activation when frightened by a strange event, while those who have insecure relationships experience significant activation of the stress response system. This lowered stress response due to trust helps protect children from experiencing ACEs.

Research indicates that the single most common factor for children who develop resilience is having at least one stable and committed relationship with a supportive parent, caregiver, or other adult. It also appears that it’s never “too late” to build resilience.
Delaware is proud to have over 325 school nurses working with school communities to help children stay healthy, safe, and ready to learn. We provide healthcare to 154,000 + students in over 300 Delaware public, charter, private, and parochial schools.

School nurses increase student attendance!

Delaware, the 1st state...with a commitment to have a school nurse in every school building.

Data indicate that all children in Delaware do not have the same opportunity. Disparities exist in well-being outcomes by gender, ZIP code, income and race/ethnicity. If we want a better future for all of us, we need better results for each child now.

For more information go to: dekidscount.org
June 3

While children have different starting points, every child deserves access to opportunities that lead to prosperity. However, equality of opportunity is not something that just happens: it is a product of systems, policies and programs that work together to lay a foundation that allows every one of our youngest Delawareans to have an equal chance for participation and for success. Throughout June, we’ll spotlight recent policy wins in the state and highlight additional policy opportunities which would strengthen opportunity for children and their families.

Health Policy Spotlight:
Due to lack of adequate paid family leave policies, many parents must return to work sooner than is optimal for the health of mothers (in the case of biological birth) and children. In 2018, the Delaware legislature passed paid family leave. State employees are now eligible for 12 weeks of paid leave upon the birth or adoption of a child 6 years of age or younger. Paid leave contributes to the establishment of parent-child bonds, breastfeeding establishment and allows infants to receive vaccines and develop stronger immune systems prior to entering child care.
June 5

Health Policy Spotlight:
Lead poisoning can affect anyone, but children are affected the most due to vulnerabilities in their developing brains and bodies. In Delaware, great strides have been made to reduce lead in home and work environments over the last 25 years that KIDS COUNT has been tracking data. In 2018, additional legislation was passed to continue this work. HB 456 prohibits lead paints on outdoor structures such as bridges, water towers, playground equipment, highways, parking lots and utility towers and poles and requires Delaware Department of Natural Resources and Environmental Control to develop regulations governing the removal of lead paint from outdoor structures.

2019

Health Policy Spotlight:
In 2018, Delaware won a $9 million federal grant to expand school mental health supports. A five year initiative, Project DelAWARE involves the Delaware Department of Education, the Delaware Department of Services for Children, Youth and Their Families and a school district in each county (Colonial, Capital & Indian River) whose combined enrollment equals nearly one-fifth of the state’s total public school enrollment.

Critically ill children and their families know too well the all-consuming anxiety of a cancer diagnosis. For families like Von’s, a wish journey is more than a gift, a trip, or a party. It is an anchor.

“We were benefiting from his wish before we even left,” Von’s mom, Gina, says. “It became the focus for so many months... [In Hawaii,] we would catch him just relaxing and smiling... It was a total recharge for our entire family. You don’t think about ‘when’s the next lab draw.’”

Help grant wishes. Transform lives.

Health Policy Spotlight:
The opioid crisis in our state affects more than just the person struggling with addiction. Often children of addicted parents and caregivers see the devastating impact of substance abuse firsthand which can lead to neglect and removal from the home. HB 440 establishes an Overdose System of Care to improve care, treatment and survival of the overdose patient in the State of Delaware. A collaborative and coordinated effort to improve the treatment and prevention of overdose will help to make sure that parents are healthy and capable of caregiving.

Delaware public schools serve a diverse student population with complex needs and immense potential. However there are equity gaps that we must address including lags in proficiency levels and graduation rates. Data show disparity exists across dimensions of race/ethnicity, gender, income and disability status.

For more information go to: dekidscount.org
Education Policy Spotlight:
According to DOE, thousands of students receive out-of-school suspensions each year for minor infractions such as being unprepared or late for class, dress code violations and disrespectful behavior. In 2013, only 2% of out-of-school suspensions were for serious offenses such as weapons, drugs or serious violence. Further, while African-American students made up only 32% of the student body, they accounted for 62% of out-of-school suspension. Students with disabilities made up 13% of the student body, but accounted for 24% of out-of-school suspensions. Out-of-school suspensions do not address the root causes for the misbehavior and only serve to put the student further behind in class. SS1 for SB85, which was passed in 2018, requires capturing and publishing of data in an attempt to help schools reduce unnecessary out-of-school suspensions.
June 12

2019

Education Policy Spotlight:
The Delaware Advance Scholarship Program was created via HB326. The goal is to encourage Delaware students with intellectual disabilities to pursue studies for a comprehensive certificate or degree at a Delaware institution of higher education in order to promote economic self-sufficiency. This will in turn result in an economic benefit to the state in the form of a more diverse, well-prepared workforce that is less reliant on government support.

For more information go to: dekidscount.org
The Institute for Public Administration partners with local education agencies, state departments, and their constituents to provide education, research, and policy assistance to improve educational opportunities for all Delaware students.

**Education Policy Spotlight:**
In an effort to address Delaware’s achievement gap, $1 million in targeted “Opportunity Grant” funding was awarded to nine Delaware school districts and charter schools for the 2017-18 school year. The funding supports programs that help disadvantaged students and English language learners have success in classrooms across the state.

For more information go to: dekidscount.org
June 14 2019

Education Policy Spotlight:
Both the Every Student Succeeds Act (ESSA) and SB 172 w/SA1 + HA 2, passed in 2018, require the development of a statewide approach to define and report school-level expenditures so school leaders and the public can better compare per-pupil spending across Delaware. DOE will begin reporting school-level per-pupil expenditures in December 2019.

For more information go to: dekidscount.org
While Delaware should be a state where every child is financially secure, economic hardship is the most commonly reported ACE. All racial and ethnic groups are affected by poverty. However, the likelihood of living in poverty is far higher for Delaware’s children of color.
Economic Policy Spotlight:
Federal and state Earned Income Tax Credit (EITC) policies serve many public policy goals including reducing child poverty, increasing the incentive to work, stabilizing income and spurring consumption. In 2018, the legislature passed HB113 which would change the Delaware’s EITC from nonrefundable to refundable. Nonrefundable credits can only be used to offset income tax liability, even though excise and property taxes are usually more burdensome for low-income working taxpayers.
June 19

Economic Policy Spotlight:
Delaware’s minimum wage was increased to $8.75 effective January 1, 2019. A training minimum wage and a youth wage, linked to the state’s minimum wage, were also created via legislation in 2018.

For more information go to: dekidscount.org
June 20

**Economic Policy Spotlight:** Recognizing the importance of making sure that every Delawarean is counted in the upcoming 2020 Census, Governor Carney signed Executive Order #23 which created the Governor’s Complete Count Commission. This commission will work to raise awareness about the 2020 Census and encourage full participation especially by those that are often undercounted such as young children. Census data is invaluable for determining and allocating resources which makes counting vulnerable populations such as children crucial to making meaningful decisions.
Economic Policy Spotlight:
A parent who cannot afford cash bail could spend months away from his children and family simply awaiting trial. In 2018, Delaware passed HB 204, which seeks to modernize the pretrial process by reducing the reliance on monetary conditions. It gives judges more discretion to determine other pre-release conditions besides cash bail by utilizing a risk assessment tool. Financial resources should not be the sole determinant of whether or not a child must be without her parent for longer than necessary.

KIDS COUNT in Delaware wants to see our state provide equitable opportunities for every child. For that vision to be realized, children’s risks and opportunities in life should not be dictated by their gender, ZIP code, family income, race, or ethnicity.

For more information go to: dekidscount.org
June 25

Family/Community Policy Spotlight:
Gun violence has a tremendous impact on Delaware’s children and young people, particularly in the city of Wilmington where 12 to 17 year olds are injured or die from gun violence at rates higher than anywhere else in the country. As a state, we must ensure that our children are able to reach adulthood. In addition to several pieces of legislation enacted to protect children, Delaware joined the “States for Gun Safety” Coalition, a multi-state bipartisan partnership working together to solve this complex issue.

Kids Count in Delaware

Nemours. Health & Prevention Services
Family/Community Policy Spotlight:
Delaware made history by becoming the first state in the nation to ban child marriage without exception. HB 337 prohibits the marriage of individuals under the age of 18.

For more information go to: dekidscout.org
Family/Community Policy Spotlight:
In Delaware, food insecurity not covered by the Supplemental Nutrition Assistance Program (SNAP) is primarily mediated by the Food Bank of Delaware. This enormous program has networks throughout the state to collect and distribute food to over 500 hunger-relief program partners. These partners are often food pantries, shelters and residential programs, but can also be social service agencies and neighborhood or community programs. In 2017, the Food Bank of Delaware distributed over 8 million pounds of food to people within our state.
