COLLEGE OF HEALTH SCIENCES
UNDERGRADUATE PROGRAMS

• Advisement and Academic Enrichment Opportunities
• Pass/Fail Courses
• Dean’s Scholar Program
• Health, Nutrition, and Exercise Sciences
• Health Studies
• Medical Technology
• Nursing

The College of Health Sciences includes the Departments of Health, Nutrition, and Exercise Sciences, and Medical Technology, and the School of Nursing. Undergraduate major degree programs are offered in Applied Nutrition, Athletic Training, Dietetics, Exercise Science, Health and Physical Education, Health Behavior Science, Health Studies, Medical Technology, Nursing, Nutritional Sciences, and Sport Management.

Students in the college are encouraged to engage in undergraduate research projects, internships, study abroad, seminars, and the college’s numerous student organizations. Students interested in such opportunities should consult with their faculty advisor. For more information, contact Dean Betty Paulanka, 345 McDowell Hall, or send email to ud.chns@udel.edu or visit www.udel.edu/health

ADVISEMENT AND ACADEMIC ENRICHMENT OPPORTUNITIES

Students are assigned a faculty advisor in their major department who provide advice on course selection, degree requirements, career opportunities, and graduate study. Faculty advisors can also assist with setting up special opportunities such as internships and research experiences. It is recommended that students meet with their faculty advisors at least once each semester. The Office of the Assistant Dean for Student Services, 343 McDowell Hall also provides advisement to students who experience academic difficulties or who require additional guidance or information.

Students in most of the college’s majors are eligible to participate in the University’s Honors Program, undergraduate research, and Degree with Distinction. Honors Degrees are available to students in programs offered by the Departments of Health, Nutrition, and Exercise Sciences, and Medical Technology, and the School of Nursing.

PASS/FAIL COURSES

Courses taken pass/fail cannot be used to complete major requirements in the College of Health Sciences unless those courses only are offered on a pass/fail basis. Pass/fail courses only can be counted as free electives.

DEAN’S SCHOLAR PROGRAM

The Dean’s Scholar Program exists to serve the needs of students whose clearly defined educational goals cannot be effectively achieved by pursuing the standard curricula for all existing majors, minors, and interdepartmental majors sponsored by the University. Driven by an overarching passion or curiosity that transcends typical disciplinary bounds and curricula, a Dean’s Scholar’s intellectual interests may lead to broad interdisciplinary explorations of an issue or to more intense, in-depth studies in a single field at a level akin to graduate work. In consultation with faculty advisors and the Associate or Assistant Dean of their college, Dean’s Scholars design an imaginative and rigorous individual plan of study to meet the total credit hours required for graduation. Contact the Assistant/Associate Dean in the college or go to www.udel.edu/deansscholar for more information and the application.

HEALTH, NUTRITION, AND EXERCISE SCIENCES

Telephone: (302) 831-2265
http://www.udel.edu/HNES
Faculty Listing: http://www.udel.edu/HNES/fac_list.htm

The Department of Health, Nutrition, and Exercise Sciences offers undergraduate majors in Applied Nutrition, Athletic Training, Dietetics, Exercise Science, Health and Physical Education, Health Behavior Science, Nutritional Sciences, and Sport Management, all with Honors Degree options, as well as minors in Coaching Science, Nutrition, Figure Skating Coaching, and Strength and Conditioning. The programs integrate background coursework in the natural and physical sciences, and, for some programs, courses in business, with the study of the major field. This broad spectrum of undergraduate programs prepares students for a variety of careers in the arenas of health care, education, recreation, and sport/fitness/nutrition management, as well as business, industry, and public, private, or government agencies.

Each student’s academic advisor, a faculty member with expertise in the student’s field of interest, will assist in selecting courses and experiences that focus on the student’s interests and professional goals. Careful selection of liberal arts requirements and elective courses allows students to pursue a minor or an area of
interest outside of the college, a double degree, double major, or interdepartmental major. Students are encouraged to meet with their faculty advisors at least once each semester. Failure to meet regularly with a faculty advisor can result in a delay in graduation if program requirements have not been met.

Students are encouraged to enrich their academic programs by participating in study abroad experiences, seminars, and student organizations. To enhance prospects for employment and obtaining internships, students are encouraged to seek experiences outside the classroom. For those planning to pursue a graduate program, research apprenticeships are available. Opportunities exist for students to participate as student members of national, regional, and statewide professional organizations related to each major.

There are several special academic opportunities for exceptionally talented and highly motivated students. Students in most majors may participate in the University’s Honors Program, undergraduate research, and the Degree with Distinction program. The College’s Dean’s Scholar Program also provides qualified students with the opportunity to develop individualized programs of study.

**MAJOR DEGREE PROGRAMS**

The Applied Nutrition major is designed for the student who can creatively combine the study of nutrition with other academic areas. The curriculum is flexible so that a concentration such as Gerontology, Food Service Management, Pediatrics, Health and Exercise, or Weight Management may be incorporated.

The Athletic Training major is accredited by the Commission on Accreditation of Athletic Training Education (CAATE). This major prepares students for taking the BOC exam for certification as an Athletic Trainer (ATC).

The completion of the Dietetics major is the first step leading to the attainment of certification as Registered Dietitian by the American Dietetic Association (ADA). The University of Delaware’s Didactic program in Dietetics is currently granted accreditation status by the Commission on Accreditation for Dietetics Education (CADE) of the American Dietetic Association, 120 South Riverside Plaza, Suite 2000, Chicago IL 60606-6995, 312-899-0040. Students in this major complete the professional practice requirement after the Bachelor of Science degree by completing an ADA dietetic internship. See the Graduate section of the Catalog for information on the Dietetic Internship Program.

Concentrations within the Exercise Science major allow students to further specialize in Biomechanics and Motor Control, or Exercise Physiology. Graduates of the program in Biomechanics are prepared to work in Gait Analysis laboratories or to go on for further graduate or professional study in Physical Therapy. The Exercise Physiology concentration is designed primarily for students interested in going on to graduate school, Physical Therapy School, or Medical School.

The Health and Physical Education program is accredited by the National Council for Accreditation of Teacher Education (NCATE). This comprehensive program prepares students to teach both health education and physical education in grades K-12. Students in this major begin regular exposure to teaching students in the schools early in the program.

Students in the Health Behavior Science major select a concentration in Fitness Management or Leisure Service Management. Internships, practicums, and clinical experiences are available in each program. The Fitness Management curriculum prepares students for work in the health and fitness industry. Leisure Service Management prepares students for leadership positions in the recreation industry.

The Nutritional Sciences major is for students who want to focus strongly on the science aspects of human nutrition. As a premedical program, it prepares students for careers in dentistry, veterinary and human medicine, laboratory research in nutrition, or positions with companies or agencies requiring the extensive use of a strong science and human nutrition background.

The Sport Management major is for students interested in managerial or administrative positions in the sport industry or collegiate level athletics. Practicums, internships, and selected courses from the Lerner College of Business and Economics are required.

**LIFETIME ACTIVITIES PROGRAM**

A varied activity program is available to all students on a pass/fail credit basis in HESC 120 courses. The objectives of the lifetime activities program are: (1) to provide knowledge and skills essential for leisure-time enjoyment, (2) to develop healthy exercise habits as well as a sound knowledge base in the scientific principles of physical activity, and (3) to provide an enjoyable atmosphere for learning skills that encourage lifetime participation. Regular attendance is required in order to receive credit in HESC 120 courses with a passing grade.

**HONORS DEGREES IN THE DEPARTMENT OF HEALTH, NUTRITION, AND EXERCISE SCIENCES**

Students can earn an Honors Bachelor of Science Degree by completing the following requirements:

1. All requirements for the Bachelor of Science Degree in the respective major.
2. All of the University’s generic requirements for the Honors Baccalaureate Degree (see page 52).

**APPLICATION PROCEDURES**

Entering freshmen and transfer students may be admitted directly into the majors in Applied Nutrition, Dietetics, and Nutritional Science. Freshmen seeking admission to the majors in Athletic Training, Exercise Science, Health and Physical Education, Health Behavior Science, and Sport Management are admitted to interest groups associated with each major. Freshmen participating in an interest group are eligible to apply for admission to one of these majors at the end of the freshman year.

The department reviews applications from University of Delaware students who wish to change majors twice a year, with applications due on December 15th and June 1st. Applications are available 30 days prior to each due date. Students are notified of admission decisions after semester grades are posted. Students not admitted to a major may apply again the following semester.

To be eligible for admission to a department major, students must have completed at least 12 credits at the University of Delaware with a minimum GPA of 2.50 and must have met the criteria for admission to each respective major. Some majors have more stringent GPA requirements and some majors are restricted due to enrollment limits. Enrollment in HESC major courses is restricted to majors. Non-majors are allowed to register for 100- and 200-level courses through the drop/add process if space is available. Non-majors are not normally permitted in 300- and 400-level courses.

Those courses in **BOLD** are used to calculate the Prerequisite Courses GPA.

### Technical Standards for Admission

The Athletic Training Education Program at the University of Delaware is a rigorous and intense program that places specific requirements and demands on the students enrolled in the program. An objective of this program is to prepare graduates to enter a variety of employment settings and to render care to a wide spectrum of individuals engaged in physical activity. The technical standards set forth by the Athletic Training Education Program establish the essential qualities considered necessary for students admitted to this program to achieve the knowledge, skills and competencies of an entry-level athletic trainer, as well as meet the expectations of the program’s accrediting agency. Compliance with the program’s technical standards does not guarantee a student's eligibility for Board of Certification (BOC) examination.

Candidates for selection to the Athletic Training Education Program must demonstrate:

1. The mental capacity to assimilate, analyze, synthesize, integrate concepts and problem solve to formulate assessment and therapeutic judgments and to be able to distinguish deviations from the norm;
2. Sufficient postural and neuromuscular control, sensory function, and coordination to perform appropriate physical examinations using accepted techniques; and accurately, safely, and efficiently use equipment and materials during the assessment and treatment of patients;
3. The ability to communicate effectively and sensitively with patients and colleagues, including individuals from different cultural and social backgrounds; this includes, but is not limited to, the ability to establish rapport with patients and communicate judgments and treatment information effectively. Students must be able to understand and speak the English language at a level consistent with competent professional practice;
4. The ability to record the physical examination results and a treatment plan clearly and accurately;
5. The capacity to maintain composure and continue to function well during periods of high stress;
6. The perseverance, diligence and commitment to complete the athletic training education program as outlined and sequenced;
7. Flexibility and the ability to adjust to changing situations and uncertainty in clinical situations;
8. Affective skills and appropriate demeanor and rapport that relate to professional education and quality patient care.

Candidates for selection to the Athletic Training Education Program will be required to verify that they understand and meet these technical standards or that they believe, with certain accommodations, they can meet the standards.

The Director of Affirmative Action and Multicultural Programs will evaluate a student who states he/she could meet the program’s technical standards with accommodation and confirm that the stated condition qualifies as a disability under applicable laws.

If a student states he/she can meet the technical standards with accommodation, then the University will determine whether it agrees that the student can meet the technical standards with reasonable accommodation; this includes determination as to whether the accommodations requested are reasonable, taking into account whether accommodation would jeopardize clinician/patient safety, or the educational process of the student or the institution, including all coursework, clinical experiences and internships deemed essential to graduation.

In accordance with CAATE “Health and Safety” standard F1 that states:

“A physical examination by a MD/DO/NP/PA must verify that the student is able to meet the physical and mental requirements - with or without reasonable accommodation - of an athletic trainer. This examination must include:

F1.1 a medical history,
F1.2 an immunization review, and
F1.3 evidence of a physical examination that is maintained by the institution in accordance with established confidentiality statutes.”

All athletic training students will be required to comply with the above standard. As a result, those students formally accepted into the ATEP following the ATI experience, will be required to have a physical examination performed by a UD physician, or other appropriate recognized medical professional in accordance with the above provision. Documentation of the physical examination must be filed before beginning your first clinical rotation as part of the HESC257 – Athletic Training Practicum I class. The results of this examination will then be filed with your permanent medical records at the University of Delaware.

CRITERIA FOR ADMISSION

Eight criteria are evaluated as part of the admission process in accepting students into the ATEP.

1. Overall GPA
2. Prerequisite Courses GPA
3. Directed Observation Hours
4. Letters of Recommendation
5. Interview
6. Essay
7. Clinical Evaluations
8. Clinical Competency Evaluation and Palpation Checklist

In evaluating the criteria, different ranking scales (1-5, 1-10, etc) are used. In each case the top student in each criteria would receive the lowest number awarded.

The eight criteria are evaluated in the following manner:

**Overall GPA** – The total number of candidates applying for admission to the program is divided by (10). For example, if twenty students apply, 20 is divided by 10 and the result is 2. In cases where a number falls between whole numbers (i.e. 2.6) the number would either be rounded up or down depending on where it fell on the scale. 2.5 would be rounded upward to 3, whereas 2.4 would be rounded downward to 2. We then rank the overall GPA of the students from high to low. The students would then be placed in groups of 2 with the top two students receiving a score of (1). The next two highest GPAs would receive a score of (2). We continue scoring the students until everyone receives a score.

**Prerequisite Courses GPA** – A total of four classes (HESC155, HESC210, HESC220 and HESC240) are used to calculate the Prerequisite Courses GPA. The candidates’ GPAs are ranked from high to low. The student with the highest GPA receives a score of (1); this number is then multiplied by two (1 X 2 = 2) for a total score of two. We continue scoring the students until everyone receives a score. We weight this criterion more heavily than others because we believe the Prerequisite Courses GPA is a very good predictor for success in our program.

**Directed Observation Hours** – Students are assigned by the Coordinator of the “Athletic Training Interest” program to a variety of clinical venues to gain valuable directed observation experiences. Students who obtain between 100-149 directed observation hours receive a score of three (3). Students who obtain between 150-199 directed observation hours receive a score of three (3). Students who obtain over 200 directed observation hours receive a score of one (1).

**Letters of Recommendation** – Students seeking admission into the ATEP will be asked to provide three letters of recommendation from individuals who can attest for their personality and clinical abilities. Letters of recommendation are evaluated using a ranking scale of (1-5). Each athletic training faculty member reads the three letters of recommendation and gives them a numerical score of between (1-5). A score of one would be considered excellent, while a score of five would be poor. All letters of recommendation are read independently. The scores from all the evaluators are added together and then divided by the total number of evaluators. The averaged score is then recorded on the admission ranking form.

**Interview** – Candidates seeking admission into the ATEP are given a formal interview conducted by the athletic training faculty, in May of each year. Each evaluator uses a standardized form, worth 100 points. At the end of the interview process, a score for each candidate is totaled and then divided by the number of evaluators to get an overall interview score. The student with the best average interview score receives a score of (1), next highest is given a score of (2) and so on until everyone has a score. This number is then multiplied by two (i.e. 1 x 2 = 2, 2 x 2 = 4, etc...). We weight this criterion more heavily than others because we believe the Interview is a very good predictor for success in our program.

**Essay** – The Essay criteria is scored using the same method as used for Letters of Recommendation.

**Clinical Evaluations** – Students are required to complete a series of four clinical rotations during the interest phase of the program. In doing so they are formally evaluated by the Approved Clinical Instructors (“ACI’s”) at each rotation...Clinical performance is critiqued on areas involving both “Skills/Abilities” and “Personal Attributes.” A Likert scale (0-5) is used in this process. The overall evaluation score that combines both “Skills/Abilities” and “Personal Attributes” is averaged across all 4 rotations. Higher evaluation scores are best. The evaluation scores for each student would be ranked ordered from highest to lowest. The Clinical Evaluations are scored using the same criteria used with Overall GPA.

**Clinical Competency Evaluation and Palpation Checklist** – Students are expected to complete the “Clinical Competency Evaluation Checklist” and the “Palpation Checklists” throughout the course of the academic year (September – May). A percentage of the total number of possible “ACI check-offs” will be calculated to determine how many competencies were completed (e.g. 112/156 = .718%). The percentage scores for each student would be ranked ordered from highest to lowest. The Clinical Competency Evaluation and Palpation Checklists are scored using the same criteria used with Overall GPA.

When all the criteria have been scored/ranked, the 8 scores are added together, to make a grand total score. The candidate with the lowest (BEST) grand total score is ranked as the first candidate who will be offered admission to the ATEP.

Acceptance into the ATEP is based upon the stated criteria and the number of available openings in the program. Meeting the minimum admission requirements does not guarantee acceptance into the program. Offers of admission into the ATEP are presented on a competitive basis to those individuals who are most qualified. Students may apply for admission to the ATEP at the end of the spring semester. Acceptance/rejection letters will be mailed to each candidate by July 1st.

Students interested in transferring from another institution or from another major at the University of Delaware must meet University of Delaware and College of Health Sciences transfer requirements and complete the same requirements as freshmen in the “ATHLETIC TRAINING INTEREST – ATI” program.

Students enrolled in the ATEP meet with the Program Director and Clinical Coordinator to plan the clinical education experience. Clinical education experiences are initiated in the first year and required in each succeeding semester of the student’s program and designed to provide the student with sufficient opportunity to develop specific competencies and proficiencies pertaining to the health care of the athlete and those involved in physical activity. The clinical experience provides the student with an opportunity to develop psychomotor, cognitive and affective skills within the context of direct patient care. The skills are identified within the psychomotor and clinical proficiencies aspects of each of the domains included in the document “NATA - Athletic Training Educational Competencies – 3rd Edition.” The development of psychomotor skills represents a significant focus of the student’s clinical experience; ample
opportunity is also provided for development and demonstration of competencies
within the cognitive and the affective aspects of each domain identified in the
above document.

A curricular requirement for all students in the ATEP is the satisfactory completion
of six (6) Practicums. These Practicums (HESC 257, 357, 358, 457, 458, 459)
are offered in sequence over six full semesters and coincide with the athletic
training students’ clinical assignments. Requirements for each of these Practicum
experiences include: (1) Clinical Hours, (2) Clinical Evaluations, (3)
Completion of the Clinical Proficiencies, (4) Performance on the
Clinical Proficiencies, and (5) Attendance at Required
Meetings/Professional Functions, (6) Endorsement of Program
Director and (7) Completion of Practicum Notebooks. The details of
each of these requirements are clarified in the UNIFORM PRACTICUM
GRADING GUIDELINES that are posted on the ATEP web site at
http://www.udel.edu/HNES/AT/Site/clinical_education.html. Clinical
assignments will include the University of Delaware athletic training room(s),
athletic practices, and competitive events; community sports medicine clinics;
physician offices, general medical clinics, high school venues in the greater
Wilmingtom, DE area; and athletic training research environments for a minimum
of three academic years under the direct supervision of a variety of qualified allied
health professionals (Approved Clinical Instructors – ACI and/or Clinical Instructors
– CI). The student will be exposed to upper extremity, lower extremity, equipment
intensive, and general medical experiences of both genders. Athletic training
students are evaluated at the end of each clinical assignment.

Once students are admitted to the program, they are required to maintain the
following minimum standards:

1. cumulative GPA of 2.0;
2. satisfactory completion of the required Practicum sequence;
3. meet the technical standards for admission.

Students who do not maintain the above minimum standards are placed on
probation and are required to correct all deficiencies by the end of the next
semester. Students who do not correct deficiencies are dropped from the
curriculum.

BOARD OF CERTIFICATION (BOC) REQUIREMENTS FOR
CERTIFICATION
In order to qualify as a candidate for the BOC certification examination, an
individual must meet the following requirements:

A. Endorsement of the examination application by the CAATE Accredited
Program Director.
B. Proof of current certification in EMERGENCY CARDIAC CARE. (Note: EMER-
GENCY CARDIAC CARE certification must be current at the time of initial
application and any subsequent exam retake registration).
C. Students who have registered for their last semester or quarter of college are
permitted to apply to take the certification exam prior to graduation provid-
ed all academic and clinical requirements of the CAATE Accredited
Curriculum have been satisfied or will be satisfied in their last semester or
quarter of college.

EXERCISE SCIENCE:
BIOMECHANICS AND MOTOR CONTROL, AND EXERCISE
PHYSIOLOGY CONCENTRATIONS

ADMISSION REQUIREMENTS AND APPLICATION PROCEDURE
Incoming freshmen and transfer students interested in the Exercise Science major
are admitted to “Exercise Science Interest.” After the completion of the freshman
year, students may apply for admission to the Exercise Science major and a
concentration within the major. A faculty admission committee for each
concentration will make decisions on acceptance based on the following criteria:

1. A competitive cumulative GPA. (Students admitted to the major in recent
years have had GPAs of at least 3.0.)
2. Successful completion (minimum grade C) of the following courses: CHEM
103, CHEM 104, BISC 207, BISC 208, and HESC 205.
3. Completion of the appropriate application form for the chosen concentration.
Applications are accepted at the end of each Fall and Spring semester.
4. Students interested in Biomechanics and Motor Control also must have suc-
cessfully completed (minimum grade C) MATH 241.

**CREDITS TO TOTAL A MINIMUM OF .................................. 122**

**HEALTH BEHAVIOR SCIENCE:**

**ADMISSION REQUIREMENTS AND APPLICATION PROCEDURE**

Incoming freshmen and transfer students interested in the Health Behavior Science major are admitted to "Health Behavior Science Interest." After the completion of the freshman year, students may apply for admission to the Health Behavior Science major and a concentration within the major. A faculty admission committee for each concentration will make decisions on acceptance based on the following criteria:

1. Successful completion of General Studies PSYC and SOCI courses, HESC 155, HESC 160, ENGL 110 and a MATH course.
2. A competitive cumulative GPA.
3. Submission of a resume.
4. Completion of the appropriate application form for the chosen concentration, including an essay. Applications are accepted at the end of each Fall and Spring semester.

**ELECTIVES**

After required courses are completed, sufficient elective credits must be taken to meet the minimum credits required for the degree.

**CREDITS TO TOTAL A MINIMUM OF .................................. 120**

**DEGREE:** BACHELOR OF SCIENCE

### UNIVERSITY REQUIREMENTS

**DEGREE: BACHELOR OF SCIENCE**

**MAJOR: SPORT MANAGEMENT**

**Admission Requirements and Application Procedure**

Incoming freshmen and transfer students interested in the sport management major are admitted to "Sport Management Interest." After completion of the freshman year, students may apply for admission to the sport management major. A faculty committee will make decisions on acceptance based on the following criteria:

1. Successful completion (minimum grade of C) of a psychology or sociology course, HESC 202, ENGL 110 and a math course.
3. Completion of the appropriate application form. Applications are accepted at the end of each fall and spring semester.
4. Demonstration of aptitude and commitment and understanding for career orientation.
5. Interview with Sport Management faculty.

**MINOR IN COACHING SCIENCE**

This minor is designed to help students develop an understanding of the instructional, psychological, and management aspects of coaching, as well as a personal philosophy of coaching. Successful completion of the minor prepares students to take the American Sport Education Program (ASEP) Coaching Certification examination.

Students applying for the minor are expected to have had previous athletic experience and must have completed at least one semester of full time study with a minimum GPA of 2.25. The application process involves an interview with the faculty director of the minor. A grade of C- or better in required courses is needed for successful completion of the minor.

**MINOR IN FIGURE SKATING COACHING**

This minor is for students who are highly proficient at figure skating and have an interest in becoming a figure skating instructor or coach. Admission to the minor requires a minimum GPA of 2.0 based on at least 12 credits of coursework and permission of the program director. Applications are accepted at the end of each fall and spring semester. A minimum grade of C- is required for all courses in the minor.

Proof of First Aid certification by either the American Red Cross or the American Heart Association is also required.

**MINOR IN NUTRITION**

A minor in nutrition requires NTDT 200, NTDT 400, NTDT 401 plus 6 credits in Nutrition and Dietetics at the 300-level or higher. A 2.0 GPA is required for admission; a minimum grade of C- is required in all courses in the minor. Note that CHEM 214 and CHEM 216 are necessary prerequisites for NTDT 400 and NTDT 401.

**MINOR IN STRENGTH AND CONDITIONING**

This minor is designed to provide students with in-depth understanding of the theory and practical considerations associated with physical training to enhance strength and conditioning. Students successfully completing the minor will be prepared to take the Strength and Conditioning Specialist Certification examination offered by the National Strength and Conditioning Association.

Students applying for the minor must have completed at least one semester of full time study with a minimum GPA of 2.25. Enrollment in the minor for at least four semesters is necessary due to sequencing of courses. A grade of C- or better in required courses is needed for successful completion of the minor.

### Pre-Professional Track in Occupational Therapy

This program is a cooperative agreement between University of Delaware and Jefferson College of Health Professions of Thomas Jefferson University (TJU). Students can earn both the Bachelor of Science (B.S.) and the Master of Science (M.S.) degrees in five and a half years. Students will spend the first three years at University of Delaware and then proceed to Jefferson College of Health Professions for the final two and a half years of graduate Occupational Therapy coursework. The B.S. in Health Studies from University of Delaware will be awarded after successful completion of the first year at Jefferson College of Health Professions. The M.S. in Occupational Therapy degree from Thomas Jefferson University will be awarded after successful completion of the final year at Jefferson College of Health Professions.

**DEGREE: BACHELOR OF SCIENCE/MASTER OF SCIENCE**

**MAJOR:** HEALTH STUDIES (UNIVERSITY OF DELAWARE)/OCCUPATIONAL THERAPY (THOMAS JEFFERSON UNIVERSITY)

**REQUIREMENTS FOR ADMISSION**

- There are two paths for admission: students who enter the program as freshmen, and current UD students in other majors who enter the program at the end of their freshman year.

**ADMISSION PROCESS FOR FRESHMEN APPLICANTS:**

1. Designate the BS/MS Occupational Therapy option as your choice of major.
2. Your essay or personal statement should discuss your interest in occupational
ADMISSION PROCESS FOR CURRENT UNIVERSITY OF DELAWARE STUDENTS:
1. Total earned credits hours (not including AP credits) of 30 or less by the end of the first year at UD (those with more than 30 credits may be evaluated on an individual basis).
2. Cumulative grade point average of 3.3 or higher
3. A grade of 'C' or better in all prerequisite courses for the programs at TJU
4. Submit a Jefferson College of Health Professions application for admission with an endorsement/letter of recommendation from a designated University of Delaware representative.

ADMISSION DECISIONS
Admissions decisions are made by the University of Delaware-Jefferson Joint Admissions Committee. An average of five candidates will be selected for admission per year.

ARTICULATED CURRICULUM
1. Students in this program will follow a specific 3-year curricular track at University of Delaware that will include the prerequisite coursework needed to transfer into the Entry-level Master’s in Occupational Therapy (EMOT) program at Jefferson.
2. Credits earned during the first year at Jefferson will be counted toward the completion of University of Delaware B.S. degree in Health Studies.
3. Students who have completed the articulated University of Delaware curriculum, have a cumulative grade point average of at least a 3.0, and have earned at least a ‘C’ in all prerequisite coursework, may transfer into the EMOT portion of the program at Thomas Jefferson University.

MEDICAL TECHNOLOGY

Telephone: (302) 831-2849
http://www.udel.edu/medtech
Faculty Listing: http://www.udel.edu/medtech/faculty_profiles.html

The Department of Medical Technology offers a major in Medical Technology, as well as an Honors Degree and Honors courses. Medical Technology (Biomedical Sciences) is clinical laboratory science related to the prevention, diagnosis and therapy of disease. The Medical Technology major is accredited by the National Accrediting Agency for Clinical Laboratory Sciences (8410 West Bryn Mawr Ave., Suite 670, Chicago, IL 60631-3415; telephone 773-714-8880). The four-year B.S. degree curriculum offers an undergraduate professional education designed to prepare students for career entry positions in hospital clinical laboratories and industry as well as graduate study in medical technology and related areas.

During the first two years at the University, students interested in medical technology should take courses in the basic sciences and liberal arts, including prerequisite courses in biology and chemistry. The professional and clinical courses in the third and fourth years include a final period of supervised clinical education in the Christiana Care Health Services and other affiliated institutions. One required Winter Session is included in the B.S. curriculum.

During the clinical rotation period (fall of junior year and winter and spring terms of the senior year), students should plan for the possibility of 1) added expense for transportation and uniforms and 2) added expense for living off-campus at the clinical site for at least a five-week rotation during the senior year when the commuting distance is excessive.

For exceptionally talented and highly motivated students, several special academic opportunities are available. Students may pursue the Honors Degree with Distinction, the Honors Degree, the Degree with Distinction, or undergraduate research through independent study.

Freshmen or transfer students may be admitted to the University with a declared interest in medical technology. Students will be evaluated for admission to the Medical Technology major after completion of the prerequisite courses. Priority will be given to full-time University sophomores.

Class size is limited to 26 medical technology majors, and any interested student should talk with the Department Chair as early as possible.

Eligibility for admission to the junior year of the Medical Technology major will be based on the following criteria:

1. Minimal GPA of 2.0 in first four semesters of coursework.
2. Minimal grade point index of 2.0 computed from specified courses in biological sciences and chemistry, including laboratories: BISC 207, 208, 276, 300, and CHEM 103, 104, 213, and 214-216.
3. Completion of at least 60 credits, including the courses listed above.
4. Within the pool of eligible students, admission to the major courses will be determined by academic achievement. All applicants will be evaluated by the Medical Technology Undergraduate Program Committee.

The following course sequence is recommended. These courses may be subject to change, so it is essential that students meet
regularly with their faculty advisors. Courses taken pass/fail cannot be used to complete major requirements. Pass/fail courses are for free electives only. A minimal grade of C- is required in each MEDT course in the Medical Technology major. In order to meet degree requirements, medical technology majors must have a minimum cumulative GPA of 2.0 to progress in the medical technology sequence. A student who earns a grade lower than C- in a medical technology course must repeat the course and achieve a grade of at least C- before enrolling in any medical technology course which has the prior course as a prerequisite. Students are not permitted to repeat any medical technology course more than once. Further, students who earn a grade lower than C- in more than one medical technology course will not be permitted to continue in the major.

**BREADTH REQUIREMENTS**

[Follow College of Arts and Sciences standards, See pages 95-100.]

**MAJOR REQUIREMENTS**

Writing: (minimum grade C) 1. A second writing course involving significant writing experience including two papers with a combined minimum of 3,000 words to be submitted for extended faculty critique of both composition and content. This course must be taken after completion of 45 credit hours. Appropriate writing courses are normally designated in the semester’s Registration Booklet. (See list of courses approved for second writing requirement, pages 93-95.)

One of the following: 3

- MATH 114 College Mathematics and Statistics (for students who do not intend to continue the study of mathematics)
- MATH 115 Pre-Calculus
- MATH 117 Pre-Calculus for Scientists and Engineers (for students who do not intend to continue the study of mathematics)
- MATH 221 Calculus I
- MATH 241 Analytic Geometry and Calculus A

Successful performance on the college proficiency exam (0 credits awarded).

**CREDITS TO TOTAL A MINIMUM OF 123**

**HONORS BACHELOR OF SCIENCE: MEDICAL TECHNOLOGY**

The recipient must complete:

1. All requirements for the Bachelor of Science degree in Medical Technology.
2. All the University’s generic requirements for the Honors Baccalaureate degree (see page 52).

**NURSING**

Telephone: (302) 831-2193
http://www.udel.edu/nursing
Faculty Listing: http://www.udel.edu/nursing/faculty/faculty.html
e-mail: ud-nursing@udel.edu

The School of Nursing offers a traditional baccalaureate degree program in nursing and an accelerated degree program for those who already hold a baccalaureate degree in another field. There is also a baccalaureate degree program (BRN) for registered nurses with associate degrees or diplomas. Returning nurses may complete the majority of their course work at home or in the worksite in a distance-learning format.

In addition, the School offers a master’s program in nursing, with concentrations in Family Nurse Practitioner, Adult Nurse Practitioner, Neonatal Nurse Practitioner, Health Services Administration, and Clinical Nurse Specialist.

**TRADITIONAL BACHELOR OF SCIENCE IN NURSING PROGRAM**

The traditional Bachelor of Science in Nursing program is designed to develop the knowledge, understanding and skills essential for the practice of professional nursing and to provide the basis for graduate education. The program is fully accredited by the National League for Nursing Accrediting Commission and the Commission for Collegiate Nursing Education. The first year of the program includes foundation courses in the natural, social, and behavioral sciences, and liberal arts. Each subsequent year increases the nursing content and coursework culminates in a senior year of clinical residency in direct care clinical agencies. Clinical resources of the School include healthcare agencies in Delaware, Maryland, Pennsylvania, and New Jersey.

During clinical rotations, students are exposed to many different experiences in a variety of healthcare settings. These include the
major hospitals in New Castle County as well as regional community hospitals, a variety of extended care facilities, independent living facilities, and various community-based providers who offer a range of services across the life span. Students graduate as nurse generalists with experiences in pediatric, maternity, psychiatric, medical-surgical, and community health nursing.

Nursing students are encouraged to participate in the university chapter of the National Student Nurses’ Association and the Black Student Nurses’ Organization. Students who have earned recognition for superior academic achievement may be invited for membership in Beta Xi Chapter of Sigma Theta Tau, the International Honor Society of Nursing. Qualified students may participate in the University’s Honors, undergraduate research, and the Degree with Distinction programs. Research opportunities are available to all undergraduates.

ACCELERATED NURSING DEGREE PROGRAM

The Accelerated Degree Program is a course of study leading to a Bachelor of Science in Nursing and is designed for individuals who have a previously earned degree in another field and would like to pursue a career in nursing. Students in this program must complete all of the non-nursing requirements by transfer credit from their first degree, completion of coursework at the University of Delaware or by transfer of pre-approved equivalent courses from other accredited institutions. The program begins in the fall with two courses which are offered in a web-enhanced format. Students will be required to come to campus for course examinations. If a student is unable to relocate until beginning full time study in January, special testing arrangements may be made on an individual basis. In January, students begin their full time studies with a five week winter session. Coursework continues in the spring semester, followed by a ten week summer session, the fall semester, and concludes with the following January winter session. All pre-requisite science courses must be completed successfully prior to the first fall nursing course.

Students taking courses in an accelerated mode are sometimes out of sequence with on-campus course offerings. In these instances, lecture will be provided via videotape or web, and augmented by group discussion sessions.

Eligibility for this course of study includes the following:
1. An earned baccalaureate degree.
2. GPA of 3.25 or greater
3. Completion of all non-nursing courses prior to second term of the program.

For more information or to make an appointment to discuss the accelerated program, please contact the School at 302-831-1253. A sample curriculum plan may be viewed at the Accelerated Degree Program website (www.udel.edu/nursing/accelerated.html). Students who may need financial assistance in pursuing a second degree should contact the Financial Aid Office at 302-831-1534. Reference books on private financial aid sources are available in libraries or local academic institutions in your community.

POLICIES

In order to meet degree requirements, nursing majors must have a minimum cumulative GPA of 2.0 to progress in the nursing sequence. A student who earns a grade lower than C- in a nursing course must repeat the course and achieve a grade of at least C- before enrolling in a more advanced nursing course.

Students are not permitted to repeat any nursing course more than once. Students who earn a grade lower than C- in more than one nursing course will not be permitted to continue in the program. Students should meet regularly with their advisor to ensure that all requirements are being met.

Students are required to meet all immunization, safety, criminal background checks, drug screenings, and CPR requirements prior to clinical coursework and direct patient care. Additional requirements for the clinical education may be required by the healthcare agency to which a student is assigned. Students are expected to provide their own transportation to all required clinical experiences.

LICENSURE

Graduates are eligible for registered nurse licensure in any state upon satisfactory completion of the National Council Licensure Examination for Registered Nurses (NCLEX-RN). If the examination is passed and licensure granted in one state, application may be made to other states for licensure by endorsement.

HONORS DEGREE IN THE DEPARTMENT OF NURSING

Students can earn an Honors Bachelor of Science Degree in Nursing by completing the following requirements:
1. All requirements for the Bachelor of Science in Nursing Degree
2. All the University’s generic requirements for the Honors Baccalaureate Degree (see page 52)
Courses at the 600 level or higher may be taken for honors credits (with permission from the course instructor and academic advisor).

After required courses are completed, sufficient elective credits must be taken to meet the minimum credits required for the degree.

**CREDITS TO TOTAL A MINIMUM OF ............................... 120**

Many nursing courses are offered once each academic year. Students must complete selected required lower division courses before enrolling in upper division nursing courses. Nursing courses must be taken in sequence unless otherwise specified.

**BACCALAUREATE PROGRAM FOR THE REGISTERED NURSE (BRN)**

The School of Nursing offers a separate program to allow registered nurses to earn a Bachelor of Science in Nursing. The Baccalaureate for the Registered Nurse (BRN) major is an innovative program designed to build on basic nursing knowledge, enhancing nursing practice in an increasingly complex society. The BRN major is offered in a distance learning format to maximize educational opportunities for registered nurses. Licensed registered nurses who are graduates of associate degree or diploma programs may apply for admission to this program. For the RN to MSN program, please see graduate nursing programs.

**Admission Requirements**

A registered nurse who is a graduate of an associate degree or diploma nursing program may apply for admission to the Baccalaureate for the Registered Nurse Major. The applicant should request a distance learning application form or access the application online at http://www.udel.edu/nursing/RN_education.htm and submit the form with fee to the School of Nursing.

**Materials requested are:**

- Completed application form with application fee
- Official transcripts verifying college credits previously earned including verification of graduation. A student who is transferring credit from other institutions must have a 2.5 GPA in all previous college work. The University accepts credits only from those institutions that are fully accredited by the appropriate regional accrediting association. This determination is made only at the time of formal application to the University.
- Current registered nurse license for those licensed in the United States
- Documentation of equivalent to a US RN license for international students plus a minimum score of 600 for the paper test and 250 for the computer based test required for the Test of English as a Foreign Language (TOEFL)

**CRITERIA FOR ENROLLMENT IN BACCALAUREATE FOR THE REGISTERED NURSE (BRN) COURSES:**

The BRN major is concentrated at the junior and senior levels and requires 120 credits for graduation. Before enrollment in any nursing courses, students must meet the following criteria:

- Official admission to the BRN major
- Completion of all science credits required for the degree. The remaining non-nursing credits can be taken at any time in the program; however students are strongly encouraged to complete non-nursing requirements prior to enrollment in nursing courses.
- Submission and approval of:
  - Nursing Employment Verification Form
  - The process must be completed before enrollment in the student’s first nursing course.
  - Updated immunization record to Student Health and the School
of Nursing
- Current RN license

POLICIES
In order to meet degree requirements, nursing majors must have a minimum cumulative GPA of 2.0 to progress in the nursing sequence. A student who earns a grade lower than C- in a nursing course must repeat the course and achieve a grade of at least C- before enrolling in a more advanced nursing course.

Students are not permitted to repeat any nursing course more than once. Students who earn a grade lower than C- in more than one nursing course will not be permitted to continue in the program. Students should have regular contact with their advisor to ensure that all requirements are being met.

Students are required to meet all immunization, safety, criminal background checks, drug screenings, and CPR requirements prior to clinical coursework and direct patient care. Additional requirements for the clinical education may be required by the healthcare agency to which a student is assigned. Students are expected to provide their own transportation to all required clinical experiences.

ACADEMIC PROGRESSION
The program is designed to facilitate timely progression for nurses who are continuing their education while employed full or part-time. There is no time limit for completion of prerequisite courses; however upon enrollment in the first nursing course, the program must be completed within a five-year period. It is possible to complete the required nursing courses in a 12-month period.
