CORRECTIONS

MONTH: NOVEMBER 1957

MARYLAND

Climatological Data Table:
Easton Police Barracks

Correct as follows: monthly precipitation should be missing; departure from long-term average, missing; no. of days with .10 or more, missing; .50 or more, missing.

MONTH: OCTOBER, NOVEMBER AND DECEMBER 1959

Climatological Data Table:
Edgewood Arsenal

Delete all precipitation data for October, November and December. See "Corrected Data" page 173 for corrected values.

Daily Precipitation Table:
Edgewood Arsenal

Delete all precipitation data for October, November and December. See "Corrected Data" page 174 for corrected values.

MONTH: DECEMBER 1959

Delayed Data (Page 165):
Loch Raven Dam

Daily precipitation record published as March and April 1959 should be identified as March and April 1957.

Delayed Data (Page 166):
Picardy

Daily temperature record published as March 1959 should be identified as March 1957.

MONTH: OCTOBER, NOVEMBER AND DECEMBER 1959

Index:
Edgewood Arsenal

Observation time of precipitation for October, November and December should be midnight.

MONTH: APRIL 1960

Climatological Data Table:
Frederick WB Airport

Correct as follows: total precipitation should be 2.58, departure from long-term average -.92; days with .10 or more, 5. Northern Central Division precipitation average should be 3.46; departure from long-term average -.13.

Daily Precipitation Table:
Frederick WB Airport

Correct as follows: 30th, 0; monthly total 2.58.

MONTH: MAY 1960

Climatological Data Table:
Frederick WB Airport

Correct as follows: total precipitation should be 4.61; departure from long-term average +1.01; days with .10 or more, 8. Northern Central Division precipitation average should be 6.45, departure from long-term average +2.13.

MONTH: JUNE 1960

Corrections (page 92):
Loch Raven Dam

Station name, Lock Raven Dam, should read Loch Raven Dam.

Corrected Data:
Owings Ferry Landing

Correction published in Climatological Data Table July 1958 (page 90) and Daily Precipitation Table, May 1958 (page 91), Owens Ferry Landing should read Owings Ferry Landing.

Corrections (page 92):
Picardy

Station name, Picardy Dam should read Picardy.

Corrected Data (page 91).
Pikesville Pol Brks

Under "Total Precipitation and Departures From Long-Term Means, Annual 1957", annual total should be E40.52.

CORRECTIONS (Continued)

MONTH: NOVEMBER 1957

DELAWARE

Climatological Data Table:
Middletown 2 S

Correct as follows: total precipitation should be missing; days with .10 or more, missing; .50 or more missing.

Daily Precipitation Table:
Middletown 2 S

Correct as follows: 27th, 0.00; 28th, .02; 29th missing; 30th, missing; total, missing.

MONTH: FEBRUARY, MARCH, APRIL AND MAY

Daily Precipitation Table:
Wilmington City Hall

Delete all data for months of February, March, April and May 1958.

ANNUAL 1958

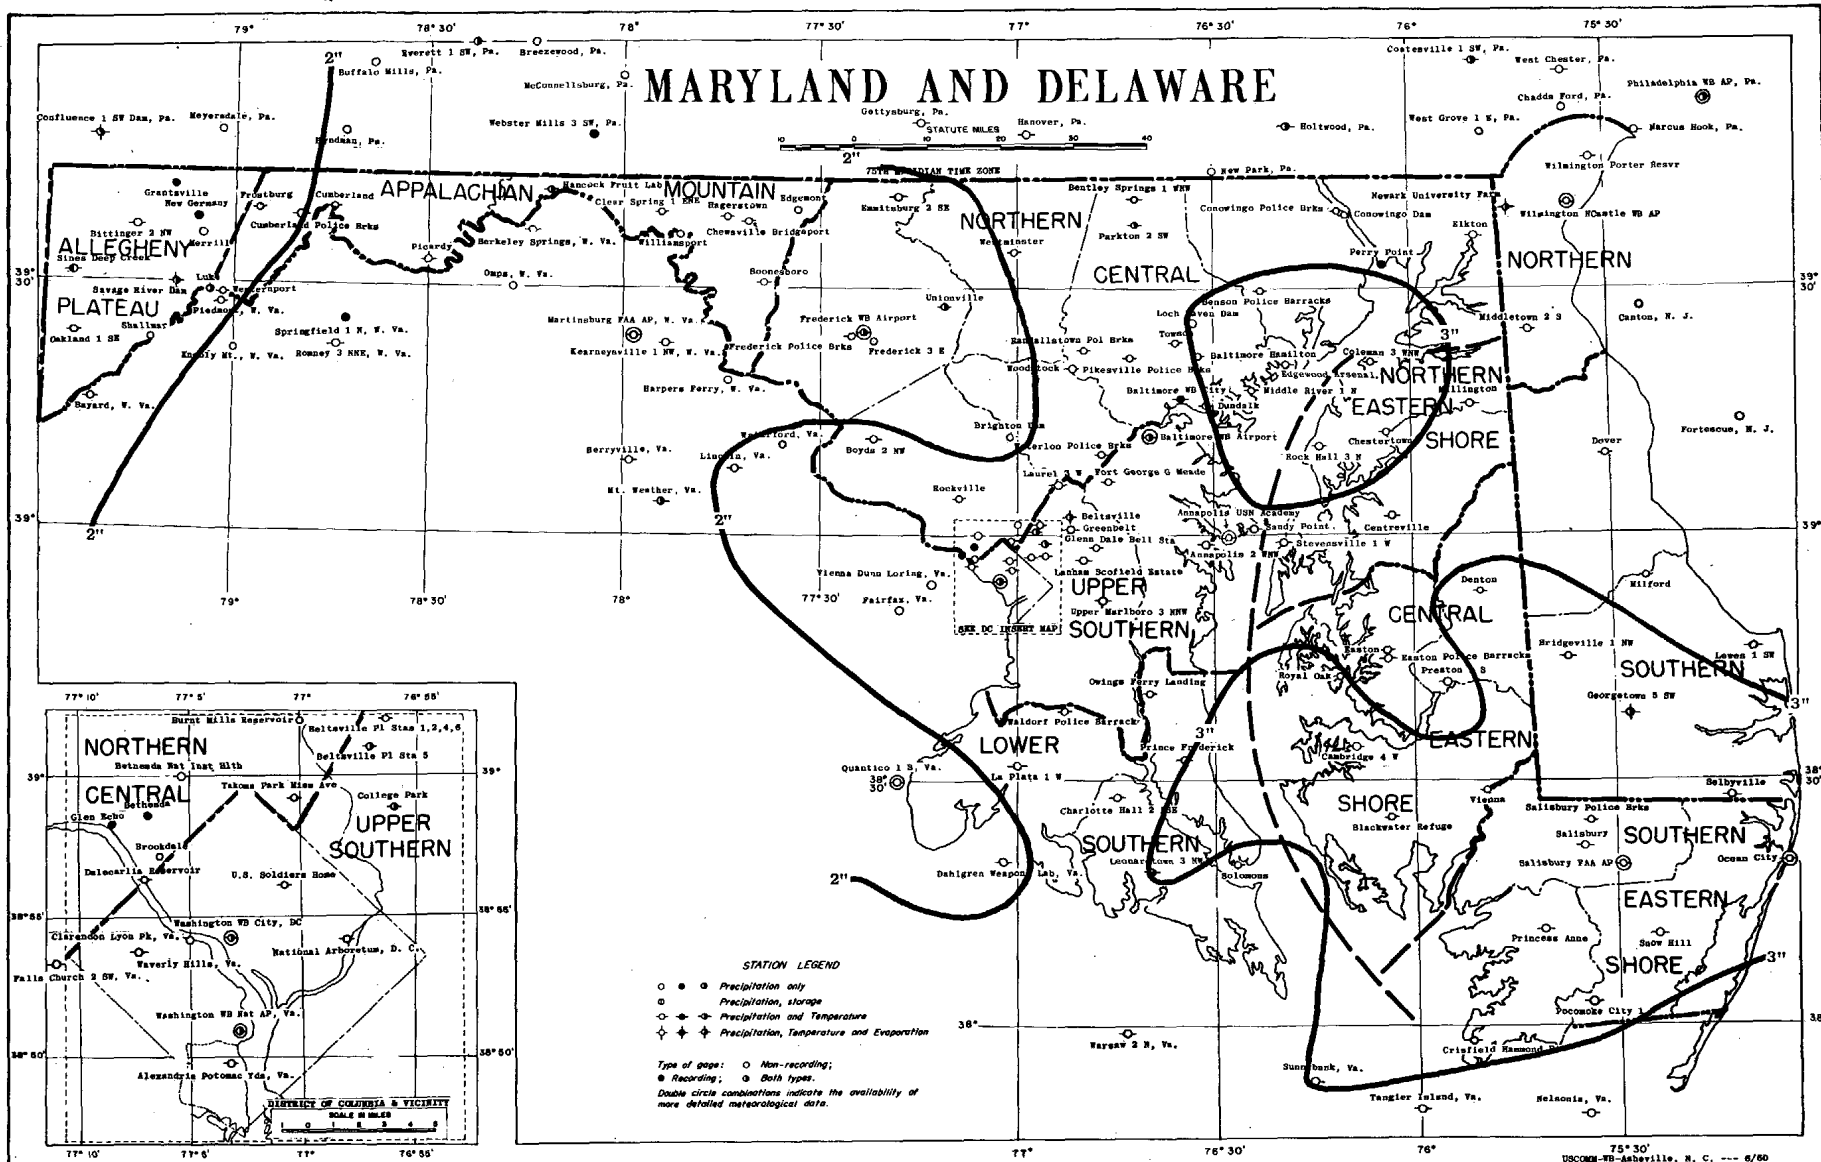

Total Precipitation and Departure Table:
Wilmington City Hall

Delete precipitation totals for March, April and May.

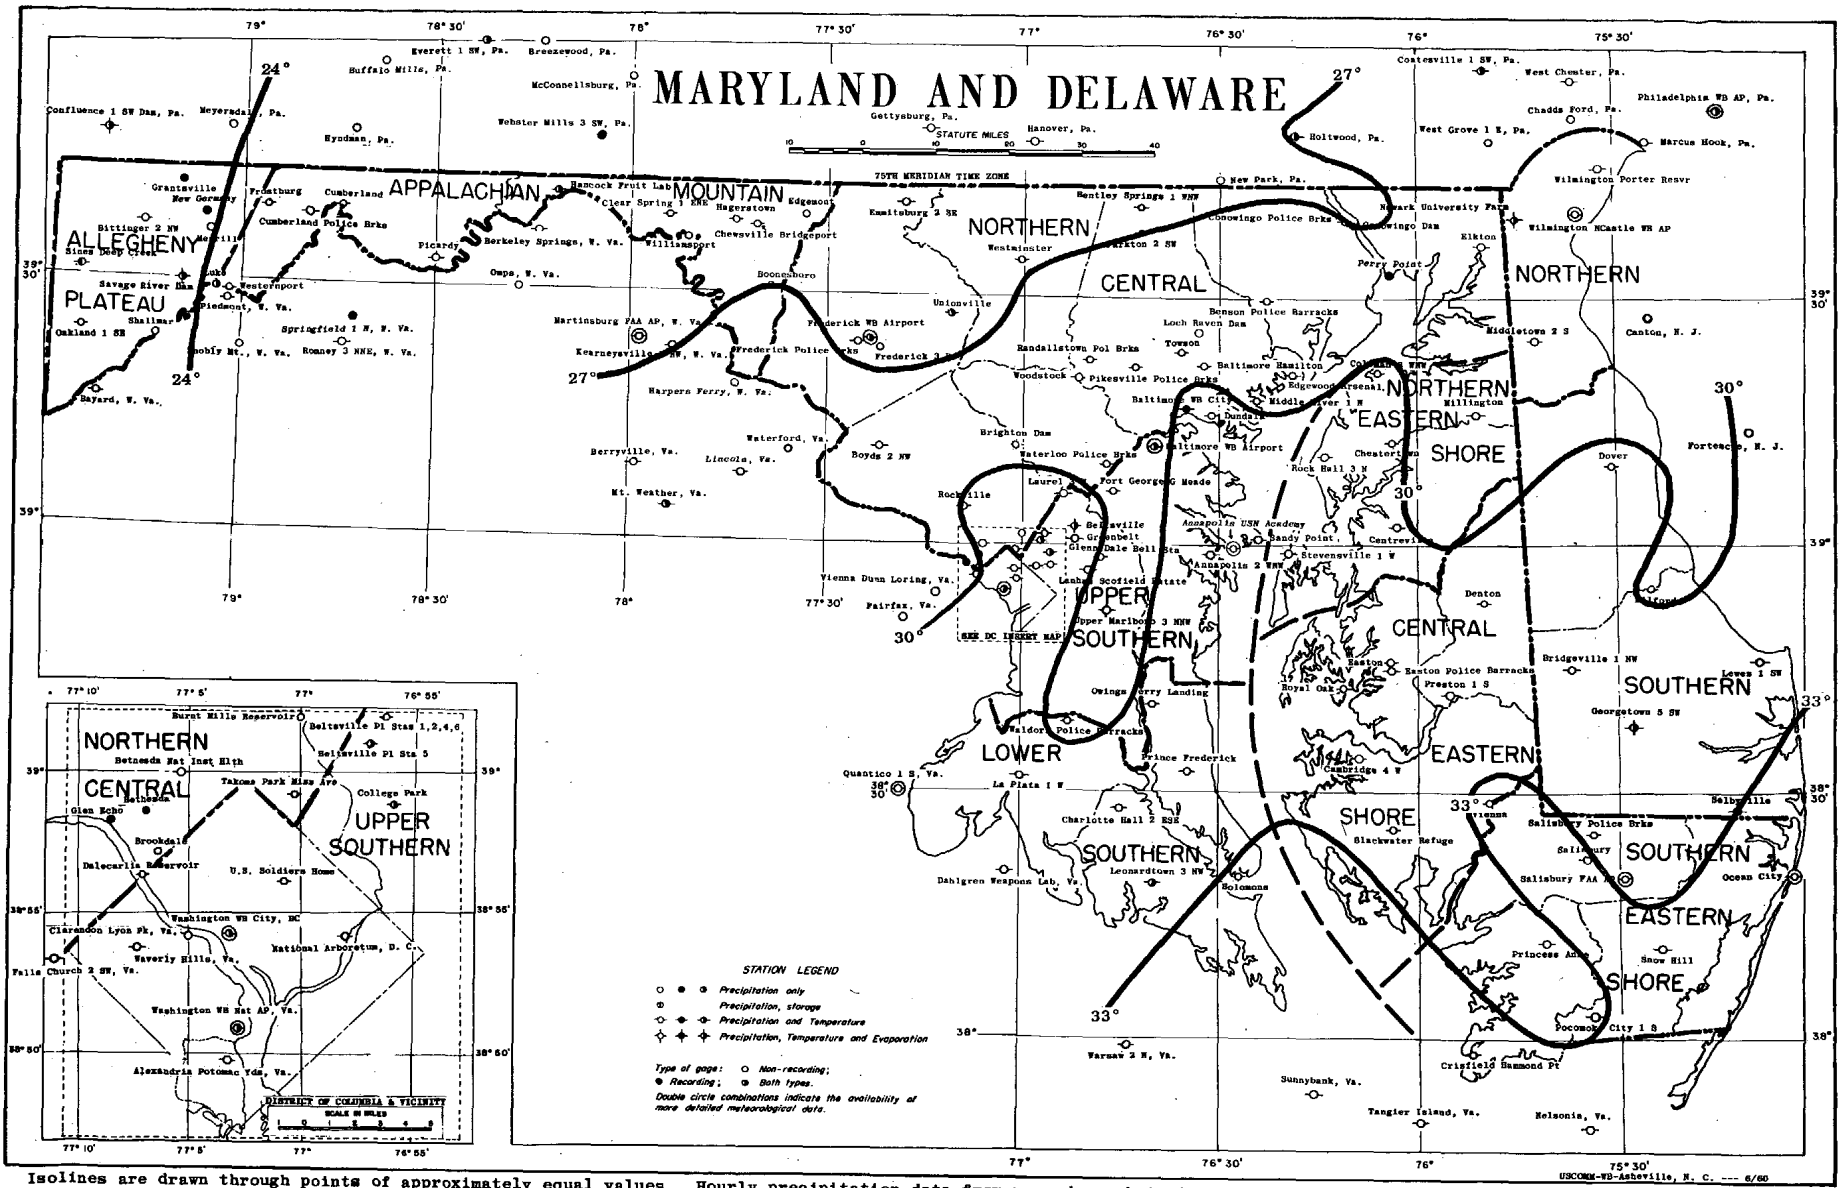

MONTH: JUNE 1960

Corrections (page 92):
Milford

Correction to annual 1958, precipitation table, December total should be E2.29.

Isolines are drawn through points of approximately equal values. Hourly precipitation data from recorder substations will be available in the publication "Hourly Precipitation Data". Caution advised in using these maps for interpolation, particularly in mountainous areas.

AVERAGE TEMPERATURE

MARYLAND AND DELAWARE
DECEMBER 1980

Isotherms are drawn through points of approximately equal values. Hourly precipitation data from recorder substations will be available in the publication "Hourly Precipitation Data". Caution advised in using these maps for interpolation, particularly in mountainous areas.

REFERENCE NOTES

Additional information regarding the climate of Maryland and Delaware may be obtained by writing to the State Climatologist at Weather Bureau Airport Station, Friendship International Airport, Baltimore, Maryland, or to any Weather Bureau Office near you.

Figures and letters following the station name, such as 12 SSW, indicate distance in miles and direction from the post office.

Delayed data and corrections will be carried only in the June and December issues of this bulletin.

Monthly and seasonal snowfall and heating degree days for the preceding 12 months will be carried in the June issue of this bulletin.

Stations appearing in the Index, but for which data are not listed in the tables, are either missing or received too late to be included in this issue.

Divisions, as used in "Climatological Data" Table and on the maps, became effective with data for October 1956.

Unless otherwise indicated, dimensional units used in this bulletin are: Temperature in °F, precipitation and evaporation in inches and wind movement in miles. Monthly degree day totals are the sums of the negative departures of average daily temperatures from 65°F.

Evaporation is measured in the standard Weather Bureau type pan of 4-foot diameter unless otherwise shown by footnote following the "Evaporation and Wind" Table. Max and Min in "Evaporation and Wind" Table refer to extremes of temperature of water in pan as recorded during 24 hours ending at time of observation.

Long-term means for full-time stations (Those shown in the Station Index as "U. S. Weather Bureau") are based on the period 1921-1950, adjusted to represent observations taken at the present location. Long-term means for all stations except full-time Weather Bureau stations are based on the period 1931-1955.

Water equivalent values published in the "Snowfall and Snow on Ground" Table are the water equivalent of snow, sleet, or ice on the ground. Samples for obtaining measurements are taken from different points for successive observations; consequently occasional drifting and other causes of local variability in the snowpack may result in apparent inconsistencies in the record.

Entries of snowfall in the "Climatological Data" Table and the "Snowfall and Snow on Ground" Table, and in the "Seasonal Snowfall" Table include snow and sleet. Entries of snow on ground include snow, sleet and ice.

Data in the "Daily Precipitation" Table; "Daily Temperature" Table; and "Evaporation and Wind" Table, and snowfall in the "Snowfall and Snow on Ground" Table, when published, are for the 24 hours ending at time of observation. The Station Index shows observation times in local standard time. During the summer months some observers take the observations on daylight saving time.

Snow on ground in the "Snowfall and Snow on Ground" Table is at observation time for all except Weather Bureau and FAA stations. For these stations snow on ground values are at 7:00 a.m., E.S.T.

In the Station Index the letters C, G, H, and J in the "Special" column under the heading "Observation Time and Tables", indicate the following:

- C Recording Rain Gage Station. Hourly precipitation values are processed for special purposes, and are published later in "Hourly Precipitation Data" Bulletin.
- G "Soil Temperature" Table.
- H "Snowfall and Snow on Ground" Table. Omission of data in any month indicates no snowfall and/or snow on ground in that month.
- J "Supplemental Data" Table.

OTHER REFERENCE NOTES

No record in the "Climatological Data" Table and the "Daily Temperature" Table is indicated by no entry.

Interpolated values for monthly precipitation totals may be found in the annual issue of this publication.

- No record in the "Supplemental Data" Table; "Daily Precipitation" Table; "Evaporation and Wind" Table; "Snowfall and Snow on Ground" Table; and the Station Index.
- + And also on an earlier date or dates.
- ++ Fastest observed one minute wind speed. This station is not equipped with automatic wind instruments.
- * Amount included in following measurement, time distribution unknown.
- # Thermometers are generally exposed in a shelter located a few feet above sod-covered ground; however, the reference indicates that the thermometers are exposed in a shelter located on the roof of a building.
- // Gage is equipped with a windshield.
- AR This entry in time of observation column in Station Index means after rain.
- B Adjusted to a full month.
- D Water equivalent of snowfall wholly or partly estimated, using a ratio of 1 inch water equivalent to every 10 inches of new snowfall.
- M One or more days of record missing; if average value is entered, less than 10 days record is missing. See "Daily Temperature" Table for detailed daily record. Degree day data, if carried for this station, have been adjusted to represent the value for a full month.
- R Amounts from recording gage. (These amounts are essentially accurate but may vary slightly from the amounts to be published later in Hourly Precipitation Data.)
- SS This entry in time of observation column in Station Index means observation made near sunset.
- T Trace, an amount too small to measure.
- V Includes total for previous month.
- X Observation time is 1:00 a.m., E.S.T. of the following day.
- VAR This entry in time of observation column in Station Index means variable.

General weather conditions in the U. S. for each month are described in the publications MONTHLY WEATHER REVIEW, MONTHLY CLIMATOLOGICAL DATA-NATIONAL SUMMARY, and STORM DATA, all of which may be obtained from the Superintendent of Documents, Government Printing Office, Washington 25, D. C.

Information concerning the history of changes in locations, elevations, exposure, etc., of substations through 1955 may be found in the publication "Substation History" for this state. That publication may be obtained from the Superintendent of Documents, Government Printing Office, Washington 25, D. C. for 25 cents. Similar information for regular Weather Bureau stations may be found in the latest annual issue of Local Climatological Data for the respective stations, obtained as indicated above, price 15 cents.

Subscription Price: 20 cents per copy, monthly and annual; \$2.50 per year. (Yearly subscription includes the Annual Summary). Checks and money orders should be made payable to the Superintendent of Documents. Remittance and correspondence regarding subscriptions should be sent to the Superintendent of Documents, Government Printing Office, Washington 25, D. C.
