January 7th 1946

Please find enclosed herewith a cutting of the "Daily Mirror", January 1st 1946, which certainly will interest you.

I hope this forecast will come true, as you will be able to do excellent work. Naturally good and competent people around you are necessary. As Walter Lippman says: a 100,000 at $100,000 each. But many can be found at much less than $100,000 and much better men than the average of the 100,000. I could name several who could carry a good deal of the load. It is worthwhile doing, the future prosperity and well-being of the world is at stake.

D.N. Heineman
