Faithfulness to Public Trust
this book is
Dedicated
to
His Excellency, Preston Lea
Governor of Delaware
and Ex-Officio Trustee
of Delaware College
FOREWORD

O DOUBT you have heard the story of the old negro, who, after being convicted of theft, said he was very sorry that he stole the chicken, and, upon being asked how long he had been sorry, replied: “Since I was caught.” Well, we are somewhat like that negro: we do not intend to be sorry for anything that is or is not in this book until we are “caught.” Contrary to custom, we make no excuses: we are neither “painfully aware of the book’s many shortcomings” nor is the book “the result of greatly limited time’s labor”—we have done our best.

We have endeavored not only to picture the awe-inspiring deeds and misdeeds, the wonderful eloquence, and the valorant athletic feats of the members of the Class of 1907, but to accurately portray student life at Delaware and to describe our various student organizations. Everything has been written in a spirit of good fellowship; but, if perchance, some one finds grounds for offense—gets sore—the editors will be pleased to meet them at 1 A. M. on June 25, behind the gymnasium—“first come, first served.”

To all who have helped to make this book what it is we give our sincerest thanks; to the Class of 1909 we express the wish that it and every other succeeding class publish a Derelict; and to the brave men and comely maidens that buyeth a copy the editors bestow their best wishes, and we hope that this book will serve to arouse pleasant memories of the Class of 1907 and its friends long after we have disappeared from the campus of Dear Old Delaware.

Manlove Hayes,
Samuel H. Messick.

COMMITTEE ON INSTRUCTION AND DISCIPLINE.
Manlove Hayes, Chairman.
Charles B. Evans,
Dr. George W. Marshall,
J. Harvey Whiteman,
James Hossinger.
Delaware College is situated at Newark, a quiet, well-ordered, and hospitable village of fifteen hundred inhabitants in the northwestern part of the State. Newark is connected with Philadelphia, Wilmington, Baltimore and Washington by the Pennsylvania, and Baltimore and Ohio railroads, and there are few points in Delaware or in the Peninsular counties of Maryland distant from the village more than four hours by rail. The region about Newark, is one of the most healthful and beautiful on the Atlantic slope. The site of the College, near the center of the town, is one of unusual charm. The village has a supply of excellent water and is lighted by electricity.

Delaware College was chartered in 1833 by Act of the Delaware Legislature, and the doors of the College were first opened to students in May of the following year. The College had been doing for a quarter of a century an important work, not only for Delaware, but as well for neighboring parts of Pennsylvania and Maryland, when by a succession of misfortunes, she was forced in the Spring of 1859 to close her doors.

Eleven years later the College was resuscitated, having meanwhile been designated by Act of the Delaware Legislature as beneficiary under the Act of Congress apportioning to each of the several States large areas of public lands to form the basis of endowments for Colleges especially devoted to the teaching of Agriculture and the Mechanic Arts, and Military Tactics. This Act of Congress, commonly known as the “Morrill Bill,” from its originator, Senator Morrill of Vermont, declares that the Colleges made beneficiary under its provisions shall
have as their leading object, "without excluding other scientific and classical studies and including Military Tactics, to teach such branches of learning as are related to Agriculture and the Mechanic Arts in order to promote the liberal and practical education of the industrial classes in the several pursuits and professions of life." In consideration of the designation and establishment of Delaware College as the institution to be provided by the State of Delaware in accordance with the provisions of the Act of Congress in question, "a joint and equal interest in the grounds, buildings, libraries and vested funds of the College proper" was conveyed to the State of Delaware, and equal representation upon the Board of Trustees was given the State.

The Board of Trustees consists of fifteen members, representing the original Board, and fifteen members on the part of the State appointed by the Governor, five from each of the three counties. The Governor of the State and the President of the College are members ex-officio.

In 1888, by Act of the Delaware Legislature, the Delaware College Agricultural Experiment Station was established as a department of the College under the provisions of an Act of Congress approved March 2, 1887, commonly known as the "Hatch Bill," appropriating $15,000 annually for the purpose of "acquiring and diffusing among the people of the United States useful and practical information on subjects connected with agriculture and to promote scientific investigation and experiment respecting the principles and applications of Agricultural Science under direction of the College or Colleges established in each of the States and Territories" in accordance with the provisions of the "Morrill Bill."

Delaware College is beneficiary also under a further Act of Congress, known as the "New Morrill Bill," approved August 20, 1890, which appropriated for one year then current $15,000 to each State for the "Land Grant Colleges" and provided for the increase of the appropriation by $1,000 each year until it should reach $25,000 a year. Delaware College receives annually four-fifths of this appropriation, one-fifth, in accordance with the provisions of the bill, being applied to the maintenance and support of the College at Dover for the education of colored students.

The appropriations provided for in this Act are to be applied "to instruction in Agriculture, the Mechanic Arts, the English Language and the various branches of mathematical, physical, natural and economic sciences with special reference to their applications in the industries of life, and to the facilities for such instruction."

Stimulated by the increased income provided by this last Act, Delaware College has, within the past few years, enlarged her corps of instructors and greatly increased her equipment of apparatus and appliances, so that she is now vastly better enabled than ever before in her whole history to perform her appointed duty.

The buildings of the College, situated in an ample and beautiful campus, shaded by trees as old as the institution itself, consist of the recently improved Dormitory, a large brick structure originally the sole College building for all purposes and still occupied, not only for lodgings, but also for laboratories, the old library, the literary societies and recitation rooms; Recitation Hall, a handsome brick building erected by the State in 1891; the wood-working and machine shop, where are housed machinery and apparatus for a thorough practical course of instruction in the mechanic arts.
The Experiment Station occupies a building on the College grounds, which contains offices, libraries and laboratories of the station workers. The Station has also a green-house, with laboratory adjoining, in the rear campus, and several buildings used for storage and other purposes in the conduct of the various lines of experimental work.

A considerable part of the rear campus is occupied as an athletic field, which affords excellent facilities for out-door sports and games.

The College buildings are heated by steam and lighted by electricity and are supplied with water by the town water works.

The sum of $25,000 appropriated by the Delaware Legislature in the year 1901 for rebuilding and repairs at Delaware College, was expended mainly in repairing and enlarging the dormitory. The building was replastered throughout, and the floors were made secure by the introduction of new timbers. The sleeping rooms were made comfortable and attractive, and the Oratory was remodeled and redecorated so that it is now one of the handsomest auditoriums in the State. New fronts, corresponding in style with the Doric portico of the main entrance, were placed on the wings, and at right angles to the wings and parallel to the main structure were built three-story extensions. These improvements have increased the number of sleeping rooms, and furnished handsome apartments for recitation rooms and laboratories.

In 1905 the Delaware Legislature appropriated the sum of $15,000 to Delaware College which has been applied to the building of a gymnasium. In the basement of this building are found shower baths, plunge baths and a large swimming pool, with lockers for the use of the students. The main floor serves as a drill hall and gymnasium, and contains a running track, suspended from the roof trusses.

The Legislature of 1903 appropriated $15,000, payable in two equal annual
instalments, and with the instalment already received the workshops have been greatly enlarged and are now entirely adequate for the present needs of the College.

Tuition is free to all students from the State of Delaware, so that the College constitutes a part of our system of free public instruction. She places within reach of the young men of the State a thorough collegiate training with no other cost than that of living and the provision of necessary books and a few incon siderable fees to cover expenses incurred by the institution. Her work is laid out upon broad lines, and the culture of liberal learning and the practical usefulness of the applied sciences are equally emphasized in her scheme of education. While, in pursuance of the special aims of her organization, stress is laid upon those departments which build up good citizenship and useful manhood, the place so wisely provided in the foundation of the "Land Grant" Colleges is given to the refining graces and amenities of the older learning.

CORNER IN THE CHEMICAL LABORATORY
