Dear George:

My attention was drawn to the enclosed article published in the Journal of Commerce. It seems that the question of electric power is the same all over the world.

I discussed this whole affair with Abs on several occasions and am glad that he thought it useful to draw the attention of the students of the University of Cologne to the evergrowing seriousness of the power situation in the world.

Probably he spoke in the same aula I had some 20 years ago, when I delivered my speech on the United States of Europe.

I hope I will be able to go to Mexico in the beginning of June, stay there for a week or two, and be back early enough in New York to meet you here.

Bachrach flew to Brussels with Patillo and will be back Saturday. I am expecting Wilmers and Diplock, a London lawyer, on Sunday for the continuation of the Barcelona discussions.

I enclose also copy of a speech, I intended to deliver at the Annual Meeting in Brussels, but which was read instead by Wilmers, as well as a copy of an article written by Camille Huysmans. I wrote Camille; please find enclosed copy of my letter to him.

I think I will have to go to Washington this week.

I believe Harriman is taking his election as President very seriously. I had a long talk the other day with one of his close friends, Samuel David Berger, who was for many years attached to the London ~~Embassy~~ and is now a very close advisor to Harriman. Probably you will have noticed that Harriman said in his last speech that he can beat Eisenhower.

I have many, many things to tell you, some of which are of great importance.

Cordially yours,

Enclosures

D. N. Heineman

P.S. I also enclose copy of a letter which I have written to Camille Huysmans as well as copy of his article about my address to the shareholders' meeting; also copy of a letter I wrote to-day to Mr. Abs. The enclosed reprint from Standard Oil of New Jersey will interest you.
