Dear Connie -

Today we have been here for ten days and return to New City tomorrow. An old friend of ours, Kate Mawe, from New Orleans arrived about 10 days ago for a month stay with us, and we have immediately to accommodate the bed and other friends with us and it is very pleasant. I want to learn to get the usual vaccine shot for the urinary + intestinal infection and aside from that have hardly left the grounds of the house. The weather has been magnificent.

The rains are soon and it has been the first rainy season in many years. We are going to have a bad year for power, and every effort is being made to have the engines that have stood by plants to just them into operation. All these steady plants have died oil and that is already important detail,
As it means bigger imports of diesel, the electricity and oil problems, which are said to be so long to solve by wise and round measures, are going to become more seriously pressing, and neither problem can be solved by improvisation.

With the ground fielded with oil in certain areas, imported about 1,000,000,000 of oil last year, and with all these resources, it is rapidly shifting into the position of Brazil and Argentina. The uncertain situation about electric power is a very disturbing factor. Political efforts economic relations in many countries, but in the Latin Countries it is worse.

The third point of achieving stability is giving power into the hands of a man who is ready next year, but the uncertain attitude of the government towards our Company,
I'm feeling better and the rest of the household is much better, and the nervousness is less. The treatment by my own doctor certainly has helped, but I have lost weight and feel as weak as usual. The doctor recently made tests for tuberculosis (myer's test) and the results were positive. I am taking treatment for it.
My correspondence has suffered for theirs field is inclined to any effort. In any event, I think they are helping me more than they did at the ladies clinic. I suppose
then they are more accustomed to look for tropical diseases.

Marvin has been well, and it is remarkable what she does. Now she
does it, I don’t understand. She is
much like her mother, she has the

The recent developments in the
satellite have worried our people
and what we have needed for years,
may grow out of this, that is,
elimination of the rival’s bluster. It
doesn’t seem an air force, or some
real measure of collaboration. Some
one of those who know how deep seated, dangerous, these problems have been, there is much for us to think of these days, and in many ways we are not prepared for the responsibilities we bear as a country, and I am slow to criticize, the I see the deficiencies.

The conduct of the one and political party here has been announced. It is itezy Matter the problem of our climate. He is supposed to be a model of the good man. Time will tell for this country has serious problems ahead of it. The president of the U.S. as he has more power so much than the president of the U.S. - no decision is made without him, so practically the whole trend of developments in the country is very firm.

bends on him. Let us hope for the best.

Wishing you much love and good wishes to you all. Sam a grace Katz are
here, and read their best wishes to you all.

I miss talking with you, had letters are
no substitute. I wish you to write to

from. All our love,

Truly, truly

Yours,

At least as the one friend Adamson has
finally had to put his figure in his
successor, and from what I know, I
would say that he could do.
