Aug 12, 1958

Dear Terri-

I have just come back from my daily visit to the doctors. The disability continues but the doctor seems to think it is better. It is better, I believe, in a measure. Of course, I still have weight. I have to take so many and bitter by mouth - and so many injections. I practically don't leave the house. I could go to the doctor in the morning and do go to Cuernavaca for the weekend. Mexico is well but all of us has to have a lot of dental work done, and for the next two three weeks next time to go to the dental for one hour every morning.

There is a good deal of sadness in Mexico these visits. Many people have disability. They all have to go twice a week. The heavy rains but we have had heavy rains before in my time here, and
have not known so much illness.

I keep in touch with my doctor in Houston
and he tells me if I want to Houston, he
would follow the same treatment by getting here, so
I have to keep the sted it'd, it's four weeks

Today,

I see a good many of my The man I mean my
friends and keep in touch with the situation here.
Things still look good on the surface, but
there are many problems that haven't been
addressed and they will just come to the
as the president takes on in Dec 1,
and while he is in many ways a good
man, no one can tell the things need
to be handled.

The trial is having a difficult time
and I don't see how the problems are
going to be solved. The agreement is in
Belgium under the cover to wait another
in two or three weeks. Merkin is spending
their winter in New York.

We have so many interruptions in the
current in California that there decided
to put in a 15 KV auxiliary plant that
will go into service automatically when
the Company has go out. It runs either a
large and for a branch alone, but we’ve
made tests for about 2 weeks and a
12 KV plant to run will go. I found out
and we’re putting in 15 KV to make
the situation more secure. I paid put in
a gasoline motor, instead of diesel, for it
is less noisy, easier to maintain, and
gasoline will be easier to be able to get.
and diesel oil is becoming more and more
difficult for private persons to get.
Merkin is importing large quantities of
diesel oil now.
I need to have at least one house where
we can be sure of privacy.

The wireless bundle has my properties sold
us, and the Mexican government, they will
be no declining loans for us or for the
public commission until the government gives
the private companies a fair return, according
to its laws, on the investment.

The news have been very heavy so
far, and pretty general are the reports.
That is, at least one favorable element.

I know, however, my letter may not
be interesting, for it is impossible to
comprehend in the development lines treated
without going into pages and pages.
I follow things as closely as I
can in the big picture, and as
1389

Ickeland in Latin America. How wise we will be at home in these problems involving Latin America. I am not sure. There are too many amateurs in the picture, including

Dwight Eisenhower.

I have a letter from Jerry yesterday, and he tells me you are all well. Marim says she much love to you all.

Always faithfully,
