Dear Bennie,

I appreciated your calling on the ship at the hospital in Houston. They are able to arrest the bleeding and the appendix above the lungs on the left, but there have not actually disappeared. I'm not taking any more anti-inflammatories. They think it should build up and possibly to the lungs.

I'm very thin - much less than I have been for many years. What is not good for many years. That is not good for my health because when I'm fully well, I'm well. The doctor in Houston says the 6 weeks of rest the doctor in Houston says I need is a doctor in Houston says I need. I should gain enough weight. He has maintained it very much need. The doctor in Houston says it will be less difficult to regain my strength than after the big
Stomach operation. I have to eat it slowly, and I eat three meals a day and all down in small meals of this kind, so the bugs get up into the little stomach, as they become inflamed and the food won't move at like a pace. All the way it means a slower kind of life, this getting back through my system, and if I go out into my climate and if I don't obey the weather, I don't stay for more than an hour.

We are having torrential rains almost all over Mexico. The dams of the company have plenty water, and at certain the water come so that the plant was threatened
but for the present the damage is over there. In the first time in years, we are not going to Casanare for the work and we had to cancel so pleased

there.

I'm staying in an 18 RV trailer at the base in Casanare - a Hercules (American) ground support & a Swiss generator. It worked automatically. We have so many interruptions and such low voltage that it has made the work ends at Casanare less enjoyable. It was nice a few months, but at my age 1 think I can think of

my comfort – rather than what we may learn when we did it even though
and freezes. We won't know what the policy of the government toward the private companies will be until the new President comes in on Dec. 1, and in my opinion for some time later. There are all sorts of problems accumulating in the country and the new President will have his hands full. There is the real Communist party in the U.S. It is trying to pull in the Communists from the outside. There is this very active and at times loud and pro-like disorder which has not been suppressed on our map at home.
Monogram was due back here a week ago but on arriving in New York his wife had to have an operation, for I do not know what, and before he left me this morning Monogram is supposed to be Monday.

I do not venture out for walks these days but we are having a lunch the ladies in the office today at 1:30. Industrial to discuss what can be done towards some financing in Boston. The motion picture trend all over the world is really fantastic and unreal and can look to be good for any one. It's
Mean that we shouldn't do some
financing in prices — that is essential.
It depends on the way it is done.

Things have really taken a turn
for the better in Argentina if the
Government is strong enough to send
the new program or oil and
the electricity companies. The concern
is to make sure the Code is not
invalidated but is for better than anything
that seemed possible a year ago.

War is being a big decided
job done and has been to the
decided! 16 times in 3 weeks
I have two more weeks to go.
The job is done.

I came across an address which Andrea suggested make it a cotton meeting at Libby in 1957 as well as to get a photo taken. Like it as it is really interesting and would like to send it to you. The book is not available as it was only a report of a cotton meeting.

I got the book you sent me and am getting a lot of pleasure out of it.

I wish we lived closer and could see each other every day. There is so much to talk about.
I returned from hospital Sept 12th and we went straight to
Connaugton and stayed until Thursday the 17th. The weather was miserable.
I like to see rain because it
means K.V. h. if it falls in the
right places but we have had only
no rain for months.

Their love in last I gave在职
to you can see the family. Again
thanks for the phone call at the

Love, Always faithfully

Henry
