Dear Sonnie,

I have just finished to write to Mrs. Lottie Bulle and to Allen Bulle, when I got a call from a friend in the
Sanitary a few minutes ago to the effect that they have determined that the test
that they were doing was a cancer. It makes
me very sad to hear them. I have been
since 1916 and I have been with him
since 1914. I knew that he was very ill
for when he was here back for about
36 hours, I knew he was in pain,
and how to kept going, I couldn't
understand. No matter how one may
feel about him, in some respects,
he is an extraordinary man, of great
capacity, unlimited courage, great
understanding and wisdom, and in my
eyes a dedicated man. He is
really practically unapproachable now.
I know some of those who are
writing to step into his shoes, and
they are prepared for great com-
promise to them. How he got there
this last trip to Europe, is
almost incredible, for I know
that he knew he was very ill,
and was suffering great pain.
He is coming here Feb 19th
2d to A cupids for a visit
met today Malécot the President here.

It would be appropriate to have a

little letter but I think a trip now

is premature. I have been asked
to go to Brussels for the two
days but I have made it clear I
cannot go. The visit is so short,
The program so full, that any
visit while conversation and the
voices be out of the question. My
doctor has advised me not go
for there would be things I would
have to do if I went, and while my strength is
Among luck, I tire easily, and there is no use going when I feel so weak I can't do no good. As Momie is not coming with me, no woman are wanted. I very much fear there will be a lot of disappointment and disillusionment out of the visit, but the papers will be full for days.

We are not in economic ties, understood, as the American Women's Committee for the Blind is having their annual Valentine Ball this evening and all those
From the advice of the committee for years, I shall have to go for a few hours, the decision by and of her daughter are here for a week, and the British Ambassador has told the committee that they are coming to the Box and that the men are to wear white tie. He is taking a lot on himself - for the British have nothing to do with this war for the blind - and about 95% of the men young do not have long Teddy coats.
We have had some good work and the last
was the winter too warm under
Another Eden and his wife
were there for about a month, and
he had some most interesting con-
vgradations. He is now in88:opulo
but will be there again for the
winter season of the 70s and as
shall see each other then. He's
died to see more than mine.
and he can't write much but
leaves a lot in the pool
at the house he has in Carovana.
He will be returning to England very shortly. He is writing on his memoirs, but is writing on the second volume first because he says it's easier. His wife is a real Churchill - but very good looking.

I keep busy around the house and usually go to the library and usually go to the library about 4 times a week for an hour or two. Dinner is in Korea now but I report to go to Ceylon with the President (112119).
This much he is sure to told more and more by his time and I am wondering how long this situation can last. The government here is not giving the electricity comforts a fair deal, and they, Mael, and I are very much concerned.

I want to take a little walk with Marvin before bed to tell her to close this letter. I will write again in a few days.
I hope this note finds you and your family well, and that you are in good health. I also send you all good wishes.
