Dear Bernice,

We spent the week end at Cerroneco and had fair weather with us but the weather was terrible - it rained practically continuously day and night. We have had one of the "worst" plams we ever had in India and we gained about 18 millions in four days at Keirawa. Another plam is in the making and we may get another plam by the end of the rain, and that is bad for us - when all other factors are so unfavorable.

The new Financial Committee is meeting next Monday - today a week, and Taylor told me this morning that John Snively is coming for inspection next Monday the 23 or on Saturday. I shall try to get that to Cerroneco for the week end so that we can have a look of things I want to talk with him. In my opinion, we have not been able to
Desiring situation in the Company service我

just joined it in 1947. I think Japanese
understands it fully so we had a long talk

last Thursday night here at the house. I
had Taylor stay here at the house. I

shall have a long talk with Taylor before he

shall leave to return this last

week. He will try to return this last

week and he had to make the last part of

the trip in a jeep and the road was

very bad as in Korea where he was in

command of our troops there. Taylor is making

a very real effort to learn as fast as he

can and he is an extremely intelligent young

man going down to see him this morning

but he is spending most of the day visiting

at Bethesda. He wants pay properly to see

do all of our plants.

We have some old friends from Cuba coming
to spend the week end with us. The situation
there is really terrible & serious, and as at home we doing nothing about it. The Conference at Santiago, Chile, though never has been held at that time and its principal results can not to the very hands more than one. I don't believe in any years we have had such mediocrity in our government.

In the big picture we show how trouble with Macmillan who is bound for a summit meeting before we are ready for it. They had less trouble with De Gaulle than with Macmillan. We can't make any comparisons. It's, Macmillan + Chamberlain, but in some ways Macmillan is leading the same atmosphere as Chamberlain did.

Can you conceive of a British government looking to sell planes to a hood man in
Cuba - while we know he is a good man and wishes to see them to attach Santo Domingo and Panama.

The visit of Lopez Natera to the U.S. will
have either very good or very bad results.
It is too early yet to say. His brother
made a speech in Chicago yesterday before some
American people and he stated that the north
sent about Latin America for the reason known
nothing about the part of the world. It is
difficult to determine if Lopez is more inter-
ested in this new business of his - or
in politics. Some still think the latter.

I'm feeling better on the whole
and have less discomfort. Wish I could
be more active physically but one cannot
have everything!
The town had practically no sunshine for
months — and I do miss that especially
during the week ends.

I shall have a busy day, but at time.
The Minister Counselor of the Embassy and the
Chief Political Officer are coming in for lunch,
and I have a number of people who want
to come in this afternoon. I just say one
very unhappily about the course of events
in Mexico and there has to be a change
of policy soon, or very one will suffer.

I hope you are having better weather in
Greenwich, than we are having here, and
that this note finds you all well.

With love, to hear from you soon -
