IN COOPERATION WITH MARYLAND STATE WEATHER SERVICE

CLIMATOLOGICAL DATA

15 MARYLAND AND DELAWARE SECTION

J. BILLY, Jr.

PRICE: 5 CENTS A COPY; 25 CENTS A YEAR

VOL. XLVIII BALTIMORE, MD., YEAR 1944 No. 13

GENERAL SUMMARY

This year was moderately warm, with annual precipitation slightly above normal and annual snowfall slightly below normal.

March and December were cold; April and October were cool; November was normal; January, February, and September were mild; July and August were moderately warm; June was warm; and May was very warm.

Annual precipitation was mostly between 33 and 40 inches in Allegany and Washington Counties; between 40 and 50 inches in the central and eastern divisions, except between 50 and 57 inches in central Worcester County; between 35 and 50 inches in eastern Garrett County; and between 50 and 55 inches in western Garrett County.

Annual snowfall was light in the eastern and central divisions and heavy in western Maryland. Average monthly snowfall was below normal in January, February, April, October, and November; normal in March; and above normal in December.

Annual sunshine was above normal. Sunshine was very deficient in April, September, and November; deficient in February; and normal in March and December. January, June, and October were sunny, and May, July, and August were very sunny.

Yields of barley were good to heavy; of wheat and rye, fair to heavy; of early hay, early and late tobacco, and field corn, good; of oats, tomatoes, sugar corn, late potatoes, sweet potatoes, and truck crops, fair to good; and of late hay, fair. The early potato crop was poor in quality and in yield. Pea, strawberry, and sweet cherry crops were short. Sour cherry, blackberry, and raspberry crops were fair. Peaches, pears, and apples were good and plentiful. Maple syrup and maple sugar productions exceeded all previous records at Grantsville.

In January a high wind and heavy precipitation storm prevailed during the 3d-4th; the 9-14th and the third decade were sunny periods; a heavy fog prevailed during the 20th-21st; ice disappeared from the estuaries of Chesapeake Bay during the first week; very heavy snow, 9 to 12 inches, fell over the eastern slope of the Allegheny Mountains on the 3d; and a moderate to heavy snow fell over western Maryland on the 15-16th.

A straight line blow from Mount Vernon to Princess Anne, in Somerset County, at night of February 12th, caused considerable property damage, killed several cows and horses, and uprooted several trees 200 years old; loss estimated at \$25,000.

In March the average number of days with precipitation was the greatest of record for that month; very cold days were 6th, 9-10th, and 19-20th.

In April the 3d-6th and 22d-24th were cold; the precipitation was frequent; and a heavy snowsquall occurred in the late afternoon or evening of the 4th in the central division and in the early night of the 4th on the Eastern Shore.

(Continued at bottom of page 51)

CONDENSED SUMMARY OF CLIMATOLOGICAL DATA 1944

Months	Temperature				Precipitation				Number of days				Prevailing direction of wind
	Mean	Departure from the normal	Highest	Lowest	Average	Departure from the normal	Greatest in 24 hours	Snowfall	With 0.01 inch or more of precipitation	Clear	Partly cloudy	Cloudy
