

# THE NEWARK POST

VOLUME XXXVII Number 19 The Newark Post, Newark Delaware, Thursday, July 4, 1946 PRICE FIVE CENTS

## HEARING PLANNED ON ZONE LAW SOON

To Give 15 Days Notice On Hearing Of New Law

Citizens of Newark may have an opportunity for a first-hand inspection of the town's proposed new zoning ordinance soon. It was disclosed at the Monday night meeting of the Town Council.

A complete draft of the proposed law has been forwarded to Council by the Institute of Local and State Government, University of Pennsylvania, whose experts have been collaborating with the newly formed local Zoning Commission in drawing up the detailed and complicated regulation.

Next step in the procedure of adoption is a joint meeting of the Town Council and the local Zoning Commission, headed by F. A. Wheelless.

The two groups will study the draft throughout, suggest final revisions and set a date for a public hearing. Notice will be given well in advance of the day or days set for the hearing, when residents will have an opportunity to check the proposed law thoroughly, and suggest changes before it is finally put to a vote by the Council. Delaware law requires that one or several public hearings be held on the ordinance before adoption with at least 15 days notice being given as to time and place of the hearing.

Town Treasurer Vernon Steele's report for June, submitted at the meeting lists electric light receipts for the month totaling \$7,142.93, while electric power returns amounted to \$4,463.37 and water rent brought in \$1,116.53, leaving a balance of \$100,019.75, less disbursements of \$17,572.30, for a total cash on hand of \$82,447.45.

## PERMANENT RANK GIVEN TWO HERE

Local Men Get Regular Army Commissions

Two Newark men are among the twenty Army officers nominated by President Truman for permanent commissions in the Regular Army, the War Department announced recently. They are: Maj. James C. Robinson, Air Corps, who was named to the permanent rank of first lieutenant and First Lieutenant Frederick L. Ingham, CAC, who was appointed a permanent second lieutenant.

The Delawareans were among 9,800 Army officers selected from more than 100,000 applicants for the permanent commissions. In choosing the successful candidates, the War Department employed the most modern and scientific method of selecting leaders yet devised.

The grades given those named in the President's list are their permanent grades in the Regular Army. In practically all cases, the officers selected hold higher, temporary commissions in the Army of the United States, and while their appointment means a reduction in rank it will be permanent.

## County To Adopt Plumbing Code July 2

Final adoption of the plumbing code drawn up by the County Plumbing Code Revision Committee was set for July 2 at a meeting in the Levy Court room in the Public Building recently at which the proposed revisions were favorably received.

G. Lester Daniels, president of the code, presided at the meeting, and John I. Cahalan, county engineer, who headed the revision committee, outlined the body's recommendations.

Suggestions for changes in the code were made by some of the 35 plumbers who attended a meeting and others may be made to writing before the code is finally authorized by the court on July 2.

The code will bring county plumbing, heating and air conditioning regulations in line with those of the city. It will be in effect in the five upper hundreds of New Castle County, comprising metropolitan Wilmington. The city, since it already has a plumbing code, will not be covered.

## Weed-Cutting Drive Here Is Stepped Up

A stepped-up enforcement of the weed-cutting directive, issued several weeks ago by the town Board of Health, was ordered at Monday night's Council session.

The campaign is aimed at ridding the town of all insect harboring weeds and calls for a penalty after June 30 of ten dollars and a dollar a day for every day the nuisance continues to exist.

Ragweed, goldenrod and other weeds provide a shelter for mosquitoes, and are a health hazard to sufferers from hay fever.

Letters will be sent to flagrant offenders, it was said, directing them to clear their properties. Provisions are being made by the board for removing weeds at the requests of townspeople.

## PLAY PLAN ATTENDANCE FOR OPENING WEEK LISTED

Warning Issued To Non-Swimmers Attending P. M. Periods At Pool

Attendance for the first week at the swimming pool soared to 1359 for all sessions, Coach William Martin, recreation program director, announced yesterday. Other figures for the opening week of the town play project showed 292 youngsters attended the teenage canteen during three evenings last week, while 65 children turned out for the two morning sessions at the playground.

An urgent warning to parents that numerous children who cannot swim have been found attending the afternoon recreational sessions was also issued by Coach Martin. Almost every afternoon, he said, four to five young children, unable to swim, have been discovered and expelled from the pool. Such children are running a grave risk when they enter the crowded pool, Martin claimed, pointing out that the morning sessions are especially reserved for non-swimmers when carefully supervised instructional periods are held.

Today, July 4, the pool and playground will be closed all day, it was further announced.

A total of 81 girls and 50 boys have been attending the morning swimming lessons for beginners, Coach Martin reported. Assisting Martin with the operation of the pool and the swimming (Please turn to page 8)

## ARRESTS IN JUNE TOTAL FIFTY-FOUR

Police List Types Of Violations

A total of 54 arrests were made in June by the Newark Police Force, according to the report submitted by Chief William Cunningham at Monday night's Council meeting.

The arrests are classified as follows: parking, 14 arrests; disorderly conduct, 12 arrests; drunk, 9 arrests; failure to stop at a stop light, 4 arrests; no operator's license, reckless driving and speeding, 3 arrests for each offense; assault and battery, 2 arrests; and larceny, threatening bodily harm, forgery, and resisting arrest, one arrest for each offense.

Five accidents and two cases of larceny were investigated. One hit and run driver was turned over to the state police, and two bicycles were returned to their owners, the report also said.

Magistrate J. H. Rumer reported \$220 collected in fines during the month. Seven cases were dismissed.

A total of 136 police calls were received, and overnight lodging was provided for two. The police car travelled 3165 miles, and the motorcycle 606 miles.

## To Change Location Of Mid-Town Bus Stop

A change in the location of the mid-town bus stop now situated before the Newark Trust Company was authorized by Town Council Monday night. Plans is to move the stop forward to the Academy Street corner, where ample space for passenger boarding and disembarking will be reserved.

## TEACHER EDUCATION FUND GIVEN UNIVERSITY

\$50,000 For Improvement Of Teacher Education

The Delaware School Auxiliary Association has made a grant of \$50,000 to the University of Delaware for improving teacher education, it was disclosed by Dr. W. Owen Sypherd, university president. Dr. Sypherd called the grant the most important contribution to teacher education ever made in Delaware.

This grant was brought about through the generosity of P. S. duPont, who made a special contribution to the Delaware School Auxiliary for this purpose. The request for this most significant grant was presented to the association by its president, Gerald Montaigne.

According to Dr. W. Earl Armstrong, dean of the university's School of Education, this grant of \$50,000 will provide adequate funds for the first two years of a proposed five-year program of teacher education improvement.

If funds for the entire five-year period later become available, approximately 350 scholarships will be awarded to students preparing to teach, teachers attending summer school sessions, and to graduate fellows, Dean Armstrong stated.

## NEW STREET LIGHTING ON DEL. AVENUE

To Install Lights In Campus Area

Additional street lighting will be installed along the section of Delaware Avenue bordering on the college campus, it was decided by the Town Council at its June meeting. The area has long been regarded as one of the most poorly lighted sections in town.

It is also hoped the move will encourage after-hour parkers from Main Street.

Tentative plans for purchase of an Elgin street sweeping tractor, which sprays, sweeps and gathers up debris in one operation, was also considered by the Council. The machine, called a one-man street cleaning department, obviates the need for hand sweeping and gathering up trash by dump trucks. Operated entirely by the driver, it is regarded as one of the most economical and efficient methods of keeping streets clean.

Only hitch is that delivery is not promised before 18 months. However, Council members are planning to view a demonstration of the machine at Chester next month before taking action. An intensive clean-up program has been considered by town authorities for some time. Complaints have been received on the increasingly untidy appearance of the community, especially of waste littered streets, in a town, once regarded as one of the cleanest in the state.

## RED CROSS ZONES SET

For Disaster Preparedness

Revamping of the Disaster Preparedness and Relief Service of the Delaware Chapter, American Red Cross into three zones throughout the state has been completed by Donald R. Morton, service chairman. The groups will be prepared for action in the event of fire, flood or tornado.

Zone 1 includes the headquarters area and Branch Areas 1 and 3. Zone 2 is composed of Branch Areas 4, 5 and 6 with Dover as a center, while Zone 3 comprises Branch Areas 7, 8, 9, 10 and 11 with Georgetown as a center.

The complete state committee includes, Dr. Washburn, Mrs. John W. Allen, C. A. Vincent-Daviss, Judson Ryan, Mrs. Eleanor Warfield, Emmett F. Hickman, Robert J. McCormick, David D. Rankin, Mrs. John M. Brentlinger, F. H. McCormick, and Henry T. Caus.

## COUNCIL ISSUES 6 BUILDING PERMITS

\$16,550 In New Construction Is Approved By Council In June

Six building permits, totaling \$16,550 for new construction, the largest going to Archie Peel, South Chapel Street, and East Park Place, for erection of a block bungalow, were approved by the Town Council at its monthly session Monday night in the Council Offices.

Remaining permits were granted the following: Star Cleaners and Dryers, 47 East Main Street, for alterations; Henry Kline, Benny Street, for construction of a block bungalow; M. Pilnik, East Main Street, addition to rear of building; and Melvin Reeside, North College Avenue, for alterations.

Town Engineer Cleaver Price's report for June listed maintenance work as follows: two new electric services installed on Dallam Road and the capacity of the transformers at the S and S Engineering Company on East Cleveland Avenue, increased from 10 KVA to 27½ KVA.

The report also listed the installation of two new connections to the sewer system and the 65 per cent completion of drainage improvements at Chinamen's Alley. The latter job has been delayed due to the shortage of reinforcing steel for concrete pipes.

During June 18,179,400 gallons of water were pumped for a daily average of 605,980 gallons, and a daily increase of 43,406 gallons over May. The figure also represents a jump of 2,657,900 gallons over June, 1945.

## ENGINEERING DEPT. HEAD TAKES OVER

David L. Arm Assumes Post At University

David L. Arm, named last March to be dean of the School of Engineering at the University of Delaware, Monday assumed that position.

The new dean relieved Acting Dean Howard K. Preston, who has served in that capacity since the death last October of the late Dean Robert L. Spencer. Mr. Preston, who has been a member of the University of Delaware faculty for about 32 years, resumes his position as professor of theoretical and applied mechanics.

Dean Arm came to the Newark campus from Iowa State College, where since 1942 he had been head of the mechanical engineering department. While there he served concurrently as director of the U. S. Navy Diesel School. Under his direction the Diesel School in its less than four years existence trained more than 6200 men for the Navy.

Dean Arm is a registered professional engineer in the State of Iowa, and is a member of both the American Society of Mechanical Engineers and of the Society for the Promotion of Engineering Education.

He received bachelor of science, master of science, and mechanical engineering degrees from Lafayette College, and remained at the Easton, Pa., institution as a member of the faculty of the engineering school from 1930 to 1937.

In the latter year Dean Arm became associated with Purdue University, where he remained until going to Iowa State College in 1941. During his last year at Purdue, he served as director of personnel at that university in addition to being an associate professor in the School of Engineering.

## Visiting Nurse Reports 241 Calls Made in June

Miss Alice Leak, visiting nurse for this section of New Castle County, reports a total of 241 visits in June, including 224 nursing and 17 instructional calls.

Types of cases and visits each reported are as follows: prenatal, 2 visits; 2; sarcoma, 1 visit; 6; sciatica, 1 visit; 9; apoplexy, 2 visits; 29; tuberculosis, 1 visit; 2; paralysis, 3 visits; 25; arthritis, 1 visit; 6; heart diseases, 7 visits; 51; accidents, 2 visits; 3; fractured femur, 1 visit; 3; anemia, 1 visit; 4; diabetes, 1 visit; 4; kidney diseases, 4 visits; 31; miscellaneous, 14 visits; 38; and treatments, 23.

## CARLSON ASSUMES UNIVERSITY PRESIDENCY

Took Over New Duties Monday Relieving Dr. W. O. Sypherd

The University of Delaware officially inducted its new president, Dr. William S. Carlson, 40-year-old educator, scientist, author and former colonel in the Army Air Forces, into office Monday, relieving Dr. Owen W. Sypherd, who has served as acting president and president since the death of Dr. Walter Hüllihen in April, 1944. As he assumed the presidency, Dr. Carlson stated:

"I come to the University of Delaware fully aware of the great challenge and high honor involved. The University of Delaware has attained a high level of excellence under my predecessors. That it will require the best that anyone can muster up in capacity, devotion and leadership, I fully recognize. Naturally, I shall do all in my power to justify the confidence that has been shown in me.

"There are a number of things about the university that please me. Among these might be mentioned a board of trustees which believes that administration is the servant of scholarship, a distinguished and scholarly faculty, a loyal group of alumni, a serious minded student body and a feeling for research which fills the atmosphere.

"I cannot help but look forward to service with the board of trustees, with the able faculty, with the students and alumni, and with the people of Delaware in helping to mold the future of the university."

Dr. Sypherd, who as student teacher, English department head, and university president, has spent more than 43 years on the local campus, said:

"I am now concluding my services to the university as temporary president for the war emergency period from May, 1944, to the present.

"To the incoming president, Dr. William S. Carlson, I extend my sincere wishes for the greatest happiness and success in his new position."

## BIO-LAB REMOVES ATOM BOX

Material Taken From Cyclotron

Removal of a one-ton iron box containing deadly radioactive beryllium from the cyclotron at the Bio-Chemical Research Foundation here was completed recently, preparatory to enclosing the material in concrete and dropping it in the ocean.

The beryllium was used to produce neutrons in experiments conducted by the foundation for the Manhattan Project to develop means of reducing the hazards of working with atomic power and to discover how exposure to neutrons affects human beings.

The beryllium will continue to be radioactive for 1,000 years, it is estimated. It is in the form of a very fine dust which would become suspended in the air if the box were to break in the process of handling. If the dust were inhaled it would produce cancer in the lungs, Dr. McDonald said.

Lifted from the cyclotron by a crane, the box will be encased in the concrete and hauled to a wharf by truck. There it will be loaded on an Army tug and taken out to sea, where it will be dumped.

## ISSUE ON METERS IS POSTPONED BY COUNCIL

30-Day Trial Not Yet Over; Question Tabled Until Next Meet

No action was taken on the question of installing parking meters here by the Town Council at its July meeting Monday night, it being pointed out that the 30-day trial period begun June 10 for the one-hour rule and the parking lot operation was not yet over.

The question, it was said, will be considered at the next session, with some Council members expressing their intention of further sounding out town opinion on the issue. Meanwhile, the current rulings will continue in effect at least another month.

Police Commissioner Battersby in a review of the parking situation said the operation of the free municipal parking lot had proved disappointing this far with only about 30 cars daily using the area.

However, violations of the one-hour rule on Main Street have dropped from an average of 30 daily when the restriction was first enforced early in June to a current low of about two daily, indicating a substantial easing of the mid-town parking congestion.

In a general discussion of the meter question, Council members agreed that town sentiment on the need of installing the devices here appeared to be about equally divided. The Council hopes to secure a more accurate sample of public reaction to the question before the next session.

## 70 YEARS OF SERVICE ACHIEVED BY LOCAL FIRM

Newark Lumber Co. Continues Service Begun By S. B. Wright

Elsewhere in this issue is depicted the growth and progress of The Newark Lumber Company which enjoys what is probably the oldest record of continuous service of any similar establishment in New Castle County.

Founded at 223 East Main Street seventy-three years ago by S. B. Wright, the first building occupied the same site as the modern, new structure that now serves Newark and vicinity with building materials, fuel, supplies, etc. The original buildings were erected in 1873 on what formerly was the original location of the Pa. R. R. Co. ticket office in Newark.

The partnership of S. B. Wright and his son, Samuel J. Wright, was formed in 1875 and the father and son combination continued the business operated by his son, Samuel J. Wright, for twenty years until 1895 when their interest was sold to John Pilling, Jr., who continued the operation until 1903, when the business was purchased by the late E. L. Richards.

Mr. Richards entered the firm as vice-president and served in this capacity until 1938 when he sold his interest.

Weldon C. Waples, presently vice-president, treasurer and general manager of The Newark Lumber Company, came to Newark in 1929 and has been continuously associated with the establishment in the same capacities.

This old, established business has carried on under various ownerships and has successfully weathered the strife and trials of seventy-three years until today when it still stands as one of the most prominent businesses in the community.

The erection of a handsome, modern new building last year marked its seventy-second anniversary. The new quarters, however, were not opened for business until several weeks ago due to their inability to obtain supplies for its completion. Now, it stands as a silent monument to the years of endeavor put in to it by men prominent in the history of Newark.

Justifiably proud of their achievements and their spacious new quarters, the management of the Newark Lumber Company extend a personal invitation to individuals of Newark and vicinity to visit and inspect their new premises and facilities that provide the complete answer to every building requirement.

## DELAWARE FARM FRONT THIS WEEK

### New Castle Herd Testing Results Given

The average cow tested in the New Castle Dairy Herd Improvement Association produced 8,564 pounds of milk and 360 pounds of butterfat for the testing year 1944-45 reports Delmar J. Young, extension dairyman for the Delaware Agricultural Extension Service.

Complete records on 15 herds in the New Castle County Association were analyzed for this summary by the Bureau of Dairy Industry, Washington, D. C.

The highest producing herd for the period April, 1944 to April, 1945, was owned by W. Lewis Phipps, Wilmington. His herd of 32 cows averaged 11,816 pounds of milk and 464 pounds of butterfat.

Other herds completing with over 400 pounds of butterfat per cow were: Fred Stafford, Middletown, averaging 11,268 pounds of milk and 412 pounds of fat; Berkley Farms, Newark, averaging 8,733 pounds of milk and 426 pounds of fat; Mitchell Brothers, Hockessin, averaging 8,305 pounds of milk and 443 pounds of fat.

The production of these tested herd show the improvement through testing. Their production averaged more than twice that of the average cow in Delaware whose production is 4400 pounds of milk and 176 pounds of fat.

Delaware is not among the states listed in the recent wheat "set-aside" order, War Food Order No. 144 announces C. E. Ocheltree, state chairman of the Production and Marketing Administration.

Under the provisions of this new order, however, Delaware grain dealers who ship wheat to elevators in Maryland and Pennsylvania will be required to sell one-half of such wheat to the Commodity Credit Corporation.

The Beef Production and Sheep and Lamb Production Payment Program came to a close on June 30.

All producers who may be eligible for payment under either of these programs have two months in which to submit evidence of sales and to make applications for payment.

Applications will be accepted at County AAA offices.

Representatives of the Delaware office of the Production and Marketing Administration and a representative from each county office will attend a conference on July 11 at College Park, Maryland, plan the 1947 Wheat Crop Insurance Program for Delaware.

It is expected that the program to provide Delaware wheat growers the opportunity to insure their 1947 crop will begin August 1. Agents will contact every wheat producer in the State to explain the provisions, costs and benefits of the program.

## SOUVENIR GUNS FINED

### Stiff Penalty For Unregistered Guns

Owners of unregistered souvenir guns, or foreign weapons which have not been inspected and recorded with the Alcohol Tax Unit branch of the Internal Revenue Bureau, are risking a penalty of five years imprisonment plus \$2000 fine Paul C. Culp, investigator for the bureau with headquarters in the Postoffice Building, Wilmington, warned recently.

An estimated 4000 such weapons are now being privately held in the state, of which only 600 have been registered, it was said.

Even to transfer a registerable gun by sale, or gift involves payment of a \$200 tax, he added, failure to pay which is punishable to the same degree.

#### LESSON-SERMON

Subject of the Lesson-Sermon: God. Wilmington: First Church of Christ, Scientist, at 1201 Van Buren Street; morning service, 11:00 A. M.; Sunday School, 11:00 A. M.; Wednesday evening service, 8:00 P. M.

## Court Authorizes New County Police Uniforms

New and different uniforms have been prescribed for the county police by Levy Court officials, who hope that the issue will spare the law enforcement officers further embarrassment. The county policemen requested the change in color because they insist it isn't pleasant to be hailed by suburban residents to read water meters, or to be questioned about mail deliveries and other functions not associated with police work.

In their new uniforms the county patrolmen will resemble the appearance of the Delaware state police. They will wear dark blue shirts, blue coats, olive drab trousers, and blue caps.

The ambulance crews meantime will continue to wear gray uniforms. They were measured for summer outfits recently.

## 1946 WHEAT LOAN PLAN IS OUTLINED

### Ocheltree Lists Rules Of Program

The Commodity Credit Corporation will make loans on 1946 wheat stored in approved warehouses or on farms, C. E. Ocheltree, Director of P. M. A., stated today.

"The loan rate for wheat grading No. 2, Red Winter Garlicky, in Delaware, will be \$1.71, with discounts for lower grades and for onions and smut, and premium for grade No. 1."

Mr. Ocheltree stated that an approved warehouse must be a public grain warehouse which has met the requirements of the CCC and which has executed the Uniform Grain Storage Agreement. The warehouse must issue insured negotiable warehouse receipts.

He stated that eligible farm storage shall consist of farm bins and granaries which are of such substantial and permanent construction as determined by the county AAA committee to afford safe storage and protection against rodents, thieves, and weather and permit effective fumigation.

Wheat loans bear interest at 3% per annum and mature on demand not later than April 30, 1947. Mr. Ocheltree said that a producer may obtain his wheat at any time and sell it on the open market after paying the loan, interest, and any warehouse charges or he may turn the wheat over to the CCC. A storage payment of two to seven cents per bushel shall be made for farm wheat under loan which is delivered to the CCC. This amount depends upon time of delivery, the smaller figure being for wheat delivered prior to January 1, 1947.

Producers desiring wheat loans may obtain the Producer's Note and Loan Agreement and other necessary papers at the county AAA office.

#### Letters Testamentary

Estate of Frank Garatwa, Deceased. Notice is hereby given that Letters Testamentary upon the Estate of Frank Garatwa late of White Clay Creek Hundred, deceased, were duly granted unto Farmers' Trust Company of Newark on the Thirtieth day of June A. D. 1946 and all persons indebted to the said deceased are requested to make payments to the Executor without delay, and all persons having demands against the deceased are required to exhibit and present the same duly probated to the same Executor on or before the Thirtieth day of June A. D. 1947 or abide by the law in this behalf.

Address: Farmers' Trust Company of Newark, Newark, Delaware.

## GUARD ENCAMPMENT AUGUST 3-11

### Units To Get Field Training

Dates for the annual encampment of the Delaware State Guard at Bethany Beach were announced as Aug. 3-11 by Col. J. Paul Heinel, regimental commander. Brig-Gen. Paul R. Rinard issued the order setting the dates and naming the camp.

"Governor's Day" at the camp will be on Saturday, Aug. 10. At that time Gov. Walter W. Bacon and other state officials and the public will be guests at the camp.

Detailed plans for the encampment have been made by the regimental staff. The trip from the Armories at Wilmington, New Castle, Newark, Dover and Milford, and from Middletown, will be made in company convoys.

An advance detail consisting of 21 men under Maj. Walter M. Deputy will leave Wilmington Friday night, Aug. 2, and set up the camp for use Saturday morning.

The troop, about 450 officers and men of the regiment, will arrive starting at 11 a. m. Saturday. Thirty-eight trucks and several chartered buses will be used in transporting the men as well as a number of privately owned cars.

**CERTIFICATE OF REDUCTION OF CAPITAL OF THE TESUQUE CORPORATION**  
We, the undersigned, Estelle M. Lebolt, President, and A. Cherrington, Secretary of the TESUQUE CORPORATION, a corporation organized and existing under and by virtue of the laws of the State of Delaware, DO HEREBY CERTIFY:

That the holders of record of the total number of shares of said Corporation having voting powers at the time outstanding have consented in writing that the capital of said Corporation be reduced by Nineteen Thousand, Seven Hundred Dollars (\$19,700.00), such reduction of capital to be effected by retiring three hundred ninety-four (394) shares owned by said Corporation.

That the assets of said Corporation re-

maining after such reduction are sufficient to pay any debts, the payment of which has not been otherwise provided for.

IN WITNESS WHEREOF, we have hereunto subscribed our names and affixed the seal of said Corporation this 4th day of June, 1946.

# What's your score in this Money quiz?

**Q.** Will money make the mare go?

**A.** Yes, sir! Of course it doesn't mean putting your hay-burner on a diet of dollar bills. But this old saying *does* emphasize the fact that an income of hard, cold cash is necessary for the existence of any individual, any family, any business.

Every dollar you put into Savings Bonds now, assures you an income—in hard, cold cash—later on, when you may want or need it most!

**Q.** Are a fool and his money soon parted?

**A.** They usually are! But fortunately you and millions of other Americans are no fools. You've learned that the Payroll Savings Plan is the *safest and surest* way of piling up dollars for your future. That's why wise Americans keep on buying Bonds through the Payroll Plan—why they keep all the Bonds they buy!

**Q.** Does it take money to make money?

**A.** It sure helps! And just about the best way to put your money to work is in U. S. Savings Bonds, where the \$75 you invest today will come back as \$100 in 10 years.

So, if you want your money to make more money—if you ever expect to have enough to buy a home, or to travel, or to quit work for good—put every dollar you can spare into U. S. Savings Bonds!

# Seventy-three Years of Service

On the original site of the Pennsylvania Railroad Company's ticket office, in 1873, S. B. Wright began serving Newark and vicinity with lumber, building supplies and coal.

Two years later, in 1875, Mr. Wright formed a partnership with his son, Samuel J. Wright, the firm becoming known as S. B. Wright & Son, and was operated under the management of S. J. Wright until 1895 when their interest was sold to John Pilling, Jr., who operated the firm under the same name until 1903.

At this time the business was purchased by E. L. Richards who continued its operation until 1925 when the present Newark Lumber Company was formed, Mr. Richards becoming vice-president of the company in which capacity he served until 1938, when he sold his interest.

W. C. Waples came to Newark in 1929 to become affiliated with the organization as vice-

president, treasurer and general manager, which office he still fills.

The present Newark Lumber Company continues to carry on its service to the community under the same high principles of business and standards of products as were initiated seventy-three years ago . . . . in a spacious, new building, erected in 1946, on the same site. Thus bringing up-to-date an enviable record of continuous service.

The Newark Lumber Company is proud of its new quarters and invites your individual inspection of its facilities at any time.

Under normal times, a complete line of building materials, fuels and nationally-known brands of merchandise, a few of which are duPont paints, Corbin hardware and Stanley tools, provide the answer to every building need.

Newark, Delaware, Thursday, July 4, 1946

## SOME HOLES WE ARE IN

The public and private debt of the American people is \$393,000,000,000, which is practically twice the volume of debt in 1941. In pre-war years the entire operation of the United States Government cost less than \$8,000,000,000 a year. We now have a fixed charge for interest which is greater than eight billion dollars.

Taxes will be sky-high during the lifetime of all of us. All the "brass hat" agents in Washington agree that at least 400,000 dwelling must be built during the present year, despite the fact that carpenters, nails and lumber and all other materials are in doubt.

While the Administration has gone to bat to keep prices down to pre-war levels in major industries, the stabilization program was given a boost by OPA officials to increase the price of steel in order to hike the pay of workers.

Moving across to food products and clothing one finds that OPA reversed its cross-word puzzles.

Heads of the National Government in Washington are distinctly in favor of higher wages, while at the same time pressure is being put to hold down prices. Just how this is expected to reduce the present inflationary movement is a bigger puzzle than the age of Ann.

Elmer Davis, the radio commentator, suggested a few nights ago that inasmuch as we have sent an American leader to China to straighten out their internal affairs that it might be a good thing to get a Chinaman over here to see what he could do about fixing up things in the United States.

## THE RED CROSS

Too much cannot be said in praise of the American Red Cross. Just think of it having produced 680,000,000 surgical dressings for our Army and Navy and for foreign war relief. This is in addition to production of 1,000,000 garments and more than 6,000,000 kit bags, which were filled with playing cards, sewing kits, soap, shaving kits and other items.

It is impossible to name all the wonderful achievements of the Red Cross, but we cannot overlook 41,000,000 meals and snacks in this country during 1945. More than 15,000 women volunteered, helped the Red Cross without any compensation. Members of Red Cross Motor Corps made more than 2,500,000 calls for the Chaplain in every American theatre of war, from Great Britain to the China. At the same time Red Cross women in great numbers served Burma-India zone, and from Alaska to South America.

## MADE OUT OF COAL

A Senate Committee in Washington got more information about oil and gasoline than it was looking for when it called in some of the experts from the U. S. Bureau of Mines. Dr. W. C. Schroeder, director of the Synthetic Fuels Division of the Bureau, told the Senators that the experts who accompanied him on his tour of the German war plants found the coal-processing fuels superior to our petroleum base fuels.

That is the reason the U. S. Bureau of Mines is building plants in the coal areas of the East and West to duplicate the German fuels. An estimated three trillion barrels of gasoline can be obtained from our bituminous coal deposits, the world's largest, and enough to last us 3,000 years. So why worry about future shortages of oil and gasoline, as long as the Bituminous Coal Institute lets us in on the conquests of coal?

Apparently, the best known coal-derived medicines are the sulfa drugs, or sulfonamides, Aspirin, the sugar substitute saccharin, and novocaine are derived from coal. Coal tar, once considered useless, produces carbolic acid and other disinfectants. From coal smoke, sometimes a nuisance, has come the quinine substitute that played such an important part in the South Pacific War.

Silk stockings from coal, air and water have captured the imagination. Nylon, in fact, is so much superior to silk in most physical properties, that it will probably permanently replace silk in America. It completely replaced silk during the war for military purposes.

In the plastics field, false teeth, artificial eyes owe their origins to coal and the synthetic resins from which they are made have gone into the manufacture of everything from machine gears to life rafts.

## PRESIDENT AND CONGRESS DISAGREE

The orderly processes that constitute Government have not been operating very well of late. Most of the Congress, and most of the people throughout the land, have not been able to find anything to shout about in the President's fact-finding plans.

The Senate stalled on the proposal to create a permanent Fair Employment Practices Commission, especially when weighted down with unsolvable racial disputes.

But the President really stubbed his toe when he insisted that the "Company's books and records must be open" to boards and commissions trying to fix prices of manufactured machinery. Also, the President was not convincing in his appeals for a full employment bill and increased employment compensation benefits above those granted by the States.

Congress is rather skeptical about most of the proposals from the White House regarding labor legislation, because the CIO seems to have the inside track.

Senators and Representatives have been conservative in their discussions but the majorities oppose continuing schemes that lead up to strikes.

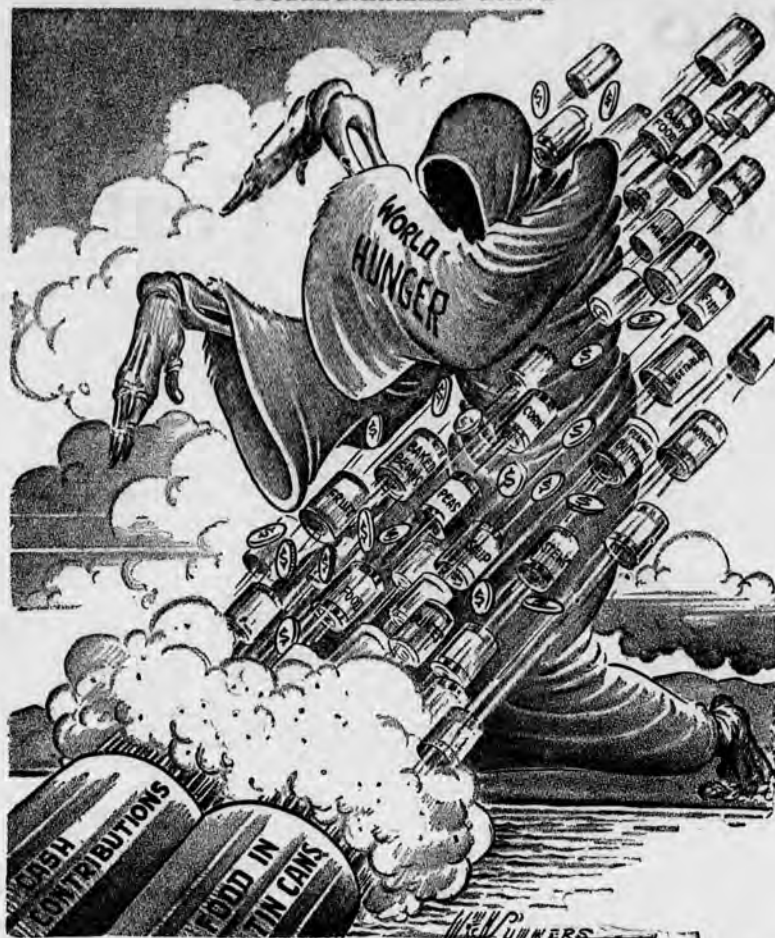

## DON'T GET POOR QUICK

The above title reserves some of the old philosophies about getting rich quick. There are more ways to buy useless goods right now than at any other time within the memory of man. So, why not take the sage advice of William Shakespeare, speaking through one of the characters in a famous play, who said, "True; save means to live." That is a word to the wise. Keep out of "investment opportunities" of the kind that wrecked American economy in the early 1930's, when millions of our citizens completely failed to "get rich quick" — thousands of them in the stock market, where they ran their heads against stone walls and lost all of their savings — and their shirts.

## MARRIAGE IN HASTE

Marriage licenses issued in cities of the first-class throughout the United States increased 11 per cent in 1945 as compared with the previous year. And the rate for 1946 is hotter still. Naturally the Census Bureau lays matrimonial speed to the war.

## FOOD FOR THOUGHT

### Of Cabbages And Greens

There is an old saying, "In youth — days are short and years are long, in old age days are long and years are short." If this is true then good proof of our advancing years is shown by the return of good green cabbage. It seems such a short time that it has been off the market. But — considering modern transportation methods — perhaps the return of green cabbage may not be the best criterion of age. This first sign of spring, although the cabbage is imported — answers the question of salads and often main dishes for many meals.

Always buy cabbage by the pound. Loose or tight heads are not nearly so important as the presence of the green color. Buying cabbage by the pound will eliminate any question of getting your money's worth.

But — once you have bought it — keep it refrigerated until time to use it. Often the lower temperature of the cellar is adequate.

In using cabbage, serve it as soon as possible after it has been cut. Shredded cabbage loses much of its food value if allowed to stand exposed to the air several hours.

In cooking cabbage, place the cut cabbage in a small amount of boiling water. Use the least possible amount of water which will prevent burning. Boil 8 to 10 minutes then add butter or

margarine and cook 2 minutes longer. Serve. If liquid remains in the pan when the cabbage is tender; serve this too. Cook only enough for one meal.

You're bound to like these:

- Stuffed Cabbages  
1 medium head cabbage  
1 cup ground ham  
1 tablespoon chopped parsley  
1 tablespoon cooking fat  
1 cup bread crumbs  
2 tablespoons melted butter or substitute  
2 tablespoons chopped onion  
1 egg, well beaten  
Salt, pepper, and cayenne  
1 cup water

Soak cabbage in cold salt water 1 hour. Boil in sufficient salt water to cover until almost tender. Drain. Remove center, leaving 2 layers of leaves. Shred the portion of cabbage which was removed. Add ham, crumbs, onion, parsley, egg, cooking fat, and seasonings. Pack lightly into cabbage shell. Tie the leaves tightly to hold the stuffing in place. Place in roaster. Baste with butter or butter substitute which has been combined with 1 cup of water. Bake in slow oven (350 degrees F.) 35 minutes. 6 servings.

## DON'T MAKE CHAIN CALLS

Did you have trouble reading that headline—"Don't Make Chain Calls"? There's a reason. There are no spaces between the words.

There's trouble, too, on party-line telephones when you make "chain" calls with no time-out between calls. It prevents others on your line from using it. The friendly, neighborly, courteous thing to do when you have to make a number of calls is to space them out — like this.

Party-lines enable more people to have service . . . and good service results when everyone shares them considerately. Remember the Golden Rule—It's a good one.

## To Form Fellowship Group

### At Christiana Presbyterian

Services will be held in the morning at the Head of Christiana Presbyterian Church on Sunday. Sunday School will begin at 10 o'clock, and the morning worship will follow at 11 o'clock.

The Sunday School classes will discuss the lesson "Jesus' Attitude Toward the Law."

The pastor, Rev. Evan W. Renne, will use as the subject of his sermon at 11 o'clock "The Privilege and Peril of Freedom." The church choir will sing the anthem "America, the Beautiful," in observance of Independence Day. All are heartily welcome to this service.

At 6:30 p. m. a Westminster Fellowship will be organized. All young people of the church and community between the ages of 12 and 23 are urged to attend this important meeting. At 7:30 p. m. a junior choir will be organized and will hold its first practice under the leadership of Jane Martens.

Miss Jeannette Thoroughgood, of West Delaware Avenue, was a Rehoboth Beach visitor this past week-end.

Mrs. Richard Proctor and daughter Amy, are spending a month with Mrs. Proctor's mother, Mrs. Maynard, Boston, Mass.

Samuel W. Lockerman entered his training at West Point, N. Y., on Monday, July 1. He is the son of Mr. and Mrs. Samuel Lockerman, Linden Hall.

Miss Suzanne Herrick, of New York City, and Richfield, Conn., was a house guest this past week-end of Miss Marie Johnston.

Mr. and Mrs. Willard Johnston and son, Martin, spent several days last week in Ocean City, N. J.

Miss Hazel Johnston, of Milford Cross Roads, was hostess on Tuesday evening of this week to the Young Adult Fellowship Society of White Clay Creek Church.

Mr. and Mrs. Ernest Reed, of Capitol Trail spent the past week at White Crystal Beach.

Mrs. Charles P. Steele and Miss Sara Steele, of 12 West Delaware Avenue, spent the week-end in Cape May, N. J.

Among the guests who were entertained on Saturday at the home of Mr. Rodney Sharp, in Odessa, were Mr. and Mrs. Harry Clark Boden and Mr. and Mrs. John Pearce Cann.

Mrs

If all the property owners in town who had complained about their increased assessments, for 1946, had appeared before the Board of Appeals and voiced their complaints the Council would have had a great deal busier session than it did . . . and it might have had more influence on the appointment of a town assessor for 1947.

Numerous were the unhappy and disgruntled comments heard on Assessor Wm. B. Swan's compilation prior to Appeal Day, last Monday. In point of fact said Assessor found it convenient to be absent from town the latter part of last week. Now, whether the many complaints on his assessments had anything to do with his absence or not—we don't know—nor care . . . but some people seem to think he just didn't care to stay and face the music.

One thing at least is commendable about the 1946 LAND assessment. And that is that land values throughout town are more equalized than they have been before. The 1946 assessments on buildings, dwellings, etc., may well be a horse of another color. Whether or not the present inflated property values warrant the increased assessments MIGHT be questioned if current values ARE inflated and tend to come down considerably in the immediate future. Which, doesn't seem very likely for a few years anyway.

However, if and when they come down—as eventually they must—local property owners may find it difficult to have their assessments then reduced accordingly. We have found, in our limited experience, that it is always much easier to make an increase in values, wages, prices than it is a decrease.

Personally we have no complaint with our assessment although we, like all the rest of you, feel that there was no real justification for the increase incurred, in our own case.

We neither pretend nor desire to be a land Croesus. We lay claim only to the meagre building in which we do business and dwelling in which we reside. Each parcel has been subjected to approximately \$1,000 increased assessment over any previous year and it's O. K. with us.

Dick Morris, Frank Powell and John H. Rumer, all former Town Assessors, were never fired with the burning desire to invite their neighbors and townsmen disfavor by tampering with the good-enough-for-us rates that had been in effect for so many years.

Perhaps this 1946 Assessment is entirely justifiable and in keeping with the times. We don't pretend to know. But, we do know that a great many property owners don't like it. And, that current rates are going to make some people mighty unpopular.

We try not to publish police news in the belief that it never helps anybody and does do the parties involved harm. But we do want to say a word of congratulations to Chief Cunningham and Officer Tibbet for their promptness in apprehending the seven-year-old youngster, Saturday morning, who grabbed a bag of change from a dairy truck and beat a retreat into the jungled thicket of honeysuckle on the B. & O. property, just behind our office.

The Dummy Painter, demonstrating his artistic ability in the window of Len Walbridge's shop last Thursday, Friday and Saturday, drew quite a crowd of interested spectators . . . which not only was a good publicity stunt for Len, but sold many pieces of work for the painter who actually was deaf—thus the Dummy Painter.

We haven't had—as yet—any replies to our plea for a two or three-bedroom house, or apartment, which we are very interested in obtaining for excellent local tenants.

'Tis said that man is like a lamp wick—trimmed many times before he gets the right flame.

If the paper this week seems a little under par—blame it on the Fourth of July holiday . . . which our entire force hopes to take off. July Fourth is rightly called Independence Day and in this instance it commemorates the END of our independence for our spouse returns tomorrow from the hills of Kentucky.

This day might also have something to do with our being a little more independent financially for it will mark the end of the 30-day race meet at Delaware Park and then we hope to have a little more change in our jeans, from day to day, since we won't be buying any more hay.

It seems as though we'll have to give the Junior Chamber of Commerce credit for accomplishing results in the town registration of non-property owners—conducted during June—for eligibility to vote in annual town elections.

Some weeks ago, just after the first of the registration days had been announced, we cracked that only one "renter" so far had registered. At the time the item was written, that was the case . . . but we shore did stir us up a hornets' nest. To put it mildly, the Junior Chamber of Commerce resented it . . . and promptly got busy.

As a result, the June registration days ended with a total of 128 non-property owners having registered . . . which was just 121 more than registered in 1945.

Don't be surprised if the town tax rate is reduced to compensate for increased assessments . . . and if a three-man Board of Assessment is appointed for 1947 instead of leaving this important task to the whims and discretion of a single individual.

## FIBRE GIRLS BOW 9-6 TO LUKENS HERE MONDAY NITE FOR SEASON'S FIRST LOSS

### Late Rally Fails To Give Continental Win In Hard-Fought Game; Girls Cinch First Half Honors In League With Win Over Wilm. Hospital Last Wednesday

The Continental-Diamond Girls' Softball team tasted defeat for the first time this season Monday night when they fell before Luken's Girls, 9-6, in a bitterly contested game here.

The fibre girls could well afford to rest for a moment on their laurels, however, after their victory last Wednesday evening, when they clubbed Wilmington General Hospital's outfit 15-2 and thereby cinched the loop honors in the first half of the Senior Division of the Girls' Softball League.

## TO STUDY MONOPOLIES IN BOXING AND MAJORS

### Big League Baseball And Boxing To Face Investigations

Assistant Attorney General Wendell Berge said recently he would study professional boxing and major league baseball to determine whether anti-trust laws were being violated.

The interest of Berge, chief of the Justice Department's Anti-Trust Division, was disclosed in the wake of charges by Rep. Donald L. O'Toole (D-N.Y.), that Wednesday's heavyweight championship bout was a scandalous "swindle" on the public.

Berge said he would look into the power which Mike Jacobs, New York fight promoter, holds over the professional boxing world to determine whether he constitutes a monopoly.

Turning to baseball, Berge said he believes a restudy of that sport was in order in view of changed conditions and new interpretations of the anti-trust laws that have come since the Supreme Court ruled in 1922 that professional baseball, despite the constant interstate travel involved, was not in interstate commerce.

Berge expressed concern with the recent rule made by the big leagues against players who jumped their contracts to go to the Mexican League. The leagues ruled that these players were barred from big league baseball in the United States for five years.

"I followed that very closely in the players," Berge said. "I think the situation should be restudied."

## Americans Averaged 18 Lbs. Candy In 1945

Americans, on the average, ate more than 18 pounds of candy each last year, a Commerce Department report indicated recently.

Confectionery manufacturers sold 2,562,000,000 pounds of sweetstuffs valued at \$620,000,000 in 1945, the department estimated.

This was down from the record of 2,804,000,000 pounds—an average bettering 20 pounds for each American—valued at \$658,000,000 in 1944, but the department said the makers could have upped sales one-third if there hadn't been any shortage of sugar.

## Bullet-Stopping Cloth Is Designed By Army

The Army has developed a protective cloth for soldiers that "will stop a bullet," Gen. Jacob L. Devers said recently.

He predicted the cloth would "save a lot of casualties" especially those caused by glancing shell fragments. Other Army officials said it is a step beyond the metallic body armor used by airmen and that the details might be disclosed later.

Devers told reporters that the Army Ground Forces which he commands would figure as importantly as the air forces and the Navy in any future conflict and that commanders are keeping their planning flexible to make full use of scientific advances.

In the Luken tilt, the out-of-towners amassed a big lead and had a 9-1 advantage in the sixth. The local lasses put on a desperate 4-run rally in their half of the sixth and added another counter in the ninth, but could not summon the scoring punch necessary for victory.

Against Wilmington Hospital's outfit, Continental took over the scoring department in the first inning with a 2-run flare-up, added five more tallies in the third and scored in every frame thereafter. The city club did not enter the picture until the fourth when they scored their only two runs of the contest.

Marge Norris opened the action in the first frame when she scored on an error by the shortstop. After two outs, Eddie Oliver singled and scored later on Ann Wilhelm's double. Continental collected 16 hits, with Eddie Oliver again leading the local batsmen with four safeties.

## Army, Navy Pay Rise Approved By Truman

President Truman made July pay call sound \$50,000,000 sweeter for officers and men of the armed forces. But he kept the fighting services pretty much in suspense on the subject almost to the last minute.

The Chief Executive waited until late Saturday before he signed into law the bill which provides a higher wage scale for those in uniform, starting with 50 per cent boosts for privates and apprentice seamen and tapering down to 10 per cent for top generals and admirals.

The pay bill was a companion measure to the draft extension bill which Mr. Truman signed at midnight Saturday.

## Martin Issues Statement On New Softball League

A statement regarding the men's service club softball league was issued yesterday by Coach William Martin, league director, as follows:

"The new service club softball league is made up of community service clubs. It has been restricted to service clubs only, and the manager of each team should limit his roster of players to members of his club. No outsider should be used.

"It is hoped that each club will show sufficient interest in the league, which is a part of the community recreation program, to field a complete team each night it is scheduled to play.

"Service club players, support the manager of your respective team. It does not matter whether or not you are a good softball player. Take part in the games and enjoy some fun, good fellowship and exercise.

"The games are five innings and are scheduled to begin at 7 p. m. However, 7:15 is the deadline and a team will have to forfeit the game if it isn't ready to play by that time."

Coach Martin also rescinded a previous league rule outlawing spiked shoes. On the grassy diamond, smooth soled shoes were found to be more dangerous than spikes. Small spiked shoes will be permitted, he said.

## SOFTBALL LOOP FOR MEN OPENS

### Red Men Nip Rotary, 19-3, In Circuit Opener

The men's service club softball league got underway Monday night when the Red Men tripped the Rotary, 19-3, in a lopsided scoring fracas on the high school diamond.

The Red Men leaped to a substantial lead in the very first inning pushing across 10 runs and scoring in every frame thereafter. Highlighting the contest was a circuit clout by Del Collo for the Red Men and a triple by Shield for Rotary.

Two fast double plays, one by each team, also featured the game. The first by the Red Men was from Del Collo to Fowler to Wilson, while Rotary's went from Meyer to Silk.

The offensive play on both sides clicked well, while defenses proved spotty. A sprinkling of spectators were on hand.

Red Men line-up: Widows, lf; Fowler, 3b; Thomas, 2b; Walp, c; Wilson 1b; Del Collo, p; Fell, lf; and Wastrum, cf. Rotary: Pettit, c; Shields, p; Silk, 1b; J. Handloff, ss and 2b; Myer, 3b; Griffith, ss and lf; Weinberg, lf and 2b; Crother, cf; and Taylor, rf.

The service club schedule for next week is as follows: Friday, July 5—Jaycees vs. Firemen; Monday, July 8—Rotary vs. American Legion; Wednesday, July 10—Red Men vs. Firemen; and Friday, July 12—Lions vs. Jaycees.

## FBI Course Taken By State Police Sergeant

Sergt. Melvin G. Leisure, supply sergeant of the Delaware State Police headquarters, State Road, was graduated from the FBI National Academy at Washington recently upon completion of a 14-weeks course.

Sergeant Leisure, who lives at 107 Laurel Lane, Forest Brook Glen, was selected to attend the course by Col. Paul W. Haviland, superintendent of the state police, who, with Capt. Herbert Barnes and Sergt. Richard E. Smith, attended the ceremony.

## NEWARK TABS 3-1 VICTORY OVER HAVRE DE GRACE IN ANOTHER SUSKY LOOP UPSET

### Scheduled For Double Header Today; Meet Kenmore Here In Morning And Face Rising Sun On Latter's Field In P. M. Tilt; Take On Aberdeen Sunday

Not losing any momentum after the Elkton upset, Newark bowled over another member of the Susquehanna League's top three on Sunday when the locals downed Havre de Grace, 3-1, on the latter's field in a tight mound duel which saw Newark trail by a single run for eight innings then, as in the Elkton game, put on a sudden, undeniable scoring burst which gave them three runs and the victory.

A stiff week-end of competition faces the home-townners on the holiday. Today they are scheduled for a double header, the first game with Kenmore A. C. here on the Continental field in the morning and the second with Rising Sun in the afternoon away Sunday the locals tangle with Aberdeen on the latter's field.

Butts held Havre de Grace to four scattered hits during nine innings last Sunday, turning in one of the best mound performances Newark has seen this season. His teammates collected eight hits for their three runs.

The winning rally in the eighth opened with a single by Weldin, after which Silk flied out to right field and Skripp took first when hit by a pitched ball. George then slashed out a crisp single scoring Weldin. Schaan made it two down when he hit into a forced play nipping George at second. Butts followed and was intentionally walked.

With the bases loaded, Bobby Gregg again, as in the Elkton victory, provided the hitting punch desperately needed by Newark. He ripped out a sharp single scoring Skripps and Schaan and spelling final for the Marylanders.

Butts hurled a strong, steady game and was nicely handled by George Schaan.

## POTATO SUPPORT PRICE PLAN

### Details Of Price Program

Arrangements have just been completed for the operation of a government price-support potato purchase program, it was announced today by E. Ocheltree, State Director of the Department of Agriculture and Marketing Administration. According to Ocheltree, Sussex county potato growers are anticipating that opening prices will be at about the level of the support price, in which case it may be necessary during the harvest digging period to relieve the market by diverting possible surpluses to industrial uses and at the same time support the price at a level in line with the Steagall Amendment. Ocheltree announced the support price will be at \$1.80 per 100 lbs. for No. 1 potatoes, at the farmer's choice. However, an allowance totalling 10 cents per 100 lbs. may be made in the case of F. O. B. shipments by rail to the farmer for hauling, grading and inspection.

Arrangements to implement the price support program were made at a Potato Marketing Potato Committee meeting jointly by Mr. Ocheltree and Mr. P. Hastings, chairman of the Sussex county ACA Committee. County Extension Agents William Henderson and Edward Schabinger; Norman Horsey, representative of the Fruit and Vegetable Branch, P. M. A.; Paul H. Hodgson, of the State Bureau of Markets; county ACA Committee; and John Williams, Edward Cordery, Raymond Townsend, and James Baxter, owners and dealers of Sussex County, S. Suber, assistant State Director, M. A. are members of the committee. In addition to Ocheltree and Hastings, should the need arise, the purchases will be made by representatives of the Fruit and Vegetable Branch, P. M. A., through cooperation with the Potato Committee. Specific information may be obtained at the Sussex County ACA office in Georgetown.

## HOPPING HITS BY HOME AIDE

### Advice On Buying To Save Given

"Buy wisely and avoid waste" is a rule for Delaware homemakers. Allow, if they would get the most food value from every fruit and vegetable dollar spent.

There are a few suggestions from Miss Gertrude Holloway, State home demonstration leader and nutrition specialist for the Delaware Extension Service, on how to put that rule into practice—and contribute to the nation's home Emergency program at the same time.

Buy fruits and vegetables by weight whenever possible. Compare the prices of vegetables that offer the same nutritional values before making a final choice. If broccoli happens to be too expensive for the family food budget, for example, check on the price of kale, spinach, green beans or some other vegetable that can be used instead.

Take time to go to the store or farm to do your own shopping for perishables rather than ordering them by mail. Then you can inspect them for quality.

Always consider quality in evaluation. Produce marked down because it is in poor condition is probably not a bargain. Wilted green vegetables have lost some of their vitamin content. Overripe fruit with decayed spots spoils rapidly, and regardless of how cheap it may be it is usually an unwholesome buy unless it can be eaten immediately.

On the other hand, produce marked down because the store has an overabundance of it may be a worthwhile bargain.

Buy produce which is in season. The variety of vegetables. It will simplify the job of keeping within the budget and it will help assure a balanced diet.

Remember that you have three choices to draw upon in supplying the diet and with an appreciation of food you can make good use of all three.

## 83 Marriage Licenses Issued In 48 Hours

Just as the number of May applicants for official permission to wed was the highest in more than two years, June couples are on their way to an even bigger record.

Clerk of the Peace George Gray Thouron disclosed recently that in a 48-hour period his office had issued 83 licenses, a record.

Last Saturday, with the office closing at noon, some 47 licenses were issued, the largest number for any day since 1941. Monday some 36 more couples applied. A total of 193 licenses has been issued to date this month.

## RELIEF COSTS RISE IN DELAWARE

### 62 Per Cent Jump Due To Living Costs

A 62 per cent rise in Delaware's expenditure for relief reported by the Old Age Welfare Commission, a branch of which handles relief in the state, was attributed to the increased cost of living, plus some rise in the case load, it was disclosed in a report last week.

That the increased cost of living is a major factor is reflected in the fact that the average payments per person, amounted to \$31.25 last month compared to \$24.07 in the same month of 1945. These payments represent outlays for food, fuel, rent and other necessities.

During May the total expenditure was \$15,373.97. This compared with \$9,741.91 in May of 1945 although the case load increased from 340 in May 1945 to 422 in May of this year. The relief funds now being dispensed in the state go entirely to unemployables or to persons who have been accredited as unable to work because of physical disabilities.

New Castle County received the greater portion of the May total, a ratio which the office reported is consistent with the records of past months. A total of \$10,890.39 was paid to 330 persons in New Castle County, \$1,328.45 was paid to 48 persons in Sussex County and \$969.78 went to 24 persons in Kent County.

## 4-H GIRLS TO LEARN DESIGNING

### Brightening Of Home Interior Is Club Project

In fixing over her own room, a 4-H girl learns basic principles of color and design which can be applied to all the rooms in the house, making them more comfortable and beautiful for the whole family to enjoy, Miss Louise R. Whitcomb, Home Management Specialist of the Extension Service, University of Delaware, stresses this fact when making the announcement that there are 16 girls taking room improvement this year as one of their 4-H projects.

In May, conferences were held with these girls and their mothers to talk over plans. Pictures were then taken before any improvements were made. At each conference the room was carefully scored as to comfort, convenience and attractiveness. Some things which were neither beautiful or useful were discarded. Some of the improvements suggested, like more comfortable arrangement of furniture for instance, will cost nothing. Club members have been encouraged to use what things they have on hand and will be assisted this summer in re-furnishing and fixing over furnishings. In many cases family members will assist in building needed shelves or closet space.

Accessories such as cushions, curtains, draperies, book-ends and fittings for clothes closets have been carefully planned to fit into the girl's color scheme. The many ingenious ways they can think of to add comfort and color to a room without too much cash outlay, makes this project a particularly challenging one.

Following are the names of the girls working this summer with Miss Whitcomb and their 4-H Club agent on the room improvement project: Doris McGinnis, Wyoming; Anna Claire Pittard, Frederica; Barbara Tatman, Frederica; Betty Ann Bostick, Felton; Martha Krawatch, Delmar; Jean Meredith, Greenwood; Elva Marvel, Harbeson; Janet Ralph, Delmar; Johanne Beppler, Marshallton; Erma Dobrick, Newark; Esther Ann Klair, Marshallton.

## State College Housing Program Is Launched

Workers are busy assembling the first unit of the Delaware State College GI Houses at Dover. This first unit which is expected to be completed in July will accommodate 36 veterans.

Four additional units will be built during the summer for both single and married veterans. The units for married ex-GI's will consist of apartments containing two bedrooms, a living room, kitchen, and a bath.

According to announcements released here today, the college has a few openings for veterans but these will be filled before July 15.

## DELAWARE'S WAR DEAD

### War Department Publishes List

Delaware's soldiers dead and missing in the second World War totaled 579 according to the Army's first peacetime report.

The War Department listed by name the 308,978 men and women of America who failed to return from battle. Delaware, with 20 per cent of the population of the United States and its possessions in 1940, contributed 21 per cent of the total number that entered the Army, the War Department disclosed.

Of the casualties in this state, 392 were from New Castle County, the War Department report revealed, while Sussex County had 91; Kent County, 51, and 37 others were from the state at large.

A total of 223 New Castle Countians were killed in action, 33 died of wounds, one died of injuries, 96 died of non-battle casualties, 27 were finding of death under public law, and two were missing.

"It is better for a woman to marry a man who loves than a man she loves,"—Arab proverb.

## 30 PLANES ASSIGNED TO GUARD

### Instructor Also Named For State Guard Air Force

Plans for assigning 30 planes, including 25 P-47 fighters, to the Delaware National Guard Air Force unit, which will occupy a section of the New Castle Army Air Base were announced the past week.

New Army Air Force instructor already assigned to the Guard for organization and guidance of the 142nd Fighter Squadron is Lieutenant Colonel A. W. Kellond, San Antonio, Tex., has arrived and entered on his duties, it was said.

Starting Monday Colonel Kellond began interviewing applicants for commissioned officer positions, both full time and on a National Guard part-time basis, for the new Delaware National Guard Air Force.

Colonel Kellond will also interview applicants for full time work as mechanics and maintenance men for the air force. There are 40 vacancies for full time men.

The units which will comprise the Delaware National Guard Air Force are:

142nd Weather Station, Type A, three officers, five enlisted men; Detachment C, 208th Air Service Group, Fighter, eight officers, one warrant officer, and 168 enlisted men; 142nd Fighter Squadron, 130 officers and men, and 132nd Utility Flight, 35 men.

# Destroy Mosquitoes And Ragweeds

The Board of Health requests your cooperation in ridding the town of weeds.

Aside from the definite health hazard to sufferers of hay fever, ragweed, goldenrod and other weeds, tall grass provides shelter for mosquitoes which at times are quite annoying.

It is requested that all persons comply with the above request prior to June 30, 1946.

Arrangements for having weeds cut may be made by calling Newark 591.

After June 30 all persons who have failed to comply with the above directive will be subject to a fine of Ten Dollars and a Dollar a day penalty for each day that said nuisance exists.

## MAGAZINE ARTICLE BY DR. C. KASE

### Drama Head Authors Piece In "Recreation"

A significant article by Dr. C. R. Kase, Director of Dramatics and head of the newly-established Department of Dramatic Arts and Speech at the University of Delaware, has been published in the current issue of "Recreation," a monthly periodical of the National Recreation Association, whose theme for June is State Recreation Service. Dr. Kase's contribution is entitled "The State University Serves the American People's Theater."

Declaring that "a State University has obligations to its citizens beyond those of providing an education to students who attend its classes," Dr. Kase described the vast scope of the Little Theater movement throughout the country today, and pointed out by reference to the program already developed at the University of Delaware a possible pattern for drama service at any state university.

The University of Delaware Dramatic Center, Dr. Kase reports, functions in close cooperation with the Delaware Dramatic Association, whose members represent approximately 75 school and community theaters in this area.

The Dramatic Center sponsors an annual Dramatic Conference, to which have come as many as 280 delegates representing 45 community and school theaters in four states.

A special conference was held early this year in an attempt to organize children's theater activity throughout the state, Dr. Kase pointed out.

Annually a state-wide Play Festival is sponsored by the university. Regional elimination trials culminate in a final program at the university, at which time a nationally known theater director acts as a critic judge with on-the-spot evaluations, criticisms and suggestions.

The Dramatic Center serves the State Little Theater movement in still another way by maintaining a play-lending library, Dr. Kase reported, from which drama groups can borrow plays they are considering for presentation. Groups frequently write in for advice and suggestions on the kind of play they should attempt, and the center gives valuable aid in this respect.

A final outstanding feature of the University of Delaware program, the article concluded, is the "Dramatic Service News," by means of which members of the Delaware Dramatic Association can know not only what others in the local area are doing, but also the significant activity of the people's theater throughout the nation.

## UNIVERSITY ESTABLISHES NEW POULTRY SCHOLARSHIP

### To Award \$200 Annually To 4-Year Senior At University

George L. Schuster, dean of the School of Agriculture and director of the Delaware Agricultural Extension Service of the University of Delaware, announced this week the acceptance of a \$200 scholarship to be known as the Delaware Poultry Improvement Association Scholarship. The Poultry Improvement Association, composed of poultry raisers and others interested in poultry, recognizes the need for trained leaders in poultry, and will award annually the scholarship to a 4-year senior majoring in poultry at the university.

The association committee which developed the scholarship program included the following: Charles Marker, Dover; Charles Conaway, Greenwood; Elias Tingle, Frankford; John Hammond, Bridgeville, and A. E. Tomhave, Newark.

Qualifications listed for the award are that the student must be a Delaware resident and will be on the basis of scholastic attainment, character and financial need.

The recipient will be chosen at the close of the junior year. If there are no suitable candidates in the senior class, in the opinion of the Selection Committee, the scholarship may be awarded to a member of the junior class majoring in poultry.

The Selection Committee will include the president of the Delaware Poultry Improvement Association, the association secretary, the immediate past president, a member at large selected by the president and head of the Poultry Department of the University of Delaware.

### 1945 TOURNAMENT QUEEN

Mary Rutte, 16, Pasadena, is the 1945 queen of the California Tournament of Roses.

## TAXPAYER'S COMPLAINTS ARE HEARD

### Adjustments Are Favorable In Most Cases

Numerous complaints on increased 1946 assessments, especially on land valuation, were registered with the Court of Appeals held Monday at the Council Offices.

Council members reviewed the objections during the afternoon and evening and, in most instances, made adjustments favorable to the taxpayers.

Complaints on land assessments were received in especially large numbers from residents of South College Avenue where a new rate per front foot had been fixed. Council concurred with the claim that the rate was excessive and lowered it in the entire Townsend Road, Orchard Road and South College Avenue section to \$25 per front foot. Reductions were also ordered in the area between West Park Place and the Pennsylvania Railroad from \$30 to \$20. Numerous other individual adjustments in scattered sections of town were authorized.

Although the 1946 assessment figures were generally higher, this is expected to be offset by the fact that the Town Council, at a special meeting several weeks ago, ordered the town tax rate to be reduced from 30 cents per \$100 of assessment to 25 cents. Thus, despite higher assessment valuations, an individual's tax payment will not increase greatly, it was said.

Newark has one of the lowest tax rates of any community in the state, and a lower one than the county.

## BOOKS BY UNIVERSITY STAFF ARE DISPLAYED

### Publications By Faculty Are Shown In Library

An exhibit of publications by members of the faculty at the University of Delaware was held recently in the Memorial Library by Dr. H. Clay Reed, head of the department of history, and Mr. William D. Lewis, librarian. The exhibit covered only the years 1938-46, it included periodical literature, and represented both present members of the faculty and former members.

Of special interest was the juxtaposed display of books by the incoming president, Dr. William S. Carlson, and the incumbent, Dr. W. Owen Sypherd. Dr. Carlson's contribution was "Greenland Lies North," published by MacMillan and Co. in 1942. Dr. Sypherd's was "The Book of Books," published in 1944 by Alfred A. Knopf. It is the King James Version of the English Bible abridged and edited for younger readers.

Dr. Sypherd was represented also by two other publications included elsewhere in the display. He is joint author of "The Engineer's Manual of English," and author of Literature of the English Bible.

Of special war-time significance was the offering of William W. Flexner, of Cornell University, and Gordon L. Walker, formerly of the University of Delaware math department. Published in 1942, it is titled "Military and Naval Maps—Their Use and Construction."

Two books published in 1938 by the Delaware Tercentenary Commission are also on display: "Delaware—the First State of the Union," by the late Dr. George H. Ryden, former head of the history department, and "Early Colonial Taxation in Delaware," by M. M. Daugherty, research professor of agricultural economics.

Dr. W. Earl Armstrong, dean of the School of Education, is represented by "The College and Teacher Education," of which he is joint author. Dr. C. J. Rees, head of the mathematics department, is a co-author of "Nautical Mathematics and Marine Navigation." Dr. Edwin C. Byam, head of the department of modern languages, has contributed his critical study "Theodore Barriere—French Dramatist of the Second Empire," which has been published as part of the Johns Hopkins "Studies in Romance Literatures and Languages."

Dr. H. Clay Reed and Mr. George J. Miller, a counselor at law at Perth Amboy, have collaborated in editing "The Burlington Court Book," which is a record of Quaker jurisprudence in western New Jersey from 1680-1709. Dr. Cyrus Day, of the English department, and Eleanor Boswell Murrie have compiled "English Song Books 1651-1702," a bibliography complete with a first-line index of individual songs.

In addition to numerous other books by faculty members, the display includes approximately 30 pamphlets representing the hundreds published and circulated each year by the School of Agriculture on the results of experiments and studies at the university.

## Play Plan

(Continued from Page 1)

Instruction are the following: Miss Ruby Dann, Bill Reybold, Eugene Trivits, Jay Steinouer, John Pack, Joe Stout and Ed Stout. All are acting as instructors in the morning and, with the exception of Miss Dann, are serving as life guards in the afternoon. The boys are members of local scout troops and have passed their junior life saving tests.

Chief assistant to Martin at both the playground and the pool is Thomas Silk, who goes on full-time Friday.

Youngsters who have already passed their swimming tests following instructions at the morning sessions are: John Holmquest, Vaughn Jacquette, James Mattson and John Speicher. To pass the test, the beginners were required to swim the length of the pool two times and dive once from the board.

The Saturday afternoon swimming session was highlighted by a diving exhibition by George Schaen, who is now a physical education major at the university.

The playground was open only two days last week due to the rain on Saturday. The area will be closed every rainy day, Coach Martin said. Activities during the opening week centered around softball for the boys, with Martin giving instruction in batting, hitting, bunting, fielding grounders and fly balls. The director hopes to continue the instructional periods if the response is satisfactory. The girls under Miss Ann Chalmers, took part in softball, volleyball and croquet contests.

## URGE EARLY SPRAYING OF PLANTS

### State Growers Are Warned Of Plant Disease

Reports reaching Dr. J. W. Heuberg, Extension Plant Pathologist, Agricultural Extension Service, University of Delaware, tell of downy mildew disease being a week to ten days earlier and more destructive than usual on cucumbers and cantaloupes in South Carolina and North Carolina. In view of this, Delaware growers are urged to begin their spraying or dusting next week so as to control this disease if it makes its appearance much earlier than usual in Delaware. Records kept by the Delaware Agricultural Experiment Station show that when downy mildew disease is serious in the south it can be expected in Delaware if weather conditions (wet and somewhat cool) remain favorable for its development.

Research in Delaware, as well as in South Carolina, have shown that Copper Compound A is the best material available at the moment for the control of downy mildew disease without serious injury to the plants. If this material is used as a spray, it should be used at the rate of 3 to 4 pounds per 100 gallons of water; if used as a dust, the dust should contain at least 5 per cent metallic copper (7 per cent metallic copper is better but it is more costly). Make applications of both spray and dust so as to cover the plants thoroughly. Repeat applications at 7-10 day intervals, depending on the weather. Spraying should be done when the plants are dry and dusting should be done in the early morning when dew is present or late evenings when the wind is quiet.

Dusts or sprays containing Yellow Cuprocide or Tribasic Copper Sulfate are also satisfactory for mildew control. Bordeaux mixture is not recommended because of its injurious effects on the plants.

A further report will be made on downy mildew disease development at a later date.

## SHELLENDER INDUCTED BY LIONS CLUB

### Members Vote To Aid Recreation Fund Campaign

Ira C. Shellender was formally installed as president of the Newark Lions Club at the group's weekly dinner meeting Monday night. Other officers installed were: Jim Counahan, first vice-president; Dan Stoll, second vice-president; Bill Marrs, third vice-president; Jay Steinouer, lion tamer; Ed Shakespeare, tall twister; and Carroll Mumford, secretary-treasurer.

Directors installed for two years were: Herman Handloff and Walter Powell.

Members voted to assist with a block party, being planned by the Newark Recreation Association as part of their campaign to raise funds for the summer program. It was also announced that returns thus far on the movie benefit held two weeks ago for the summer program total \$700, with more still expected. Jim Counahan and George Haney were named as the Lion's recreation committee to assist with the town association's plans.

Members who have volunteered to play on the Lion softball team, entered in the men's service club league which opened this week, are: Dick Engberg, T. D. Smith, Dave Poffenberger, Les Beers, Jay Steinouer, Herman Handloff, Jack Sinclair, Frank Smith, Arthur Oram, W. O. White, Len Fossett, Bob Davis, Bill Shue and Lish Rahn.

A talk on various types of summer recreation programs adaptable to a community the size of Newark was given by George Sargisson, executive director of Recreation Promotion and Service, Inc., Wilmington.

## NEWARK SCHOOL BOARD IN STATE ASSOC.

### Joseph McVey On Organizing Committee

Joseph M. McVey, president of the Newark Special School District Board, was one of the members of the organization committee which recently drafted a proposed constitution and by-laws to govern the newly-formed Delaware Association of School Boards.

The district boards will act on the draft and report not later than July 15. If approved the draft will be considered adopted and in force.

Work on the constitution is a preparatory move for a meeting of the association tentatively set for September 12 in Dover, it was disclosed by W. Reily Brown, temporary chairman of the group.

The planned September meeting, slated to be held at the invitation of G. Daniel Enteline, who is vice-president of the Dover board, will be for representatives of all boards of education, including Wilmington, special districts, and state unit districts. Each board which affiliates with the organization will be entitled to one vote, excepting boards which employ fewer than three teachers, the proposed constitution sets forth.

The purpose of the association is "to bring about and foster unity of thought and action of school boards and to further the educational interests of the state." Membership will comprise boards of education and boards of trustees of the state.

## TO HALT VETERAN ENROLLING

### University Puts July 1 As Deadline

No further applications from veterans for admission to the University of Delaware for the first time in September will be accepted after July 1, it was announced today by Charles W. Bush, university registrar, following a meeting of the Committee of Admissions.

Mr. Bush emphasized, however, that the university will continue to accept applications from former students of the university.

Today's action was made necessary, the registrar stated, in view of the fact that 850 applications for admission in September already have been received and because 700 students who were in attendance last term are expected to return in the fall. This total of students already exceeds the maximum number which university authorities had previously estimated could be accommodated. This number is also double last term's enrollment.

Of the 850 applicants approved for admission in September, more than 625 are World War II veterans. In addition, approximately 400 of the returning students are also veterans.

Applications from non-veterans who did not formerly attend the University of Delaware have not been accepted since May 1.
