Your Pledge?

VOLUME 39

NEWARK, DELAWARE, FEBRUARY 21, 1923

NUMBER 15

## Basketball Results To Date Show Five Wins, Six Losses

### Team Makes Credible Showing Against Navy; Loses To Swarthmore

#### Delaware 31; Haverford 23

The Haverford cagemen proved easy prey for the Blue Hen's Chicks last Saturday night when the latter triumphed over their old rivals by a score of 31-23. The Delaware lads displayed a commendable amount of strength, considering they had been through five contests during the eight days previous to the Saturday night contest. The squad did not exhibit their usual strong offense and were at times weak on the defense, but they did outclass their rivals throughout most of the game.

Jackson led off by tossing two fouls. Field goals by Arnold and Garrett gave Haverford a 4-2 lead which caused the Blue and Gold cagers to come back strong. Williams then tied the score by a two-pointed, but Garrett retaliated and warmed the blood of his opponents all the more. Cole and Jackson then started a rally which gave Delaware a 14-6 lead. After time out, Haverford came back strong and the first half ended 18-14. Delaware kept the lead throughout the rest of the game.

Delaware tightened up in the second half and held the Red and Black to two field goals. France and Cole fought their forwards to a standstill. Toward the last of the game Gibson replaced McKelvie, who was taken out on personals. Robinson went in for Gibson, Mannix for Jackson, and Boyce for France. Jackson was not up to his usual form at the free trial line. He made 7 out of 14. Captain Arnold of Haverford made 9 out of 14 chances. The line-up:

University of Delaware		
	Field	Foul Pts.
Jackson, forward	3	7 13
McKelvie, forward	1	0 2
Williams, center	6	0 12
Cole, guard	2	0 4
France, guard	0	0 0
Totals	12	7 37

Haverford College		
	Field	Foul Pts.
Arnold, forward	2	9 13
Rhoades, forward	0	0 0
Hadwick, center	0	0 0
Garrett, guard	3	0 6
Munsicker, guard	2	0 4
Totals	7	9 23

Referee, Ross. Umpire, Gallaher. Substitutions—Delaware: Gibson for McKelvie, Robinson for Gibson, Gibson for Cole, Boyce for France, Mannix for Jackson. Haverford: Heilman for Rhoades, Yerkes for Heilman.

#### Delaware 21; Swarthmore 24

After keeping in lead of Swarthmore by the score of 16 to 7 in the first half last Friday, Delaware failed to continue its pace and lost to the Garnet team, 24 to 21. Williams was at his best and was more than a

match for his taller opponent, Asplundh, scoring five tallies from the court. By his field goal, Jack put Delaware in the lead at the early part of the game and the team held that position until the timer's whistle announced the half-way mark of the contest.

In the second half Swarthmore, by the aid of Burr and Swope, lengthened its stride, due to clever passing, and gradually ate up the large margin which was standing at the first half. Within three or four minutes of the end the Garnet boys tied the score and personal fouls by the Blue and Gold five enable the opponents to take the lead and hold it until the finish. With the score 24 to 21 in favor of Swarthmore the whistle was blown and the Delaware boys marched off, defeated but not conquered, amid the applause of the spectators who appreciated the plucky but unlucky fight our boys had made.

#### Delaware 28; Navy 44

Navy had its hands full last Wednesday when it defeated the Blue and Gold five, which showed its best form of the season. Delaware started off like a whirlwind and before the "Mid-dies" were awake to the proposition McKelvie and Williams, aided by clever passing, succeeded in putting the ball through the net-covered ring several times. France and Cole were on the job at their guard positions and allowed the Annapolis boys but one field goal in the first twelve minutes of play. McKelvie proved a thorn in the side of the opponents by his clever shooting, but four personal fouls on his part removed the aforementioned thorn. The friendly spirit of the spectators was demonstrated when they applauded, as he walked off the court to the showers, the short but spectacular part he had played. With the boy from Kennett Square out of the game, the future admirals drew a sigh of relief and continued to fight their way to victory. The first half ended with Delaware on the important end of a 15 to 12 score.

The table of fate changed in the second half and the "Mid-dies" staged their habitual comeback by making six field goals in the first eight minutes. McKelvie began to function according to his usual form, scoring eight

(Continued on Page 4.)

#### Freshmen 33; Beacom's 29

The Freshman five won their third victory of the season over the Beacom College team last Friday. Spectacular playing of Slonsky and Jacobson brought home a 33-29 victory. Yesterday the Freshies played the highly touted Salesianum five. Return games with the Goldey and Beacom fives are contemplated by Manager Lewis. These games will be played prior to varsity games.

## Varsity Ball To Be Held Friday Night

### Review Correspondent Gets Exclusive Story

According to the latest reports of the press, the plans for the Varsity Ball have been completed. This gala affair is to be held on Friday night in the Commons. There have been numerous theories offered concerning the fatal result of this annual function.

It is said that men of every rank and "condition" will share the evening's entertainment. The wise with the foolish and the poor with the rich will link arms and dance away the swirling hours. No doubt, the public will gape with wonder on this bewildering assemblage.

When interviewed Mr. Varsity said that he did not wish to make any statement concerning the rumor that Florenz Ziegfeld would attend the dance.

"I realize," said Mr. Varsity, "that there will be bizarre creations worn by the ladies. Yet, I feel positive that the costumes worn will not be of such a design that will necessitate Mr. Ziegfeld's appearance in order that he might get inspiration for next year's Follies."

The committee has done everything in its power to make the dance a success. When Paul Whitman sent word that it would be impossible for him to break his contract with the Palais Royal, in New York, the Committee hastily decided to pay a larger sum for the music. Therefore, after much difficulty, they were able to secure George Madden and his orchestra. Artistic designers from Greenwich Village have been obtained to decorate the hall.

Our total of 5258 beats last year's score by 300 points. Sitting score this year equalled our highest prone last year.

The reports of the R. O. T. C. match are forthcoming. From Rutgers comes the result of their team, the high score of 953 out of a possible 1,000. This beats the score of our team by only 12 points. The perfect score of Gidley, '23 of Rutgers was the primary reason for the high standing. Columbia sends in a score of 971; Syracuse 921; New York University 907. As yet there have been no reports of the first stage from Cornell and City College of New York, which are represented in the matches.

#### New Dean Not Chosen

##### At Trustees' Meeting

On February 18, the Board of Trustees of the University met to elect a new Dean. Although a nomination was made, no one was elected.

Charles A. McCue, Dean of the Agricultural Department of the University, was reappointed as temporary Dean until June, at which time a permanent Dean will be elected.

Mr. M. C. Prince, County Agent Leader, will look after Dean McCue's work until then.

## RIFLE TEAM CRACKS OUT HIGH SCORES

### Breaks All Last Year's Records But One

Thus far the University Rifle Team has compared very favorably with the teams representing other prominent institutions. In fact, every record of last year, with the exception of that for standing, has been broken, as will be seen in the data below.

The scores in previous matches follows:

Virginia Polytechnic Institute 975, Delaware 910.  
North Western University 1754, Delaware 1658.  
University of Porto Rico 1043, Columbia University 1646, Delaware 1658.

Lafayette College (unknown), Delaware 1655.

The Corps Area matches which began January 8th have practically been completed. The scores for the first six stages are as follows:

	Same stage	1921-22
2nd stage Standing	690	652
1st stage Prone	941	920
3rd stage Prone	938	924
4th stage Kneeling	879	816
5th stage Prone	963	
6th stage Sitting	930	

At the end of last year the following were the records:

Prone—97, Wade.  
Sitting—94, Harper.  
Kneeling—92, Woodrow.  
Standing—86, Cook.  
Four positions (20 shots)—174, Wade.

The records of this year have, with the exception of standing, broken those of last year:

Prone—100, France.  
Sitting—96, Cook.  
Kneeling—96, Brown.  
Four positions (20 shots)—177, Cook; 178, Pierce; 185 Reynolds.

It is believed that our standing in the 2nd Corps Area match will be such that we shall be entitled to represent the Corps Area in the National Intercollegiate match again this year.

## STATE SOCIAL WORKERS TO GATHER HERE TUESDAY

### Prominent Speakers Secured for Conference; Students Urged to Attend

The Professional Social Workers' Club of Delaware will hold a conference for social workers at the University next Tuesday. The purpose of the meeting is to increase the interest that is being done by this Club in the State and if possible to interest the students in adopting this field of work for their life work.

The program will continue thru-out the morning and afternoon, during which time speakers of world-wide importance will address the various gatherings. At College Hour Mr. Carl Kelsey, Professor of Sociology of the University of Pennsylvania, will address the combined student bodies on the subject of "The New Field of Social

(Continued on Page 2.)

## Joint Recital At Artist Series Sat.

### Rosa Tuck and Chester Wittell Will Delight Audience With Pleasing Program

#### Last Musical Number of Series

The last musical number of the Artist Series at the University of Delaware will be given Saturday evening, February 24th, when Miss Rosa Tuck, of St. Thomas, Ontario, and Mr. Chester Wittell appear in a joint recital. This concert will probably be the finest of the series and is looked forward to by

MISS ROSA TUCK

music lovers of Newark and the University.

Miss Tuck makes her second appearance at the College, having sung in Newark during the summer as one of the artists of the summer school program. She will be warmly greeted by the host of friends she has made at Newark and whose many requests for a return engagement puts her on this program as one of the most attractive numbers. Miss Tuck possesses a most remarkable contralto voice which added to a charming personality wins her audience from the first note and holds it, a willing captive, to the end.

Mr. Chester Wittell is one of America's great pianists, having appeared as soloist with the symphonies as well as in recitals at nearly every large city in the Middle Atlantic States and New England. Mr. Wittell is also a composer of note. He will include some of his own compositions in his part of the program Saturday evening.

Dr. Caroline M. Purnell (1897), one of the most distinguished women physicians of the United States died recently. She was the daughter of Dr. William Henry Purnell, the first President of Delaware College, after the resuscitation of 1870.

## OUR WORD — OUR BOND

"Better is it that thou should'st not vow,  
Then that thou should'st vow and not pay."

Here are a few words, tho written centuries ago, that have an especial application to us mortals who still continue to follow indifferently the path of life, which just now lies across the campus. Last October every enthusiasm was exerted toward making the drive for a new library a success. The drive was a success but the campaign was not ended with the hoisting of the banner of victory over the objective. We are still in the campaign and we must now hold the ground which we won for ourselves by one hundred per cent subscriptions from the student body.

At that time it was a matter of so much ink and a good intention. But now it is a question of backing our intentions with the cold cash. The library campaign headquarters, which are now situated in the Alumni Secretary's office, reports that approximately one half the students have paid their subscriptions up to date, and the other half have apparently forgotten what they indicated they would do.

The work on the proposed library has gone now so far that any other course but forward is out of the question. But what will happen if we, the students, who set the example for the State last fall, show our lack of interest in what is being done for us by neglecting to pay our pledges to the campaign.

No possibility of a doubt exists that some of us have willfully neglected our share in the construction of the library; the matter has slipped our notice, due to the demands for money from other sources at this time of the year, and all we need is a reminder of what we promised. Our word is as good as our bond and we will make it so. We promised one hundred per cent contribution before the twenty months have expired and when the final date comes we will be one hundred per cent paid.

The money is payable every other month, February being the month when the current payment is due. And all paths lead to the little office on the third floor of Old College.

## VOLUNTEER MOVEMENT HAS SUCCESSFUL MEETING

Women's College Representative Elected Secretary of Organization

The annual conference of the Student Volunteers of Delaware, Maryland, and the District of Columbia was held on Friday, Saturday, and Sunday of last week at this university. Almost one hundred delegates, who are students of colleges in this area, were present at the convention. Those from the University of Delaware were Estella Kite, Marian Niede, Grace Reed, Miss Marian Null, Anna Maciejewski. Besides the student assembly eminent missionaries and scholars from all parts of the world took part in the conference, and addressed the assemblies.

The Student Volunteer movement was inaugurated in Massachusetts in 1886. Since that time its growth has been rapid and wide-spread, until today it is known thru-out the world. Its purpose is not only to interest college students in the mission field, but to bring college students from all parts of the country to discuss questions of religious importance. Each member is pledged to do missionary work at some time or other.

In preparation for the conference, on Tuesday, Dr. George A. Chalfont, of Johns Hopkins Uni-

versity, delivered a very interesting lecture entitled "What Am I Going to Do in Life" in which he emphasized the fact that every student should go slowly in choosing a profession, and that his choice should depend mainly on the possibilities of his doing the most good for the world. On Friday evening Dr. Flening of the Union Theological Seminary took for his subject "Life Service." On Saturday morning Dr. Rowe of Princeton spoke on "My Work in China." Business meetings dealing with different phases of the missionary work were held during the morning. Elections were held at which Miss Lillian Ernest of the University of Maryland was made president; Miss Mary Reich, of Johns Hopkins Nurses' Training School, vice-president; Harold Price, of the Johns Hopkins Medical School, treasurer; and Miss Estella Kite of the Women's College, University of Delaware, secretary.

Luncheon was served at noon in Old College, and in the afternoon Dr. Lambie of Abyssinia, was the speaker. After his speech tea was served at the Women's College, and in the evening at 7 o'clock a banquet was given in the Commons. Later in the evening Dr. Archer, of Drew Seminary, gave a lecture with stereopticon views of Java. Dr. de Schweinitz was the second speaker of the evening. Devotional exercises were held Sunday morning after which Dr. de Schweinitz spoke again in Wolf Hall. Luncheon at the

Women's College was followed in the afternoon by addresses made by Dr. Lambie and Dr. Wilder, when the conference came to a close.

the duBarry Room of the Hotel duPont, Wilmington, on Saturday night, February 24th. In the absence of the alumni presi-

dent, H. W. Lyndall who is now in Chicago, vice-president A. F. Eggmont Horn of Washington, D. C., will preside.

## Alumni To Gather At Hotel DuPont, Feb. 24th

DENIS PAPIN'S

STEAM CYLINDER

## They Weighed Air— and Charles II Laughed

**S**AMUEL PEPYS says in his diary that Charles II, for all his interest in the Royal Society, laughed uproariously at its members "for spending their time only in weighing of air and doing nothing else since they sat."

This helps to explain why Charles has come down to us as the "merry monarch."

The Royal Society was engaged in important research. It was trying to substitute facts for the meaningless phrase "nature abhors a vacuum," which had long served to explain why water rushes into a syringe—the commonest form of pump—when the piston is pulled out.

Denis Papin had as much to do as anyone with these laughable activities of the Royal Society. Papin turned up in London one day with a cylinder in which a piston could slide. He boiled water in the cylinder. The steam generated pushed the piston out. When the flame was removed, the steam

condensed. A vacuum was formed and the weight of the outer air forced the unresisting piston in.

Out of these researches eventually came the steam engine.

London talked of the scandalous life that King Charles led, and paid scant attention to such physicists as Papin, whose work did so much to change the whole character of industry.

The study of air and air pumps has been continued in spite of Charles's laughter. In the General Electric Company's Research Laboratories, for instance, pumps have been developed which will exhaust all but the last ten-billionth of an atmosphere in a vessel.

This achievement marks the beginning of a new kind of chemistry—a chemistry that concerns itself with the effect of forces on matter in the absence of air, a chemistry that has already enriched the world with invaluable improvements in illumination, radio communication, and roentgenology.

**French Clubs Meet**

**Next On Feb. 27th**

On Tuesday, February 27th, there will be a joint meeting of the two French Clubs of the University. An interesting program has been prepared for the occasion and it is hoped that all French enthusiasts will be present.

The feature event of the evening will be in the form of two plays, one to be given by the club of Delaware College and the other by the Women's College. Our friends from the other end of the campus will present "La Bonne" with an All-Star Cast. The nature of the play is not known but there is no doubt but that a pleasant surprise is in store for lovers of the French language. The members of the Men's Club will offer "L'anglais Tel Qu'on le Parle" with a cast composed of the following students: Walker, Dougherty, Gibson, Cummings, Boines, Graham, and King. Professor Levine has spent considerable time training the members of the cast, and he hopes to give the members of the Women's Club a real treat. The remainder of the evening will be spent in conversation and the playing of games, after which refreshments will be served.

Those who intend to take advantage of the Foreign Study Plan should consider membership in the French Club as part of their training, as proficiency in the language is best obtained at these meetings.

**STATE SOCIAL WORKERS TO GATHER HERE TUES.**

(Continued from Page 1.)

Work." The students are especially urged to attend the luncheon to be held at 12.30, at which time Mr. Owen R. Lovejoy, General Secretary of the National Child Labor Committee of New York City, will present "Child Labor and Minimum Industrial Standards." The cost of the luncheon will probably be 25 cents for students, reduction being granted by business office.

Meetings will be held in either Wolf Hall or in the West Wing every hour and the student body is cordially invited to enjoy the remarks of the well-known speakers who have been engaged for the conference.

**Engineering Levels Mountains**

The Pack Train has become a relic of the past, along with the Prairie Schooner. Modern methods of transportation have leveled mountains, brought San Francisco nearer to New York, and widened the markets of all our great industries.

And the engineering brains and energy, that have developed transportation to the prominence it holds in the business of the world today, are no longer employed in improving means of overland travel alone. Street Railways, Elevator Systems, Inter-urban Lines and Improved Shipping Lines—these are some of the accomplishments of engineering in the development of better transportation.

Neither have the builders of such systems been concerned only in the actual hauling of people and materials. A study of the methods of handling passengers and freight at the large terminals has developed the Terminal Engineer, who has greatly improved existing

methods, and has developed entirely new ones, as well.

Engineering, as it is applied to transportation, has had to concern itself with many kinds of materials and many ways of handling them under all manner of circumstances. For instance the problems surrounding the handling of iron ore, in bulk, are vastly different from those encountered in moving any one of the finished products manufactured from iron ore, that must also be transported in large quantities. But Engineering constantly meets each situation with improved transportation facilities.

Industry, as a whole, and the nations and the people of the world owe much to the engineers, associated with such large manufacturing industries as Westinghouse. They have not only brought about vast improvements, but they have done so at a constantly decreasing cost to those who derive the greatest benefit from them.

**The Best Business Career**

Is what every ambitious senior is thinking about at the present time. Life insurance is one of the best, one of the most desirable, and one of the most satisfactory as a permanent calling.

In assets and volume of business, life insurance is one of the three leading businesses of this country, yet the field is comparatively under-developed. Only 7 per cent of the economic value of human life in the United States is covered by insurance. This gives an idea of the big field still to be worked, especially business insurance for firms and corporations.

As to remuneration: Reports of college graduates who have entered business indicate that life insurance is at the very top as a source of income. Now is the time for you to consider what you are going to do after graduation. If you are ambitious and willing to work hard and are interested to know about life insurance, address
