Dear Bonnie

Just a line to tell you that as planned Brosens, Marion and I had lunch with President Hiler. Peron at Olivos yesterday. Cereijo, Gomez Morales (Finance Control) and Barros (Minister Industry Commerce) were there. After lunch Marion left and from 2.30 to 6 the President, Cereijo, Morales, Barros, Brosens and I talked over the electricity & Code problem. He sure the President is more understanding of the problem than his ministers. I have always found it that way. He is wiser and sounder than they and more sincere. He does not want to nationalize. He wants to solve the Code and electricity problem. His ministers do not understand the problems of the electricity business. Some of them are too cock sure of their views when they really do not know the problem. They may be well meaning but some of their ideas would

VIA AEREA - AIR MAIL

destroy not only the private companies, but
would make government operation impossible.
I hope we may bring them to see it. No
solution that does not really settle the
problem for the Argentine and the Code is
any good.

On Thursday we will meet again with
Cruz, Morales and Barros and on Friday
I hope we can all meet with The President
again. I feel that a fair, satisfactory and
effective solution that will make financing
and material possible will be reached and
all these are possible on certain sound
bases.

I still am without a word from you

and do hope you will send me a word
about your health. Wholeness may be
bothering you, but sure you are going to
be entirely fit soon but as you know
repairing any damage takes time.

Marian & I are well. Marian writes me
almost every day about affairs in Mexico
City. Marian joins me in love & good
wishes to you all. We think of you
much every day —

Truly
Yours
Kendall
