VOLUME V

NEWARK POST, NEWARK, DEL., JULY 22, 1914

NUMBER 26

Newark's New Industry---Old Firm Establishes Branch

OPPORTUNITY FOR FARMERS

The Phillip J. Ritter Conserve Company of Philadelphia, that some time ago purchased the Harry A. Gilbert Cannery, located near the old depot, is making extensive improvements to the plant and will operate it this season. As the purchase did not include the machinery all of which Mr. Gilbert had dismantled and shipped away, the new owners are installing an entire new outfit of modern machinery. In addition to the installing of the machinery numerous improvements and alterations are being made to the building to make it sanitary in every respect and suitable for the business of the new owners. Workmen have been engaged at the plant for several weeks installing the machinery, painting and attending to other improvement. It is anticipated that the plant which will be known as the "Ritter Catsup Factory," will be started up about the middle of next month. While the company manufactures large quantities of fruit butters, cranberry sauce, preserved fruits, jams, jellies, soups, etc., at its other plants, the Ritter catsup is its greatest specialty which the company is now advertising extensively.

William H. Ritter, treasurer of the company, was in Newark for a short time this morning and in conversation with a representative of The Post, told of some of the plans that his company has relative to the local plant. For the first season Mr. Ritter stated the concern would probably only handle tomatoes but it is possible that they may also handle grapes this year if they can be secured in this locality. He explained that after this year if they find the plant will manufacture other products here if the fruits such as strawberries, raspberries, currants, grapes, peaches, apricots, etc., can be secured in sufficient quantities. Should this be done it will mean that the plant will be in operation practically the entire year.

Mr. Ritter stated that the company originally contemplated securing about 400 acres of tomatoes for the local catsup factory but when Mr. Gilbert was bought out they took over his contracts which are for only between 180 and 200 acres. In addition to this acreage however, the company will be in the market for large quantities of tomatoes if they can be bought here.

Public Meeting

In view of persistent rumors of criticism of the policy of the Firemen's Carnival and the attractions to be offered, the Firemen met last week and asked Council to hold a public meeting in order that the whole affair could be threshed out in the open. Rumored threats of legal action against the Carnival committee made it inadvisable to proceed with expenditures of preparation, if any trouble was anticipated. The idea of the Firemen was to present their attractions for the approval of Council and the citizens who were interested. If any question arose of the inadvisability or legality of these, the matter was to be placed before the Attorney for Council, Attorney for Law and Order Society or Council might ask for any opinion of the Attorney General.

By such a meeting it was thought that the matter could be discussed and an agreement reached that would be satisfactory to all. The Firemen, while a Volunteer Company, consider themselves and are so considered a Public Service institution. With this idea of a service institution, rather than a private corporation, they asked that their policy for securing funds for

The Ritter concern does not can tomatoes, but uses them for catsup entirely. A 650-horse power boiler is being installed and the catsup plant will have a capacity of 24,000 baskets of tomatoes a day or 1,000 baskets every hour. Although the acreage arranged for this season will not near reach this capacity, the fact that the company is making such extensive plans would indicate that it intends to operate on a large scale in future years and Newark will no doubt be greatly benefited by the addition of such a plant operated by this well known and long established firm.

When asked about his help for this season Mr. Ritter stated this morning that they would probably employ between 60 and 100 persons at the plant and said he wanted it understood that they preferred to engage local help where it was possible to do so. He said all the machinery had not arrived at the plant as yet but that they would probably be in shape to start up by August 15, when tomatoes will be starting to come on. Charles Ritter, vice-president of the company, will come here to take personal charge of the plant when it is started.

The Philip J. Ritter Conserve Co. is one of the oldest established concerns of the kind in the country it having been in business 60 years. The company has three plants in Philadelphia and one in Bristol, Pa., in addition to the local plant. Of the fruits grapes are bought in large quantities and the company this year will handle between 1,000,000 and 1,500,000 pounds of grapes alone. The officers of the company are Philip J. Ritter, president; William H. Ritter, treasurer; and F. William Hoffman, secretary. Its products have won awards at numerous exhibitions.

Through the efforts of the officers of this company the P. B. & W. Railroad is now stopping one additional train at Newark. This is an express train which leaves Broad street station, Philadelphia, at 7.20 a. m. and is due here at about 8.20 a. m. Previous to this there was poor service from Philadelphia and Wilmington early in the morning and it was because of this fact that Mr. Ritter made complaint about the service with the result that the additional train is now stopping here.

Fire Protection be scrutinized and O.Ked before they proceeded with this year's Carnival. Pursuant to this request, Council in last week issue called for an open meeting asking all interested to be present.

The idea met with general approval. Thursday evening upward of fifty citizens representing all phases of life in Newark met at the Council Chamber. The College, manufacturers, merchants, professions, and mechanic were present. The general trend of opinion was that the meeting would result in a sane open discussion of the issue. That there was and is a difference of opinion was recognized. But the objections and intent was to be made open and the issue faced. So much for the object of the meeting and the general interest manifested and the citizens present. A telephone message came that "the meeting had been called off." That was the message. No explanation whatever.

Nor is any forthcoming yet except that the matter had been adjusted. With whom? And what matter? are natural questions asked. But no reply.

The object of the meeting failed and the rumor still persists—to the regret of many interested citizens.

RED MEN'S PARADE

Line Of March Given For Carnival

The Red Men's parade to be held next Monday evening, July 27th, o'clock. The line of march will be for the benefit of the Firemen's Carnival, will form on Academy street between Main street and Delaware avenue, to start at 8 as follows:

Meet at Delaware avenue to South College avenue; South College avenue to H. Warner McNeal's residence; countermarch to Delaware avenue; west on Delaware avenue to Elkton Road, to Main street; east on Main street to lower end; countermarch to Chapel street; to Choate street; to Main street; to Carnival.

It is hoped our townspeople will add to the pleasing effect by decorating and having red fire burning along the route of parade, as the firemen desire to make this the largest and most attractive Carnival ever yet held in this town. The parade will be headed by Mr. Geo. W. Griffin in his auto with the aged Red Men from the Home. There will be visiting tribes from various points including Andastaka tribe, No. 14, of Newport, which will be accompanied by a band of music, making two bands in line. Every body help a little and make this parade a success.

WEDDING

McMULLIN-MURRAY

Miss Julia B. McMullin of Glasgow and Mr. George P. Murray of near Christiana were quietly married at the Head of Christiana manse last Saturday evening, July 18. Mr. and Mrs. Murray are residing at the home of the groom near Christiana.

Supper And Lawn Fete

A mid-summer supper and lawn fete will be given by the Ladies' movement. White Clay Creek Church, Thursday evening, July 30th, at the home of Mr. and Mrs. Leslie Derickson, Milltown, Del. Supper served from 5 to 8 o'clock. Come and bring your friends.

"Dry" Question Up In Maryland

Cecil county which has been continuously "dry" since 1902 will vote again this fall on the liquor license issue. In response to a call about forty foes of license met in the Court House at Elkton on Friday, none appearing from the Fourth, Seventh and Eighth districts. It was resolved to appoint by August 1, a campaign committee of three members from each of the nine election districts, the several tracts to constitute local committees with an executive committee of nine members to outline and prosecute the work of the campaign.

Leslie Camp In Progress

Leslie Camp Meeting opens today and will close on August 3. B. & O. R. R. northbound train, passing Leslie at 10.04 p. m. will stop on the nights of July 26 and August 2, for passengers for all stations, except Eder, between Leslie and Wilmington. As Woodlawn Camp will not be held this year the prospects are good for record crowds at Leslie.

In Local Progressive Circles

The Rev. S. M. Morgan urges leaders of the Progressive party in Delaware to oppose resubmission of the liquor license question in Kent and Sussex counties and stand for State-wide prohibition and an amendment to the Federal Constitution. A State wide prohibition organization has been formed in Sussex with former Secretary of State Dr. C. R. Layton as Chairman and a like one in Kent county.

HAPPY SERENADERS

Pay Compliments To Mr. Thomas And Bride

Serenaders attracted much attention on Monday evening when the Minnehaha Band marched up Main street to the home of Jacob Thomas. A flourish of music brought out the family. The honors were for Mr. Otto Thomas and his bride. Stepping up to the porch railing, they received a hearty cheer. A crowd of 200 people soon collected on the street to hear the music.

Mr. Thomas acknowledged the compliment and quickly ordered refreshments which were served at Hotel Deer Park.

It was one of the happiest serenades given in Newark for some time. It simply shows the popularity of young Thomas. His bride from Germany has received a simple but good natured welcome to our town. We express the general wish in hoping her stay a pleasant one.

Meeting Of Candy Committee

Miss Edith Cleaver has been made chairman of the candy committee. All members of this committee are urged to be present at a meeting to be held at Miss Cleaver's home on Thursday evening of this week.

Army Worm Precaution

"Forewarned is forearmed" and in face of the widespread devastation caused by the army worm, information of how to control and destroy the pest is timely.

This prescription is given out by the Philadelphia City Forestry Department as the proper solution of arsenate of lead and water to be used: To five ounces of arsenate of lead add 10 gallons of water. Put this in a watering can and spray the lawn or garden liberally. Paris green in the same proportions and spray. Paris green will not kill the worm, but will drive it away. People are warned by the Forestry Department that both arsenate of lead and Paris green are deadly poisons and are to be used with care and not too liberally.

One woman in Germantown who mixed a pound of the arsenate of lead with a few gallons of water found the poison did more harm to her lawn than did the worms. If used in the proper proportions the poison will not harm dogs or cats who may try to eat it, but it will probably kill them if they get too much of it.

Several school gardens have been visited by the pests and today thousands of school children in charge of these small plots will enlist in the campaign to exterminate the worm. Miss Cora Miller, supervisor of school gardens, has sent a letter to the principal of every garden in the city telling how to get rid of the pests. She calls attention to the fact that the arsenate of lead, is a deadly poison and must be used carefully.

"Should the army worm appear in a garden," she writes, "all other work is to be suspended in order to fight the pests. Some of the children can help by spraying the poison with sprinkling cans, and the others should be put to work picking the worms from grass and vegetation and dropping them into cans with which a small quantity of kerosene has been poured."

Grass that has been destroyed by the army worm and appears dry and withered will come back to its former freshness if well watered.

Press Association To Meet

The Delmarvia Press Association will meet at Ocean City, Md., July 30th, at the Atlantic Hotel.

Company E At the Front

Winning Praise From Officers

LOCAL BOYS LEADING THE MARCH

Special To The Post

Co. E left Newark bright and early last Saturday morning to join the Organized Militia of Delaware in their hike through the State. The boys arrived at the State Rifle Range near New Castle, the site of the encampment until Monday, at 10.40 a. m. There had been three rests of from ten to fifteen minutes each during the march, and with the exception of one man who was forced to ride about three miles, the men stood the march well. Co. E maintained on this occasion, its old reputation for "getting there." Only one company—Co. H. of New Castle, was on the grounds ahead of Co. E. and considering that their hike covered only three miles, they were expected to be there. The men of Co. E were justly proud of this performance, since they came a longer distance than any company walking to the rifle range. Their surprise when they found they had outdistanced the Wilmington companies was a pleasant one. The down-state companies from Dover and Milford, reached State Road station by train, about ten minutes after Co. E. had crossed the tracks.

Parade was held on Saturday afternoon in preparation for the special review for Vice-President Marshall on Sunday morning.

Sunday: church; review for Vice-President Marshall. The review was moving along with a precision that called forth the highest praise when an amusing incident occurred which threatened to spoil the entire affair. To each transport wagon are hitched two of the far-famed army mules. The first to pass the band while it was playing. They pranced down the line until they were just in front of the band and then balked.

The band had to stop playing before they would move on. They had all the other teams held up. It was while the mules were causing the disturbance that Vice-President Marshall partly turned to Senator

Saulsbury and said: "Saulsbury, the mules are all right. They are the emblem of the Democratic party, but like it they don't always pull together. But when the party does get going it pulls like those mules will when they start together." Almost before he had stopped speaking the two mules started together and with such a jump that the teamster was almost thrown from his seat, another Democratic trait.

The Vice-President then turned to Governor Miller and remarked: "There is a team I would like to see together and that is a bullmoose and an elephant." The governor as well as the officers saw the joke and their laughter showed that they appreciated it.

Monday: arose at 4.45, packed up, breakfasted and broke camp at 6 a. m. The march proper began. A pleasing feature is the presence of Governor Miller at the head of the command. This action on the part of the Governor is greatly appreciated by the men of the regiment. In his usual whole-hearted way he has departed from the custom of a formal review of dress parade, and chosen to share with the boys, the actual inconveniences of the march and camp life.

The first day's march extended to St. Georges on the C. & D. canal. This was an excellent spot for camping, because the men could enjoy swimming and fishing.

Tuesday: The Second Battalion was chosen to lead the march for the day. Since Capt. L. B. Jacobs is the ranking captain, Co. E. led the regiment. This gave them an opportunity to show their speed. With Capt. Jacobs, and Sergt. Sargent at the front Co. E. soon left the remainder of the regiment far in the rear. Only the "Slow Down" signs at the entrances to the towns could hold them in check. They are law-abiders—so they did not exceed the limit. The Inspector-Instructor, Lieut. Elvid Hunt, U. S. A., complimented Capt. Jacobs upon the excellent manner in which the advance guard had been

(continued on page 4)

Radical Changes At Rehoboth

The recent town election at Rehoboth Beach, it is said, will mark a new era at the resort. In the new Board of Commissioners are T. C. Ruddell of Baltimore, Robert Hinekey of Washington, and B. F. Shaw of Wilmington. Hinekey, it is said, will build a new ocean pier costing \$50,000. Charles Horn held the lease on the present site of the pier and was supported by the old Board. The new Board and their supporters say they purpose make Rehoboth a fashionable summer resort.

Colonial Dames

Open New Home

The Colonial Dames of Delaware on Wednesday formally opened their new home at 1905 Market street, Wilmington, with a reception to members throughout the State. Mrs. Preston Lea, the president, welcomed the guests. The building is typically Colonial in style and furnishings and contains fine specimens of antique furniture and art works widely collected and donated by members of the society.

Dates For Primaries Named

New Castle County Democratic Committee met in Wilmington last week and set August 22 for the primaries for delegates and September 5 for the county nominating convention. Republican primaries will be held on August 29 and the convention on September 2.

Summer School Entertainment

The third of the entertainments arranged for the students of the Summer School by Physical Director McAvoy, assisted by other members of the faculty, was held in the college gymnasium on Friday evening, July 17. It consisted chiefly of a demonstration by the manufacturers of the Victrola showing in what ways their machine can be used in the school room. The demonstrator first played a few songs sung by singers of note, and explained how the pupils could learn to know when the songs were well sung and even to sing them themselves. He then played some selections from the best composers, and explained how these composers and their music may exert a great influence on the child's life. He next showed the difference between the different instruments of an orchestra and a band, and how these could be combined. Finally, he showed how the Victrola could be used in a practical way in the school room to teach marching and rote songs and to tell stories.

Services Last Sunday

Dr. Samuel C. Mitchell, president of Delaware College, preached the sermon at the Newark Presbyterian Church last Sunday morning.

Rev. L. E. Poole spoke at the union services held on the College campus last Sunday evening.

Oxford	4	9	.307

SCHEDULE FOR SATURDAY

Elk Mills at Newark.
Aberdeen at Elkton.
Oxford at Rising Sun.

WILLIS' HOME RUN WON GAME

Del Willis had a great day with the bat against Rising Sun on Saturday and his slugging alone was responsible for Newark's 6 to 3 victory. While Heitmillers was a puzzle to the other local players, his pitching just suited Willis who found him for two home runs and a three base drive out of four times up. This player alone was responsible for four of Newark's six runs without which the locals would have lost.

In the second inning with Gregg on first Willis picked out one that he liked and drove it to left field. The ball bounced into the corner field and both Gregg and the hitter came home. Again in the fourth inning Willis found one that he had left and even drove it deeper into left field than he did the first one and easily made the circuit. In the sixth inning he hit an easy one to the pitcher but in the eighth he connected again, this time sending the ball to deep right field for three sacks. He scored a minute later on Hogan's single.

Hogan pitched fair ball but sharp fielding and a classy throw by Morris which nipped a runner at the plate in the third inning got him out of some tight places. Hogan was wild at the start and walked the first two hitters. A wild pitch scored one run in this inning but the visitors were unable to get any safe hits. In the third Wilson lead off with a hit and went to second on Kirke's sacrifice. When Heitmillers singled to centre Wilson attempted to come home but 'Captain Morris' perfect throw got him at the plate by several yards. Snyder followed with a single to left and Ferguson in going after the ball turned his ankle and Heitmillers scored. Heitmillers lead off in the sixth with a double and came home on Brickley's single to center, the ball getting away from Marsey on Morris' return.

This ended the scoring for the visitors. Hogan got better as the game progressed and in the last three innings only one runner reached first. The fielding feature of the game was a great stop by A. Beatty in the seventh inning. He got a hard hit grounder near second base with his bare hand and threw the runner out at first. The score follows:

	R.	H.	O.	A.	E.
C. Beatty, 3b	0	1	1	1	0
Jackson, ss	0	0	4	1	0
Marsey, c	0	1	6	4	0
Morris, cf	0	0	1	1	0

SCHEDULE FOR SATURDAY

Appleton at Newark.
North East at Providence, 2 games

OTHER LOCAL SCORES

Continental, 9; Elkton, 7.

CLAY IN GOOD FORM

Clay was in great form against Oxford on Saturday allowing the champions but two hits. His great pitching won for Elkton 2 to 1. Smith pitched another fine game but his team could not hit at the proper time. The score by innings follows:

	R.	H.	E.
Elkton	0	0	0
Oxford	0	1	0
Batteries, Elkton, Clay and Potts; Oxford, Smith and Thomas.			

ELK MILLS DEFEATED ABERDEEN

Elk Mills won a close game from Aberdeen on Saturday by the score of 4 to 2. While Sweitzer was hit harder than Bonnett he kept the hits more scattered. The score by innings follows:

	R.	H.	E.
Elk Mills	0	1	0
Aberdeen	0	2	0
Batteries, Elk Mills, Sweitzer and Moore; Aberdeen, Bonnett and Strickler.			

BOOSTS AND KNOCKS

Two home runs and a three bagger in one game is some slugging. Al Beatty brought the spectators to their feet by his great one hand stop of a hard grounder.

"Billy" Jackson's fame as a player is extending beyond the Tri-County League circuit. He played for Milford against Dover last week and got two hits which helped to win the game.

Elkton is gradually crawling up and is now tied with Aberdeen for third place.

Newark and Elk Mills are the only two teams in the league that have won a majority of their games. The locals are still two games ahead of Elk Mills and will have a chance to increase that lead when the latter team plays here next week.

That Elk Mills game should be some contest. Newark has won a majority of the games played with all the other clubs of the league but has lost two games to Elk Mills. The game next week will give Captain Morris and his team a chance to even up.

Of the seven remaining games four are scheduled away and three at home. There are two games to be played with Elkton and Aberdeen and one with each of the other three clubs.

That was some funny decision that Umpire Gibson pulled off with Willis on third. If Heitmillers made a balk Willis was entitled to score and if he did not make a balk the runner was out. Gibson at first called him out but later reversed his decision and allowed him to remain on third. No one yet has explained how the "Ump" figured that decision out.

Clay is evidently coming back as he pitched some game against Oxford last Saturday.

Newark will tie up with Rising Sun again on Saturday, this time at Rising Sun.

His size is all that keeps "Billy" Jackson out of faster company and at that he has an edge on many infielders playing ball in the minor leagues.

Captain Dick Morris has dropped in his batting of late but then he may get his eye when the hits are badly needed.

BATTING AND FIELDING AVERAGES

Captain Morris has not been hitting in his usual form of late but still leads the team in batting. Del Willis by his great hitting on Saturday took a big jump and now stands second. The batting averages follow:

	G.	AB.	R.	H.	Av.
Morris	13	51	11	20	.392
Willis	7	2	5	10	.370
Ferguson	8	28	5	10	.357

	G.	AB.	R.	H.	Av.
Gregg	13	50	11	17	.340
C. Beatty	13	46	11	15	.326
A. Beatty	13	48	10	15	.312
Marsey	13	49	9	15	.306
Jackson	13	49	10	14	.286
Hogan	12	42	1	9	.214

The fielding averages follow:

	O.	A.	E.	Av.
Ferguson	8	0	0	1000
Willis	5	1	0	1000
Jackson	36	28	1	.985
Gregg	119	4	2	.984
Marsey	124	20	5	.967
C. Beatty	20	32	5	.912
A. Beatty	11	30	4	.911
Hogan	4	24	5	.848
Morris	9	5	4	.778

FIELD CLUB TAKES A BRACE

During the past two weeks the Newark Field Club of the Penn-Mar League has taken a decided brace and promises to make it warm for the leaders before the season is over. The field club defeated Appleton on Saturday by the score of 8 to 5. This defeat drove Appleton out of first place as North East, the baby member, also won from Providence, supplanting Blackson's team. Chillas pitched a fine game on Saturday and while Willis also pitched well, his club gave him poor support. Appleton will be here next Saturday and as North East plays a double header with Providence on that day there promises to be some changes in the standing of the clubs. The score of the Newark-Appleton game follows:

	R.	H.	O.	A.	E.
Appleton	0	0	0	0	0
Newark	8	5	27	17	1

PROVIDENCE EASY FOR NORTH EAST

North East is going at a fast clip and by trimming Providence 12 to 2 on Saturday moved into first place. Reynolds pitched star ball for North East while Spratt was hit to all corners. The score by innings follows:

	R.	H.	E.
N. East	0	5	3
Prov.	0	0	1
Batteries, North East, Reynolds and Biddle; Providence, Spratt and Scarborough.			

INTEREST IN FIELD CLUB

The work of the Field Club during the past two weeks has had the effect of arousing more interest in the Penn-Mar League than at any time this season. The club is now pulling together and is looked to make a good finish notwithstanding the fact that it is now in the cellar position.

A business and social meeting of the Field Club held at the home of Arthur S. Houchin last Friday evening was helpful to the welfare of the organization. Officers of the club were present and in addition to enjoying a pleasant evening, short addresses by Dr. Joel S. Gillfillan and Professor Clarence A. Short contained helpful hints for the club. The question of umpires was discussed and it is possible that there will be changes in the staff. The purpose of the meeting was to bring the members of the team in closer association with one another and to arouse more spirit. The members of the team were also impressed with the importance to get out on practice evenings, Tuesday and Thursday of each week, on the Delaware avenue grounds. If the players report regularly at practice it is thought that with the new players secured during the past two weeks the Field Club will be able to more than hold its own.

The management of the Field Club is doing everything possible to bring the team up to where it belongs and thoroughly appreciates the loyal support given the club by local fans.

CONTINENTAL DEFEATS ELKTON

The Continental and Elkton clubs had some exciting game on the local grounds last Saturday, the former winning by the score of 9 to 7. In addition to the nine innings of play the fans were also

treated to several scraps following the game. The visitors apparently carried a ship on their shoulders and with an air which said, "If we can't beat you playing baseball we can whip you." This spirit after the game naturally produced some fighting and the Elkton visitors got the short end of both games. With the exception of several bawling eyes which the Elkton players wore home with them, no one was hurt. Crowe pitched fine ball for Newark while the batting of Montgomery and Goodnow was a feature. The score follows:

CONTINENTAL

	R.	H.	O.	A.	E.
B. Crowe, 1b	2	2	13	0	0
Montgomery, cf	2	3	2	0	0
Fossett, 2b	2	2	1	2	1
Goodnow, 3b	1	3	0	2	0
Fulton, ss	1	2	0	2	1

Warning Against Too Much Lime

Farmers applying large quantities of limestone to correct soil conditions, no matter how serious, are losing money, is the conclusion reached by Prof. J. W. White, an agronomy expert of the Pennsylvania State College. He has just completed an experiment that convinced him that small applications of ground limestone are more economical than heavy ones, and he believes his findings will result in tremendous savings to the agricultural interests of the country.

When discussing his work, Prof. White said: "The experiment recently finished was to study the effects of different amounts of ground limestone when applied to very acid soils. We found that a large excess of limestone had a depressing effect on the growth of clover, and on the basis of the experiment concluded that the amount added in amounts slightly in excess of that necessary to make the soil neutral gave the most economical returns. We found that a large excess of limestone on the basis of the first clover crop, gave results which indicated that limestone when applied in large amounts is done so at a loss.

Prof. White said that in Central and Eastern Pennsylvania lime could be most economically applied at an average of one and one-half to two tons per acre, and it should be finely ground. The appearance of red top, sorrel and other such weeds, he said, are a pretty sure indication that the soil is in need of lime.

A second experiment is now under way to determine how finely limestone should be ground to give the most profit for the money invested. This experiment has been in progress two years. The farmers, he said, are losing money when they apply limestone that is too coarse. It should be applied in such a degree of fineness that at least 80 or 90 per cent will pass through a 60-mesh screen. Finely-ground limestone, he added, gives about the best results as an equivalent of burned lime.

A second experiment is now under way to determine how finely limestone should be ground to give the most profit for the money invested. This experiment has been in progress two years. HERE AND THERE

The \$1,125,000 derived from automobile licenses will be turned over to the State Highway Department of Pennsylvania and will be used to meet the cost of work on the public roads.

J. E. Happersett, a farmer of the Pomeroy section, while at work in his barn, one day last week, was attacked by a bull which gored one of his sides severely.

Wilmington bank clearings last week totaled \$2,081,004.27 against \$1,913,561 for the like week last year, a gain of \$167,443.27.

Wilmington last week reported 18 deaths, 50 births and 21 marriages compared with 25 deaths, 42 births and 28 marriages for the like week last year.

Mrs. Mary L. Cox, wife of Alfred G. Cox, died at her home on Green street, Middletown, on Saturday. Her funeral was held yesterday with interment in Bethesda M. E. Cemetery, Middletown.

Killy Murphy died at the home of Mrs. L. K. Holcomb, "The Buttonwoods," near New Castle, on Friday, aged 80 years. His funeral was held on Monday.

Alfred duPont Hanby, a former well-known contractor and builder, died on Thursday at his home at Carpenter Station, aged 75 years. His wife, who was Miss Hannah Ann Green, survives him with five daughters. Mrs. John King of Boothwyn, Pa.; Mrs. James L. Kelley, Mrs. Ira L. Parker and Mrs. Samuel Stewart, all of Wilmington, and Mrs. James C. Conly of Carpenter. Sixteen grandchildren and seven great-grandchildren also survive him. His funeral was held yesterday with interment in Siloam M. E. Cemetery.

Mrs. Maria E. Wright, widow of Thomas Wright, died last Tuesday at her home in Elk Township, Chester county, aged 81 years. Her funeral was held on Thursday with interment in Rosebank Cemetery, Elvert.

Elkton's new auto-chemical fire truck got its first call on Thursday morning when an explosion occurred about a mile from the fire house, and in less than five minutes was manned and on the scene but luckily workmen had controlled the blaze which did some slight damage.

Cantaloupes took a drop in Laurel one day last week, when 400 crates were spilled on the streets out of a runaway team.

While visiting friends at Landenburg, Pa., Mrs. John W. Hopkins of Dover was stricken with paralysis, one day last week.

The Sussex cucumber crop is large. Forty carloads were shipped from Seaford one day last week.

The Delaware Anti-Tuberculosis Commission has chosen a site in Creek Hundred for a sanatorium for colored consumptives.

Lightning during last Monday night's storm struck and killed one of James Racine's horses, on his farm on the Glasgow road, near Elkton.

The 256-acre Whiteoak farm near Town Point, Elk River, was sold last week by Omar D. Crothers of Elkton, to Joseph Long of Philadelphia, for \$6,390.

Elk Neck farmers will hold their sixth annual picnic on Wednesday, August 5, on the shore of the Thompson, now the Mosebach farm on Elk River. These picnics have always been well-attended and greatly enjoyed.

Joseph Leoney of Riverside, N. J., has been appointed manager of the new Sutra hosiery mill at Elkton, which is inviting applications for employment and will shortly begin operation.

Post Office Inspector M. S. Plummer has gone over and recommended a new rural free delivery route from Elkton to Lewisville, via Cherry Hill, Fair Hill and Providence, serving about 200 families.

Charles Price, long its tenant, purchased the 170-acre farm of Mrs. Margaret McAleer of Brookton, located in the Warwick section near Middletown for \$10,000.

Little Elk Tribe of Cherry Hill, will join in the Red Men's parade

at the Newark Firemen's Carnival next Monday evening.

Pickpockets on Saturday robbed Mrs. James Wilson of Kirkwood, who has a stand in King street market, Wilmington, of \$17.

Frederick Morton, 35 years old and unmarried, fell from a load of wheat near Lewisville on Saturday and was fatally crushed under the wheels of the wagon.

William Welch, aged 15 years, employed on Thomas Slay's farm, near Wyoming, while catching a horse in the pasture on Friday was kicked on the right temple by another horse and, remaining senseless, was taken to the Homeopathic Hospital, Wilmington, where he died on Saturday night of hemorrhage of the brain.

The body of George Vinsinger, aged 42 years, a hand on one of the Bush Line tugs, who disappeared on Wednesday night, was found on Friday evening in the Christiana River, between King and French streets, by three of his friends who thought that he might have been drowned as he was last seen hauling on a line on the tug.

Miss Lidie M. Smith and Mr. George A. Crozier were married on Thursday evening at the home of the bride's parents, Mr. and Mrs. Walter Smith, at Cranston Heights Marshallton, by the Rev. J. H. Gray, pastor of Silverbrook M. E. Church, Wilmington.

The First National Bank of Milford which stands on the Honor Roll, has declared a regular dividend of 9 and an extra one of 1 per cent.

Miss Dorothy Thompson, only daughter of the Rev. B. Fish Thompson, rector of Christ Church Dover, died on Thursday of typhoid fever, aged 20 years.

New Castle County Levy Court has refused to pay a bill of \$296 for rent and furnishing of the recently established county morgue.

Fire Chief P. J. Magill of Wilcar, painted white and lettered in blue and gold, recently purchased by City Council.

Members of the Progressive State Executive Committee met at Dover last week and discussed informally the coming convention and campaign.

Residents of Wilmington are trying to combat the army worm which have stripped many of the lawns of the city and suburbs.

Commissioner Burris having suggested that the Levy Court, if it had authority, might employ as laborers men now out of work, the Court will obtain the opinion of its counsel on the subject.

T. M. Bullen of Newport went to Fenton's Beach, N. J., one day last week in his launch, after driving back his hunting dog which was following him. He reached the Beach at 1.30 p. m. and about two hours later was astonished to see the dog creeping toward him almost exhausted after swimming across the river.

Arthur G. Webster, aged 37, who escaped 18 years ago from the old jail in New Castle, where he was serving a five year sentence for robbing the John Banning residence on Broome street, Wilmington, was released from the Missouri Penitentiary recently but was arrested by State Detective Frank McCoy and brought to Wilmington last Wednesday where he was identified and held for the action of the General Sessions Court.

Mayor Howell's suggestion of a big civic celebration in Wilmington during the first week of October in connection with the laying of the corner stone of the City Hall and Court House has met with the support of Council and the general approval of residents. A meeting attended by representatives of all organizations in the city and county will be held in the City Hall next Tuesday evening to select a general committee to arrange for the celebration which it is intended to provide special features for each day of the week.

George, the 10-year-old son of Owen McMahon, was drowned on Wednesday in Red Clay Creek, near Marshallton, while swimming with a comrade, Frank Fisher. His father recovered his body. The Wil-

mington as Company's pulmotor was used without avail.

Henry M. Dager, a well-known and well-to-do farmer, living two miles south of Dover, on Wednesday drowned himself in Moore's mill pond, near his farm, after drinking carbolic acid. His body was found standing upright under the flood gates with his feet at the bottom of the dam. He was 64 years old and leaves a widow and two sons. He suffered from stomach trouble which induced melancholia.

William Jones and Pearl Moore, a colored couple of Selbyville, who rose suddenly out of the bushes by the roadside were shot one night last week by William Long, who mistook them for highwaymen as they failed to answer his hail. The woman was shot in the stomach and was sent to a hospital, and the man was wounded in one arm.

Ralph Cahoon Whitenack of Wilmington of the Class of '06 of Brown University, and a post-graduate of Harvard, for several years in the service of the akwar of Baroda, India, has been called to the chair of economics in the Kero University, Tokyo, Japan, and will sail from New York on August 10.

Five young men, S. J. and Tobias Robinson, Howard H. Morgan and Milton S. Coulburn of Seaford and a friend from Baltimore were returning from Cambridge to Seaford last Monday night in S. J. Robinson's automobile, run by Coulburn, when two tires burst, and the car ran against a culvert

and was upset. Coulburn was caught under the car but was not seriously hurt. The others were thrown out on the hard roadbed but escaped with bruises more or less severe. The accident on the State road at Webb's Crossing, between Harlock and Federalburg, Md.

Politics Just The Same

There are persons who constantly clamor. They complain of oppression, speculation and pernicious influence of accumulated wealth. They cry out loudly against all banks and corporations

and all means by which small capitalists become united in order to produce important and beneficial results."

Sounds like a stump speech in Kansas, but it is part of an address made 81 years ago in the United States Senate by Daniel Webster.

In 1883, as at every other period of our national existence, one element of the people felt sure the country was on the brink of disaster. Big business, exemplified by the United States Bank, then believed it was being unduly mauled. Others thought Biddle and his friends were equipped with horns and cloven hoof.

The pain that is past seems a trifle compared with the one we anticipate. One thing we know for sure. Whatever else has happened American business has grown so fast the census taker has difficulty in keeping up with it.

—GIRARD in Public Ledger.

INTERESTING BASKET BALL GAME

Much interest is being exhibited by students of the Summer School in the basket ball game to be played next Friday in the College Gymnasium. The opposing teams will be made up of girls in the school from Delaware and Maryland.

EDUCATED MAN IN POLITICS

The need of the college man in politics is felt more keenly today than at any time in the history of the republic. When we say politics, we use the word in its broad yet practical meaning. Living in a time when every question bearing on life, social and economic, has been thrust into the political arena for discussion and decision, the best minds of the country are needed. Questions affecting the manufacturer, the farmer, are vital subjects of political platforms. Indeed all phases of life and professions are affected. Time there was and only a few years ago, when the manufacturer, the professional man and the farmer left the details of government to the office holder and office seeker. Especially has this been true of the professional man and the farmer. The professional man absorbed in his laboratory and class room, left, with disgust, the bickering details of practical politics to some ward or hundred politicians. The farmer took but little part, failing to see what interested organization could benefit. He looks with alarm on pending conditions but failed to sense his power. He grumbles over his Levy Courtman but fails to appear at the primaries of his party. Both he and his professional fellow citizen have so neglected this civic duty that they are unacquainted with even the minor details of practical politics. They know so little of the actual workings of government that they fail to effect any idea they may have into legislation. It is surprising how ignorant many of our college graduates are of the simple duties of properly exercising their franchise. The Arts and Science man graduates, enters into one of the professions, aside from law, and he becomes so absorbed in his work that he leaves his duty to his state and community to what is known as the practical politician. The Engineer graduates, enthusiastic in his profession, and fails to note the simple workings of town government. And no less the graduate from the Agricultural departments. Interested in the science, he goes out and increases the products of the soil, leaving the legislation affecting the social and economic conditions of the farmer to those who make politics a business. By his knowledge acquired he has increased the crops, yet is ignorant of ways and means of securing or controlling legislation just as important. The loss from this ignorance may overbalance the gain from scientific farming. Good roads, drainage, game laws, pure seed, railroad rates, school taxation, are all questions of vital interest to him. And only can his influence be effective, by a knowledge of the practical politics of his Legislative district. It is disgracefully amusing to see the farmer or professional man appear before the General Assembly to secure the passage of a bill. He is absolutely ignorant of the simple proceedings of lawmaking that he is compelled to turn his idea over to the politician. He is completely at the mercy of the man who knows the rules of the game. The law maker, if honest, is his superior in the respect that he is acquainted with legislative proceedings. Yet he may use this knowledge to defeat a measure that may mean much to the general welfare. The result is that lack of education and knowledge of politics retards civic improvement to a considerable extent.

Aside from a scattering genius, the State can ill afford to lose the thought and practical everyday interest of our college men. The professional man, the engineer, the agriculturist, have no right to selfishly neglect these duties, unpleasant or exacting they may be. State and social service demand from these men the result of their training in making theories into practical legislation. It is not an ideal situation, nor can we expect any great social improvement when the party government, with its selection of candidates is left to the hands of the trade political Boss. Yet as it now stands, these men are the only ones acquainted with the details. And rest assured they give it undivided attention. Thus their success. Hundred, county and state politicians are at

work all the time. The College man fails when he merely casts his ballot. That this need is being recognized is shown by an article in another column showing how the School for Good Citizenship is being organized at Cornell University.

Every state institution especially should take up this question. Every student of whatever course of study should be required to take up these studies of History, Economics and Practical Questions of Government. Without a knowledge of these questions no graduate, be he professional engineer or agriculturist, can do his whole part as a good citizen. The interests of no profession overcome this duty to the state—that of knowing how to take part effectively in creating legislation demanded by the hour.

GET REGISTERED

Get registered. In order that you may vote at the primaries, it is required by law that you get registered one of the first three registration days. No man has a right to complain of his party candidates that fails in this opportunity. The farmer who is dissatisfied with his Levy Courtman, can by organization, defeat his candidacy at the primary election. The place for effective work in politics is in the selection of the candidates. Send delegates to the Convention that you feel sure will look toward your best interest. Here is where the rank and file voter has the power.

CO. E. AT THE FRONT

(continued from page 1)

executed, also upon the men completing the march in such excellent physical condition. Capt. Stephenson warmly congratulated Capt. Jacobs upon the rapid marching of Co. E. "You have a great company there," he said.

The regiment camped on Tuesday at Silver Lake between Middletown and Townsend.

Wednesday: The regiment will march from Silver Lake to Smyrna. This year the mess is in charge of cooks Crow and Sergt. John Frazer, U. S. A., retired. The best of camp food is served to the men. In the evenings the cook tent is the mecca for several old "Regulars" for Sergt. Frazer can tell "some tales."

SPORTS

Co. E. is upholding her end in the sports held each afternoon. W. O'Daniel, Corps. Foster and Ferguson are on the battalion baseball team.

Corp. Homewood finished second in the 100-yard swim on Monday. At Dover a track meet will be held. Lieut. Clark, Sergt. Dean, Corps. Homewood, Ferguson, and Bounds, and Private McDowell will represent Co. E.

PERSONALS

Lieut. J. D. McKeon was officer of the day on Tuesday. Anyone who has ever tasted Sergt. Frazer's "Brown Betty" will assert that the "sarge" is some cook.

About 3 a. m. Monday morning "Mone" Foster was found with a blanket around him, his teeth chattering, while he sat upon the cook stove trying to warm up.

Capt. Jacobs is the most popular company commander in the regiment. The men are all proud of their leader, for he is always "on the job." Although firm in discipline, he does not maintain it thru inflicting hard punishment, but rather thru kindness, and his endeavor to have the best for his men.

"Billy" Cann, and "Pete" McDowell received an ovation from the girls when the troops passed thru Middletown.

Wesley Keith is still hunting the "key to the flagpole."

Allison O'Daniel has been trying to locate a bucketful of "skirmish line."

Shellender proved that he is some angler by catching two little sunfish.

Lieut. Clark frequently gives exhibitions of daring horsemanship. He dashes down the road at

the speed of a charging general, and is roundly applauded for keeping the saddle so well in the bucking.

Wanted—Six barbers to remove wagon in the line, that of Co. A, Huey Morris.

Co. E. will return to Newark on Saturday evening. They will en-train at Milford for home.

Observations

"The kid that runs the Post is a sensational fool—he is the disturbing element of this community. He is always up to something. Coming from Sussex he is utterly insensible to the polite ways of society. He is a crude product and should be told where to get off."

The above is the expressed opinion of one of Newark's inherited rich. We shall accept it as a compliment.

We are proud of being a disturbing element; we appreciate the recognition of always being up to something. We do not regret our ignorance of polite society (if this man is in it). Regarding the fool—we appreciate the compliment.

PERSONALS

Mr. H. L. Carter of Naugautuck, Conn., is the guest of the Rev. and Mrs. Van Overen.

Mrs. Clifford J. Sawdon and daughter Ruth of Wilmington are spending several weeks with the former's parents, Mr. and Mrs. Harvey Hoffecker.

Mrs. Amos Osmond left today for a visit with her son Charles Osmond and family, Harrisburg, Pa.

Mrs. Harry Dixon of Wilmington was the recent guest of Mrs. Harvey Hoffecker.

Messrs. J. P. Wright and N. N. Wright will act as ushers at the wedding of G. S. Messersmith and Miss Marion Lee Mustard in the Presbyterian Church, Lewes, this evening at 8:30 o'clock. Mrs. J. P. Wright and Miss Elsie Wright attended the wedding.

Mr. and Mrs. C. H. Hudson from Muncie, Indiana, were guests last week of Mr. and Mrs. W. H. Gamble, returning home on Friday with Mr. and Mrs. Harry Gamble, who have been visiting Newark. Mrs. Ahern of Bellevue, Mrs. Dougherty of Philadelphia and Mrs. Hibel of West Chester were also guests during the week.

Misses Geneva Burnite, Ola Clark Beatrice Vansant and Jennie Smith, spent Monday with friends at Townsend Delaware.

Mrs. W. J. Rowan and children, Violet and Archibald, are the guests of relatives in Tennessee.

Mr. and Mrs. Carl Harrington of Philadelphia were the week-end guests of the former's sister, Mrs. Ernest Wright.

Miss Mary Doyle is visiting her sister, Mrs. E. Adams of Smyrna, Delaware.

Miss Jean Longfellow is the guest of friends at Clayton, Del.

Mr. F. A. Cooch and family are spending a vacation in central Pennsylvania.

James H. Walker, who was seriously injured on July Fourth, returned from the Delaware Hospital last Saturday.

College Notes

President Samuel Chiles Mitchell of Delaware College, has just returned from the beautiful "Sappire Region" of North Carolina. Y. M. C. A. Secretaries from all parts of the United States, though chiefly from the South. The purpose of the convention was to discuss and formulate plans for making more effective and extensive Y. M. C. A. work throughout the country. Dr. Mitchell was one of the principal speakers of the session. He discussed "Social Conditions in the South." Secretary of State William J. Bryan addressed the Sunday meeting of the convention. He spoke on the benefits of Y. M. C. A. work among young men in the United States, especially in the cities. Mr. Morse of New York, who for forty years has been engaged in the work, traced its development in the United States, and outlined some plans which he considers advisable to adopt in order that the most efficient work may be accomplished.

One of the most interesting and helpful of the talks given at the chapel exercises of the Delaware College Summer School was delivered July 17, by the instructor in drawing, Mr. Ronald Davis of Wilmington. His subject was "Pictures in the School Room." In urging the study of pictures in the schools, Mr. Davis pointed out that such study should have for its object three things: (1) to acquaint children with good pictures; (2) to assist in developing their power of observation beyond the mere recognition of name and artist; and (3) to cultivate in them a strong love for the beautiful and to help them to acquire the power of appreciating what is really worth while in pictures. Rural schools, as well as city schools, may study pictures, because modern processes of reproduction have made good copies obtainable at extremely low prices. "Pictures," said Mr. Davis, "are, in the sense in which we are considering them, primarily wall decorations and should aid in beautifying our surroundings and making us happier." Continuing, the speaker said that pictures for the school room should consist not of fine detail, but of large simple masses, and should contain life and action. In closing Mr. Davis spoke of methods of teaching an appreciation of pictures, and also of methods and materials used in framing pictures artistically.

At the morning exercises on July 20, Dr. Reed, professor of Bacteriology, talked on "The History of Bacteriology." After explaining the nature of bacteria, their shape

and their effect, Dr. Reed gave a brief resume of the men who have done most effective work in advancing the science, among them Pasteur in France and Dr. Welch of Johns Hopkins University. In closing Dr. Reed spoke of the great future of the study of bacteriology in connection with preventive medicine.

At the morning exercises of July 21, Mrs. William S. Hilles of Wilmington, spoke to the students of the Delaware College Summer School on the subject of "Equal Suffrage." The address was forceful and interesting. Mrs. Hilles said, in part, that it is unjust that thirty million women should have no part in making the laws under which they live. Women are educated now,—they are able to take their place side by side with men in the world of affairs; and they are therefore capable of casting the ballot. The barrier against women continued the speaker, is due to prejudice, which in turn is due to ignorance. Suffrage is a great educational movement, and therefore must triumph. In closing, the speaker urged the students of the Summer School to do their best to secure the ballot for the women of our state.

In the course of her talk Mrs. Hilles did not refer to or discuss the recent formation of the Delaware Women's Anti-Suffrage League.

Interest in the tennis tournament at the Summer School continues unabated. The finals in both men's and women's singles will be finished this week. Next week the matches in doubles will be played. The winners in doubles will then play a team representing the faculty. The results of the tournament so far as follows: Miss Hurlock beat Miss K. Wilson, 6-0; Miss Coulter beat Miss Robinson, 6-3; Miss Gillespie beat Miss E. Wilson, 6-3; Miss Crothers beat Miss Quillen, by default; Miss F. W. Wilson beat Miss iRekards, 6-4; Miss Curry beat Miss Bowen, 6-0; Miss M. Campbell beat Miss Jaquette, 6-0; C. B. Sypherd beat Ritz, 6-1; G. Anthony beat J. W. Polite, 6-0; W. R. Ritz beat G. W. Wilson, 8-6; H. L. Brown beat L. Sparks, 6-1.

The drawings for the second round are as follows: Miss Matthews vs. Miss Crothers; Miss Ont Scott vs. Miss Hurlock; Miss Janney vs. Miss Campbell; Miss Gillespie vs. Miss Curry; C. B. Sypherd vs. W. R. Ritz; G. Anthony vs. M. K. Mitchell; Miss F. Wilson vs. H. L. Brown, byes.

Dr. S. C. Mitchell, president of Delaware College, occupied the pulpit of the Newark resbyterian church on Sunday, July 19.

Miss Campbell, instructor in vocal music in the Summer School, is training some of the students for a theatrical entertainment to be given on Thursday evening, July 30. Features of the entertainment will be the rendition of songs and sketches by pupils in the Observation School and students of the Summer School, and the representation of a dramatized version of Longfellow's "The Courtship of Miles Standish." The leading parts in the latter will be taken by Miss Perna Nelson, H. L. Brown and M. K. Mitchell.

New Writer From Appleton

Every month the Newark Post is becoming a better paper. Let us make it have the largest weekly circulation in the State.

The Newark Post is doing a great work in improving the town by its well edited articles but we must do our share.

The change in weather has been greatly received by all the farmers of the State.

It would be a great misfortune if the army worm, which is devastating Philadelphia and Wilmington should come to this part of the country.

President Wilson expressed the wish that the Mason and Dixon line be forever forgotten so as there would be no longer a North and South but a united Union. Let us do our part.

When Main street is finished it will be a great improvement to the town and a benefit and convenience to the community.

The coming carnival will be a great boom to the town. It will be a success and it will be Newark's success. Come and bring your friends.

Give the Newark base ball team support so they can win the pennant. These young men are bringing honor to the town.

To reduce the high cost of living knock the bottom out and then

be economical.

The roads between Appleton Strickersville have been undergoing much needed repair.

To make the chickens lay feed them wheat.

From all appearances the fruit crop of the community will be large.

Frank McVaugh, Jr., of Hockessin, was held up on Friday night by three men with drawn revolvers who mistook him, he thinks, for another party, and searched him but missed \$180 which he had placed in the folds of his shirt cuffs. It is said he recognized the trio and so informed local officers.

GENIUS OF THE SMITH-LEVER ACT

How the Principles It Embodies Have Grown Out of the Past, are Related to the Present and Prepared for the Future

This informative article on the Smith-Lever extension act is taken from the *Experiment Station Record*, edited by Dr. E. W. Allen, assistant director of the office of experiment stations, United States Department of Agriculture.

No better evidence is needed of the place which agricultural education has attained in the public mind than the passage by Congress of the extension measure signed by the president on May 8. It will be recognized as a highly significant step in the advancement of the great national industry through the aid of the general government, rounding out and completing the movement inaugurated in 1862 with the passage of the land grant act for the establishment of agricultural colleges. Since that radical step was taken, which settled the right of the federal government to aid education in the states, the

an annual appropriation of \$10,000 to the land grant colleges of each state and territory for extension work in agriculture, domestic science and other phases of rural life. This initial appropriation was to be supplemented after two years by annual grants, equal to those made by the respective state legislatures, but not to exceed one per cent per capita of the total population of the state or territory.

A bill embodying these ideas was introduced into the house of representatives December 15, 1909, by Honorable J. C. McLaughlin of Michigan. No action was taken on this measure in either house of Congress, although in the following June a bill providing for co-operation with the states in vocational education was favorably reported from the senate committee on agriculture and forestry, in which an appropriation was included for

work between the agricultural colleges and this department. This measure, with some further amendments, passed the house January 19, 1914, and the senate February 7. After several months in conference the report of the conferees was agreed to, and on May 8, as previously stated, it received the signature of President Wilson.

It goes into effect, therefore, on July 1, 1914, less than five years from the time the movement for such a measure was inaugurated in congress.

In its final form the act provides that "in order to aid in diffusing among the people of the United States useful and practical information on subjects relating to agriculture and home economics and to encourage the application of the same," there may be inaugurated in connection with the colleges receiving federal aid under the Morrill acts, agricultural extension work to be carried on in co-operation with this department. This work is to consist of "the giving of instruction and practical demonstrations in agriculture and home economics to persons not attending or residing in said colleges in the several communities, and imparting to such persons information on said subjects through field demonstrations, publications and otherwise."

For the maintenance of the work there is permanently appropriated \$480,000 per annum, or \$10,000 for each state which accepts the provisions of the act. In addition, there is appropriated \$600,000 for the second fiscal year of its operation, and for each year thereafter for seven years \$500,000 additional, until a total of \$4,100,000 is reached, which with the \$480,000 makes a total of \$4,580,000 and continues as a permanent annual appropriation. Unlike the initial appropriation of \$480,000, these additional appropriations are to be allotted annually to each State by the secretary of agriculture in the proportion which its rural population bears to the total rural population.

They are also conditional upon the provision by the states of an equal sum for maintenance of the work, supplied either by direct appropriation, or contributions from the county, college, or local authorities, or from individuals within the state.

The act further provides that the extension work authorized is to be carried on in such manner as may be mutually agreed upon by the secretary of agriculture and by the colleges. Before the funds appropriated become available, plans for the work must be submitted to the secretary and receive his approval.

In its provision as to care of funds, etc., the act follows in a general way the language of previous legislation for the agricultural colleges and experiment stations. It is specified that in states where there are two or more colleges receiving the benefits of the Morrill acts, the legislatures shall designate the institutions to receive the appropriations. No part of the appropriation can be used in the purchase, erection, or repair of buildings, the purchase or rental of land, college course teaching, promoting agricultural trains, or other purposes not specifically authorized, and not more than 5 per cent for printing and distribution of publications. Payments from the federal treasury are to be made semi-annually on January 1 and July 1, and a financial report thereon must be submitted prior to September 1.

A full report of operations under the act is also required prior to January 1 from the several colleges, while the secretary of agri-

BASIC RELATION OF AGRICULTURE

TO WELFARE OF WHOLE COUNTRY

The passage of the Extension act was a response to a widespread public demand, more so than any of the previous acts.

Advocacy of it came not alone from a group of educational institutions which conceived the plan and would be the beneficiaries under it, but in an unusual degree it came as an intelligent expression of farmers through their organizations, and from the various agencies which stand close to them, such as the bankers and the railroads, commercial clubs and related bodies, and welfare organizations generally.

It thus expresses, probably more emphatically than any previous national action, the very general realization of the fundamental relation of agriculture and of the people living under it to the welfare and prosperity of the whole country.

Else, why should the nation bind itself to an annual appropriation which will soon reach beyond \$4,500,000, and the states in accepting it agree to practically duplicate the amount for a like purpose?

national attitude toward direct appropriations for agriculture has undergone a complete change.

This new measure is the sixth act which recognizes agriculture as an appropriate subject for promotion by the federal government, and the fifth to provide permanent grants from the public treasury to be used through the system of state institutions established by the Morrill land-grant of 1862.

If the recognition of agriculture as a subject for national aid and attention has seemed tardy, it has been none the less emphatic, and in this last instance it represents a far wider expression of favor than any previous measure of the sort. The welfare of agriculture, even to the point of considering the individual farmer and farm home, has become a matter of national concern, limited by no state boundaries.

The Smith-Lever act, as the extension measure just enacted seems destined to be known, completes a campaign of education extending over several years. Its conception may perhaps be traced to the report of a committee on extension work of the Association of American Agricultural Colleges and Experiment Station in 1906. This committee, as the result of an inquiry into the status of agricultural extension teaching, found 317 agencies, including 38 agricultural colleges and experiment stations, then engaged in some form of extension work, mainly farmers' institutes. It recommended that each agricultural college organize as soon as practicable a department in extension teaching in agriculture, co-ordinate with other departments or divisions.

AMERICAN HOME MAKER TAKES

RANK WITH AMERICAN FARMER

In one respect the measure is unusually broad as compared with the legislation which preceded it. In addition to the assistance given specifically to agriculture, it recognizes the home and homemaker, and the general conditions of country living.

It is probably the first federal legislation to be adopted in which the term "home economics" formally appears.

It is, therefore, a recognition not only of the American farmer, but of the American homemaker and of the worth and dignity of the vocations which they represent.

This recommendation was repeated in 1907 and 1908, and in the latter year a committee also advocated "that the association place itself on record in favor of a moderate federal appropriation to be made to the land-grant colleges for the purpose of carrying on extension work in agriculture under a plan which requires the states to make appropriations for the work."

At the Portland meeting of the association in 1900 the same committee reported a detailed plan for federal aid. This plan included

modified in some respects and passed by the house in August. It came before the senate in December, but on January 31, 1913, after extended consideration, that body substituted for it a much more comprehensive bill for vocational education, and no agreement was reached between the two houses before adjournment.

Substantially the original Smith-Lever bill was reintroduced in the 63d Congress, April 7, 1913, and on September 6 its sponsors so modified its provisions as to provide for co-operative extension

FOR A SINGLE CENTRAL AGENCY TO DEAL WITH EXTENSION WORK

Heretofore the department's demonstration work has been conducted in part independently of the agricultural colleges. No uniform plan has been followed, and the varied activities in extension lines have not been definitely brought together and administered through one departmental agency. Such an administrative agency has now been established, through a states relations committee, and to it will also be assigned the general administration and supervision of the new extension fund under the Smith-Lever act. There will thus be for the first time a single central agency in the department which will deal with the extension work of the department and with the extension divisions of the several colleges. The department now proposes to make the agricultural colleges state centers of all its operation with the state institutions. It will be united in the closest manner feasible with the state activities, so as to secure unity of action under a consolidated state organization. It is felt that such a combining and co-ordinating of these efforts will action under a consolidated state organization. It is felt that materially strengthen the conduct and the effectiveness of the undertaking as a whole.

culture in turn must make an annual report to congress.

It will be noted that the extension act provides for co-operative action between the general government and the states, between the federal department of agriculture and the agricultural colleges the other. For

the pressure for extension activities has not been confined to the colleges in the states, but has been felt in increasing degree by the department of agriculture at Washington, and congress has seen fit to appropriate moneys for demonstration work to be used in the states through the departments.

(continued on page 7)

A finger on the pulse of your telephone

In every Bell central office there is a wonderful mechanism of dials and testing apparatus by means of which the telephone doctor—the Wire Chief—and his staff keep a finger on the pulse of the telephone system and learn of and correct faults which may arise. Trouble may be discovered and corrected by these telephone doctors without the subscriber having any knowledge of it.

In this, as in every other detail of the operation of the telephone plant, the standards of men and methods are high, and the apparatus is so delicate that the least disturbance in the nervous system of the telephone may be promptly traced to its source.

Bell Telephone Service, you see, is more than just operating a system; it includes a constant watchfulness that YOU may always have at command—the most efficient telephone service in the world.

When you telephone, smile!

The Diamond State Telephone Company,
E. P. Bardo, District Manager,
601 Shipley Street, Wilmington, Del.

 Fire Chief WILSON.

tion there are other funds, portions
 of special appropriations, which
 are employed in demonstration and
 extension activities.

Co-operation between the depart-
 ment and the agricultural colleges
 has been discussed in an abstract
 way for a long time, and there
 have been many instances of such
 co-operation covering a wide range
 of subjects. There is now, how-
 ever, an opportunity for co-opera-
 tion on a national scale along the
 broad and varied lines of extension
 work in agriculture and home eco-
 nomics.

This should be improved by de-
 vising and putting into operation
 an effective system which, while
 carefully preserving the autonomy
 and special responsibilities of each
 party, will bring the state and fed-
 eral agencies for the betterment of
 agriculture and the practical educa-
 tion of the people on our farms
 into such close and harmonious re-
 lations as will best procure the eco-
 nomical and efficient use of the
 great sums of the people's money
 devoted to these purposes, and
 create an American system of ex-
 tension service for our rural com-
 munities more widespread and ben-
 efitial in its operation than any-
 thing in this line the world has yet
 known.

To do this it will be the depart-
 ment's aim to make the system co-
 operative in the best and most lib-
 eral sense—a joint effort providing
 for co-operative planning, while en-
 trusting to the extension depart-
 ments of the colleges the details of
 execution, in accordance with pro-
 ject requirements of different lines
 of work.

The more strictly co-operative
 work will usually involve only the
 department's funds and such part
 of the Smith-Lever fund or state

which the colleges may have for ex-
 tension work outside the Smith-
 Lever projects and joint enter-
 prises with the department will of
 course, be entirely within the con-
 trol of the colleges, but it is hoped
 that even these funds will be so
 used through the extension divi-
 sions that there will be proper co-
 ordination of effort and avoidance
 of duplication all along the line
 of the institution's extension ac-
 tivities.

GOOD ROADS

IN SUSSEX

At a meeting of the Good Roads
 Association at Laurel on Saturday
 last, Governor Miller was present
 and spoke of his approval for
 Greater Delaware that can be
 brought about by Good Roads.

The Governor said:
 "Knowing that 1900 years ago
 Julius Caesar saw the necessity of
 good roads, we know the question
 is no less important in the time in
 which we live. I was in Boston last
 Friday and rode over the city in
 an automobile. I found the condi-
 tion of the city very much changed
 from a year ago, as they had elect-
 ed a new mayor who is trying to
 economize. The city has taken off
 the dump wagons and the men who
 took care of the streets. This may
 be a saving at present, but in years
 to come they will find that it is a
 loss instead of a benefit. On the
 twenty-second of August, 1913, I
 attended the first good roads meet-
 ing at Rehoboth and the fact that
 you are having a meeting of this
 kind here at Laurel this afternoon
 indicates that the people are fully
 alive to the necessity and advan-
 tages of good roads.

"During the past nine years
 down to the present time, we have
 spent one million five hundred
 thousand dollars in Delaware for
 the construction of good roads.
 Four hundred thousand dollars of
 this came from New Castle county.

"It is unnecessary to build good
 roads unless you maintain and
 keep them in proper shape. The
 traveler through Europe today
 can see most excellent roads which
 were built prior to the Christian
 era. If good roads were necessary
 thousands of years ago, they are
 two thousand times more important
 today. Some people may think
 that good roads are of more benefit
 to the automobilist than to the
 farmer, but the man who is able to
 ride in an automobile is able to
 ride in an automobile is able to
 ride six miles out of his way to reach a
 market where it would mean
 time and money to the farmer to
 do likewise.

Sussex county has determined to
 have good roads. The Association
 formed there some time ago, are
 agitating the question of bonding
 the county for general road im-
 provement.

IS NATIONAL POLICY

NOT SOP TO FARMERS

It is not a sop to the farm-
 ers. It is the mature expres-
 sion of a national policy. It
 is for the improvement of the
 country's greatest industry,
 that the national resources
 may be made more produc-
 tive and conserved for the
 benefit of posterity.

Genius of the Smith-Lever Act

(continued from page 6)

With their experiment stations,
 constitute the two great agencies
 for acquiring agricultural informa-
 tion. There are many minor con-
 tributory agencies which are not to
 be overlooked, but they are inde-
 pendent and incidental rather than
 primary. The department, work-
 ing on broad lines and problems,
 frequently not bounded by a state,
 but regional, works out matters
 which it is desirable to get before
 the people, or leads up to a cam-
 paign which it is in the interest of
 the states to have conducted. The
 individual stations likewise make
 discoveries which are of both state
 and regional application, and they
 also work out details for local con-
 ditions, sometimes covering an en-
 tire state, sometimes much more
 restricted.

These results and applications,
 whatever their source, deserve to
 be brought to the attention of the
 public, and this makes desirable
 some organized action. The new
 extension measure provides the col-
 leges with the means for this and
 also provides for co-operation.

The funds carried in the Smith-
 Lever act are not appropriated di-
 rectly to the department of agri-
 culture as its funds to dispense
 among the states, and they are not
 given to the states unconditionally.
 They are designed "to provide for
 co-operative agricultural extension
 work between the agricultural col-
 leges in the several states
 and the United States department
 of agriculture."

The department receives no por-
 tion of the funds appropriated un-
 der the extension act, but these are
 paid semiannually to the state au-
 thorities on the warrant of the sec-
 retary of agriculture, who is charg-
 ed with the proper administration
 of the law. The plan of organiza-
 tion at the colleges contemplates
 the establishment of extension divi-
 sions at each of the colleges. Into
 these all the extension funds and
 work will be grouped, just as
 those for experimentation and re-
 search are grouped in the experi-
 ment stations. These extension
 divisions are state organizations
 and not federal, and the funds sup-
 plied under the new act become the
 funds of the designated college, sub-
 ject to certain conditions and to a
 measure of federal control.

On the other hand, the depart-
 ment has separate funds approp-

riated to it by congress for exten-
 sion (demonstration) work to be
 conducted in the states. The most
 conspicuous examples are those
 for the co-operative demonstration
 grew out of the ravages of the boll
 weevil, and demonstration work in
 the northern states which was an
 oshoot of the farm management
 studies. These two funds, togeth-
 er with other contributions to be
 used with them, amount to ap-
 proximately \$800,000. In addi-

funds as the colleges may choose to
 put into the co-operative arrange-
 ment. The co-operation under the
 Smith-Lever act will simply con-
 sist in the co-operation between the
 colleges in their projects to the de-
 partment for approval in advance,
 much as are the Adams fund pro-
 jects, unless the college shall de-
 cide to use the Smith-Lever fund
 in whole or in part on projects
 which also involve the use of the
 department's funds. State funds

Look After Your Barn Doors

And don't rig up one of those death
 traps. Equip your doors with the
**MYERS NEW-WAY ADJUSTABLE
 TANDEM**

They can be raised or lowered or
 made tight for winter weather—
 all by turning a nut on bar. This feature
 with the Tubular Track make them
 the best hanger on the market.
 They can't come off—blow out or
 in as with the old fashioned track.

WHIZ-----

Flies cut down the milk produc-
 tion as well as short pasture. To
 secure the greatest milk production, make the
 cow contented. Get the Whiz solution and a
 sprayer and you will see the result—not only
 in the cow but the milk check.

Falling Prices

The price of Potatoes and Tomatoes are both dropping, due to
 good weather conditions. Last Saturday we had Tomatoes advertised
 at 15 cents 1-4 peck but we were able to sell them for 10 cents 1-4 peck
 all day. And we also sold White Potatoes at 20 cents 1-2 peck, 75 cents
 a basket. Potatoes for this week are 18 cents 1-2 peck, 65 cents per
 basket. Other vegetables are also getting lower. Squash, Egg Plant,
 Cabbage, Beets, and Peppers. Call at our store before buying else-
 where. We are the first to lower the price on everything.

We have the best Watermelons coming to town and we guarantee
 every melon.

OPTOMETRY—The
 science of prescribing
 and fitting glasses to
 correct defective vision
 without the use of
 drugs.

OPTOMETRIST—
 One skilled in optom-
 etry, an expert in
 measuring eye defects.
 A physical Eye Spec-
 ialist.

Concerning Your Eyes

Good eyesight is essential to health and comfort. Eye
 strain uncorrected leads to nervous disorders and is a factor
 in causing many reflex disturbances.

Tired, aching eyes, frequent pain over the eyes or heads
 aches are some of the indications of eye strain. At other
 times the eyes give no indication themselves of strain, but
 endeavor to keep up the demand upon them, by using the
 reserve accommodative power until they give out.

GLASSES RELIEVE EYE STRAIN

Success in relieving eye strain depends entirely upon
 the skill of the practitioner who prescribes the glasses. Our
 Optometrists are experienced and capable.

Colleg Trustees In Special Meeting

A special meeting of the trustees of Delaware College has been called for July 24 at the Hotel DuPont, Wilmington, when several matters of importance will be considered, including the borrowing of \$150,000 for the Women's College. The State is to appropriate \$30,000 a year for five years to the college, but the money is needed now as the buildings are nearing completion.

The appointment of county agents, under the bill recently passed by Congress, for Kent and Sussex counties, also will be considered. The board, last June, appointed Levi Cooch agent for New Castle county.

SQUIBS

To do something in Newark is a greater sin than to do nothing.

A stranger is too often rated as a carphaggler.

Inherited and unemployed wealth is the engraved card (old English please) to society.

There are some folks so behind the times that they are still reading Duetronomy.

If you want to get an idea of a Democratic times ask a Newark storekeeper who caters to the factory trade and see if he says business conditions are "purely psychological."

If you want to know why the Town Meeting was called off last Thursday night, ask the marines. No one else will tell you.

The spirit of the law and the letter may or may not agree—just according to whom you sent to the Legislature.

During the last ten years, Newark has grown more than any town on the peninsula. Every step in that growth has been made in face of strong stubborn opposition. Every improvement has been won by a narrow margin. Even some of our manufactures have located here by force of individual effort rather than public encouragement. Not a single movement has been started that had the support of a healthy interest. The town has grown in spite of itself. I know of no proposition for town development equal to Newark.

Some day some stranger—a live wire, will sight this place. He will make a mint of money and incidentally push the inherited auto club to the ditch.

Curiosity

A man came into my office the other day for a little social chat. With him was a youngster who had an inquisitive temperament. He was into everything. While annoying, he was amusing. He will make a reporter if this tendency is properly trained. He has a nose for news. The elder man scolded him into some semblance of behavior.

Our conversation lagged for a moment. My friend picked up a letter from my desk, looking at it carefully. I was shocked at first. Then I thought it was a form of nervousness and that the man was really unaware of his act. When to my surprise he said, "Oh, a letter from — (seeing the name on the envelope), looks suspicious; what are you writing to him for?"

I turned and looked at the boy. Though just scolded for his mischievous curiosity, he was looking at his relative elder with admiration. I am not sure but as the boy looked at me I thought I caught an expression in his eye—"Well, what do you think of that?" I was thinking the same thing.

Just then the telephone rang. I haven't answered his question yet. There was nothing in this letter that could not be published broadcast. But the point of this story is my own curiosity. Had I left the room, would the man have read the letter?

He proved conclusively that position does not insure good breeding. But if he had read it, he would have been a thief. He would have been none the richer—I none the poorer.

But would he have read the letter? And how about the example set before the boy?

Burned By Explosion

Frederick Brown was painfully burned about the arms last Friday, when a gasoline torch, with which he was working, exploded at the Women's College.

SNELLENBURG'S

Market & Seventh Sts., [Wilmington, Del.]

The Delmarvia Player Piano

For the People of the Peninsula who love Music and the joy of Personal Interpretation.

- ☐ Made Exclusively for us by the Largest Builders of Player actions in the world.
- ☐ Backed by a Double Guarantee—the Builders and our own, as the most perfect Player Piano in existence today.
- ☐ The Delmarvia comes in three styles and sizes; the cases are highly artistic and on beautiful lines, which make it desirable for the most exclusive home.

The Delmarvia, cabinet size, \$475

The Delmarvia, large cabinet size, \$565

The Delmarvia De Luxe, - - \$610

☐ If you have an old instrument, we will take it at its full value in exchange. If you do not desire to pay cash, you can make very liberal terms with us. If cannot call, write for particulars.

THAT CHRISTMAS GIFT

I know it is not in keeping with the weather to think of Christmas. But a little time and attention given now to your Cards or Gift Calendars will repay you more than you realize.

☐ At the holiday season, you rush off and buy some stock card or calendar. Time demands something and that is the best you can do.

☐ While now, a little thought and talk with the Printer will result in something Original—Individual. Express Yourself to your friends at Christmas tide.

☐ We are going to do some real original Christmas printing this summer. Shall we do calendars for you? Perhaps there is some scene, some quotation from your reading that you would like to share with your good friends. Let us talk it over with you.

At THE POST, of course,—a Shop where Printing is considered an Art and not a Job.
