PRICE SEVEN CENTS

Delaware State Fair To Open At Harrington This Saturday

Delmarva Residents Offered Varied Program Of Farm, Home Exhibits, Auto Races, Nation's Top Entertainers; Senior Citizens, Children Offered Special Fair Days

The 47th annual Delaware State Fair will open in Harrington at noon this Saturday and continue through Saturday, July 30.

It will offer residents of the Delmarva area an opportunity to see thousands of farm product and home craft exhibits, champion livestock and poultry, plus personal appearances by some of the nation's top entertainment stars.

Included among the latter will be TV host Mike Douglas; teen-age favorite Gary Lewis and the Playboys; recording star Brenda Lee; and Natalie Nevins and Jim Roberts of the Lawrence Welk TV troupe.

In addition, the fair program will have such traditional fair features as auto races, harness racing, night fireworks and giant midway with its rides and games.

Two Grandstand Shows

George C. Simpson, fair general manager, has announced that for the first time, two complete grandstand shows will be presented on the final Friday and Saturday at 7:30 and 9 p.m.

Gary Lewis and the Playboys will star in the Friday night show, and Brenda Lee will appear both Saturday nights.

Fair officials said that advance reservations for all grandstand shows can be made by writing or calling the fairgrounds office. They report advance sales are heavy for both Friday and Saturday nights.

Special days have been set aside for children and senior citizens.

Next Tuesday is Children's Day and all school children will be admitted free. Special afternoon and evening grandstand shows will feature the Ginny Tui show, and there also will be pony races and fireworks.

Next Thursday will be Governor's Day and Senior Citizens' Day. All persons 60 or over will be admitted to the grounds free. All those 65 and over will be provided free seats in the grandstand. Awards will be presented to the oldest man, oldest woman and the couple married the longest time.

The Governor

Governor Charles L. Terry, Jr., will be the guest of honor at a dinner given by J. Gordon Smith, fair president. Later he will be presented to fair visitors just prior to the evening grandstand show.

Next Wednesday afternoon, there will be a program of harness racing featuring some of the area's finest juvenile trotters and pacers. TV's Mike Douglas will appear in the 8 p.m. grandstand show.

This Sunday, there will be a Delaware Quarter Horse Show beginning at 9 a.m., and at 10 o'clock there will be an antique auto show.

For the first time in years, an evening grandstand show has been set for Sunday evening. At 8 o'clock there will be a concert and exhibition by the John P. Frazier Memorial String Band. There will be no admission charge for the grandstand.

Joie Chitwood's Auto Thrill Show will be presented Monday night.

Auto races, a favorite of fairgoers, will be held on the opening Saturday night and again the afternoon on the final day of the fair.

Playgrounds Offer Jr. Rec-Olympics With Field Week

New London Tops With 16 Firsts With Competition Held At Central School

For Field Week, playgrounds combined for a day of competition, with the biggest Jr. Olympics held at Central.

New London topped everyone with 16 first place awards; six seconds; and seven thirds.

Ribbons, trophies, and certificates were won by Fairfield Cresters, but the outstanding athletes were Debbie Rice and John Smith.

Debbie Stalfutz, Joe Dugan, and Dennis Ford were award winners at Harmony Hills, and Bonnie Blaine and Cinta Colpo were double winners at Lumbrook.

Junior Lyall, Bimbi Van Meter, and Rose Lyall did well on their home field, Central, and Jesse Guilbault and Paula Gravelly from Birchwood were successful.

The Neal family can be proud of its three athletes: Jackie, Ronelle, and Barbara from Christiansa.

College Park, West Park, and George Road competed at West Park in a tri-playground field day.

Peggy Barry, Donna Duncan, and Jenny Steele returned to George Road with trophies, and Paul Schubelek and Jackie McFarland won the best all-around athlete awards at West Park.

Paul Bryant won the best athlete medal at Downes, as did Marty Speckette at Rittenhouse Park.

Gail Roseman, Steve Carroll, Debbie Brown, and Lora and Lucy Rockhold scored at Jennie Smith and Gallaher.

POLLUTION CONTROL

Delaware would be eligible for approximately \$34-million over the next six years for water pollution control under terms of a bill passed by the U. S. Senate last week, Sen. J. Caleb Boggs said Monday. Boggs was a co-sponsor of the legislation, and as the ranking minority member of the subcommittee on air and water pollution, helped work out final details of the bill.

Former President Of Bancroft Firm Named Dean At UD

Dr. Arnold L. Lippert Succeeds Wm. C. Archie In Arts-Science College

President John A. Perkins has announced the appointment of Dr. Arnold L. Lippert, Wilmington, as the new dean of the college of arts and science at the University of Delaware, effective Sept. 1.

He succeeds Dean William C. Archie who recently resigned to become executive director of the Mary Reynolds Babcock Foundation in his native state of North Carolina.

For the past year, Dr. Lippert has been on the Delaware campus serving as an administrative intern and special consultant to the chemistry department and the college of home economics. He was unanimously recommended by the faculty advisory committee appointed to screen potential candidates.

"We are fortunate in having secured a Delawarean serving on our own campus as our new dean," Perkins said. "He is a man with outstanding scientific and administrative experience who, upon early retirement from industry, has set about preparing himself for a career in higher education."

Lippert had been scheduled to go to Purdue University in September as professor of clothing and textiles. President Frederick L. Hovde of Purdue released him from this commitment so that he might accept the larger educational assignment at Delaware.

A native of Kewanee, Ill., Dean Lippert received his bachelor's degree in chemistry at the University of Illinois and his PhD at Johns Hopkins University.

Upon moving to Wilmington in 1934, he accepted a position as a research chemist with DuPont, but joined Joseph Bancroft & Sons Co., the following year as chemical director. He held this post until 1941, when he became chief of the dyestuffs section of the War Production Board, Washington. In 1944 he returned to Bancroft where he served as vice-president and president until 1965.

He holds patents in this country and abroad and it was during his administration that Bancroft developed textile processes including Everglaze, Minicare and Banlon.

Vandalism, Theft On Vacation Greet Returning Family

A Robesart Manor home was ransacked with damages estimated at more than \$12,000 and property valued at more than \$1,000 was stolen between July 1 and July 9.

Loss and damage was not known until Friday when John D. Tall, 44, and his family returned to their home at 10 Arroyo Road after vacation.

Police said a neighbor discovered and reported the burglary on July 9. According to state police, thieves turned to vandalism inside the house which was entered through a rear door, apparently with a crowbar.

The entire house was ransacked, police added, and the intruders poured cooking oil over furniture and clothing, left left in beds, closets and other areas; and caused other damage.

Stolen property included clothing, jewelry, a radio, tape recorder, records, water skis, a camera, and movie projector.

Red Cross Executive

Mrs. J. Fenton Daugherty

At the recent annual meeting of the Delaware chapter, American Red Cross, Mrs. J. Fenton Daugherty of Newark was elected secretary and a member of the executive committee of the Delaware group.

John N. McDowell of Newark was re-elected to a three-year term as a member of the board of directors.

Mrs. Fern Brown Named To BPW Georgia Meeting

Mrs. Fern Brown of the Newark Business & Professional Women's Club is scheduled to attend the national BPW convention in Atlanta, Ga., July 24-28.

Mrs. Brown is one of 16 representatives of the Delaware Federation of Business and Professional Women selected to attend the Georgia conference.

An address by J. Paul Austin, president of the Coca-Cola Co., will open the convention this Sunday evening.

Hubert Prettyman Attends PMC Summer Institute

Hubert Prettyman of 116 Brewster Drive, Newark, is attending a summer institute for secondary school teachers at Pennsylvania Military College, Chester, Pa.

Business and social studies teacher at Christiansa High School, Prettyman is one of 38 teachers enrolled in the six-week institute beginning June 28 and sponsored by PMC and the National Science Foundation.

Research With Corn, Soybean Irrigation Slated As Farm-Home Field Day Feature

Corn and soybean plots demonstrating effects of sub-irrigation will be a feature of annual Farm and Home Field Day on Aug. 10, at the University of Delaware Georgetown Agricultural Substation, and some 1,000 farmers, agricultural businessmen, and others are expected to attend.

Starting at 10 a.m., buses will take visitors on tours of more than 80 field plots and research projects at the substation farm, and university scientists will be on hand to explain.

Sub-irrigation experiments on both corn and soybeans use underground pipes to provide water during prolonged periods of dry weather. Such studies are increasingly important as a result of several years of low rainfall.

Plots showing methods of adding potassium to the soil, utilizing sub-irrigation, also will be open to the public on Field Day.

Much substation research is devoted to corn and soybeans, Delaware's most important economic crops, and some 3,000 individual soybean plots are being studied by university researchers.

Such things as weed control methods, planting dates, seed quality, fertilizer studies and the development of new improved varieties are being evaluated.

Thousands of research projects have been undertaken at the substation during the past quarter century. Since this year marks the 25th anniversary of the purchase of the farm, Field Day will highlight significant accomplishments made through agricultural research during these years.

To California

Paul J. McCarthy, Jr.

A Newark airman's holiday ended in an unexpected cross-country bus ride because of the airline strike.

Airman 2/c Paul J. McCarthy, Jr., son of Mr. and Mrs. McCarthy of 92 Madison Drive, Newark, had orders to report to Travis Air Force Base, Calif.

He had completed basic training and been at home on 30-day leave. McCarthy had planned to catch a non-stop flight to the West Coast, but the airline strike ended that.

He then tried to use Operation Combat Leave, a military flight service to aid stranded servicemen. But a spokesman at Dover Air Force Base said the service is available only to military men stationed in Southeast Asia who are stranded on leave in the United States.

In Philadelphia, McCarthy boarded a bus on Tuesday last week, for Chicago and major attention will be given to laboratory experimentation as a basis for effective teaching.

Directed by Dr. Theodor Benfey, Earlham chemistry professor, the Institute has an enrollment of 33 teachers and is backed by a \$43,000 National Science Foundation grant.

Greters Club Provides Swings For Day Nursery

The Greters-Newcomers Club of Newark recently presented the Newark Day Nursery with a swing set purchased as a special club project.

Mrs. Melvin Gryzbowski, club president, and Mrs. Walter Galloway, chairman of the Greters charity committee, made the presentation to Mrs. David Anderson, president of the Newark Day Nursery.

Hubert Prettyman Attends PMC Summer Institute

Hubert Prettyman of 116 Brewster Drive, Newark, is attending a summer institute for secondary school teachers at Pennsylvania Military College, Chester, Pa.

Business and social studies teacher at Christiansa High School, Prettyman is one of 38 teachers enrolled in the six-week institute beginning June 28 and sponsored by PMC and the National Science Foundation.

Research With Corn, Soybean Irrigation Slated As Farm-Home Field Day Feature

Corn and soybean plots demonstrating effects of sub-irrigation will be a feature of annual Farm and Home Field Day on Aug. 10, at the University of Delaware Georgetown Agricultural Substation, and some 1,000 farmers, agricultural businessmen, and others are expected to attend.

Starting at 10 a.m., buses will take visitors on tours of more than 80 field plots and research projects at the substation farm, and university scientists will be on hand to explain.

Sub-irrigation experiments on both corn and soybeans use underground pipes to provide water during prolonged periods of dry weather. Such studies are increasingly important as a result of several years of low rainfall.

Plots showing methods of adding potassium to the soil, utilizing sub-irrigation, also will be open to the public on Field Day.

Much substation research is devoted to corn and soybeans, Delaware's most important economic crops, and some 3,000 individual soybean plots are being studied by university researchers.

Such things as weed control methods, planting dates, seed quality, fertilizer studies and the development of new improved varieties are being evaluated.

Thousands of research projects have been undertaken at the substation during the past quarter century. Since this year marks the 25th anniversary of the purchase of the farm, Field Day will highlight significant accomplishments made through agricultural research during these years.

16-Room Addition At Eden Scheduled For Fall Opening

Construction Proceeding To Bring Building To 21 Room Standard In District

Construction on a 16-classroom addition to the Newark district's Eden Elementary School in Bear is progressing satisfactorily and school officials expect that the addition will be ready for the first day of classes on Sept. 8.

The Eden School was not built by the Newark district, but was acquired in a school consolidation. One addition was made to the Eden School to help it meet growth in that area, and the 16-room expansion underway was authorized in a referendum last April 10.

The Eden Elementary School until this time has had eight classrooms, but with this expansion will come up to the district level of 24.

Floyd K. Swope, Jr. Receives Citation As Civic Leader

National Recreation, Park Association Award Honors GNRA Director For Efforts

At the June meeting of the Greater Newark Recreation Association board of directors, Floyd K. Swope, Jr., was awarded the National Recreation and Park Association recreation citation for outstanding volunteer achievement in the community.

This citation was instituted to honor individuals who as volunteers are giving outstanding service to recreation.

Swope has served six years on the board of directors, two as president. He has served three years as a director of the Citizens for Parks, three as state chairman of recreation for the Delaware Congress of PTA's, and one year on the recreation and group work committee of the Community Services Council of Delaware.

Other civic and service activities include two years as leadership training chairman for the Capitol Trail District, Boy Scouts of America; two years as church teen-age education and fellowship chairman; and he is a past-president of the Chestnut Hill Estates Civic Association.

Swope is employed by DuPont as a project engineer in the data systems and mathematics section of the organic chemicals department.

Corp. Lester Thompson Jr. With Marines In Vietnam

Marine Lance Corporal Lester D. Thompson, Jr., son of Mr. and Mrs. Thompson of 17 Meadow Lane, Newark, is serving with the 7th Regiment of the 1st Marine Division in Vietnam.

The 7th Marines, when not engaged in combat operations against insurgent communist forces, are putting into effect new programs in the civic action field.

Vacation

One week in 52—and next week is the one—the Newark Post is not published. There will be no Post next Thursday, as the plant will be shut down all week while members of the Newark Post staff take their annual vacations.

The office and printing plant at 14-16 Thompson Lane will be closed from this Saturday, July 23, through Sunday, July 31.

Printing orders will be received and processed thru Friday of this week, with deliveries to be made after our week's vacation.

Please look for the Newark Post again on Thursday, Aug. 4, when we'll be back at work.

Sales Manager

General Manager Marshall E. Lake has announced the appointment of Robert J. Walstrom as sales manager for the auto sales and service firm of Hollywood-Perkins at 136 Elkton Road in Newark.

Walstrom was most recently associated with William S. Whitman in the operation of the University Esso Servicenter across the road from the auto agency, and prior to that, conducted his Bob's Atlantic service station on Capitol Trail.

The father of three children—Reggie, Connie Lynn Walstrom, and Mrs. Pat Jarrell—Walstrom resides with his wife and 12-year-old Connie Lynn at 209 Madison Drive in Newark.

Seaman Jim Searborough Graduates In Coast Guard

Seaman James N. Searborough, USCG, son of Mr. and Mrs. Ernest N. Searborough of 1002 Lakeside Drive, Newark, has graduated from bootcamp at the U. S. Coast Guard Reserve Training Center, Yorktown, Va.

He attended the two-week course during his annual active training duty for basic seamanship and boat handling.

Graduates return to their hometown Coast Guard Reserve unit for further training.

Granville H. Smith Promoted To Head County H-J Units

Granville H. Smith, sales manager for three years with the Howard Johnson motel-restaurant operation in New Castle County, has been promoted to head of the H-J units of the Newark and New Castle County.

The promotion was announced last week by Harry B. Bissell, Jr., president of Bradford, Inc., which has the Howard Johnson franchise in New Castle County.

Bissell said the move was necessitated by the corporation's rapid growth and plans for expansion. Bradford employs 175 persons, Bissell said, and gross income last year increased 30 per cent.

Smith, 59, a native of Millsboro, resides in Newark with his wife at Southgate Apartments.

He has been in the hotel business since he was 18. Before joining the Bissell-Howard Johnson operation, he was manager of the Lori Delaware Restaurant on Rt. 13 near Wilmington for 12 years, and is a past-president of the Delaware Hotel Association.

Dr. Blaine Schmidt Gets \$5,810 Grant In Land Use Study

The University of Delaware is continuing its study of economic and social effects of the interstate highway system on New Castle County.

A \$5,810 grant has been given to the university by the State Highway Department and the Bureau of Public Roads of the U. S. Department of Commerce to support research of Dr. Blaine Schmidt, professor of economics and business administration.

Professor Schmidt heads the bureau of economic and business research in the university college of business and economics.

The grant covering the fiscal year starting July 1, will finance collection of additional data on land values and use.

A report on results of research to date is expected to be published this fall, Schmidt said.

46,782-Acre City Annexation, Reports By Planners Approved

Council Extends City Boundary To Include Tract North Of Barksdale Road; Annual Report Of Planning Group, Recommendations On Comprehensive Plan Win Approval

The area of the City of Newark was increased by 46,782-acres north of Barksdale Road; the annual report of the planning commission was accepted; and commission recommendations on a comprehensive plan for the Newark area, with the exception of Main Street proposals which are to be reviewed, were accepted at a special meeting of Newark City Council last Monday night.

City annexation of the 46,782-acre tract north of Barksdale Road to the Cherry Hill and Christine Manor home developments, and west from the present city line to the Sherwood Leslie Snyder and Clarence S. Foster lands, was accomplished with a 5-0 approval of an ordinance at a final reading, with Councilmen David H. Doehrl and Henry R. Folsom, Jr., absent. Folsom appeared later in the evening.

Compliance

"Everything the planning commission requested in the way of revisions has been complied with by the developers," City Solicitor Clyde M. England, Jr., assured council concerning the plan for the Hunting Hills development on the newly-annexed tract.

The 61-page annual report of the Newark Planning Commission for the year 1965 included a chronological summary of items considered by the commission and their disposition during the year; recommendations on the Day and Zimmerman traffic survey; a chart of zoning classifications; instructions for change in zoning requests; a check list for zoning plats; a map of Newark population and growth over the 20-year period from 1945; maps of the general comprehensive plan and of parklands; the planning department budget; and a summary of future needs for an expanding population.

Acceptance

"John, you think we should accept this?" Councilman Otis R. Thomas asked Griesbaum, now employed in planning for the county, but planning director for the city during the past year.

"Yes," Newark's recently resigned planning chief, Mr. Thomas, was presented to the council, he added concerning the annual report of the commission.

"A very complete report, and should be accepted as presented," Thomas said. Mayor Norman Handoff added that "maps are most impressive." The report was accepted unanimously in the 6-0 vote with Folsom's absence.

"I would like to compliment the staff," Griesbaum said of Mr. Thomas, who is secretary, and Edward P. Clark, draftsman, for their compilation of the report.

"Our compliments to the planning commission," the mayor added, and Councilman Arthur P. Mayor stated "we might reward them by hiring another planner to help them."

Planning Organization

The Newark Planning Commission organization during 1965 included George J. Pinto, chairman, who resigned because of illness last November; Vice-Chairman Paul Dolan; Robert M. Eisner, Eldred L. Rahn, who resigned in April; C. Vernon Steele, and Eugene C. Shilt.

Last September, Mrs. R. R. Ronkin was appointed to serve Rahn's unexpired term, and William C. Long was appointed a member-at-large.

Charles D. Long was executive secretary, and Clarence W. Taylor, legal counselor.

The planning department operated last year with a \$37,300 budget. The report concludes with the planning commission's comments on the future of the city.

10,000 By 1980

"Newark's population has increased by 140.20 per cent since 1950. Should this same percentage of growth be continued, by 1980 Newark will have in excess of 40,000 people."

"It is important that wise, well-informed decisions be rendered on these aspects of planning related to land use, in order that the little remaining land in Newark will be secured to its highest and best use for generations in the future."

"This is the aim and purpose of the planning commission."

Concerning planning commission recommendations on the proposed comprehensive plan for the Newark area, Solicitor England advised "This is something to adopt as a good idea."

Mrs. Jane Tripp in the audience suggested that "with the many changes in the comprehensive plan 'there should be an annual review by the planning commission, and day to day review by the planning department.'"

And Mrs. Tripp's suggestion was adopted by council in accepting commission recommendations for the comprehensive plan with the exception of Main Street proposals which are to be restudied.

Local Orchestra Featured In Sunday Series Finale

The final concert in the Newark Schools-Community Symphony Orchestra's three-part series being broadcast Sundays at 12:30 as part of Newark Schools on Parade, will feature Haydn's Symphony No. 104 in D Major, often referred to as the London Symphony.

The three broadcasts have been recasting for listeners the birth of the Newark Symphony Orchestra last March 15, at the concert held in the auditorium of Newark High School.

Conductor Harley S. Hastings will be Nelson Freidly's guest on Sunday to discuss orchestra plans for the coming season.

Former GNRA Aide

Tom K'Burg

Newark's R. Thomas K'Burg, 404 Vassar Drive, Nottingham Green, has been named executive director of the Salem County (N.J.) United Fund.

K'Burg had been a campaign division director for the United Community Fund of Northern Delaware, which he joined in 1964.

He succeeds Robert K. Nelson in the new post. Nelson resigned as executive director recently to take a similar post with the North Penn (Pa.) United Fund.

K'Burg attended Albion (Mich.) College, the University of Delaware, and LaSalle College in Philadelphia. A native of Buffalo, N. Y., he has lived most of his life in Delaware.

His previous positions include the assistant directorship of the Greater Newark Recreation Association and the Leonia (N.J.) Community Center.

He is married to the former Joann Otto and they have four adopted children.

Library Friends Hear Pearl Buck At Event In NYC

Three members of the board of Friends of the Newark Free Library attended the annual luncheon meeting sponsored by the American Library Association.

Mrs. Ralph E. Purcell, president; Mrs. Howard Greene, vice-president, and Mrs. Jerry Nelson, director, represented the Newark Friends at the New York City meeting on July 13.

Nobel prize winner and author, Mrs. Pearl Buck was the luncheon speaker.

Mrs. Buck urged that libraries present all views on a subject and that they endeavor to provide balanced fare.

She deplored present over-emphasis on crime, violence, and sex, saying that these should be only a small element in the larger picture presented in literature.

Americans were urged to display "a vigorous sense of curiosity, and to read, read, read!"

The group from Newark met other prominent authors and artists, including Ingrid and Edgar Parin d'Aulaire and Marcia Brown, all winners of coveted Caldecott Medals for outstanding picture books for children.

Dr. Blaine Schmidt Gets \$5,810 Grant In Land Use Study

The University of Delaware is continuing its study of economic and social effects of the interstate highway system on New Castle County.

A \$5,810 grant has been given to the university by the State Highway Department and the Bureau of Public Roads of the U. S. Department of Commerce to support research of Dr. Blaine Schmidt, professor of economics and business administration.

Professor Schmidt heads the bureau of economic and business research in the university college of business and economics.

The grant covering the fiscal year starting July 1, will finance collection of additional data on land values and use.

A report on results of research to date is expected to be published this fall, Schmidt said.

A gift was presented to the oldest, J. L. Ford, and youngest, James Joyce.

Ice cream and cake were served at 4:30 o'clock.

The reunion for 1967 will be at the home of Mr. and Mrs. Larry Timmons at Head of Christiana Church on the third Sunday in July with dinner at 1 o'clock.

Friends are asked to remember Ford Barr, 91, with cards. He is in a nursing home.

New Post Office Planned For Bear By July Of 1967

The U. S. Post Office Department announced last Thursday that it will relocate the Post Office in Bear in a new building about 500-ft. from the present structure.

The department said it had signed an agreement with Nicholas J. Fidance of Bear, under which Fidance will build the new office on U. S. 40 near Schoolhouse Road. The department will lease the building from Fidance.

The new building will be on one floor, cover 1,741-sq. ft. of floor space, and will be air conditioned. It will cost \$27,000.

The department said it will be completed by July 11, 1967.

Star At The Fair

Natalie Nevins

Jim Roberts and Natalie Nevins, singing stars of the Lawrence Well TV program, will headline the 3 p.m. grandstand show at the Delaware State Fair next Thursday which will be Senior Citizens' Day. All persons 60 or over will be admitted to the grounds free.

University Offers August Institute For Cheerleaders

The first annual Summer Cheerleaders' Institute will be held at the University of Delaware, Aug. 15-18, and the instructional staff will be supplied by the National Cheerleaders Association under the direction of Lawrence R. Herkimer, nationally known as "Mr. Cheerleader."

Herkimer directed a one-day program at the university last semester which attracted more than 600 participants.

Subjects to be stressed during the institute are cheerleading techniques, mass demonstrations, songs, pep squads, crowd psychology, novelty yells, pep rallies and sportsmanship.

The institute is open to students in junior and senior high school or college.

Students planning to try out for cheerleading squads this fall will find the program especially helpful, officials state.

Participants will live in university residence halls with regular residence directors. All meals will be served in university dining halls, and recreational opportunities are a part of the four-day schedule.

Pre-registration forms may be obtained by writing to the extension division, University of Delaware.

Applications should be received by Aug. 1.

Tennis Class Openings
Offered Youths, Adults

The Greater Newark Recreation Association has openings for tennis instruction for beginners, intermediate, and adult beginners classes.

The GNRA's second session of tennis will be from July 25 to Aug. 26.

Morning classes for beginners and intermediates will be held at the Newark High School courts, and afternoon classes at Christiana High.

Adult classes will be held in the evening at Christiana.

For further information on the tennis program contact the GNRA office.

Bureau Of Census Lists Total 564 Farms For County

A total of 564 farms was counted in New Castle County during the 1964 census of agriculture, the U.S. Department of Commerce bureau of the census reports.

In the last previous census of agriculture (1959), the total counted in the county was 729 farms.

The 1964 report shows that average farm size in the county was 214.6-acres and that the average value of county farms was \$116,368.

Value of all products sold by farms in the county in 1964 was \$9,841,804—in 1959, \$10,236,942.

Value of all crops sold by county farms in 1964 was \$5,840,194, and in 1959, \$5,620,504.

Value of all livestock and livestock products sold by county farms in 1964 was \$3,995,056; and in 1959, \$5,216,438.

Dozens are doing it everyday . . . trading in their pennies and dollars on an exciting combination of banking convenience and fine art. Here's the story:

Delaware Trust has just acquired an outstanding selection of famous art reproductions . . . paintings by such artists as Rembrandt, Picasso, Utrillo, Van Gogh, Cezanne, Monet and Renoir.

Each has been painstakingly reproduced in full color on actual canvas, mounted on a 22x28-inch handcrafted wooden stretcher—suitable for framing or for hanging "as is".

You may have your choice of the 26 masterpieces for only \$6.95 each when you deposit \$25 in a new or existing Delaware Trust 4% savings account or rent a safe deposit box or take out a loan for any purpose.

All of the 26 full color reproductions are on display now at each of our 12 convenient offices. Since this is a limited time offer, we urge you to come see them as soon as possible.

Winning Sportswriter

Bud Collins of the Boston Globe, left, accepts Martini & Rossi Sports-writers Award from Gov. Dan K. Moore of North Carolina. Looking on is previous winner, Will Grimley of the Associated Press.

SALISBURY, N.C.—You wouldn't find as many big name sportswriters and sportscasters at the World Series as you would have found down here in this quiet North Carolina town recently.

Red Smith was here, Chris Schenkel was here. There was Jim Murray and Lindsey Nelson and Will Grimley and dozens more. And there wasn't a sports contest of any kind going on within a hundred miles.

These men, and dozens of their colleagues, were here for the Seventh Annual National Sportscasters & Sportswriters Awards which was organized in Salisbury and which makes its home here.

They were here because they're the tops. Each year the 7,000 members of the NSSA vote for the best sportscaster and the best sportswriter in each of the fifty states. They also select a national finalist in sportscasting and in sports-writing. Then, each year, all the winners gather here for the presentations.

This year Vin Scully, who broadcasts the Los Angeles Dodgers games and Red Smith, the nationally syndicated columnist of the N. Y. Herald Tribune were the national winners.

Another award presented here each year is the Martini & Rossi Award for outstanding writing or sportscasting in sportsman's sports such as fencing, riding, boating, auto racing and tennis.

For the past three years this award has been taken by a tennis writer. This year's winner was Bud Collins of the Boston Globe. Previous winners were Allison Danzig of the New York Times and Will Grimley of the Associated Press.

Among the nominees for this award this year were three women, each of whom was selected as outstanding in her field. They were Eileen Crimmin of Seattle, Washington for her stories on power boating; Alice Higgins of Sports Illustrated for horse show coverage; and Betty Moore of the New York Morning Telegraph, steeplechase and hunt.

Other nominees selected for outstanding work in their fields were Ted Webb of NBC-Monitor for motorsports, and Lincoln A. Warden of the New York Times for his coverage of fencing.

Richard du Pont, Jr. Named To Delaware Trust Board

Richard C. du Pont, Jr., Middletown aviation firm head, is a new advisory board member of Delaware Trust Company's Middletown office. The appointment was announced today by J. H. Tyler McConnell, bank president.

DuPont, president of both Summit Aviation and Manor Aviation, is the son of the late pioneer in the use of American glider planes.

Karen Sundt Plans To Teach Grade 4 For New Castle

Karen Sundt, who graduated from the University of Delaware last June, has accepted a position with the New Castle special school district. She will teach a fourth grade at the Manor Park School.

Miss Sundt received a bachelor of science degree in education with her major in elementary teaching. She was on the dean's list and was elected to Kappa Delta Pi honor society in education; served as a junior counselor; was active in the Modern Dance Club all four years, and in her senior year, was club president.

For the past two summers Miss Sundt has taught modern dancing and been a unit director at the Campfire Girls Camp at Tecoma, Ga., and this summer she will travel with her family to the South and Midwest.

The family will visit maternal relatives in Atlanta, and then go West to visit paternal relatives in Arizona and New Mexico.

There will be a Sundt family reunion in Fort Collins, Colo., where other relatives reside.

Miss Sundt is the daughter of Col. and Mrs. Daniel N. Sundt, 15 Monterey Drive, Brookside.

SIXTY-FIFTH ANNIV. FOR VAN AULENS

Mr. and Mrs. J. Penrose VanAulen, Lancaster, Pa., quietly celebrated their 65th wedding anniversary on July 3 with small family dinner.

Those attending from this area were their daughter and son-in-law, Mr. and Mrs. James P. Greenplate, Orchard Ave., and two of their children, Edna Graves, and Robert F. Greenplate and their respective families.

Mr. and Mrs. Van Aulen were married in Lancaster, July 3, 1901.

PUBLIC SALE OF VALUABLE MERCHANDISE

This is to serve as public notice that there will be a Public Sale of a 1964 Chevrolet Corvair on the premises of building 212 foot of West Street, Wilmington, Delaware at 9:00 A.M., Thursday, July 28, 1966.

This automobile is being sold to satisfy a lien obtained by way of a conditional sales contract which has been assigned to The Farmers Bank of the State of Delaware, and who is the holder thereof.

It is being sold to satisfy the said bank's claim under said conditional sales contract against Roy J. Wade. Terms—Cash.

July 21, 1966

THE ABC'S FOR STARTING SCHOOL

Did you know that the expression "back a clean slate" originated way back in 1689? The phrase may have political overtones, as slate means list of candidates as well as a writing tablet, but we'd like to think that even in those historic years each student wanted to start the school year with a clean slate.

Would you believe that there is nothing more appealing than a loose-leaf binder filled to the brim with paper; a freshly sharpened pencil; and a brand new ruler? Would you believe two freshly sharpened pencils? These are the basic tools necessary for a head start. Incidentally, do not get the No. 2 pencils, as they are not too hard or too soft, and the handwriting you've been practicing all summer will be shown off to best advantage.

Of course, there are other necessities like crayon boxes, compasses, and fountain pens, but we do suggest you find out what your teacher deems necessary. Particularly enough, different schools have different rules about the supplies needed.

By now, you've probably gone over your wardrobe to see that it is pressed and cleaned and that no buttons are missing. And you've straightened out your bureau so you can find things at a moment's notice. In these hectic morning hours, an additional aid to keep things calm and serene is to lay your clothes out the night before. And speaking about serenely, have you discussed with your family the spot where you are going to do your homework each night? Some families prefer the breakfast room or den or even dining room. Or some of you may even be lucky enough to have a desk in your own room. No matter the location, we're sure we don't have to remind you that an atmosphere of quiet can change those C's to B's and that it is terribly important that you have the right light. Ideally it should shine over your left or right shoulder. The new highly intensified lamps are ideal for study and can be moved from one spot to

Food Sense □ Not Nonsense

This Growing Nation

Today's boys are 6 to 8 per cent taller than their fathers were at the same age. The average woman of 17 to 25 years is taller by 2 inches than her counterpart of the early 1900's. While the boys are some 12 to 15 per cent heavier for their height than were their fathers at the same age, not so the girls with respect to their grandmothers. Granddaughter in her late teens is some 6 to 8 pounds lighter for her height than was her grandmother.

Improved nutrition, in which the enrichment of bread plays a part, is a major factor in the more rapid growth and increased size of our children. Twenty-five years ago, the primary purpose in enriching bread and flour was to make use of these popular and low cost foods to distribute B-vitamins—thiamine, niacin, and riboflavin—and iron with which the American diet as a whole was inadequately supplied. The improvement in our nation's health, as reflected in the data for our growing younger generations, demonstrates that enrichment has been, and is, a sterling success.

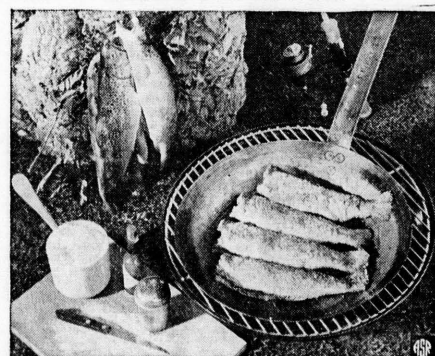

About Bowling.....by Dick Ericson

SHOULDER ANGLE: The angle at which a straight line runs from the shoulders to the floor by way of the midsection is not constant. The more you bowl, the less you protrude.

SHOULDER ANGLE: The bowler's shoulders always are at a right angle to the line he intends his ball to follow. For example, if a bowler is trying to get a strike from an angle other than a straight line perpendicular to the foul line, he should assume that angle with his shoulders. Also, on spares such as the 7 pin or 10 pin conversion, he should approach the foul line at an angle.

A Fine Pan Of Fish!

Few foods are as satisfying as freshly caught fish, hooked on your own line and pan-fried over your own fire. Small fish, or fillets and steaks cut from larger game, make succulent eating dipped in egg and rolled in cornmeal or cracker crumbs. They fry quickly and need only a simple sauce of melted butter, Tabasco liquid and pepper spice, lemon juice and parsley to enhance their delicate flavor. Tabasco is an excellent seasoning to use in cooking fish, so pack the handy little two-ounce bottle with your other culinary essentials.

A booklet titled "Space-Saving, Time-Saving Cooking for Men-on-the-Move" offers new ideas and recipes for outdoor cooking. For a copy, write to: "Men-on-the-Move," Suite 1100, 551 Fifth Ave., New York, N. Y. 10017.

Skillet-Fried Fish
6 small pan-fried fish or 4 tablespoons butter or margarine
2 pounds fillets or steaks
Salt
Paprika, optional
1 egg
2 tablespoons water
1 cup flour, cornmeal or cracker crumbs
4 1/2 teaspoons lemon or lime juice
1 1/2 tablespoons finely chopped parsley

Sprinkle fish with salt and paprika. Beat together egg and water; dip fish in egg mixture; roll in desired dry mixture. Heat a small amount shortening or butter, salad oil or bacon drippings in skillet. (Do not allow to smoke.) Add fish. Cook quickly over moderate heat until browned on one side, about 4 minutes. Turn and cook 3 to 4 minutes longer or until easily flaked with a fork, but still moist. Remove from skillet; keep warm. Wipe out skillet with absorbent paper; add butter and melt. Stir in Tabasco, lemon juice and parsley. Serve with fish.

YIELD: 4 to 6 servings.

EISENHOWERS CELEBRATE GOLDEN ANNIVERSARY

The Eisenhowers' July first golden wedding anniversary marks the first time in 119 years that a former President and his lady have reached this milestone. John Quincy Adams and his wife celebrated their 50th anniversary on July 26, 1847. Respecting the wishes of General and Mrs. Eisenhower, a committee headed by Bob Hope, comedian, and Robert B. Anderson, former Treasury Secretary, is urging that in lieu of gifts to the couple, contributions should be sent to Eisenhower College, a new co-educational liberal arts college named after the General. Contributions are tax deductible and may be sent to Eisenhower College, Seneca Falls, New York (or c/o Postmaster) where they will be permanently recorded.

Superb Rice Dish

Zesty Green Rice is different. Men like it because of its abundance of flavor and the beautiful way it accompanies the entrees they prefer, the broiled and roasted meats, poultry and seafood. From the feminine viewpoint, the rice adds attraction and glamour as well as good taste to the menu, is easy to prepare, to serve and to eat, and never fails to win compliments for the hostess. Zesty Green Rice consists of rice enriched with chicken flavor and topped with a masterfully-seasoned sour cream sauce. Note that the sauce is not heated before being spooned over the freshly-cooked hot rice. There's no need to heat it; the warmth of the rice does that while still retaining the most attractive appearance of the dish. And the washing of one saucepan is eliminated; welcome news these busy days.

Simply cooking the rice in chicken broth instead of water gives it its chicken-rich taste. That's one of the nice things about rice: its goodness of other ingredients added to it, so that it can be used as few other foods can be. In this dish, it's the ideal base for the lavish sauce.

Zesty Green Rice
3 cups chicken broth
1 1/2 cups uncooked rice
1/2 teaspoon salt
1 clove garlic, crushed
1/2 cup chopped parsley
1/4 cup chopped green onion
2 tablespoons anchovy paste
3 tablespoons tarragon wine vinegar
Coarsely-ground black pepper
1 1/2 cups sour cream
Combine broth, rice, and salt in a 3-quart saucepan. Heat to boiling; stir once. Cover, reduce the heat and simmer for 14 minutes, or until liquid is absorbed. Blend garlic, parsley, green onion, anchovy paste, vinegar and pepper into sauce. Spoon over rice. Makes 6 to 8 servings.

TRAIL BLAZER

HOW JOBS ARE MADE

From where do the better jobs come?

They come from research and development. This year, American industry is expected to increase its research and development investment by \$1.6 billion to a record \$15.2 billion for new processes and products, according to a McGraw-Hill survey.

By 1969, the companies expect that their over-all quest for new technological capabilities will be costing \$18.2 billion annually.

The main object for 45 per cent of the companies is to develop new products, while 41 per cent concentrate on improving existing products.

Finding new processes is the target of the remaining 14 per cent.

To mention one of the many companies, U. S. Steel tripled its expenditures for research over the past ten years. In their Monroeville, (Pa.) research center and associated laboratories 1,800 scientists, technicians and other people are employed. About 1,300 projects were under study during the past year.

This unit conducts a development program for higher-yield strength, high-toughness weldable steel for use in deep-diving underwater vehicles and armor plate for helicopters. In the past two years alone, over 100 new or improved products have been marketed by U. S. Steel.

Yes, R and D stands for progress in America.

GOOD PLANNING

The unsung, heroic volunteers of the Newark Planning Commission and the professional members of the planning department are to be congratulated on their annual report and effort for the past year.

The 57-page report, plus a three-page table of contents and a page of foreword, is a concise, coherent compilation of municipal planning activities during 1965, and of pleasing format.

The report, itself, represents a tremendous amount of work—but the effort expended in preparing the report is infinitesimal when compared with the work of the municipal planners over the 12-month period ending last December 31.

Many municipalities are all but hopelessly swamped under the torrential tide of residential and business growth, and Newark is far more fortunate than most—because of a sound, dedicated planning organization.

Joint Account

Chrysler Detroit Tank Plant Produces 30,000th Combat Vehicle In 25th Year

The Chrysler-operated Detroit Tank Plant began its 25th year of operation last week by producing its 30,000th combat vehicle—a 50-ton M-60A1 Tank.

The 1,207,000 sq. ft. U. S. Army-owned facility, part of the U. S. Army Detroit Arsenal, is the only active tank manufacturing complex in the nation. It currently produces both the M-60A1, the Army's latest combat tank, and the 57-ton M728 Combat Engineer Vehicle on the same assembly line. These are the 17th and 18th types of armored tracked vehicles produced in the tank plant since 1941.

Chrysler Corporation ranks as the largest volume manufacturer of combat tanks in the Free World. Since 1941, more than 36,000 medium and heavy tanks have been built by Chrysler for this nation and its allies.

Starting in 1967, Chrysler will begin production of the M50A1E1 turret system under a multi-million Army Weapons Command contract awarded last January.

Construction of the tank plant which started in 1940 actually marked the beginning of assembly line production of tanks in the United States. All tanks up to then were hand-built models.

With World War II fast approaching, the Army asked Chrysler to select a site and construct a manufacturing plant in the Detroit area that could be used to mass-produce 1,000 urgently needed models of the M2A1, a medium tank originally designed in 1936. With government approval, Chrysler officials, under the direction of President K. T. Keller, chose 113-acres of rented farmland in Warren, Mich., approximately 13 miles from downtown Detroit. Ground was broken in the middle of a corn field on Sept. 4, 1940.

Tourneys, Racing Feature Activities With Playgrounds

In recent playground activity, the Greater Newark Recreation Association sponsored tournaments, races, and games.

At the Lumbrook playground, Jim Greenplate and Alan Anip won the horseshoe tournament.

Earlean Tucker and Joyce Bias proved that girls can throw ringers too. They won the girls horseshoe tournament at the New London playground.

John Boyer won the checker tournament at Downes School, and David Parson at Rittenhouse Park.

The Indians and Cowboys competed at West Park playground relay races, and players at the Jennie Smith playground defeated the George Read Village team in an inter-playground softball game.

Debbie Rice and Janet Mullin drew the best pictures of Fairfield Crest directors in the drawing contest. All portraits were displayed for Family Night, and Chris Smoot ate the most marshmallows that night. Children at College Park and Gallagher playgrounds enjoyed their bicycle rodeos.

Peggy Brice, Linda Shelton, Jeff Alexander, Tom Williams, Rodney Hamilton, and Mike Rust received first place ribbons at College Park. Congratulations to Kenny and Steve Carroll, Gary Kaminski, Loreta Sizzi, Charles Ferris, Margaret Langley, Bill Mooney, Chuck Pierson, Bunny Roseman, and Billy Cox for their work on Bike Night at Gallagher.

Two months after ground-breaking, the Army decided to replace the M2A1 with the larger, improved M3, a 27-ton model still in the early development stage. This new heavily armed medium tank, named in honor of Civil War Gen. Ulysses S. Grant, had a riveted body construction and carried its main 75-mm. gun mounted into the right side of the hull. Chrysler completed two General Grant pilot models by April, 1941, and assembled the first production vehicle on July 8, approximately three months before completing plant construction.

During the remainder of 1941, Chrysler built and delivered to the Army 730 General Grants. By the time M3 production phased out in the summer of 1942, a total of 3,350 M3's had rolled off the tank plant assembly lines.

Even before the M3 reached production, Chrysler and the Army had completed the design of a radically new medium tank—the 32-ton M4 General Sherman, the first U. S. tank to be made with a completely welded body, and carry its main gun on a 360° rotating turret mounted on top of the hull.

The first M4 production vehicle, completed in July of 1942, was the forerunner of over 18,000 models of the General Sherman which became the principal combat tank used by U. S. and allied forces during the height of the war. Working seven days around the clock, including holidays, Chrysler's M4 monthly production rate reached a peak of 896 vehicles in December, 1942. By the time the Sherman production run had ended in the summer of 1944, Chrysler had built seven different types of M4's, including models equipped with 75 and 90-mm. guns, 105-mm howitzer, special artillery, cannons, mine detectors and bulldozers.

All of the M3's and early M4 models were powered by modified 9-cylinder air-cooled aircraft engines. But, with ballooning Army and Navy air force requirements putting a strain on aircraft engine capacity, the Army asked Chrysler to develop a new engine which could be made on machines and tools existing in its plants. The company's quick solution was to combine five automotive-type 6-cylinder engines on a common crankshaft. Affectionately known to the armed forces as "the egg beater" or "the Dionne quintuplets," this multi-bank engine drove 7,500 Sherman tanks.

In the spring of 1944, the Chrysler Army Engineer Tank Group started development of a new heavier medium tank to replace the M4. Plans called for the new tank to be in production by the following winter. The design of the new tank, called the T26, included greater armor and firepower than anything within 20 tons of its weight. The T26, later named the M26 General Pershing, was put into production in February, 1945. Due to the termination of the War, less than 2,500 were built, and saw action in Europe.

The Tank Plant's production record during World War II totaled 22,234 medium tanks of 12 different types—enough to equip over 100 armored divisions. Another 1,610 were modified for the British Army. These achievements helped to earn for the City of Detroit its international reputation during the War as the "Arsenal of Democracy."

At war's end, the facility was used as a military development and modification center.

THEY PERIL LIFE TO SAVE LIFE

A century ago, a ship trapped in the storm-tossed North Atlantic too often was lost with all hands. This apparent fate awaited the British vessel "Ayshire" as she lay helpless off the New Jersey coast in 1850. Badly damaged and buffeted by heavy seas, she was obscured from shore by a blizzard. Her 201 passengers and crew seemed doomed.

Fortunately, a gallant band of rescuers from the Life Saving Benevolent Association of New York was on hand. Using a newly invented lifeboat, the "Francis Life Car," they soon carried all but one to safety.

A few months before the "Ayshire" had foundered, the Association had been formed to guard seacoasts, save lives at sea, and honor rescuers. Prime mover behind the Association was the Atlantic Mutual Insurance Company, cooperating with leading shipowners and merchants.

The dramatic "Ayshire" rescue was the first of many acts of heroism at sea logged by the Life Savings Benevolent Association.

In the year following the Association's founding Wal-

ter Restored Jones, its first president and then also president of the Atlantic Mutual Insurance Company, made the initial awards for rescues at sea beyond the call of duty.

The first award was to 65-year old Benjamin Downing and his 16-year old son Benjamin Franklin. Fearing the stormy seas, six men refused to assist in the rescue of two others on a capsized schooner. But, Downing and his son went into the boiling surf and succeeded in rescuing one of the men, despite the fact that the older Downing, a lighthouse keeper, was lame and had only one arm.

By World War I, safeguarding lives at sea became a responsibility of the U. S. Coast Guard.

Today, the Life Saving Benevolent Association of New York still functions—supporting research, presenting scholarships to the Merchant Marine Academy and donating gifts to lifesaving stations and schools. It continues its annual presentation of decorations and cash awards for heroism in rescuing persons from drowning, adding to its honor list those who "periled life to save life."

Local Airman

James M. Potter

Airman James M. Potter, son of Mr. and Mrs. Richard D. Potter of 9 Carlisle Road, Newark, has been selected for technical training at Chanute AFB, Ill., as a U. S. Air Force aircraft maintenance specialist.

The airman recently completed basic training at Lackland AFB, Tex. His new school is part of the Air Training Command which conducts hundreds of specialized courses to provide technically trained personnel for the nation's aerospace force.

Airman Potter was graduated from Christiana High School in 1965.

Landscaping For Patios Advised By Bob Stevens

To provide enjoyable outdoor living, patios should be carefully landscaped, according to Robert F. Stevens, extension horticulturist at the University of Delaware.

A patio should be somewhat private, and neighboring yards and windows should be screened from view. Use screen fences, decorative walls or large shrubs to provide this needed privacy. Honeysuckle, mock orange, arbutus, hemlock, yew and other shrubs with an ultimate height of 6 to 8 ft. may be used.

Good shade trees for patios include styrax, yellowwood, maples, and crabapples, Stevens says.

When Communist troops invaded South Korea in June, 1950, the Army reactivated the plant for tank production, updating the M26 Pershing into the M46 medium tank. The following year, the Army started development work on the M47 Patton I, an improved medium tank featuring a completely redesigned turret system and a new high velocity 90 millimeter gun.

In 1952, Chrysler was called upon to again operate the tank plant and carry out the M47 production run. When this program ended in November, 1953, Chrysler had built and shipped 3,450 M47's.

In the meantime, Chrysler had completed a new tank plant in Newark, and had started production of the M48 Patton II, the first completely new medium tank designed since the end of World War II. Its feature included a one-piece cast armor-plate hull and greater speed and mobility than any tank in its class.

Although all medium and heavy tank production operations had been assigned to the Delaware plant, Chrysler continued to operate the Detroit plant on a stand-by basis.

The Detroit Tank Plant continued to produce components for the Newark operation when Chrysler started production of the M60 tank in October, 1959. Although a medium tank in size and weight, the diesel-powered M60 carried the firepower and armor of heavier class tanks. These features distinguished it as the Army's first "Main Battle Tank."

In May, 1960, the Army announced that the M60 add-on production run would be performed at the Detroit Tank Plant, started a new chapter in the history of the famous facility.

Chrysler completed the final M60 in Newark during August of that year and, without missing a day of schedule, rolled out the first production model at the Detroit plant a month later.

PUBLIC SALE

OF VALUABLE MERCHANDISE
This is to serve as public notice that there will be a Public Sale of a 1960 Chevrolet Two Door Sport Coupe on the premises of Building 212 foot of West Street, Wilmington, Delaware at 9:00 A.M., Tuesday, July 26, 1966.

This automobile is being sold to satisfy a lien obtained by way of a conditional sales contract which has been assigned to The Farmers Bank of the State of Delaware, and who is the holder thereof.

It is being sold to satisfy the said bank's claim under said conditional sales contract against Webster C. Greene.

Terms—Cash. July 21, 1966

PUBLIC SALE

OF VALUABLE MERCHANDISE
This is to serve as public notice that there will be a Public Sale of a 1960 Chevrolet Fleet Side Pick-Up on the premises of Building 212 foot of West Street, Wilmington, Delaware at 9:00 A.M., Friday, August 5, 1966.

This automobile is being sold to satisfy a lien obtained by way of a conditional sales contract which has been assigned to The Farmers Bank of the State of Delaware, and who is the holder thereof.

It is being sold to satisfy the said bank's claim under said conditional sales contract against Howard Jenkins.

Terms—Cash. July 21, 1966

CITY OF NEWARK

CITY COUNCIL
PUBLIC HEARING

August 15, 1966 — 8:00 P.M.
Pursuant to Section 103 and Section 402 of the City Charter and Chapter XXIII, Sections 1600 and 1601 of the Code of Ordinances of the City of Newark, and further pursuant to Section 204 of Title 22, Delaware Code Annotated, Notice is hereby given of a Public Hearing in the Council Chambers, Academy Building, Main and Academy Streets, Newark, Delaware, August 15, 1966 at 8:00 P.M., E.D.T., at which time the Council will consider for Final Reading and Passage a Proposed Ordinance entitled: AN ORDINANCE ANNEXING INTO THE CITY OF NEWARK AND AMENDING CHAPTER XXIII OF THE CITY OF NEWARK CODE OF ORDINANCES TO ZONE 15.03 ACRES OF LAND MORE OR LESS, EXTENDING FROM WELSH TRACT ROAD NORTHERLY TO THE DEVELOPMENTS OF ROLLING GREEN AND ROCKWOOD COURT AND EXTENDING WESTERLY FROM LANDS NOW OR FORMERLY OF ROBERT R. SPRINGER AND WIFE TO LANDS NOW OR FORMERLY OF ALBERT POLK AND OF FRANK HUFNAGL, JR. AND WIFE.

Escape Measures In Summer Heat Cited By UD Aide

Escaping summer heat practically becomes a national preoccupation each July. Certainly, modern home air conditioning makes it easier to keep cool and comfortable. Nonetheless, there are other ways to help keep the house cool, according to Coral K. Morris, extension home management specialist at the University of Delaware. Some of these methods can even increase effectiveness of air conditioning systems.

Keep windows and blinds or drapes open during the night when the air is cooler, but keep them closed during the heat of day.

Venetian blinds on south windows cut heat from the sun in half, Miss Morris points out.

Louvers outside windows are even better; they can cut out almost all the direct solar heat on south windows.

Bamboo curtains on the outside of windows also will effectively reduce heat inside the house.

Awning is another good idea for a cooler summer. Use metal or canvas in a light color with open sides, Miss Morris recommends. All awnings should be wider than the windows to screen out the sun for longer periods during the day.

Fans are a summertime necessity for homes without air conditioning. Attic and floor fans circulate air and help keep the entire house cooler.

Large window fans should include a reverse cycle or be easily turned so they can either bring in the cooler

Richard Klair Named Pfc With Army In Germany

Richard A. Klair, son of Mr. and Mrs. William Klair, Newark, was promoted to Army private first class on June 22 while assigned to the 814th Engineer Co. near Hanau, Germany.

Klair entered the Army last October; received basic training at Fort Jackson, S. C., and was last stationed at Fort Leonard Wood, Mo.

The 19-year-old soldier is a 1965 graduate of Dickinson High School.

Don Burton Cites Control Of Livestock, Crop Pests

Livestock producers depend to a large extent on chemicals to control pests that attack animals and damage feed crops.

Insecticides, herbicides, fungicides and biologics intended to protect livestock and feed crops, are safe when used as recommended, according to Don Burton, associate extension livestock and dairy specialist at the University of Delaware.

However, he emphasizes, they can be hazardous if they are improperly used. Misuse can bring serious financial loss, or can lower the quality of products.

These chemicals should always be properly labeled; keep them in the original container, never in an unlabeled container.

Prevent misuse by referring to the label each time the chemical is used.

Kim Thorn To Attend West Virginia Wesleyan

Kim Thorn, a daughter of Mr. and Mrs. Leonard J. Thorn of 110 Tanglewood Lane, Newark, has been accepted for admission to West Virginia Wesleyan College.

The Newark High School graduate plans to major in education. A member of the Drama Guild, Future Teachers of America, prom committee, yearbook staff and Tri-Hi-Y at Newark High, she attends St. Thomas Episcopal Church.

Morton Attains Top 500 Of U. S. Industrial Firms

Morton International, Inc., has joined the ranks of the 500 top industrial companies in the United States for the first time, according to a listing recently announced by Fortune Magazine. The 500 top companies are selected according to their volume of sales for the previous year.

With a sales volume of more than \$123 million for 1965, Morton ranks 457th among the top 500, and is one of 17 companies to make its first appearance on the list this year.

Morton has a new plant on Oglethorpe Road near Newark.

Wilmington & Western RR Plans Saturday Ceremony

Officials from all parts of the state are expected to visit the Wilmington and Western Railroad at Greenbank this Saturday morning for Governor's Day ceremonies.

Governor Charles L. Terry Jr., members of the General Assembly and officials of the C&O-B&O Railroad will attend the dedication ceremony for New Castle County's newest tourist attraction.

Saturday's event will parallel original dedication of the line on Saturday, July 8, 1971, when a picnic and ground-breaking ceremony took place at Brandwine Springs.

Saturday's 10 a.m. program at the Wilmington and Western's Greenbank Station will include the driving of a golden spike and remarks by visiting dignitaries.

A trip up the line to Mt. Cuba will follow at 11 a.m., and luncheon in Brandwine Springs Park is scheduled at noon.

outside air, or blow out hot air inside the house.

Miss Morris suggests using a kitchen fan as soon as you start cooking. If possible, do some of the cooking outside or prepare mostly short-order meals on hot days. Do as much cooking as you can during the cooler morning hours.

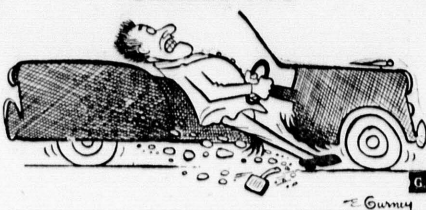

A dry basement with good ventilation lowers humidity throughout the house. A dehumidifier may be needed to keep the basement dry.

If you are putting on new roofing or building a new home, remember that light-colored composition shingles absorb only half as much heat from the sun as black or dark shingles.

A house with a high-pitched roof is cooler than one with a low-pitched or flat roof, Miss Morris states.

If possible, she says, avoid having blacktop or concrete next to your house. The air temperature may be 80 degrees over the lawn area, but it will probably be 120 degrees over the adjacent blacktop.

BRAKING TIPS

While you probably consider yourself a good driver, nevertheless poor braking habits may be causing you to waste money on gas, tires and brake replacements—perhaps even risking your life!

According to safety engineers in the brake lining division of Johns-Manville, more than 60% of all fatal accidents on the road are caused by excessive speeds and faulty brakes. Actually, from a safety standpoint, your brakes constitute the most important part of your car.

The big automotive news for 1966 is the disc brake—long used on racing cars and jet aircraft, and now available on many new model cars. Automotive engineers report that disc brakes develop less fade at high speeds and provide steady braking power.

But no matter what model car you own, these tips from Johns-Manville may help you put the skids to some common driving problems:

1. Give your brakes a break. The harder you use them, the quicker you'll wear out the linings. Try to ease up to stops you know you must make.

2. Don't ride the brakes. Quick, short applications and relief, are most effective to

prevent heat build-up in the drums and to maintain the friction you need for smoothest stops.

3. Watch for symptoms of "sick" brakes: too much pedal movement toward the floor, grabbing too abruptly, noisiness, dragging, and brakes pulling car to one side.

4. If fluid has to be added more often than every 1,000 miles, have the entire system checked for leaks.

5. Listen for trouble evidenced by typical noises when stopping. Such as a hollow groan meaning worn or loose parts, or a shrill screech meaning the lining is worn down to the rivets and they are scraping the brake drum.

6. In case of brake failure, first apply the parking brake. Many people forget it's there. Put car into low and pump the pedal to build up pressure in the system. If your brakes fail to operate properly because they're wet, you should either stop and wait for them to dry or drive for a few minutes with one foot on the accelerator and the other on the brake pedal.

By heeding these six safe, economical tips, you should be able to give yourself the "brake" you need.

Thiokol Executive S. J. Nemeth Dies Of Heart Attack

Stephen J. Nemeth of 41 Ferncliff Drive, Windy Hills, an official of Thiokol Chemical Corp., Elkton, Md., died in Wilmington General Division on Wednesday of last week at the age of 48.

Mr. Nemeth was taken from his home about 10 p.m. and died 90 minutes later at the hospital, according to Herbert Harrington, chief deputy coroner for New Castle County. Death was caused by a heart attack.

He had worked at Thiokol on Wednesday and a Thiokol spokesman there said he had appeared in good health.

Mr. Nemeth was head of the administrative department at the Elkton plant.

A native of McKeesport, Pa., he graduated from Duquesne University.

Before going to Thiokol in 1957, Mr. Nemeth had been employed by the National Tube division of U. S. Steel at McKeesport, the Copperweld Steel Corp., Glassport, Pa. and the Pittsburgh Ordnance Arsenal.

He served in the artillery with the Army in World War II and participated in the African campaign.

Mr. Nemeth was a member of the National Accountants' Association and Holy Angels Catholic Church, Newark.

He is survived by his widow, Mrs. Rosemary M. Nemeth; four sons, Stephen John, Charles Paul, Thomas R., and James E., and a daughter, Kathleen L. — all at home; his parents, Mr. and Mrs. Stephen Nemeth, McKeesport; four sisters, Mrs. Julia Lamb, Cleveland; Sister M. Veronica, McKeesport; Mrs. Elizabeth Dzik, Duquesne, and Mrs. Margaret Orosz, Ligonier, Pa.

Requiem mass was offered Saturday morning at Holy Angels Church, with interment in All Saints Cemetery.

Friends called Friday night at the William J. Warwick Funeral Home, Newark, where the Rosary was recited.

Shrubs, Not Lawn Deserve Watering During Droughts

Lack of rainfall this summer poses problems with plants, but while lawns are suffering from the drought, shrubs may actually be more in need of watering.

Although lawns may turn brown, root systems of grasses rarely dry out completely or die, according to Dr. Charles Dunham, associate professor of horticulture at the University of Delaware. As soon as the rains come, most lawns will turn green and grow again.

Plants that really need attention are any newly planted ones, broad-leaved evergreen shrubs, shallow-rooted shrubs, needle-type evergreens and valuable perennials.

Annual flowering plants need not be watered unless there is plenty available, since they die with the first frost.

Deciduous shrubs may show signs of wilting in the new growth. This wilting is a sign that they need water and may be permanently damaged if not watered.

If it is necessary to conserve water during a prolonged drought, use water to save these shrubs rather than to water the lawn, Dunham recommends.

Hesseltine Aids Dairymen As Author Of New Bulletin

The leucocyte count of herd milk or individual cows can be used to check on animal health, according to a new publication "Reducing Leucocytes in Milk," in which Dr. W. R. Hesseltine, extension dairy specialist at the University of Delaware, and author, explains that leucocytes are white blood cells found in milk that fight infection and irritation.

Knowing the white cell count helps the milk producer because the causes of a high count also are the cause of mastitis and lower production, according to Hesseltine.

The bulletin is published by the Cooperative Extension Service at the University of Delaware, and contains detailed recommendations for milking machine operation and milking methods that will reduce the possibility of irritation or injury to cows.

Copies are available from the Mailing Room, Agricultural Hall, University of Delaware, Newark.

Marine Willie Cisneros Completes Ft. Lee Course

Marine Cpl. Willie A. Cisneros, 22, whose wife Reba lives at 205 Madison Drive, Newark, completed a 26-week office machine repair course at the Army Quartermaster School, Fort Lee, Va., on May 20.

Corporal Cisneros entered the Marine Corps in 1961, and has served in Paraguay.

Agriculture, Vital Factor For State Labor Market

Agriculture is an important factor in the local labor market, and even though farmers have made great strides in mechanization, the need for farm laborers is far from eliminated, according to W. T. McAllister, extension farm management specialist at the University of Delaware.

Almost 12,000 people are engaged in farm production in Delaware, and approximately one-half of these are hired farm workers. Another six or seven thousand persons are hired to process and market Delaware's farm commodities, and an additional 6,000 are needed to service the agricultural industry.

A pamphlet "Labor Management on the Farm," includes tips on organizing work for increased efficiency for hired help and on managing workers so they are productive and profitable.

The information is applicable to any employer—farm or non-farm, and pamphlets are available from county agents in Newark, Dover and Georgetown.

Mill Creek Hundred News

Sara Pennington Evans, Correspondent
Phone 239-7798

Mrs. Evans is vacationing this week, and we hope that you miss her Mill Creek Hundred News as much as this editor does. And since the Newark Post will not be published next Thursday because of our annual plant shutdown for staff vacation, Mrs. Evans' readers will miss her writing for two successive weeks. We are sorry to say.

Second Session Summer School Openings Offered

Registration for the second five-week summer session and three special three-week courses in education at the University of Delaware will be held July 20 from 9 to noon in the Student Center.

Advance registrations are being taken now in the registrar's office at Hullen Hall.

A total of 64 courses will be offered in the two sessions, all beginning Aug. 1.

The three education courses will end Aug. 19.

All other courses, many of them continuations of courses started in the first summer session, will end Sept. 2.

But we hope that Mill Creek Hundred News will appear in the Aug. 4 edition of the Post—and that Sara Pennington Evans is having a wonderful vacation.

Former Faculty Member At U. D. E. C. Markham Dies

Edwin Carlyle Markham, 64, a former member of the University of Delaware faculty, died July 11, at Chapel Hill, N. C., after a brief illness.

Markham, a Smith professor of chemistry at the University of North Carolina, was a specialist in analytical chemistry.

A native of Durham, N. C., he attended Duke University and graduated from the University of Virginia where he later taught.

He left the University of Delaware in 1934 to join the University of North Carolina faculty.

Professor Markham was author of chemistry textbooks and articles for scientific journals.

He is survived by a son, Allen, a daughter, Carlyle Janet Markham, both of Chapel Hill; two sisters and a brother.

World War I Vet Rodney S. Lynam Dies At Age Of 71

Rodney Sharpley Lynam, 71, a shell-shock victim of World War I, died last Thursday in the Delaware State Hospital of a heart attack.

Mr. Lynam graduated from Mercersburg (Pa.) Academy in 1911 and was drafted into the Army in 1915 after spending a year at the University of Delaware. He suffered shell-shock while serving in France and returned to the United States in 1918 for treatment in several veterans hospitals.

He entered the state hospital in 1926 and remained there until his death.

He was the son of the late Judge and Mrs. William T. Lynam, Sr. Graveside services were held at White Clay Creek Cemetery.

(Continued from Page B)

Cape May County's sixth annual Tuna Tournament failed to account for any tuna over the 15-pound minimum, but a last minute switch from a tuna-only event to a gamefish sweepstakes did result in a fun-filled fishing event for 175 anglers and skippers last week.

The tournament was set as a tuna event, but a scarcity of tuna in Atlantic coastal waters gave committee members a problem to ponder.

It was decided at the captain and crew meeting last week to switch the event to a bluefish, marlin and tuna competition, with point awards to determine prize winners.

Cancellation of fishing on the tournament's first day was based on weather reports which indicated unfavorable conditions offshore. The boats did fish Tuesday and Wednesday, however. Net result of the two days fishing was 23 marlin tagged and released or boated; two small tuna, both under the 15-pound minimum required for scoring; and an excellent catch of bluefish. In the latter classification some 15 blues which went over the six-pound minimum, were weighed in.

Trophies and fishing tackle prizes were awarded at the banquet at the Yacht Club of Stone Harbor on Wednesday. The tournament is sponsored annually by the yacht club and the Stone Harbor Fishing Club in cooperation with the Cape May County Department of Public Affairs and the Borough of Stone Harbor.

The largest white marlin award went to Mrs. Blanche Peddle, of Gladwyn, Pa., and Avalon. Caught aboard Capt. Henry Peddle's Mambo the fish weighed 57 1/2 pounds. The Mambo took top honors for the most points in the marlin classification with 208.

Points were awarded on the basis of 75 for a released fish and a point per pound for a tagged fish. Mambo released two fish in addition to the marlin boated by Mrs. Peddle.

My Honey out of Avalon, with Skipper Harry Wilson took first place with 150 points for two released fish. Largest bluish was a 12 lb. 8 oz. fish boated by Jim Roney, of Cherry Hill, N. J., while fishing from the Jim Lin.

The polar bear has been removed from the list of animals for which the National Rifle Association of America offers awards of recognition to its members who successfully hunt big game.

This action was taken because the National Rifle Association is vitally concerned with the ethics of hunting and the conservation of natural resources.

Most polar bears are found north of the Bering Straits. Because of the remoteness of their habitat, they have been comparatively unmolested by man over the years.

Formerly, the main economic value of the monarch of the ice was as a subsistence item for the Eskimos. However, harvest methods have changed during the past 20 years from one primarily by natives to one by sportsmen. This is the result of lessening dependence of Eskimos on game for subsistence, and of more efficient methods by trophy hunters.

In recent years, pursuit of polar bears has increased tremendously by employment of airplanes. More and more hunters are using light planes operating out of villages and towns on the Arctic Ocean to find the polar bear.

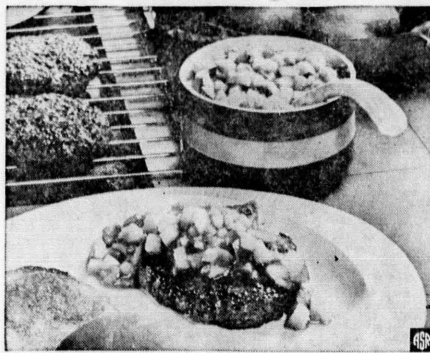

Airplanes operate in pairs to locate a bear. Then one plane lands while the second remains aloft as a safety precaution in case the first plane gets in trouble upon landing. Frequently, the plane remaining aloft is used to herd the bear toward the waiting hunter.

Alaska's hunting regulations prohibit the use of aircraft for molesting or herding polar bears in the state's territorial waters. However, aircraft hunting is outside the three-mile limit and over international waters.

The First International Scientific Meeting on the Polar Bear was held at Fairbanks in Alaska last September, and brought together for the first time, the five nations of the world most concerned with the polar bear. They are Canada, Denmark, Norway, the Soviet Union, and the United States.

Proceedings of this meeting confirmed that scientific knowledge of the polar bear is far from sufficient as a foundation for sound management.

New Nectarine Relish Bedecks Burgers

That cookout king, the hamburger, wears a mantle worthy of culinary royalty for "Nectarine Relish Burgers."

A relish notable for its regal appearance and fit-for-a-monarch flavor bedecks each hamburger. It combines diced fresh nectarines with some other mighty appealing ingredients to give a burger a new lease on life.

California orchards supply the country with fresh nectarines all summer long. The fuzz-free fruit can't be beat as out-of-hand eating at home and on picnics or simply sliced over breakfast cereals. But it's also a winning entry in meat sauces, salads, appetizers and, above all, desserts. The nectarine habit, so easy to form, is a real summertime blessing.

Nectarine Relish Burgers

4 or 5 medium-size fresh nectarines
3 tablespoons chopped green pepper
1 tablespoon chopped onion
2 tablespoons brown sugar
2 tablespoons chili sauce
1/4 teaspoon dry mustard
Few dashes Tabasco
6 grilled hamburgers
6 toasted hamburger buns

Dice nectarines to make 2 cups. Combine green pepper, onion, brown sugar, chili sauce, mustard and Tabasco. Stir in nectarines. Mound on hamburgers. Serve on or with buns as you wish. Makes 6 servings.

TV Host At The Fair

Mike Douglas

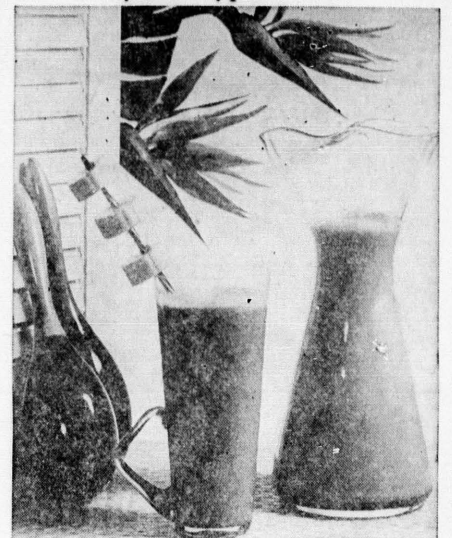

Afternoon TV host Mike Douglas will appear at the Delaware State Fair in Harrington next Wednesday evening. He will star in the grandstand show beginning at 8 o'clock.

ment policies. It was mutually recognized that each nation within whose territory polar bears are found, or whose citizens harvest the species in international waters, should take such steps as each country considers necessary to conserve the polar bear until more precise management, based on research findings, can be applied.

The vast majority of sportsmen who appreciate and enjoy hunting as wholesome recreation, are dedicated to the wise use of our natural resources, including wildlife. They believe in the legitimate pursuit of game and subscribe to the doctrine of "fair chase." Efforts are being made to determine the elements of "fair chase" involved in pursuit of polar bears by airplane, as well as the world polar bear population and the acceptable annual world harvest.

This is being done to make certain that one of the largest of the surviving members of the bear family is not in danger of extinction.

Try A Calypso Cooler

This perfect summer cooler is a blend of chocolate and banana that is the "refreshing-est." Make it with quick chocolate-flavored mix which dissolves instantly in milk to give rich chocolate flavor. Just stir to blend; no beater is needed. For a delightful tropical accent, add mashed banana. Prepare this beverage ahead and keep it cool in the refrigerator. Serve as a snack or as part of the midday meal. It's a great refresher for the whole family.

Calypso Cooler
8 teaspoons quick chocolate-flavored mix
1 quart (4 cups) milk
2 ripe bananas, mashed
Combine all ingredients in a 1 1/2 quart refrigerator container. Stir to blend. Cover and chill; shake well before serving. YIELD: 4 servings.

Three-Year-Old Filly Stars To Compete For \$50,000 Delaware Oaks On Saturday

One of the best-matched and interesting fields of three-year-old fillies ever to compete in the \$50,000-added Delaware Oaks, is in prospect for the 20th running of the mile and one-eighth stake at Delaware Park this Saturday.

There's Lady Pitt, who already has a good start toward becoming champion of her division this year for Thomas Eazer's Golden Triangle Stable. A \$24,000 bargain yearling, Lady Pitt was a juvenile last year, came close to being "always a bridesmaid but never a bride."

She had to settle for second money in four rich stakes—the Gardenia, Demoselle, Frizette and Schuyler—in addition to being runner-up in two others of her 14 starts.

The filly did win half of 11 starts, running a dead heat with Prides Profile in the Astoria, and captured a pair of allowance races. She won the yearling stakes last year for \$100,000. She has accounted for 14 rich stakes so far this season, the Mother Goose and Coaching Club American Oaks.

A Delaware Oaks nominee who was unraced as a two-year-old but came into her own this season with five victories in six starts is Natsushka, whose owner George Getty, is a son of J. Paul Getty, reputed richest man in the world. Natsushka is fresh from winning the Monmouth Oaks, and earlier in the year scored in the 35th Woodford Stakes.

Last winter she won three in a row at Santa Anita, then burred her show and dropped out of the picture for three months. Returning to action, she won the returning Miss Woodford in a breeze, timed in a blazing 1:09 3/5.

Prior to her Monmouth Oaks conquest, she ran second in the Post-De Stakes behind Indian Sunlight at the same New Jersey track. That was her first race around two turns and not long before, she'd had a down bruise cut out of one hoof. That the trouble cleared up quickly was evidenced by her smashing success in the Monmouth Oaks, which certainly moved her into contention for the year's three-year-old filly crown.

The aforementioned Indian Sunlight, owned by former Secretary of the Treasury George M. Humphrey, and Prides Profile, who represents the Rokeby Stable, are among other stars likely to be reckoned with in the Delaware Oaks.

Saturday's special has been won by many of the outstanding fillies of the past 30 years.

Its honor roll includes such names as Gallorette, Vagrancy, Next Move, Kiss Me Kate, Parlo, High Voltage, Bayou, Primonetta, Miss Cavendish and other distaff luminaries.

"Not We're not campin'—we're fishin'!" Newark City Manager J. Francis Neide said a bit testily two Friday nights ago to an inquisitor driving the beach in an official-looking yellow truck.

Standing in the light of a gasoline lantern just beyond the white, foaming fringe of the black Atlantic Ocean, Francis was shaking his head at a rig on his surf spinning tackle just after something big, powerful, and unexpected from the sea had hit his line with some resemblance to a passing truck in high gear—and the monell whistling from the reel had suddenly snapped.

The official in the yellow truck was prepared to deal with canners, but at midnight fishermen were something else. Non-plussed, he drove off down the beach where the red taillights winked out of sight in the distance. A gentle southeast breeze off the ocean repelled all insect life as we moved the surf in cool and surprising solitude—the beach was otherwise deserted—and small, toothless sharks provided almost constant action as they tugged without preference at double-hook rigs baited with Plovers, "Mack" McCarty's houndworms and Monterey-injected frozen squid.

The Delaware bait situation is tough indeed, when squid has to be imported from California or Mexico—whichever Monterey it is the squid hailed from.

"Big blues are feeding on blowfish in Rehoboth and Indian bays," Mack McCarty informed us earlier that evening after we missed a sundown surfing rendezvous with Brookside's Chuck Dobrosky and Swede Svendsen.

"It's unusual to have blowfish that big in the bay—and they're there because it's tough for them to find menhaden and other baitfish in the ocean," Mr. McCarty mused.

"How's the trout fishing?" Mr. Neide asked, and Mack replied "Don't mention it. We used to have plenty of trout, and people complained because there were no blues. Now we have blues—and few trout."

And of course, no trout in his right mind is going to cultivate companionship with a marine wolf such as a bluefish.

Castling far out over the black water some quarter mile north the red and green lights blinking from the rock jetties at the inlet, we beached and released unharmed, some dozen slim, toothless and forever harmless sharks, and a red-orange, winking moon climbed over the ocean as it bathed the beach in soft silver as it rose yellow and then white in the starry sky.

Billy Richards and the Billy from home joined us in the surf shortly after midnight, and after holding

Newark All-Stars Win State Title In Babe Ruth Play

Newark's 13-year-old Babe Ruth League All-Stars won the state championship last Saturday by walking over the Nor-Del All-Stars by a score of 14-1.

David Chapman set a 13-year-old class record by striking out 16 of 21 batters.

Clyde Webster, Steve McDowell, Jesse Moore, Randy McDonald, and Dell Null each collected two hits, and Ken Neyher, Dan Dolphin, David Chapman, and Eric Siena had a hit apiece.

Chapman limited Nor-Del to one hit—a home run by Knightly that carried some 300-ft. in the air.

In the opinion of the coaches, the Newark All-Stars are the best 13-year-old ball players to be produced in the area.

The Calcutta pole for some three hours without a strike worth remembering, we stuck the rod in a sandspike with the line taut to the sea, and turned our back for three minutes while helping a Billy to get a rig from the tangle in the tackle box.

But after three attentive hours, three untended minutes were enough to lose a Calcutta rod, and a Penn Beachmaster reel loaded with Dick Jennings' reeled Cortland camouflage spinning line.

Turning back to the ocean, we looked in vain for the rod silhouetted against the silvered sea—and a heart suddenly sank as the sand spike was observed fast on the beach, while a three-way furrow in the sand dove and into the rumbling surf marked the recent passage of a lost rod, reel, line and rigging.

After three uneventful hours, a big fish had hit the line during the three minutes that the rod had been left untended.

"I don't know which is worst, Dad," Billy said. "Losing the rod, or losing the fish and not knowing what it was."

And the father didn't quite know, either. It could have been a big shark, a channel bass, a striped, a tidrunner or big trout, or a stinger. But it had to be big and quick.

And there was no excuse for this time. Some five years ago in the same general area, with Paul Boswell and Billy, we lost the first one in the same way.

After catching several sharks and a big sea robin in the golden glory of the dawn, we left the beach to meet Charles R. "Bus" Humphreys some hour away on Bill Faulkner's wharf at Bowers for a go at the Delaware Bay trout from Mr. Humphreys' Boston Whaler.

"Delaware Bay is loaded with trout," we had advised Bus, a Chesapeake waterman, and Mr. Humphreys had forsaken the rock around Poplar Island for a fling at Delaware weakfish.

Both boys left us for other commitments, and with Francis Neide and Bus Humphreys, we put in a long, hard, hot day on the bay, battling a gross or so of burly, toothed, blue-gray sharks that never stopped biting at any of a dozen stands until we drove far, far offshore over deep water and a swarm of sea robins near the ship channel.

"I never saw so many sharks," Bus Humphreys said in what was not altogether pleased amazement. And they were tough on tackle.

Francis Neide took all honors for the day by catching the only two respectable fish—a pair of two-pound summer flounder—fluke to Jerseyman Neide. And he caught the biggest shark, too, a three-footer of some 20 lbs.

"The shallows are full of sharks," Bill Faulkner had warned us, "and the trout fishing has been poor." And Bill was right.

"But those sharks should be gone in a few weeks, and the trout should move in," he said. And we're going back because we believe Bill Faulkner will be right again.

(Continued on Page Seven)

Brandywine-Bound

SuMac Lad, all-time money-winning harness horse with \$885,095, who was retired from racing last year at age 11 after 151 races, will be honored this Saturday night at Brandywine Raceway.

The occasion will be SuMac Lad Night, and racing action will center around the \$25,000 SuMac Lad Trot, formerly the Marquis de Lafayette Invitational, in which the giants of trotting are due to post and the turf in search of a track record to replace Speedy Scot's 2:01.1 set last year.

Shown with Sumie is Stanley Dancer who trained and drove him to his pinnacle of success.

Brandywine Plans SuMac Lad Night For This Saturday

SuMac Lad, the Methuselah of trotting—retired last September at age 11 after 151 races in which he harvested a record \$885,095 since 1956, more than any harness horse in history—will be honored at Brandywine Raceway this Saturday night.

President Howard Miller announced that the old warhorse will be saluted amid pomp and ceremony on what is to be the first annual SuMac Lad Night, and the occasion will be featured by the first public appearance of SuMac Lad since he retired.

Arrangements to honor the trotter whose monumental achievements compare with those of the late great World Champion Greyhound, were made by Brandywine officials with owner I. W. Berkemeyer of New Milford, and Stanley Dancer of New Egypt, N. J., the popular reinsman who trained and drove Sumie to his pinnacle of success.

In addition to dedicating the entire program to Sumie, Brandywine officials have changed the name of the annual \$25,000 Invitational Trot taking place Saturday, from "The Marquis de Lafayette" to "The SuMac Lad."

Ed Richitelli Wins 6th NCC Golf Title With 72-Hole Play

Defending Champion Ed Richitelli won his sixth Newark Country Club golf title last weekend, with a seven-stroke lead over Charlie Pinto.

Richitelli carded a pair of 73s for a total 146 in the final 36-hole round, for a 72-hole total 286.

Pinto, who was within two strokes of the champion during the final 36-holes, finished with a 144-119-293, and former club champion Dick Bauer was third with a 153-147-300.

Ed Statler won the first flight with a 311-40-271; Ben Harris, the second flight with a 345-64-281; and Howard Edler, Jr., took the third handicap flight with a 347-68-279.

Newark Country Club champion in four successive years—1960 through 1963—Ed Richitelli did not compete in the local tourney in 1964, but returned to the wars to win his fifth Newark title in 1965, defeating Dick Bauer, defending champ.

Pinto and Ron Mitchell finished second and third last year.

Mrs. Ray Ott Takes First In NCC Ladies Day Golf
Mrs. Ray Ott won the Ladies Day golf event last Tuesday at the Newark Country Club, with the best round using two clubs and a putter.

Mrs. William Bohning finished second, and Mrs. Paul Cundiff, third.

Sylvester Tucker Hits Homer, Triple But All-Stars Lose

The Newark 15-year-old Babe Ruth League All-Stars were downed 5-1 by Brandywine last Saturday in the opening game of the state tournament, despite a home run and a triple by Newark's Sylvester Tucker.

Brandywine's Vic Rash shackled Newark to a four-hit attack in nurling the win.

Williams and Ludwig held Brandywine's batsmen to five singles, but the victors took advantage of defensive lapses and brief pitching wildness to produce their five runs.

George Cavanaugh pitched Newark to a 5-1 victory over New Castle West last Monday night in tournament play.

Gary Haylman collected two hits in four trips, and Dave Webster scored two runs to spark the victory for Newark at Canby Park.

Rock Manor Pairs Win Class-A Golf In DSGA Tourney

Rock Manor golfers walked off with all honors in Class A play with the Delaware State Golf Association Better-Ball-Of-Partners Handicap Tournament played last Wednesday at the Newark Country Club.

Adam Precia and Jack Malloy of Rock Manor won Class A play with a net 60, followed by Dow Williams and Walter Start, and Robert Young and Al Burns of Rock Manor with 62.

Newark's Howard Edler, Jr., Gerald Gilston, and Doyle McSpadden paired with Jack Matthews, Jr., of Greenhill. Al Meli of Cavaliers and Roland Longenecker of Wilmington led Class B play with the Edler and Gilston pairings tied at net 65s, and McSpadden and Longenecker carding a 61.

A total of 188 players with 94 teams participated in the DSGA tournament at the Newark Country Club.

Doug McMin of Newark is serving his second successive term as president of the DSGA, and Joe Aneda was the host pro.

Larry Pratt Wins Head Coaching Job For Cross Country

Larry Pratt, assistant coach for two years, has been named cross country coach at the University of Delaware by Athletic Director David M. Nelson.

Pratt will succeed Kenneth Steers, who coached Blue Hen harriers for 20 years, closing with a record of 75 wins, 49 losses, and a tie.

Nelson said Pratt's background in both track and cross country will coordinate the two sports more closely than ever at Delaware.

Pratt has helped Steers with varsity and freshman cross country teams for the past two years, and has assisted Track Coach Jimmy Flynn during the same period.

Steers' 75 victories includes a string of 22 consecutive wins spanning four seasons—the final five in 1960 to the first meet in 1963.

Pratt graduated from the University of Delaware in 1964 with a bachelor of science degree in education. He holds the university discus record of 157-8, and until last season his shot put of 49-11-1/4 was the Delaware mark. Both marks were set in 1963.

Lineman Hubbard, Jones, Murphy, Walker With Backs Fulton, Walp Represent NHS

Four linemen and two backs will represent Newark High School's Blue Hen Conference champions on the Gold squad in the 11th annual Delaware All-Star High School Football Game at Delaware Stadium on Aug. 20.

Bob Jones, Bob Hubbard, Bill Murphy, Pat Walker, Dick Fulton and Donnie Walp—all members of Coach Bob Hoffman's 1965 Blue Hen Conference co-championship team which defeated Wilmington 39-7—will battle the Blues in the annual game which benefits the Delaware Foundation for Retarded Children.

Jones, a 180-pound guard who played at Carroll in Delaware State this fall, lettered in track as well as football. His guardian is Murtlo Watson, 85 New London Avenue.

Hubbard, a third-team All-State end last season, is the son of Mr. and Mrs. Daniel Hubbard, 74 New London Avenue. The 180-pounder intercepted a pass in the 1963 game against Christiana and returned it 101 yards to score a touchdown. He was selected to the All-Conference and third team All-State, and also lettered in basketball.

Murphy, a 190-pound tackle who also won letters in wrestling and track, plans to attend Delaware and major in marine biology. He is the son of Mrs. Mildred K. Murphy, 2 Madison Drive, College Park.

Murphy was the recipient of the award for the highest scholastic standing by a member of the 1965 Newark football squad.

Walker, who will attend the University of Delaware, is the son of Mr. and Mrs. James C. Walker, 16 Longview Drive. The 6-5 and 196-pound tackle—and he's still growing—taller and heavier—was a standout performer in track.

At 5-11 and 180-pounds, he played fullback and also lettered in baseball. He is the son of Mr. and Mrs. Andrew S. Walp Jr., 327 Delaware Circle.

Fulton won All-State honors as a senior in 1964.

Vikings' George Arbeiter Ties 16-Strikeout Record

Christiana High School Ace George Arbeiter matched the New Castle County American Legion League record for strikeouts in a game last week while pitching Newark Post to a 4-3 decision over Atterbury.

Arbeiter fanned 16 batters to tie the mark held by Newark VFW's Mark Brown, a Yellowjacket star.

A two-run sixth inning provided the margin of victory for Newark Post.

Newark Notes

by GIBBY YOUNG

OLD PRO!

One of the most heart-warming stories to appear on the sports pages this year—lead to a sentiment: a 11-year-old sports fan—happened last week when Robin Roberts won his first start as a member of Leo Durocher's Chicago Cubs.

And the last place the toughest problem for a pitcher—hurting winning baseball with spotty support. If Robin can win with the Cubs, he can win with any club.

Roberts isn't hanging in there for additional glory. He's not like that. He is pitching out the string because he loves to play baseball. And baseball needs more like him.
