FOREIGN STUDY SCHOOL NOW THRIVING REALITY

Interesting Summer Activities

The Delaware Foreign Study Plan is now a thriving actuality. The pioneer group of students to go abroad under the Plan has arrived in France, in charge of Prof. Raymond W. Kirkbride, Director of the Foreign Study Division. The program calls for twelve months of hard work studying international conditions at first-hand, and acquiring a fluent use of the French language. The group consists of eight as fine men as ever went out from Delaware, all of them thorough gentlemen, and all of them anxious to do credit to the university and to the country which they represent. Their year's study in France will count as the equivalent of the junior year at the University of Delaware. During the entire time the students will be under the personal supervision of Mr. Kirkbride. The following are (Continued on Page 5.)

WHO'S WHO AMONG OUR NEXT OPPONENTS

Dickinson Has Heavy Team

According to Saturday's football results, Delaware had better keep a weather eye on her future opponents if we expect to win anything worth talking about.

Muhlenburg, this week's opponent, showed up in splendid style against Lafayette, one of the strongest elevens in the country. Although the Lutheran boys came out on the small end of a 20 to 0 score, they nevertheless gave the Eastonian outfit something to worry about in the forward pass game. Muhlenburg has always put out a keen brand of aerial football and it has been this one phase of the game that has aided materially in defeating the Blue and Gold these past two years. McAvoy must perfect a system of defensive play against the forward pass game if he can hope to have a successful season this year. Delaware has always been slow to recognize the necessity of specializing in this part of the game, and the season progresses too far before the fault is corrected. The line is strong enough to withstand the shock treatment of line-plunging, but the backs must be coached in aerial defense. Muhlenburg scored practically all of her 35 points on Stroudsburg Normal by forward passes, and Lafayette received several severe scares through the same offense.

Ursinus who comes here after the Muhlenburg game are also specialists in the overhead technique. Their 33 point victory over Williamsburg was the result of aerial work and they used this same work in holding Columbia to a 13 to 0 score—a feat that is a splendid accomplishment for so small an institution. (Continued on Page 2.)

BIG PEP FEST AND SMOKER FRIDAY EVE

Everybody Back the Team

Come on fellows! Get awake! Everybody turn out and help make the pep fest, Friday night in Old College, a live affair, ablaze with intensity.

Last Saturday, when that clean-cut, clean-playing aggregation from St. Joe's licked us, our cheering was pretty dead. It lacked volume. It was without snap. It was pepleless.

Let's get going in earnest. Let's cut loose and make our team win. We can do it. We did it last year when we beat Dickinson.

We've got a darn good team, but we haven't proven to the members of it that we've confidence in them. Let's give them a gauge of our faith by our yelling.

Let's be enthusiastic. Enthusiasm, like whooping cough, is contagious. Let's get infected with the warm glow or ardor. Let's make our cheering blaze and snap across old Frazer Field in a white-hot flame. Let's put electricity into the muscles of our football players. Let's put tears in their eyes and an unconquerable spirit in their hearts by the way we sing our Alma Mater.

All you Freshmen get those songs and yells down pat. And let's rave.

Let's do our share. Allah is with us.

Let's beat Muhlenburg.

NEW MEMBERS ARE ADDED TO FACULTY

Professor Van Kuren Returns

Delaware is welcoming to her midst five new professors who have come to take their places as members of the faculty. The new men hail from different parts of the country and represent some of the finest teaching talent that the largest and best known Universities can produce. All of the new professors come to this locality for the first time with the exception of Professor Van Kuren, who is known to many here; he taught at Delaware a year ago at which time he left to study at Harvard for his master's degree.

George Porter Paine, Ph.D., assistant professor of Physics, is a graduate of the Harvard University where he received his A. B. and his A. M. For some time he served in the capacity of research instructor at the University of Wisconsin, where he was awarded his Dr. of Philosophy degree. The last position which he filled before he came here was that of physicist with the National Research Council stationed at Harvard University. Though he has spent a good many years in the West, Dr. Paine is an Easterner by birth and training and is glad once more to be back East.

Oscar J. Merrell, M.A., professor of economics and business, is (Continued on Page 3.)

CONVOCATION DAY MARKS OFFICIAL OPENING OF TERM

Dr. Richmond Brings Message On Value of Education

The year 1923-1924 was officially inaugurated by the Convocation exercises held at 3.00 p. m., September 21st, in the Armory, and which was featured by an address by Charles Richmond, Chancellor of Union College, N. Y., and presided over by Dr. Walter Hulihan, president of the University.

The exercises were scheduled to be held in front of Old College, but due to the threatening weather, they were held in the Armory before a large audience, composed of practically the entire student body, the faculty, and many visitors. Under the direction of Dr. F. M. K. Foster, marshal of the procession, the line formed on the campus opposite Wolf Hall, Women's College student in the lead, followed by Delaware College students, the Faculty, members of the Board of Trustees, with Drs. Richard, Hulihan and Henry B. Thompson, making up the last of the procession. As the long line of marching students reached the Armory, the ranks were divided, and the order of entering the building was reversed.

Dr. Hulihan, called upon Rev. H. Everett Hallman, pastor of the local Presbyterian Church, to make the invocation. Rev. Hallman was followed by the Rev. Frank Herson, Methodist Episcopal pastor of Newark, who read a portion from the Scriptures.

Dr. G. H. Ryden lead the audience in singing "America," after which Dr. Hulihan introduced Mr. Henry B. Thompson, chairman of the Board of Trustees. After a few remarks, Mr. Thompson introduced to the audience the speaker of the day, (Continued on Page 6.)

NEW GLEE CLUB WILL ORGANIZE THIS FALL

John Thoms To Direct

Delaware is again going to have a glee club. Mr. Thoms, one of the youngest and most promising of Wilmington's musicians, has offered to take charge of and to direct personally the resurrected organization.

Mr. Thoms, it will be recalled, arranged the music of our Alma Mater. That alone is enough to place him high in the estimation of all Delaware students. But for those not acquainted with this popular piano teacher, perhaps it would increase their interest in the glee club to know that Mr. Thoms is the assistant director of Lepp's Orchestra which is famous in this locality for its Willow Grove concerts. Mr. Thoms also assists in the direction of the Philadelphia Operatic Society, and has under his charge and direction several smaller organizations of this type.

With such a start as this, elaborate plans are being made for a glee club that will be a real musical organization, and one of which Delaware will be justly proud.

For those of the student body who are interested and who will support this movement of reorganizing the glee club, there will be a meeting in the lounge room at 6.30 p. m. on Thursday evening, October 4.

AUTUMN TRAINING IN FULL SWING

Base Ball and Track Men Train

Coach McAvoy has started early this year to develop something worth while in the base ball personnel of Delaware for the coming spring campaign. Last year the team was a failure through the lack of a well-trained and developed pitching staff, and McAvoy has set out early to avoid a recurrence of such a deficiency. Victor Willis, a man who formerly was a pitcher in the major leagues, has been secured to coach the men who aspire to hurling honors next spring, and already this man has held several workouts on Frazer Field. Willis, a veteran of many years' campaigns, has taken the youngsters along slowly, but within a short time, unless cold weather sets in, he will have discovered something, bad or good, among them. Delaware is sorely in need of at least two good pitchers and the new candidates are being watched in a more or less anxious manner. It is too early to make predictions either way, although at the present time, Harper, a former Perkiomen man, looks to possess the most likely arm among the new men.

Will Continue Mass Athletics
In accordance with the system of mass athletics, established here last year, each freshman (Continued on Page 2.)

DELAWARE PAPERS TO CONSOLIDATE

To Have One Alma Mater

At the regular Faculty Meeting on Monday, October 1, the Faculty unanimously approved of a joint paper for the two colleges, and on the strength of this, the *Review* has become a six-page edition. This was made possible by the fact that there was an extra amount of news at the Men's College for the first issue; but in the future the extra space will be devoted to Women's College news. The news space in the paper will be divided between the two colleges and hereafter it will in reality, as well as in name, be a University of Delaware paper.

President Hulihan is heartily in favor of a University of Delaware Alma Mater instead of a separate song for each college, and on his advice there will be a joint meeting of the student (Continued on Page 6.)

DELAWARE BOWS TO ST. JOSEPH'S

Team Needs Better Backing

Delaware lost a rather listless, uninteresting game to St. Joseph's College Saturday, by the score of 6 to 0. Delaware's play was very ragged at times and her offensive lacked the necessary winning punch. Due to good interference on the part of the Philadelphia boys and poor tackling by the Delaware defense, Kalen, of St. Joseph's, was able to slip through the Delaware stalwarts for a touchdown in the first quarter. It was a clever fifty-yard run and furnished the only real excitement in the game.

Delaware collected but one lone first down and as St. Joseph's did little better after the first quarter, the game resolved itself into a punting contest between Garvine and Dixon. Garvine outclassed Dixon in this department. His punts were long and well placed.

Delaware took a brace in the third quarter, but their attack was squelched by a 15-yard penalty and an intercepted forward pass. The lineup:

Delaware	St. Joseph's College
Magaw.....	left end.....Berry
Kramer.....	left tackle.....Dougherty
Akin.....	left guard.....Perry
Donaldson.....	center.....De Simoni
Lohman.....	right guard.....Donohoe
Torbert.....	right tackle.....McClernan
Sweezy.....	right end.....McElroy
Garvine.....	quarterback.....Kalen
Weggenman.....	left halfback.....Dineen
Hubert.....	right halfback.....Cunniff
Williams.....	fullback.....Dixon

Substitutions—Jackson for Hubert; Hubert for Jackson; Nunn for Sweezy; Lohman playing end, Nunn playing guard; Coppick for Dineen. Referee—Raby, of Gettysburg. Umpire—Dougherty of F. and M. Linesman—Shalet, of N. Y. U. Time of periods—10 minutes.

Score
St. Joseph.....6 0 0 0—6
Delaware.....0 0 0 0—0

A MIGHTY MAEZ!

At the recent Delaware-St. Joseph's College football game, we were acquainted rather abruptly with the fact that the Varsity Club button is no longer to be recognized as an admission card for our athletes of former years. The news, to say the least, was extremely disquieting and not a little distasteful. The Varsity Club may be said to be one of the most invigorating of all campus organizations and was founded in agreement with the Athletic Council that all members could at any time enter free of charge to Delaware contests. This is really the only thing that Delaware has ever given her athletes, and it is little enough to accord to the men who have been kicked about the gridiron and basket ball floor, sweated on base ball diamonds, and stood the terrible grind of the cinder track, all for the glory of their Alma Mater. Delaware gives no athletic scholarships, no inducements for men to take up athletics. The athletes, while in college, get nothing but bruises and knocks, criticism and conditions in lessons; and now we are to deprive them of the right to come back and watch Delaware contests without paying admission the same as any other person. Certainly this is an injustice to our alumni, the men who made this school what it is and who do everything in the outside world to help it onward in its progress. The men who have it in their power to revoke this obnoxious act should certainly think twice about the matter and give it immediate attention.

PEP! PEP! PEP!

The 1923 football season has been inauspiciously opened with a defeat at the hands of St. Joseph's. The best sport is a good loser, and the Student Body is ready to show the team a good demonstration of real sportsmanship.

That spirit burst forth at College Hour Tuesday and will be more evident at the Pep Fest and Smoker Friday night. It will culminate itself on Frazer Field Saturday when the Blue and Gold oppose the Maroon and White.

We are going to make victory certain. We have a good team and a good coach. They are fighting hard every day and feel optimistic. Do you feel the same? Come out to the Smoker Friday evening and prove you do. There will be cheering, singing, smoking and peppy speeches by the bright lights of the campus.

Stir up the PEP! Let's beat Muhlenberg!

AGS HOLD

FIRST MEETING

Dr. Palmer Addresses Students

The Agricultural Club held its initial meeting of the year on Tuesday night in the Lounge Room, where Dr. Palmer addressed the members on the subject of the value of a college education. Dr. Palmer's talk was mainly for the benefit of the Freshman members, to whom he explained just what

they might make of their college work, what to expect of Delaware, and what Delaware expects of them. His talk was eagerly listened to by all the members and the meeting was a very successful one. President Horace Nunn expects to have a live wire organization this year and has already outlined plans for various speakers to address the club on subjects of interest to them. The first meeting was very well attended and the prospects for this year are very good.

The Review will be sent to all listed alumni for a period of two weeks. Within that time the subscription charge, \$2.00, should have been received from all who desire the news from their Alma Mater during the present collegiate year. The third issue will be sent only to those who have subscribed through the Circulation Manager.

Gentlemen:

Enclosed find \$2.00 for which send the Review to the following address for collegiate year 1923-1924.

Name
Street
City and State

AUTUMN TRAINING
IN FULL SWING

(Continued from Page 1.)

will be required to take three hours physical exercise a week in some form or other. The Sophomore class which initiated this system last year, will continue their training also. Coach McAvoy will supervise this work, although the whole system is based upon the honor code of the student government of the college. A man may choose whatever he wishes to exercise in—tennis, volley ball, swimming, football, or any other active sport. At the conclusion of each year he must sign a chart indicating which sport he has taken part in, and in signing this he is bound by the honor system. This system of physical training will no doubt be of great benefit to those who fulfill its requirements, but the broadness of the proposition makes it necessary that it be an honor affair and cannot be supervised personally by one man.

Cross-Country Work

Contemplated

Track candidates are also having an early training period. Coach Keyes is earnestly endeavoring to develop a cross-country team at Delaware this year and it is with this object in view that he has set out so early in track enterprise. Captain Hoey is back in running

togs, and with Christfield who has returned to school, should form a substantial nucleus around which a winning five-mile aggregation can be formed. Keyes also plans a big inter-class track and field meet, and hopes to stage a one-mile inter-class relay race between the halves of one of the home football games.

ALUMNI NOTES

Abraham Schimmel, '22, electrical engineer, is now doing installation work in the construction department of the Philadelphia Electric Company, Philadelphia, Pa. He can be located at his home, 901 Adams Street, Wilmington, Delaware.

R. Betty, Jr., and L. F. Hawke, Class of '23, are engaged in the Student's Training Course of the General Electric Company at Schenectady, N. Y.

Announcement of the engagement of Miss Margaret Parr, daughter of Mrs. John B. Parr, of Bryn Manor Road, Pittsburgh, Pa., to Robert N. Foulk, '21, of Wilmington, Delaware, was announced at a bridge tea given in honor of the bride-to-be last Saturday afternoon. Foulk is teaching at the Wilmington High School at the present time.

WHO'S WHO AMONG
OUR NEXT OPPONENTS

(Continued from Page 1.)

Ursinus is accredited with having a very strong team this year.

William and Mary managed to score 10 points on Navy which cannot be said to be very reassuring. Forward passes featured this game.

Haverford stood off the Brown Bears to 34 to 0 score, but at the same time managed to make as many first downs as Brown. This attack of our Red and Black rivals was mainly through the line, Wilbur being credited with several knife-like plunges for eight and ten yards through the Brown varsity defense. Fumbles near the goal line accounts for the fact that Haverford did not score.

And Dickinson, dear old Dickinson, is trying to scare us by holding the Third Corps Army Area, on which six former Army stars performed, to the disquieting count of 16 to 0. The score is not near so alarming as the fact that the Baltimore American states that the Dickinson line weighs 190 lbs. per man and that the backfield averages 175 lbs. Delaware's husky 160 lb. line won't stack up as exactly gigantic against this monster aggregation. On the other hand, the service line only averaged about 180 lbs. per man.

However, a good hard series of workouts that will put the men in the proper condition, a lot of coaching in interference, and a good aerial defense, added to the Delaware fighting spirit, will do wonders to help win out.

JOSEPH HENRY
1797-1878

Born at Albany, N. Y., where he became teacher of mathematics and physics in Albany Academy. Leading American physicist of his time. First director of the Smithsonian Institution.

When Henry
rang the bell

If any bell was ever heard around the world, Joseph Henry rang it in his famous experiment at the Albany Academy. The amazing development of the electrical industry traces back to this schoolmaster's coil of insulated wire and his electro-magnet that lifted a ton of iron.

Four years later when Morse used Henry's electro-magnet to invent the telegraph, Henry congratulated him warmly and unselfishly.

The principle of Henry's coil of wire is utilized by the General Electric Company in motors and generators that light cities, drive railroad trains, do away with household drudgery and perform the work of millions of men.

The work that was begun by pioneers like Joseph Henry is being carried on by the scientists in the Research Laboratories of the General Electric Company. They are constantly searching for fundamental principles in order that electricity may be of greater service to mankind.

GENERAL ELECTRIC

NEW MEMBERS ARE ADDED TO FACULTY

(Continued from Page 1.)

a native of the Lone Star state. He was graduated from the University of Texas and afterwards did two years' graduate work at the University of Chicago. He came East shortly afterwards to become the head of the business administration of the University of Richmond, later going to the Harris Teachers' College in St. Louis, where he dealt with the methods of teaching business work. He was also connected at one time with an accounting firm in the city of Chicago. Professor Merrell is especially interested in athletics; he himself was a football and track man at college. It is interesting to note that this past summer Professor Merrell made a four thousand mile auto trip across the country, passing through some twenty states in his travels.

Oswald Watson Mosher, Jr., B.Lit., instructor in English and history, is a graduate of the University of Princeton in the class of 1909, which, incidentally, was the time when Woodrow Wilson was there. He then studied at the Harvard Law School and afterwards did extension work at Columbia University. Professor Mosher has also done some summer work at the University of Minnesota. He taught for five years at Eastern College, Manassas, Virginia, and for two years at Leonia, New Jersey. In accordance with the plan of the International Bureau of Education, Professor Mosher sailed with twelve others for France, where he taught English to French students at the Colleges de Garcons, Thonon les Bains, at the same time pursuing higher studies in history in the University of Grenoble.

Ernest Canfield Van Keuren, A.M., assistant professor of English, was graduated from the University of Cornell. As has been said before, Professor Van Keuren has taught at this University, teaching from 1920 till 1922. Professor Van Keuren spent the past year at the University of Harvard. This summer he studied at the Cornell summer school. Professor Van Keuren's interest lies mainly in dramatics, as he is specializing in dramatic literature; and it will appear from time to time that he will be identified most with that phase of college life.

William Morrison Patterson, Ph.D., Assistant Professor of Modern Languages, is a graduate of Vanderbilt, class of 1899. Professor Patterson received his Ph.D. degree at Columbia University in 1916, and was associated with the Department of Commerce during the World War. He was recently in business in New York City.

Dr. Hullihen Is Host To Class of '27

The students of the University were guests at a reception on the "Knoll," the Newark residence of Dr. and Mrs. Hullihen, on September 21. Immediately after the Convocation exercises, those of the student body who were courteous enough to recognize the invitation of Dr. and Mrs. Hullihen, gathered on the lawn before the President's dwelling. Here refreshments were served by students of the Women's College. The new members of the students' bodies of the Men's and Women's Colleges were made acquainted with the upper classes.

The receiving line consisted of Dr. and Mrs. Hullihen; Dean and Mrs. Dutton; Dean Robinson, of the Women's College; Dean and Mrs. McCue; and Dean

of Engineering, M. Van G. Smith; and Dr. and Miss Elinor Harter.

This reception is an innovation in the social affairs of the University. But it is to be hoped that it will become a tradition of Delaware and be supported in the future by the entire student body.

"Pete" Herman, who was recently injured in an automobile accident, is much improved. He is suffering from various internal injuries and a "stretched" spinal cord. It is doubtful if he will be able to return to college this year. "Pete's" many friends wish him a rapid recovery of his health.

Company C To

Have Banquet

Members of Company C, winning outfit in last year's competitive drill, who are wondering when they are going to attend the banquet that Major Rowe annually gives the winners, may depend upon soon having their minds and appetites set at rest. Major Rowe is soon to confer with Mr. Wilkinson on this subject and the banquet may be expected in the near future. The competitive drill came too late last year for arrangements to be made for the occasion, but the members of Company C are assured of the "spoils of war."

Engineering Levels Mountains

The Pack Train has become a relic of the past, along with the Prairie Schooner. Modern methods of transportation have leveled mountains, brought San Francisco nearer to New York, and widened the markets of all our great industries.

And the engineering brains and energy, that have developed transportation to the prominence it holds in the business of the world today, are no longer employed in improving means of overland travel alone. Street Railways, Elevator Systems, Inter-urban Lines and Improved Shipping Lines—these are some of the accomplishments of engineering in the development of better transportation.

Neither have the builders of such systems been concerned only in the actual hauling of people and materials. A study of the methods of handling passengers and freight at the large terminals has developed the Terminal Engineer, who has greatly improved existing

methods, and has developed entirely new ones, as well.

Engineering, as it is applied to transportation, has had to concern itself with many kinds of materials and many ways of handling them under all manner of circumstances. For instance the problems surrounding the handling of iron ore, in bulk, are vastly different from those encountered in moving any one of the finished products manufactured from iron ore, that must also be transported in large quantities. But Engineering constantly meets each situation with improved transportation facilities.

Industry, as a whole, and the nations and the people of the world owe much to the engineers, associated with such large manufacturing industries as Westinghouse. They have not only brought about vast improvements, but they have done so at a constantly decreasing cost to those who derive the greatest benefit from them.

Westinghouse

ACHIEVEMENT & OPPORTUNITY

Junior Class Holds Elections

In the elections held recently by the Junior class to fill the vacancies, resulting from several of the class officers not returning to college this year, Harry Lowber was unanimously selected as secretary; Paul Skewis and Robert Muhlig tied for the treasurership and Russell Hunt and Roger Cann were selected as the candidates for representative on the Student Council.

Lowber replaces Mather who did not return this year. The vacancy in the treasurership was occasioned by Robert Conly returning to Boston "Tech." McCormick was the member of the Student Council who did not come back this year.

Downing Heads Harter Hall

C. B. Downing was elected president of the Harter Hall Government Association for the coming year.

A. V. Krewatch is proctor of Section A, with J. A. Warrington, W. R. Foster, and D. Stewart for assistants.

J. G. Leach was selected as proctor for B Section. His assistants are V. Tempone, F. Miller, W. Donaldson, and F. Swezey.

Faculty Club Entertains

In the Lounge, on Monday evening, October 1, the Faculty Club gave a reception to the new members of the Faculty and their wives. The purpose of this informal reception was to enable

the new members to become better acquainted with the old ones. Practically all of the members, new and old, were present.

Dr. George H. Ryden entertained the club with several fine solos. He was accompanied by Miss Dora Wilcox, of the Women's College. Dean McCue, president of the club, then gave a brief address of welcome to the new members. After his talk, refreshments were served, and the rest of the evening was very enjoyably spent in "getting acquainted."

In the receiving line were Dean McCue and wife and the new Faculty members. The arrangements for the evening were in charge of the Social Committee, consisting of Major L. B. Rowe and Dr. F. M. K. Foster.

Borrowing Brotherhood

"Mom, I have to have a new pair of sneakers."

"Sneakers? Why, what for? You had a new pair the beginning of the month. You can't have worn them out by now."

"I didn't get a chance to wear them out. Somebody won them."

"What are you talking about?"

"I took my sneakers up to the club and when I went to put them on last Saturday I didn't have any to put on. Somebody else had gotten there first, I guess."

"Where did you put them? If you'd put them in your locker

that couldn't happen."

"Yes, it could. I did put them in my locker, but at the club it's first come, best dressed. Somebody beat me to it."

"Are you trying to tell me that you youngsters use one another's clothes without even asking for them? I never heard of such a thing."

"Why, mom, that's nothing. All the members use each other's things. That's what belonging to the club means. If you're stingy with your things you're a crab."

"Indeed!" said the mother icily. "And if you take what does not belong to you, what are you in this club?"

"Oh, now, mom, don't put it that way."

"That's the only way I see it. Your shoes belonged to you. I cannot imagine any properly brought up child using another child's shoes, not for a minute. I hope you haven't done that sort of thing?"

"What can I do if I get there and find that I haven't a sweater? Haven't I got to take what's left? I got to be a good sport, haven't I?"

"Not if wearing another person's clothes is being a good sport, you haven't," said mother grimly.

"Then I might just as well resign from the club," said the lad gloomily.

"Then resign," said mother. "I'll replace the things your

friends have borrowed. I'll sew your name into them and stamp it on them, so they can read it without straining their eyes. You'll keep your tennis outfit in the hall closet and carry it back and forth to the courts or you needn't play tennis."

"O, mom, that's making a crab out of me."

"All right. I have more respect for the crab that pinches the impertinent person who gets in its way than I have for the impertinent person. I've made up my mind now, that you respect other folks' belongings and permit them to respect yours. That's all about it."

"O, gee, mom." But his outfit reposes in the hall closet. He no longer belongs to the borrowing brotherhood.—Angelo Patri, Phila. Record.

Officers of Cadet**Staff Announced**

Major Rowe announced last Monday the names of the men who will compose the first cadet staff of the R. O. T. C. since Delaware has been placed upon the list of Distinguished Colleges in Military Science. Major Rowe has not only succeeded in making Delaware a Distinguished College, but he has also managed to get all upper-classmen tailor made uniforms, a feature that will add materially to the appearance of the Battalion. Each cadet officer will also wear a Sam Brown belt and leather puttees.

Frederick B. Smith has been selected as Cadet Major of the Battalion. John Shaefer is to be Adjutant, Cadet Captains Harold W. Clift, Geoffret C. Houghland, and Wilbur S. Shockley will command the companies.

The rest of the staff is made up of the following:

Cadet First Lieutenants, J. Harmer Donaldson, Clarence B. Downing, Purnal L. McWhorter, Horace Nunn, Paul D. Owens, Eugene D. Smith, and Edward H. Jackson.

Cadet Second Lieutenants, William Howard, Albert O. Humphreys, Mariott C. Johnson, Howard R. McClure, Clifford A. Smith, Franklin T. Vansant, and John E. Mortimer. Cadet Sergeant Major, William S. Jackson. Cadet Drum Major, Isaac Elliott. Cadet Color Sergeants, William Foster, Vincent Tempone. Cadet First Sergeants, Roger W. Cann, John Leach, and Frances Miller. Cadet Staff Sergeants (Band), Howard L. Corkran, Albert O. H. Grier. Cadet Platoon Sergeants, James H. Deputy, Charles W. Gibson, Herbert Ickler, Ralph W. Jones, William J. Lank, and Paul R. Rinard. Cadet Sergeants, Kenneth J. Crothers, William M. Donaldson, Ralph L. France, Frank Garatwa, Charles E. Green, LaBarre Jaggard, John MacMurray, William D. McKelvie, Frederic Mullineaux, Harry Pikus, John P. Skewis, and Francis Warner.

NOW THRIVING REALITY

(Continued from Page 1.)

the men who compose the group: Anustin P. Cooley, Sandy Lake, Pa.; Francis J. Cummings, Wilmington, Del.; David M. Dougherty, Wilmington, Del.; Herbert H. Lank, Seaford, Del.; William K. Mendenhall, Sewell, N. J.; J. Cedric Snyder, Georgetown, Del.; T. Russel Turner, Wilmington, Del.; J. Winston Walker, Wilmington, Del.

The long 3,500-mile journey from Delaware to France was a real pleasure trip, from the time the men assembled at Newark, July 5, to the arrival in Nancy, July 21. President Hullihen and Mrs. Hullihen started the group off right with a farewell dinner given at Newark, Thursday evening, July 5. In addition to the eight members of the group and Mr. Kirkbride, there were present: Mr. Pierre S. duPont, whose personal interest and financial support are making the undertaking possible; Mr. H. Rodney Sharp, who is working hand in hand with Mr. duPont in developing the project; Mr. C. Lyon Chandler, one of America's greatest authorities on international affairs; Mr. G. Gray Carter, who holds the Delaware appointment as Rhodes scholar at Oxford, England, for the coming three years; and Dean George E. Dutton, Prof. George H. Ryden, and Business Administrator A. G. Wilkinson, members of the Faculty Committee on Foreign Study. Appropriate talks were made by President Hullihen, Mr. duPont, Mr. Chandler, and Mr. Kirkbride.

On Friday morning, July 6, the eight students and Mr. Kirkbride left for New York, accompanied by Business Administrator A. G. Wilkinson. Mr. Wilkinson very generously provided parlor car seats for the group, and had the men as his guests for lunch in the dining car. President Hullihen made the trip on an earlier train, and joined the crowd in New York later in the day.

Friday afternoon the men were received by the French Consul-General at New York, who welcomed them to his country in the name of the French Government, and expressed his best wishes for a pleasant year in France.

Friday evening, through the kindness of Mr. duPont, the entire delegation was treated to a charming theatre party, under the chaperonage of President Hullihen, Mr. Wilkinson, and Mr. Kirkbride.

Saturday morning, July 7, amid the fond farewells of some of the parents and relatives of the students, and with a parting hand-shake of encouragement from President Hullihen and Mr. Wilkinson, the group embarked on the French Line steamer, "Rochambeau," and they were off on the great adventure. There followed nine days of perfect weather, and the crossing was a delight. Color and flavor were added to the trip by another mark of generosity of Mr. duPont—two big baskets of fruit and candy.

On Monday, July 16, the "Rochambeau" slipped through the gates at Havre, and Delaware's pioneer Foreign Study group was on French soil. A special train carried the passengers across the fertile fields of Normandy and along the banks of the busy Seine to Paris, reaching the St. Lazare Station in the afternoon. After getting the men settled in a hotel, Kirkbride was host to the party for

the initial dinner in the great French capital, introducing the group to the luxuries of the justly famous "cuisine française."

The next four days were spent in visiting Paris. Prof. Brinton, of the Delaware Modern Language Department, who spent the summer in France, was there to welcome the crowd and took turns with Mr. Kirkbride in conducting the party around the city. Among the "sights" visited were: the Avenue Champs-Élysées, the Arc de Triomphe, Napoleon's tomb, the Eiffel Tower, Notre-Dame, the Louvre, etc.

Saturday, July 21, the men said good-bye to Paris for six weeks, and went to Nancy to begin their studies. A separate private home was waiting for each man, and they are all comfortably located. Mr. Kirkbride has established headquarters at the Hotel Thiers.

Monday, July 23, at 8 a. m., the men assembled at the University of Nancy ready for the first school hour. There are three regular class periods daily, from 8 to 11 in the morning. The work includes drill in grammar, phonetics, etc., and lectures on history, literature, and geography. In addition to the regular three hours per day, each member of the Delaware group is given a 60-minute private lesson, for the development of his conversation and pronunciation. This is a feature arranged for the Foreign Study students alone.

Tuesday night, August 7, at 8 o'clock in the grand salon of the famous Café Stanislas, took place the formal banquet in honor of the arrival at Nancy of the pioneer Foreign Study group of the University of Delaware. It was a brilliant event. The banquet hall was in gala attire, with flowers and French and American flags. The guest list included many of the most prominent people in Nancy.

The delegation from the University of Delaware included nineteen persons, as follows: President Walter Hullihen, and Mrs. Hullihen; Mr. Charles B. Evans and Mrs. Evans; Mr. H. Rodney Sharp, Mrs. Henry P. Scott, Miss Blair, Miss Ospina, Prof. G. E. Brinton and Mrs. Brinton; Mr. Raymond W. Kirkbride, and the eight Foreign Study students, Messrs. Cooley, Cummings, Dougherty, Lank, Mendenhall, Snyder, Turner, and Walker.

Mr. Kirkbride acted as toastmaster, speaking in French. In his introductory remarks he pointed out the radical differences between the French and American university systems, and explained the Foreign Study Plan in detail. He then gave the reasons why the city of Nancy had been chosen as the place where the Delaware students are to commence their work in France, which the guests from Nancy appreciated heartily.

Mayor Mengin responded, welcoming the Delaware students and visitors to Nancy. The Mayor praised the work of the American Army in the neighborhood of Nancy during the war, and expressed the gratitude of his city for what the Americans had done.

President Hullihen was the next speaker. He emphasized the value of the interchange of ideas between nations, and the desirability of closer relations between American and French universities. He assured the French guests present of the warm sentiment in America to-

day toward France, and closed with a toast to Premier Poincaré, who was once a student at Nancy. His speech was then translated into French by Prof. Charles Bruneau, Director of the Summer School.

Dean Bruntz, of the School of Pharmacy, responded to Dr. Hullihen in the name of President Charles Adam, thanking Delaware for having confided her students to the University of Nancy.

The Prefet of Meurthe-et-Moselle, Monsieur Magre, reiterated, in the name of his State, the welcome expressed by previous speakers. He spoke in superlative terms of the value of such projects as the Foreign Study Plan in bringing the nations together.

Monsieur Florentin, editor of "L'Impartial," and Secretary of the Press Association of Eastern France, spoke in the name of the press. He declared that a real spirit of friendship and comradeship on the part of the citizens of Nancy awaited every member of the Foreign Study group.

The closing talk was made by Monsieur Marcel Knecht, manager of the Paris "Matin," and a native of Nancy. Mr. Knecht is very familiar with American conditions, having repeatedly represented the French Government on various missions to the United States. He spoke partly in French and partly in English, urging the need for a better

mutual understanding between France and America. He praised the Foreign Study Plan, and paid a high tribute to Mr. duPont, both for his support of the Plan and for his tremendous aid to the Allies during the war.

The guests then withdrew to an adjoining salon, where coffee was served. Here, with the aid of some volunteer interpreters and a few pocket dictionaries, the Nancéiens and the Delawareans mingled as one big friendly family. At midnight the stately melody of "Old Delaware" was sung by the Foreign Study group, and the Foreign Study Plan, brilliantly inaugurated, was a reality.

Raymond W. Kirkbride.

How about the members of the R. O. T. C. and the Military Department getting together and putting on a Military Ball? Such a dance could be made a distinct novelty here at Delaware.

Artist Series To
Start This Friday

Marco & Co., magicians, will give the first of a series of entertainments at Wolf Hall on Friday evening, October 5th, at eight o'clock. Marco's program comprises thrills and laughs, and is characteristic of all that is new in his art. The features of his program are his egg trick, the mutilated handkerchief, and the flags of all nations.

He has played in all the large cities of this country, among which are Portland, Oregon, Sioux Falls, South Dakota, Kearney, Nebraska, Houston, Texas, and Mason City, Iowa. Wherever Marco goes, he is always assured of a return engagement. Freshman will be able to understand his jokes and tricks as well as Seniors.

Dr. Bevan, addressing Faculty Club Monday night—"Well it has just been three weeks since I left Florence!"

CONVOCATION DAY MARKS OFFICIAL OPENING OF TERM

(Continued from Page 1.)

Dr. C. A. Richmond, Chancellor of Union College.

Dr. Richmond, in one of the most stirring addresses ever given at the University, made a sincere appeal for the obliteration of false ideals and standards in education and for a more efficient training of the youth of the nation. Dr. Richmond said in part:

"My plea today is a plea for the safeguarding of these higher values, a regard for the ultimate rather than the immediate. I would have our youth taught from their earliest childhood to value above everything the imperishable riches of the mind and the spirit. I would inspire them with the firm belief that they are the children of God, made by Him and made for Him, and I would put this spirit into all his teaching.

We call this the melting pot of the nations. Certainly the crude and diverse human elements gathered here will never be fused by the fires of passion nor by the burning of old wounds nor by any heat whatsoever except the fires of a common sacrifice. We can never make a nation out of antagonisms. Our work of education is an education in forgetting as well as in remembering. We must set ourselves patiently to the task of educating all classes of our people to the conception of a new nationality made up out of many old elements but purified and refined and ennobled because it is permeated and transfused with the spirit of human liberty and of human sympathy. Such a nation will be a united nation and strength and prosperity will follow unity."

The speaker caused a wave of laughter to sweep the audience when he humorously remarked that "it doesn't take much brains to teach Freshman."

Dean George E. Dutton, who has taken the place of former Dean E. L. Smith, deceased, made his first official appearance since his acceptance of the office in the Arts and Science School and announced the appointments of the University.

Deans Charles A. McCue, of the Agricultural Department, and Winifred J. Robinson, of the Women's College announced the names of the new members of the faculties of their respective departments.

Dr. Hullihen, prior to the address of Dr. Richmond reviewed the progress of the University during the past year. He criticized the action of the State Legislature in cutting down the appropriation for the University resulting in a cutting down of the teaching staff, and lack of housing facilities; he thanked the Delaware School Auxiliary for its material assistance in furthering the educational facilities of the University; and congratulated the Military Department for its efficient work during the past year as compared with the work of other colleges.

Rev. Hallman, at the close of the exercises, pronounced the benediction, officially marking the end of the exercises.

Immediately following the Convocation exercises, Dr. and Mrs. Hullihen, assisted by several ladies of the Faculty, held a reception at The Knoll in honor of the new Faculty members and students of both Colleges.

It was announced just prior to the Convocation exercises that about 100 men had enrolled in the Freshman Class of the College. The men's enrollment falls

short of that of last year.

The following figures show the enrollment at the College since 1914:

	No. of students
1914-1915.....	203
1915-1916.....	226
1916-1917.....	226
1917-1918.....	216
1918-1919.....	210
1919-1920.....	301
1920-1921.....	302
1921-1922.....	285
1922-1923.....	319
1923-1924.....	304

At the Fair

An odor of sawdust, perspiration, and cheap perfumery permeated the atmosphere. Shirt-sleeved men yelled invitations to "take a chance," "try your luck," and the usual hokum to the crowd, that flowed sluggishly around the luridly decorated booths.

The faces were, for the most part, commonplace (the exceptions were not the sort that would prove interesting) and I was rapidly becoming bored. But a vague hope chained me to the sawdust-covered ground.

Suddenly my hope was realized far beyond my most foolish imaginings.

A girl, a beautiful girl, a girl such as one dares not even dream of, appeared before my astonished eyes. She was slim, with shapely, silken-clad ankles. Her hair was arranged closely around her well-formed head in an ebony caress. Her cheeks were pale olive, with just a trace of color. Her lips were such that to have kissed them would have been like horse-play with God. And her eyes, her eyes were big, and deep, and dark. They were more than mere orbs of sight, they were stars of the soul, stars to be worshipped reverently and from a great distance.

I forgot the tawdry background of colored lights and of red, white, and blue bunting. I no longer heard the yells of the perspiring barkers. My consciousness was no longer offended by the peculiar odor of sawdust and sweat. I forgot the littleness of man and the shortness of life.

She was coming forward in my direction. When she was just a few steps away she halted to examine, with childish pleasure, a collection of toy balloons. Her nearness only intensified her beauty.

"My God!" I thought, "can she be real?"

Just then she turned to a pimple-faced youth, whom I had not noticed before, and exclaimed in a loud voice:

"My Gawd, George, aint chu goin' t' buy me a hot dawg?"

There appears to be an unusually large amount of musical talent in the Freshman Class this year. With this fact in view it would seem reasonable that the University Orchestra emerge from its comatose state.

(Continued from Page 1.)

councils of both colleges for the purpose of bringing about this desire, which is one that should meet with hearty approval. Both student bodies voted to have a joint Alma Mater last year and there should be no trouble in adjusting the existing Alma Mater to suit both colleges.

President Hullihen in the same interview stated that there will be approximately only one half the number of Chapel exercises this year as there was last year and that the number of cuts would be lowered proportionately. There will be six meetings devoted to student body discussions without any other program. Each other college hour will be featured by some prominent speaker and will be attended by both colleges. New seating arrangements will also take place, there being a regular assignment of seats to the members of the Women's College as well as to the members of Delaware College. This is another step toward a true university and can be cited as an example of President Hullihen's program of progress at Delaware.

ITS LACQUER-RED COLOR MAKES IT HARD TO LOSE

The Pen that made the Grade

Will Help You Make It Too

ONE reason alone that the Parker Duofold is invaluable to students is because *fluent* writing induces *fluent thinking*. You can't compose your thoughts if an unruly pen harries your brain. But Duofold's balanced swing, its super-smooth point, its fit and business-like feel in your hand, all give your mind free rein!

Ask your student friends who use this classic pen—they'll tell you they would rather let go of seven dollars than have to part with the faithful Duofold.

Its over-size ink capacity holds a long-distance ink supply. And its point is not only smooth as a polished jewel, but no style of writing can distort it; hence, a pen you can lend without fear.

Students call it the "All-American" Pen because it's the ranking favorite at leading universities and colleges.

Give yourself a flying start this year by getting Duofold this week.
