NEWARK, DELAWARE, MARCH 27, 1917

NUMBER 22

MANDOLIN CONCERT A GREAT SUCCESS

Miss Saylor, Soloist, Pleases Large Audience. Quartette In "Unusual Form."

The College Mandolin Club, assisted by Miss Grace S. Saylor, of Collegeville, Pa., gave the initial concert of its first annual tour in the New Century Club, Wilmington, Saturday evening, March 24.

A large and appreciative audience, comprising persons from Philadelphia, Wilmington, Newark and neighboring towns gave the club members a hearty greeting. Many students took advantage of the bargain program which consisted of the concert and twelve dances "thrown in," after 10 o'clock, and as a result were much in evidence.

The first number was The Star Spangled Banner, in which the club was assisted by Miss Saylor and the College Quartette. The remainder of the quartette was equally as successful as the first number and this was not more truly evidenced than by the vigorous applause of the listeners. Complaints were lodged against the club for its failure to respond with encores, but the club is to be defended by the fact that the dancing was scheduled for 10 o'clock and the program was longer than it was intended to be.

A large measure of the success of the concert is due to the splendid part contributed by Miss Saylor. The club is to be congratulated on securing this artist who is well known in musical circles in this city and in eastern Pennsylvania. Miss Saylor won the sympathy of the audience upon her first appearance, which served as a stimulus to bring forth her best efforts; there were shown in the two selections, "My Heart at Thy Sweet Voice" and "Die Lorelei." Sweetness and volume were combined with a pleasing personality which added charm and interpretation to her numbers.

The College Quartette made its debut in the second half of the program. Once the fellows were dispelled of their stage-fright they sang like past masters of the art. They have good voices, individually, which quite fortunately are productive of good harmony. It is a hard matter to determine just which number was most favorably received. Humoresque was played by several members of the club while the quartette sang "Old Folks at Home."

Tom Wilson, the collegemate, who is ill in the Delaware Hospital, heard the concert by means of transmitters which were generously donated and installed by the Bell Telephone Company. Tom reports the concert as a "tip-top" affair.

E. E. Plumley, '19, leader, deserves much credit for his untiring efforts in developing the organization, which, in view of its creditable performance in Wilmington, merits the support and encouragement of all lovers of music.

FACULTY DE- FEAT SENIORS

"Profs" Showing Flashy Form Nose Out College Seniors After Hard Fought Game

In a hotly contested and exciting game last Wednesday night, the much touted Faculty quintet trounced the Seniors to the tune of 16-14.

The game was fast from the start, both teams playing a very aggressive game. Professor Counts scored first blood for the Faculty when he tossed a foul. This he quickly followed with two more. From this point on the Seniors were on the short end and at no time were in the lead. Tarr had the honor of the first field goal of the game, making a pretty toss from under the basket. Another goal by Counts and four fouls gave the Faculty an advantage of an 8-1 lead at the close of the first half.

Capt. Counts and his aggregation began with a rush in the final period and scored three field goals before the Seniors got started. Once the last year men got going they fairly swept their opponents off their feet. Towards the end of the game they were going strong, scoring five field tosses in several minutes of play. The "Profs" tightened up at this stage and managed to hold their two-point advantage till the whistle sounded.

Great credit for the victory of the Faculty is due Capt. Counts, who scored 14 of his team's points. The score:

Old Manuscripts Presented To Library

Mr. E. L. Vallandigham, of Chestnut Hill, Mass., and formerly a Professor in Delaware College, has presented to the Department of History at Delaware College a number of interesting works on local subjects. The list is as follows:

- (1) Irving Spence. History of the Presbyterian Church in America. Philadelphia, 1838.
- (2) Edward Neill. Terra Mariae, or Threads of Maryland Colonial History. Philadelphia, 1867.
- (3) Papers of the New Castle Common. New Castle, 1893.
- (4) Ideal New Castle. A compilation prepared under the auspices of the Commercial

STUDENT COUNCIL TO GIVE DANCE

In Gymnasium Friday Evening

On the evening of Friday, March 30th, the Student Council of Delaware College will hold its second informal dance of the collegiate year in the Gymnasium.

Those who had the privilege of attending the Student Council dance, which wound up the 1916 football season, on Thanksgiving night, will recall one of the best social events of the year. The dance was given in honor of the efforts of the team which resulted in a very successful season. Let us therefore hold this coming event by way of introduction to the track and baseball season. "Old Delaware" has great prospects in these two branches of sport, and start the season with a good lively dance. The attendance at this dance will be indicative of the amount of spirit and enthusiasm to be shown on Frazer Field during the next two months. Let us get together, therefore, and show the track and baseball men that they have our moral support at least. There is no reason whatever that in a college of 230 students, there should not be 100 men present at this dance. Show your interest and let's pull off a real dance. Make the slogan 100 couples.

Dancing will begin promptly at 8 o'clock and will extend to 12. The admission will be \$1.00 per couple. Tickets can be procured from any member of the Council (Steele, Lauritson, H. Horsey, D. Horsey, Fitzpatrick, Reynolds and Fitzpatrick) during the coming week. Don't be satisfied with buying your own ticket. See to it that every other fellow in college has one. These college events are and should be made individual matters, and the responsibility is on the shoulders of every man in "Delaware." Good music is guaranteed!

Dramatic Club To Present Plays

On Friday evening, May 11th, the Dramatic Club of Delaware College will give two one act plays, "Honor" and "The Green Coat," in the Newark Opera House. The Mandolin Club will render a musical program on the same evening.

Club by G. A. Wolf. Illustrated. 1899.

(5) William H. Purnell. Anniversary Address before the Delta Phi Literary Society. 1853.

(6) Delaware College Catalogue, 1855-6, with addenda giving Newark Academy Catalogue.

(7) Also an M. S. letter from Professor W. P. Trent of Columbia University, giving the result of his investigations touching the legend that a niece of Daniel Defoe came to Philadelphia as a "redemptioner" and became the ancestress of several well-known families in Cecil County, Md. This story is circumstantially told in Johnston's History of Cecil County.

SUMMER SCHOOL COURSE LENGTHENED

To Cover A Period Of Ten Weeks

The 1917 Summer School will open at Delaware College on June 25th, according to circulars issued during the past week. The session this year has been lengthened to ten weeks, and divided into two terms, the first from June 25th to August 3d, and the second from August 6th to August 31st. The primary purpose of the school is the training of teachers for the schools of this section of the country, and a large percentage of the teachers of Delaware are expected to be in attendance, as well as many from the adjoining counties of Maryland.

Opportunity will also be provided for high school students to make up any deficiency in college entrance requirements and for students to pursue college work in the summer months. Credit in Delaware College and the Women's College will be given for work done in the advanced courses, a fact which means, too, that credit will be given in all other institutions where the work of Delaware College is accepted. A course meeting five times a week for the ten weeks will receive three credits in Delaware College. Thus it is possible for a student to secure from 9 to 12 credits in ten weeks. The requirement for graduation from the Arts and Science Course is 128 credits.

A new schedule will go into effect this year, by which all recitations in the regular subjects will be held in the morning. There will be five recitation periods of 50 minutes each, the first beginning at 8:00 a. m. and the fifth closing at 1:00 p. m.

Among new courses announced is a special two-weeks' course for rural ministers, beginning August 6th, and continuing until August 17th. The character of this course will be described in the regular summer school bulletin to appear in the near future.

Tuition at the Summer School is free to residents of Delaware. Others will be charged a nominal tuition of \$5.00. The total expenses of those attending the 1916 session varied between \$35 and \$45. Dr. G. S. Counts, head of the Department of Psychology and Education will be director of the Summer School, and Professor Mary E. Rich of the Women's College, will act as Dean of Women.

Auditors Visit Delaware College

State Auditors Roe, Harman, Jester and Sommers, visited Delaware College on Monday, auditing the accounts of all the departments of both the Men's and Women's Colleges. Although the visit of the Auditors was unexpected everything was found in perfect readiness in the office of the registrar. Not an error was found in any of the accounts, and the work which they had calculated would require two days was completed in the early afternoon. Miss Todd, the registrar, was gratified upon the excellent condition of the office.

CORNERSTONE OF DORMITORY LAID

Simple And Impressive Exercises Mark Occasion

Simple but impressive ceremonies marked the laying of the cornerstone of the first of the new dormitories of Delaware College last Monday. The new building which is located at the northern end of "The Green," just off Main street, faces west and is one of four in the plan of the newer Delaware College. The walls are already beyond the first story, and every effort is being made to be ready for a formal dedication in June. The building of modified Colonial architecture, is of brick with marble trimmings and measures 160 1-2x30 1-2 feet, part of it being three stories in height. It is built to accommodate sixty students. There will be seven study rooms, some en suite and some single, with five large toilet rooms, each with baths and showers. The structure will cost approximately \$100,000. Since the plans were drawn it has been decided to reserve the Ionic columns for the library building, where it is believed they will stand out boldly and more impressively. There will be on the dormitory instead, a smaller entrance flanked by pilasters, with Corinthian capitals.

Rooms in the dormitory will rent from \$40 to \$80 per year, including heat, light, water, and janitor service, the majority of the rooms renting for \$40, or, in keeping with the general idea of keeping the student's expenses as low as possible. Each room will be furnished with a bed, two chairs and a study table for each student, and a chiffonier. The building will be heated from the central plant of the college.

At 4:15 on Monday, a procession formed by the band, cadet battalion, and members of the faculty, proceeded to the new building, where the cornerstone was laid. Many friends of the college also attended. Dr. W. O. Sypher, head of the English Department and an alumnus of the College, presided at the exercises. Following prayer by Rev. W. P. (Continued on Page 4)

MARCH 27, 1917
Farewell

With this issue the present Review board retires from office; and the new editor and his staff assume the responsibility of publishing the Review during its third year as a weekly. It is with a certain degree of pride and at the same time with a feeling of dissatisfaction with ourselves and with what we have accomplished that the present editors relinquish their duties. We stated at the beginning of our regime that we undertook our task fully realizing that we were inexperienced, and now that the result of our efforts are a matter of record you, as well as we, can judge to what extent we were incapable of shouldering the task we assumed. Only too well do we realize that opportunities to raise the standard of the Review and to further its range of influence have slipped through our hands. These opportunities, however, were not passed up because of any irresponsible attitude, but only because we were unable to grasp them. The Review has far greater possibilities than have yet been realized. It has yet to reach the height of its influence as a mouth-piece of student opinion and as the mouth-piece of student sentiment; it can and should be made more accurate,

more readable, more alive. More able as well as the most conscientious efforts will be required from editors and staff if the Review is to attain the limits of its possibilities. These conclusions are the results of a brief experience and are mentioned only that the new board may have clearly before them from the beginning some improvements for which they may strive. We wish the incoming board unlimited success and hope that its

members will combine earnest endeavor and co-operation if they would raise the Review to the position that it should occupy in this era of the glorious expansion of Delaware College.

BOILER ROOM.

The old boiler was installed when Mechanical Hall was built, and in the moving had to be sawn apart to get it out. On that account the present boiler is only a few years old. The boiler-room, however, is crowded, because in it are also the blacksmith shop and foundry.

Government For Every Student

The heads of the different departments of Delaware College are gradually improving their curriculums. At the present time, every department—Arts and Science, Agriculture and Engineering—has realized the necessity of an Economics Course for their students. But every department has not appreciated the fact that the Course in Government, which is now only an Arts and Science subject, is practically indispensable to a college man. Will it take three years for the Government Course to be recognized and adopted as it has for the Economics Course?

There are very few intelligent voters in the mass of population anywhere. Everybody, however, would expect intelligent voters at a college. Nevertheless, in November at Delaware College, when the straw vote for President was taken very few students cast their votes intelligently. To hear most of the quasi-voters' arguments any non-partisan would immediately brand us as Republicans—because our-fathers-were.

We, who are able to attend college, are supposed to be picked men. When we graduate we should be the nation's best citizens. However, if part of us in the Engineering and Agricultural Course are not taught how to vote, we shall not know anything concerning the policies of our country. If we learn nothing about our country in college, we can not be interested in the United States government when we leave college.

Members of the Faculty of Delaware College, help us to be broad-minded!

Interesting Meeting Of The Engineers' Society

An intensely interesting meeting of the Engineers' Society was held last Tuesday evening. Clinton Todd was the first speaker. He described the development of the automobile from the early horseless carriages in England to the present handsome and powerful cars.

The horseless carriage operated by steam was a rather familiar sight on the English roads in the '30's and the '40's. It was of varying sizes and carried anywhere from four to over twenty passengers. But because of the expense, and for other reasons it soon went out of use. Along in the 1860's the steam road vehicle appeared; but as it was practically all engine, with room for only four passengers, it soon died a natural death.

The development of the gasoline automobile began about 1885 after the combustion engine had begun to reach some degree of perfection. From the smallest and crudest beginning the internal combustion automobile grew thru a long series of improvements and inventions, until today we have a highly-developed, handsome, comfortable, dependable, high-speed vehicle. The quickness of the public to use the automobile for a pleasure car has been the great factor in making its rapid development possible.

The development of the electric machine has paralleled the development both of electric traction and of the gasoline machine. Later developments of the steam automobile have also reached a high degree of perfection.

Dale Cannon described the development and uses of wireless telegraphy. The inception of the wireless telegraph dates back farther than most people realize. As early as 1842 Professor Morse sent messages by wireless a distance of 80 feet, and in 1854, Lindsay, of Scotland, sent messages a distance of 2 miles. In Herz accidentally discovered while experimenting with a Leyden jar and

Interesting Meeting Of The Engineers' Society

(Continued from Page 2) two coils of wire, each of which had a spark gap, that a disruptive discharge thru one would induce an appreciable discharge in the other, although it was separated some distance. This was the epoch-making discovery of the existence of electro-magnetic waves. Marconi began his experiments in 1895, when he could send messages two miles. From that time he continued his experiments until now messages can be sent almost halfway around the world. The great value of the wireless telegraph was brought home very forcibly to the public at large in 1910, when the passengers on a wrecked ship were saved by means of it.

The military aeroplanes are now fitted with light-weight wireless outfit. These aeroplanes fly high over the targets the gunners wish to hit, and send back messages giving the range and the number of hits. By this means they make possible the firing of big guns with a range of fourteen miles, a feat which without the wireless would be impossible.

HONOR SYSTEM

Georgia School Of Technology DECLARATION OF PRINCIPLES.

We, the students of the Georgia School of Technology, hold that the heart of education is morality, and the essence of achievement is character. We would place honor above credits and base attainment upon desert. We believe there is no enduring reputation which is not rooted in worth and no real success which has not its foundation in manhood; that every honorable man would rather suffer failure than stoop to fraud; and that trustworthiness is the superlative asset of the engineer.

As a concrete expression of this belief, we hereby pledge ourselves:

FIRST, Neither to give nor to receive assistance during examinations, recitations or any work upon which we are graded.

SECOND, To report to the proper authorities any one who we have good reason to believe is guilty of giving or receiving unauthorized assistance.

CONSTITUTION.

Art. I. Honor Court. Section 1. Duties. A court consisting of ten members and a President shall be elected from the student body to develop and foster the right spirit in regard to the Honor System and to conduct the trial of any one accused of violating it.

Section 2. Membership. The President of the Honor Court and four members shall be elected from the Senior Class, three members from the Junior, two from the Sophomore, and one from the Freshman. Special students shall act with the classes in which most of their work lies.

It is essential that the members of this court be men of the highest character; men whose courage, conscientiousness and sense of fairness will lead them to render a verdict without fear or favor and in accord with the evidence.

Section 3. Elections. The election of members shall take place at the first class meetings in the Fall, and not later than October 1st. Two alternates from each class shall be chosen at the same time to serve in case of the disability of the regular members. Each class shall elect its own representatives.

Section 4. Eligibility of Members. A member will be ineligible to sit with a court in any trial if

the accused is a relative, a roommate, or fraternity mate.

Section 5. Organization. The President of the Honor Court shall be elected by the Senior Class at the time of the election of the other members. It will be his duty to call a meeting of the court immediately after the elections, to organize, elect officers, and arrange for a mass meeting to admit the new Freshman Class to the Honor System. The officers elected shall be a vice-president, secretary and sergeant-at-arms. Their duties shall be such as usually pertain to these offices. The vice-president shall be a Senior.

Section 6. Meetings. Meetings of the court shall be called by the President as occasion may require to confer upon matters relating to the welfare of the Honor System. At least two meetings shall be held in each term at which a few men, chosen by lot from each class, shall be summoned and examined with regard to the actual operation of the system in their respective classes. The witnesses shall be questioned as to the attitude of the students towards the system and as to violations of the rules.

Art. II. Admission of the Freshman Class. The meeting for this purpose shall be held not later than Oct. 15th. At this meeting the older men shall instruct the incoming Freshmen as to the scope, nature and purpose of the Honor System and the seriousness of their responsibility under it.

Art. III. Trial. Section 1. In case any one is suspected of violating his pledge the observer shall obtain another witness if possible, but in any case he must report the facts to a member of the Honor Court, who must in turn report the case to the president of the court.

This requirement includes teachers and students alike. It will then be the duty of the President to call a meeting of the court as soon as possible for a preliminary hearing of the evidence. If the evidence in the judgment of the court seems to warrant it, a formal trial of the accused will be held promptly.

Section 2. The verdict shall be "guilty" or "not guilty." Eight votes shall be required to convict and the penalty shall be expulsion.

Art. IV. Pledge. Section 1. All final and monthly examination papers shall bear the following signed pledge: "I certify on honor that I have neither given nor received assistance during this examination."

Section 2. All other papers upon which a man is graded shall also bear a pledge when requested by the instructor.

Art. V. Conduct During Examination. During examinations, no one is placed under constraint except such as every thoughtful man, careful of his honor, places upon himself to avoid temptations or indiscretions that may reasonably give rise to suspicion. While each one's sense of propriety should suggest acts to be avoided, it may be mentioned that leaving the room unnecessarily, or for more than a brief time or placing one's self beyond the observation of other men tends to expose one to temptation and suspicion.

Art. VI. Publicity. The President of the Honor Court shall arrange for the publication of the Honor System, with the names of the members of the court, in an early Fall issue of the Technique, and shall request the proper authorities to give a space to it in the School Catalogue.

Art. VII. Limitations. It is understood that the Honor System shall apply only to work on which grades are based, such as: Examinations, written recitations, class room work, shop, mill, labor-

tory and drawing.

Art. VIII. A gentleman does not hold his honor lightly, and no man under the Honor System should ever use language implying that he does not regard his pledge seriously, or allow any slurring remarks concerning it to go unchallenged.

Editor And Business Manager Of Review Elected

At the meeting of the Delaware College Review Board, on Wednesday, Mr. Donald P. Horsey was elected editor-in-chief to succeed Mr. Harold Horsey. Also Mr. L. E. Stayton was elected to succeed Mr. K. R. Bowen as business manager.

Up to the present time rules concerning the board, elections, etc., have been rather indefinite. With the aid of Dr. Sypherd, a definite set of rules will be put before the board at some future date for adoption.

ALUMNI ATTENTION

Library Files Of The "Review" And Alumni News Incomplete

The College Library files of the "Review" and the Alumni News are incomplete, and it is the desire of the Librarian that any alumnus possessing any of the missing numbers will be good enough to present them to the Library in order that the files may be made complete. The missing numbers are:

The Delaware College Review—All numbers of Vol. 28—October, 1911, to June, 1912.

The February issue of 1904.
The Alumni News—Numbers 3 and 4 of Vol. 2, 1916.

STIFF TENNIS SCHEDULE ANNOUNCED FOR DELAWARE

Blue And Gold To Meet St. Johns In The Opening Match

Manager R. H. Pepper, of the Delaware tennis team, has announced this year's tennis schedule. Tennis became a minor sport at Delaware last year and this year's team should make a creditable showing. The schedule is as follows:

April 28—St. John's at Annapolis, Md.

May 1—Swarthmore at Swarthmore, Pa.

May 5—Haverford, at Haverford, Pa.

May 12—Moravian, at Bethlehem, Pa.

May 18—P. M. C. (pending) at Newark.

May 26—Western Maryland, at Westminster, Md.

June 2—Washington (pending) at Chestertown, Md.

As soon as the weather permits the Delaware courts will be put in shape and the candidates for the team will be called out. As a nucleus for the team, Coach G. E. Dutton has McMillan, Sunwalt, Pepper, Humphrey, Lauritsen and Gutowitz, who represented the Blue and Gold on the court last year. These men should all show improvement this year and give their opponents a tough contest. Coach Dutton is placing great hopes in Sunwalt and McMillan. Both of these men won the majority of their matches last year and should benefit from the experience.

Several racquet wielders in the Freshman class will try to displace the veterans and win places on the team. With such an excellent schedule and a large number of good men, the tennis season should be a success.

CORNERSTONE OF DORMITORY LAID

(Continued from Page 1)
Haupt, the big block of marble was swung into place, and laid by Dean Smith. In the stone was placed an iron box containing a copy of the catalogue of Delaware College, the catalogue of the Women's College, copies of the Delaware Farmer, The College Review, the Delaware Ledger and the Newark Post, and the signature of every student in college. Short speeches were made by President Mitchell, Dr. Harter of the faculty, and LeRoy B. Steele, president of the Student Council.

Dr. Mitchell said in part: "Soon these walls which we witness rising, will become, to some three score men, representative of the dreams and sentiment of their college days. They will be filled with sentiment. A few years ago Brown University called upon her alumni to subscribe to an endowment

fund for the College. In response to a very generous subscription a receipt was forwarded, but the alumnus replied that the only receipt that would satisfy him would be the plank saved from the window sill of the old dormitory dating back to Revolutionary days. The sentiment that hundreds and thousands had for that building will come to be a part of this building, the cornerstone of which we have laid today. Our State Senate

last Friday indicated that a cornerstone may soon be laid for a new dormitory for the Women's College, an act which in itself constitutes a great moral achievement.

Men through these windows will see visions, visions of a large world, of civic achievement, of a bigger world order,—miracles of transformation. The taste, simplicity, and character in the building make it an uncomfortable

place for the man who harbors mean ambitions and low thoughts. It is rather a structure in which manhood will find its home and

where visions of life will come to men."

The ceremonies closed with the singing of the Alma Mater.

Your Glasses Were Fitted When?

If your eyes have not been examined within the past two years they should be looked after now; particularly if you have suffered from a severe illness.

Improper lenses can prove harmful not only to your eyes but to your health as well.

In all Delaware there is no better optical service than ours.

Let us test your eyes and prove it to you.

DIRECTORY OF ADVERTISERS

We believe in reciprocity. "If you deal with us, we will deal with you" is a fair and square business proposition.

The Review is dependent upon its advertisers. Without their help in the form of advertisements it could not be published. Therefore it is only right and proper that the students and entire constituency of the College should patronize those concerns which patronize the Review. Your trade and business dealings should preferably go to them.

Below is a classified list of those advertisements which appear in "Our" paper and "Your" paper. Look it over and then follow that doctrine of Reciprocity.
