NEWARK POST

VOLUME IV

NEWARK, DELAWARE, WEDNESDAY, AUGUST 6, 1913

NUMBER 28

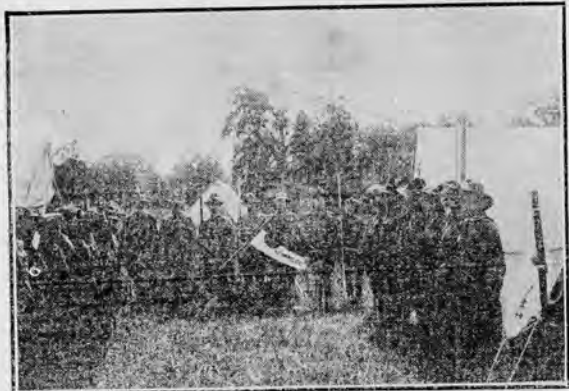

CAMP IDEAL A SPLENDID SUCCESS

Boy Scouts Doing Good Work—Illustrated Lectures Feature The Evenings

Is Camp Ideal a success? Just ask the Newark Boy Scouts or any of their numerous visitors and you will be told it is the best ever. Situated on the Northeast river a short distance from Charlestown it offers just the kind of camp life that appeals to a boy—and to grown-ups as well,—isolated just enough from town and neighbors to give it the proper atmosphere of wildness; the river directly in front of the camp affording bathing, boating and fishing; plenty of fun and play with a minimum

from pink to dark red, they present a rugged appearance. Their appetites would make their mothers exclaim, "Mercy, son, you'll eat us outen house an' home," or words to that effect and excite to envy many a dyspeptic millionaire. They all declare that meal times are too far apart. But the interval is usually pretty well filled, for from "reveille" to "taps" they are almost continually on the go.

Cooking and dish-washing, however, is the fly in the ointment. Of the two dish-washing is the most

LOCAL PATROL—BOY SCOUTS

amount of work to enable each boy to derive the greatest amount of pleasure from the outing.

The use of the camp site was kindly given to the Scouts by Mr. Black of Charlestown, who thoroughly believes that boy time is play time, all too short and not to be let go by without enjoying it to the full.

And that's exactly what the boys are doing. Tanned all shades

detested. But then what real live boy ever did like to wash dishes? It's woman's work, anyhow, they declare. So thoroughly imbued with this belief was one little chap that he sidled up to a party of boy visitors and said, "If you'll wash the dishes, we'll give you dinner." This was an inducement not to be lightly cast aside, so the ladies washed the dishes.

(continued on page 8)

IRON HILL MINES

Dr. Fahrig, Scientist, Making Investigations

Work at the old iron ore pits on Iron Hill has been discontinued, awaiting the report of Dr. Fahrig, geologist of international reputation, who is now examining the field.

Dr. Fahrig, with three or four assistants, has been working on his report for the last few months, and expects to be at least another month before it is completed. The examination has been of the most thorough nature, and the report will give in indisputable terms the facts concerning this old landmark which has been for so many years of much interest to this locality.

Although all operations have been suspended for the present, awaiting the report of Dr. Fahrig, a visit to the camp will amply repay the summer pedestrian. In the furnace room at the camp are specimens of ore taken from depths varying from 5 feet to 160 feet, with the results from the tests of these in small vessels, all of which are labelled and numbered ready for transfer to the examiner's chart. In the adjoining room where the pure chemicals, etc., are kept is an analytical weighing machine which, placed in a vacuum, is operated from the outside. This wonderful machine will register with unquestionable accuracy the weight of a hair from the human head.

A particularly interesting spot is the cut from which the ore was excavated by the Welshmen in the eighteenth century. Dr. Fahrig has found that 21 cubic feet of earth makes one ton, and calculating upon this basis, the casual visitor can gain some slight conception of the tons and tons of ore handled by the early operators of the mine. In compiling the facts for his report, Dr. Fahrig has had trenches dug, from which he concludes that ore is silicious iron, the strain running east and west, and lying in alternate layers, with barren ridges between. A month ago

three steam drills were at work on the hill, drilling in one instance to a depth of 160 feet, gathering information needed by the engineer.

Dr. Fahrig, a native of Germany has travelled, worked and studied in all parts of the world. In commenting on the beauty of this particular spot, he said it impressed him with the fact that the Creator has fashioned the most widely scattered portions of the globe in much the same fashion after all; the particular spot upon which we stood—the old ore pit—was so strikingly similar to a place in South America where he had been engaged in similar experiments.

Dr. Fahrig is a scientist of note, whose headquarters are in London. Like all of the truly great he approaches one with a simplicity of manner which in no way suggests his interesting career. He has been personally acquainted with the scientists Darwin and Huxley, as well as many others whose names have become famous throughout the world. Dr. Fahrig revealed himself in a sentence yesterday when he said: "I have worked and studied along this line for fifty years, yet every day since I have been here I have learned something I had failed to see before. This is indeed an interesting locality."

Newark People In Storm

Prof. and Mrs. Harold Tiffany have returned from a vacation in Connecticut and at Delaware Water Gap, Pa. Prof. and Mrs. Tiffany were staying at the Gap House last Friday when the terrific storm visited that locality. This hotel is situated on the highest point in the village, consequently was not affected by the rush of waters that inconvenienced the hotels farther down the mountain. The storm raged for five hours, from 1 to 6 p. m., during a part of which time it was as dark as night. Mrs. Tiffany in speaking of the storm today pronounced it the worst she had even seen.

350 persons attended the field Day exercises of New Castle Grange at State Road last week.

LOCAL HORSE WINS IN NEW YORK

Congratulations For H. R. Tyson

Harry J. S., the black stallion, trained at Newark, now being driven by H. R. Tyson on the Grand Circuit, repeated his success of last week, on Monday at Empire City Park, where races are being held in connection with the Greater New York Fair.

Harry J. S. is owned by Harry J. Stoeckle of Wilmington. The horse won the race in three straight heats, the best time being recorded in the third when the horse traveled in 2.13. The event was the 2.14 class trot and the purse \$1,000.

Death Of Prominent Delawarean

John H. Rodney, the well-known lawyer of New Castle, died at the Germantown Hospital, Philadelphia, on Sunday, aged 74 years. He was a descendant of Caesar Rodney of Revolutionary fame and was graduated from Princeton in 1859, and later from the Harvard Law School. Six sons, Capt. Geo. B. Rodney, Fifth U. S. Cavalry, Lieut. Dorsey B. Rodney, and Geo. H. Rodney, also of the Army, Keith Rodney of Germantown, Pa., Richard S. Rodney, Mayor of New Castle, and James Rodney of Parkersburg, Pa., and two daughters, Mrs. F. de H. Janvier of New Castle, and Mrs. Sarah D. Faulkner, wife of Capt. Albert Faulkner, U. S. A., survive him, and also a brother and five sisters. His funeral was held yesterday with services at Immanuel Church, New Castle, of which he was long a vestryman.

Special Service At Christiansa

Services will be held in the Presbyterian Church of Christiansa village next Sunday morning at the usual hour. Holy Communion will be observed and at the same service two elders will be ordained.

W. C. T. U. Meeting

The regular meeting of the local branch W. C. T. U. will meet next Friday evening at the home of Miss Martha Pennington.

Increase In Price Of Milk

Milk will be advanced to 8 cents a quart September 1st is the information sent out by the local milkmen. This increase in price is a month earlier than usual and is due to the shortage of the milk supply, caused by lack of pasture due to the dry weather and the high price of feed.

QUESTION OF AUTO ASSESSMENT REVIEWED

Statement From The Board

Apologues of the automobile assessment discussion, is printed below a recital of the historical facts in the controversy as taken by a member of the Board, from the minutes of the meetings:

Newark, Aug. 5, 1913.

Editor of Post:
In response to your request I would say that the Board of Education took up the consideration of the assessment of automobiles in the year 1910. And it was at that time announced through your paper that the Board contemplated assessing automobiles the following year.

Automobiles were included in the assessment for 1911 for the first time and all paid their assessment but one, who claimed that the assessment was illegal. The Board consulted its attorney who gave as his opinion that the assessment was legal. The assessment for 1912 also included automobiles as the person who claimed that the assessment was illegal declined to accept our attorney's opinion, claiming that his own attorney advised him that the assessment was not legal, it was necessary to have a suit at law to determine the case. A friendly suit was instituted and the case tried and decided in favor of the legality of the assessment of automobiles for school purposes.

In determining the amount to be placed upon each machine the Board discussed thoroughly all the

WOMEN'S COLLEGE COMMISSION MEETS

School To Open In September 1914

At a meeting of the Affiliated College Commission, held in Wilmington on last Monday plans by six different architects were submitted.

Meeting will be held on Monday next when the details of decision will be considered. Although this will probably take some time, the Commission feels sure that the buildings will be ready by Sept. 1st, 1914.

As one member expressed himself, "The College for Women will open in Sept., 1914, if the Commission is required to rent a church for class rooms. An Act of Legislature has authorized the Board of Trustees to make such provisions and rest assured it will be done."

Storms Play Havoc Throughout Delaware

The electric storm of Friday night did great damage in many sections of Delaware. The greatest loss, \$20,000, was at Seaford, where the shirt and overall factory of Carter, Webster & Co., was burned with its contents. Among barns burned were George E. Hurd's at MacDonough, with 1300 bushels of wheat, two of William D. McMullen's near Port Penn, Mrs. W. A. Comegy's near Middletown, with several hundred bushels of wheat, W. J. Twilley's near Delmar, Senator Record's near Laurel and E. C. Reese's Harrington, along with a dwelling. Wind damaged corn and tomatoes and buildings in various sections of Kent and Sussex counties. The continuous glare of the lightning to the north of Wilmington led residents to think that a big fire was raging in or near the former city.

Wilmington As A Shipping Port

Major R. B. Raymond, United States engineer in charge of the local district, on Tuesday made public the report he had sent to Washington of the work done in the rivers and harbors of the district during the past year. The tonnage and value of the leading articles shipped to the port of Wilmington last year were 650,559 tons, worth \$44,355,931, while the shipments of coal, quarry stone, manufactured products, leather, chemicals, iron supplies, machinery, agricultural products, paper, cotton goods, etc., amounted to 478,605 tons, with a value of \$69,965,131.

COUNCIL HOLDS INTERESTING MEETING

North College Avenue Widened—Reports From Special Committees

No action was taken at the monthly meeting of Town Council on Monday night relative to building ordinances to govern the erection of buildings within the town limits in the future. Council, however, is still working on the proposition and such an ordinance will no doubt be passed in a short time. Secretary Herdman reported that at the request of Council he had written to the town officers in several towns about the size of Newark, asking for copies of their building laws. Replies were received from Smyrna and Dover to the effect that they had no building ordinances which places them in the same class as Newark when it comes to uniform building lines. Dover, however, prohibits the building of frame buildings on certain streets.

Seaford and Milford have ordinances governing the erection of buildings and consequently an established building line. Copies of these laws were sent to Council. Seaford also prohibits the erection of frame structures on the principal business streets.

Bids were opened for the laying of curb and gutter on North College Avenue to the town line as follows: B. A. Vandergrift, \$1,019.14; L. B. Jacobs, \$860.60 and Samuel Little, \$774.50. The contract was awarded to the latter. The street is to be widened at the same time and later Council will macadamize the street from the railroad to the county line. Practically all of the property owners along the street realizing the great benefit this improvement will be to them have offered to give what will be necessary of their land to widen the street free. Joe Ferro, who owns a property that sets well out on the street is the one exception. It is understood that Ferro claims his property will be greatly damaged and wants \$1,000 if the town takes about 8 feet of his front, the amount of the ground required.

The matter was discussed in Council and it was agreed to offer him \$54 damages.

Council entered into an agreement with the Levy Court whereby the latter body gives the town authority to dig up the county road near the site of the disposal plant to lay the sewer providing the road is restored to as good condition as before it was disturbed.

An ordinance providing for the imposing of a fine of \$15 for the using of town fire hydrants for any other purpose than a fire unless a permit is secured, was given first and second reading.

Councilman Frazer to whom the matter of looking into the feasibility of laying conduits along Main street to get rid of the overhead wires was referred, reported progress. Mr. Frazer said he had talked with some people who thought the project was feasible. He stated that a representative of the Diamond State Telephone Company had informed him that his company would have a suggestion to make on the subject at the next meeting.

The report of the treasurer for the month of July was as follows:

Balance at previous meeting	
Received from sale of light	\$2,207.93
Received from sale of water	619.44
Tapping mains	361.08
1913 tax	15.00
Fines from Alderman	6,532.98
Total	17.23

DISBURSEMENTS.

Paid on Town account	\$2,185.04
Street account	267.64
Light account	1,878.16
Water account	1,624.73
Total	\$6,955.57

This left a balance of \$2,798.11. Of the amount paid out \$6,000 was on notes that were taken up.

SPECIAL MEETING OF COLLEGE TRUSTEES

New Heating Plant To Be Installed

A special meeting of the Board of Trustees was held at the president's office, Delaware College, on Monday, when action was taken upon the installation of a heating plant. The treasurer of the board was authorized to negotiate a loan of \$15,000 for the installation of a new heating plant. The matter of making it a combined plant for heating and lighting was discussed but it was decided to continue to buy the current for lighting the buildings from the town.

The prudential committee of the board was given the authority to make all arrangements for having the new plant installed. This committee consists of Dr. G. A. Hartor, chairman; Lewis P. Bush, George G. Kerr, Dr. H. G. M. Kollock, and Samuel J. Wright. Governor Charles R. Miller was also added to the committee. Before final action is taken on the size of the plant this committee will consider the advisability of making it sufficiently large to also furnish heat to the buildings of the Women's Affiliated College. If it is feasible from an economical standpoint this will probably be done. The location of the new plant will be north of the college and near the Baltimore and Ohio railroad. This is about three quarters of a mile from the site of the Women's College.

A report also was made by the Committee on Buildings and grounds, recently appointed on the location of the greenhouse. The committee, composed of Chancellor Curtis, F. C. Bancroft, Thos. Davis, recommended that the greenhouse be placed on a plot in rear of the old dormitories, as near the heating plant as was advisable.

The following resolution adopted at the recent alumni meeting, was presented but action was de-

ferred until the next regular meeting:

Resolved:—That the Board of Trustees be urged to authorize the specialists of the Faculty and Experimental Station to take charge of the College grounds with the view of such skilled treatment of lawns, trees and shrubbery as shall make sure that the grounds be brought to the highest possible condition of health and beauty and to present a permanent illustration of landscape gardening.

OBITUARY

Mrs. NANCY GREGG, 80 years, widow of Robert Gregg, died Wednesday at her home in Newark. Three sons, John, George and William, survive. Funeral services were held last Saturday. Interment Cherry Hill Cemetery.

Mrs. KATHARINE McKEON, 65 years, died at her home on Chapel street this morning after a lingering illness. Funeral services on Saturday, August 9th. Mass at St. John's R. C. Church at 9 o'clock.

Five children, Thomas McKoon, Pittsburgh; Mrs. Harry Hill, James Ella and Esther of Newark, survive.

JAMES L. CROSSAN.

James L. Crossan, aged 70 years, died last Thursday at the home of his son, William L. Crossan, near Newark. Death was due to Bright's disease. Mr. Crossan is well-known in this community where he has lived for years on a farm north of town, from which he retired about 18 months ago. Four children, William, Irving and Howard Crossan survive.

Funeral services were held from the residence of his son. Interment in Red Clay Creek Cemetery.

The five month old child of Mrs. Ransom Dempsey, which died from spinal meningitis, was buried from the home of its mother this afternoon. Interment Christiana village.

FARM OBSERVATIONS

LESSONS FROM OUR NEIGHBORS

A veteran Delawarean who has achieved marked success as a farmer stated recently he had learned more from his neighbors than from any other source. He acknowledged his indebtedness to books and bulletins, to experiment stations, and to farmers' institutes, but the example of good farmers was always before him. With something like this in mind, Mr. O. A. Newton and Mr. N. L. Grubb, members of the State Board of Agriculture, visited New Jersey to learn from their neighbors across the river whatever might appear to be useful to Delaware farmers.

Crossing from Wilmington to Pennsboro and going in a southeasterly direction, the land appears to be fairly fertile and productive and many vegetables, such as early potatoes, cabbage, onions and tomatoes were going to market. Tomatoes especially were being harvested. Some of them were picked green showing that they were intended for distant markets. It was noted all along the way that sometimes a fertile, well tilled, productive farm was alongside a neglected, idle farm. The same thing occurs in Delaware. Side by side are good farms and poor; good farmers and poor farmers, good crops and poor. Why? The land is the same—the man is different. One may be handicapped by lack of capital, but in most cases the handicap is in the man himself—his lack of industry, skill and ability to devote himself to his business. The lesson is not new; it is not confined to Delaware nor to New Jersey. It is in all climes, among all people in all kinds of human endeavor. We need better men. It is the duty of the State to make conditions suitable to the production of better men. Every poor farm is a financial detriment to the State. Every thrifty, honest, intelligent farmer is a valuable asset to the State and the Nation. The State ought to help its poor farmers to become good farmers. The task is not simple nor easy. It should, however, be undertaken. The slow, dull pupil in school is the difficult pupil; but the school is for the slow and dull as well as for the quick and the brilliant. Here is a nation-wide problem—to raise the efficiency of the inefficient man—to raise the efficiency of every man.

The great lesson of the trip centers around soil management, business methods in farming, drainage where the land is wet, good tillage, filling the soil with vegetable matter by the use of legumes which also draws fertility from the air, and using commercial manures liberally and intelligently.

Southern New Jersey has recently experienced a notable development in growing white potatoes and other vegetables, in apple and peach orchards and other fruits, in poultry, and in the comfort, convenience and beauty of the country homes. Chemicals and clover, intensive methods, careful guarding against diseases and pests, co-operative marketing tell the story. The farmers who have followed these methods intelligently have made money. Southern New Jersey has barren sand, but not so barren but that tillage, humus, legumes and chemicals may easily and readily make them fertile and profitable. It is true that there are lands in the world that are naturally more fertile than these sandy lands. In southern New Jersey there are spots of absolutely barren sand and right alongside of those spots are farms made from the same barren sand that are producing the most luxuriant crops at a great profit. These farms were not made fertile in a minute, and they were not made fertile except by the investment of capital and labor in them. Of course it would be folly for any one to pay as much for the barren sand as he would pay for the fertile, productive farm alongside it, but there is really no excuse for the sand remaining barren for it will amply repay the sum required for its purchase and the larger sum required for its improvement.

A night and the following forenoon were spent at Vineland. Fifty years Vineland was little but a stretch of sandy waste; now it is a town of nearly 10,000 people. Along the business street, which is wide, houses and stores are crowded close together, but outside of this street houses are scattered, each standing in the midst of a little park, and all about the town are small farms of five or ten acres, and occasionally twenty

acres or more. Nearly all of these farms are devoted to poultry and to peaches or other fruit. Peaches are becoming very popular and very profitable. Probably two-thirds of those engaged in the poultry business are making a decided success of it, and this is rather remarkable because of the fact that a large proportion of those who have gone into the business are town people or city people who have had no experience in the country. One of the most striking sights near Vineland is the famous duck farm of S. Huey. More than forty thousand ducks have already gone to market from this farm this season. The flocks of white ducks remaining cover acres of ground around a pond, and one would almost think that there were millions of them instead of thousands.

The people around Vineland are under obligations to certain men who came into the neighborhood for the express purpose of improving it. Among these are the Fels (who make naphtha soap). They bought fertilizers and manures in a wholesale way at the lowest possible price and sold them to the farmers at cost, and then gave the farmers as much time as they needed to pay for them, whether it was one year or several years. They also put up a canning factory to take care of the products that the farmers grew, and for a number of years they ran this factory at a loss rather than a profit. They pay good prices and require good stuff, and they are now reaping the reward of their labors and of their benevolence, and the development of Vineland has been greatly stimulated and hastened by the credit given the small farmer. It is a fine example of what may be done by the co-operation of capital and labor, bound together by the "strong and friendly tie of agriculture," aided by all that art and science could contribute towards the happy result. Now, the State and Nation are willing in a number of ways to add to this co-operation, this friendliness, this prosperity, this ideal condition of country living. Close to Vineland are demonstration poultry plants, and experiment farms where field study is given to growing grapes.

Public and private charitable institutions have been established and state roads of macadam or gravel add to the attractiveness of the neighborhood. Naturally land has become high in price. The Fels own a farm that is really a demonstration farm. It is in charge of Mr. R. M. Lipman, a brother of Dr. J. G. Lipman, of the New Jersey Experiment Station, one of the greatest soil experts in the United States, if not in the world. When they decided to start the canning industry, they got a Delaware man Mr. E. D. Sawyer, and told him to make a study of conditions, to build up a business and at the same time to help build up the community. The results show that careful study has been given to every detail of the canning business, until sweet potatoes are canned in such a way that they preserve almost their natural freshness. A machine has been made to core tomatoes. A device simply picks out the tomato stem and the usual little green spot surrounding the stem. The waste is greatly reduced, so that the product from a given quantity of the fruit is increased about 15 per cent. Besides this the tomato is not bruised, nor broken, and the best specimens can be sealed and skinned and gently placed in a new style flat can holding a half dozen tomatoes in a single layer. These are as good in January as tomatoes fresh from the green house, and at much less cost.

From Vineland a run was made straight north to Glassboro where Repp Brothers have extensive apple orchards and are now putting up for their use a new cold storage plant that will hold 80,000 bushels of apples. A few years ago they put up a 30,000 bushel plant, but soon found it inadequate to their needs. The striking features of their methods of apple production are high fertilization of the orchards, little pruning, tillage early in the season, and then growth of natural grasses and weeds to hasten the ripening of the wood and hardening the fruit buds for the following year. By this method they have annual crops of fruit. Of course they spray thoroughly to prevent disease and insect injury.

From Glassboro to Marlton and Moorestown is only a short distance and here the Barton Brothers are

specialists in peach production, and Horace Roberts and his sons are masters of a dozen or more farms devoted to apples, peaches and vegetables. They have adopted the Repp method of liberal fertilization and little pruning. They grow legumes, tomatoes and other crops, instead of weeds, in their orchards.

The Barton Brothers take the lead in growing peaches, and by their methods, which include spraying with self-boiled lime-sulphur solution, their orchards are annually well loaded with fruit. They also raise apples and vegetables with marked success. They had vetch a good cover crop for their orchards and sow it rather early in the season at the rate of ten pounds of seed per acre.

Horace Roberts might be said to make a specialty of apples, except for the fact that he raises great quantities of peaches, strawberries, tomatoes, string beans, watermelons, and other crops with the same marked success as he raises apples. The beans are grown in the orchards and do not interfere with the cultivation of the orchard, the spraying, or with the yield of fruit. They are shipped to distant markets by the earload. Tomatoes are grown down the strawberry rows the first year. In other words, while the strawberry plants are growing, the land produces a crop of tomatoes. Besides the fruit and vegetables that are sold at the nearby exchange, or shipped in car lots, Mr. Roberts keeps teams on the road hauling his goods to the Philadelphia market. He also has an auto truck that takes about 160 bushels to a load and makes several trips per day. Of apples, he has many early and summer va-

rieties and finds the Gravenstein one of the most prolific and most profitable in his orchards. His spraying is so thorough that the visitors did not find a specked apple on the trees, on the ground, among the fruit that was ready for market, nor even among the culls. The products of all the Roberts' farms last year sold for \$85,000. When asked how he attended to all the details of so much business, Mr. Roberts replied, "Why not? I have nothing else to do."

Christmas Stamps Designed

The Red Cross, through the National Association for the Prevention of Tuberculosis is now printing one hundred million seals which will be distributed beginning September first, for use on Christmas packages.

The seal this year will be very different from that in the years past. The design was drawn by the New York artist, C. J. Bubb, who was awarded a prize of a hundred dollars for the drawing.

The seal this year will be rectangular in shape, one and one-half inches wide and one-inch deep. The center will depict Santa Claus with his eight reindeer and the border will be a brilliant red and green, in poinsettias and holly, with the Red Cross emblem on either side. They sold last year Christmas seals amounting to \$400,000.

A square crab trap, of wire, which opens when dropped overboard, has been invented by Capt. Henry Fish of Lewes.

Dogs running at large at Rehoboth Beach are required to be muzzled.

Printer's ink won't make the car go. There's only one reason why 200,000 new Ford's can't possibly satisfy this seasons demand. The car itself is right with a whiteness that is unmatched anywhere at any reasonable price.

Our great factory has produced nearly a quarter of a million Model T's. Prices: Runabout, \$525; Touring Car, \$600; Town Car, \$800—f. o. b. Detroit with license. For particulars get "Ford Times"—an interesting automobile magazine. It's free—from Detroit factory. Ford Motor Company, 1444 Michigan Ave., Chicago.

KEEPING WELL INSTEAD OF GETTING WELL

Prominent scientists declare that a TEASPOONFUL OF GRAPE JUICE will kill all the typhoid germs in a glassful of water.

Grape Juice is a food, the nearest thing to milk. Its elements gluten and grape sugar make flesh and muscle. Grape Juice supplies a perfectly pure water, sweetened and flavored by nature herself. An excellent tonic served as a delicious and refreshing drink.

On your next trip down town, when tired and fatigued, try a glass of

BASE BALL NEWS-- GAMES OF THE WEEK

TRI-COUNTY LEAGUE

The Newark team gave Elk Mills a hard battle last Saturday on the Elk Mills diamond. The game was a pitchers' battle between Hogan and Keeley. A two bagger and two singles in the fifth practically won the game for Elk Mills, giving them two runs. "Little Billy" Jackson, by fast work on the base paths, tallied Newark's lone in the next inning. The score:

Stolen bases, W. Jackson, Rankin, Howarth, Ellison, Steele; sacrifice hit, Johnson; two base hit, P. Jackson; double play, Coslett to Steele; struck out, by Hogan, 6; by Keeley, 10; base on balls off Hogan, 2; off Keeley 1; Wild pitch, Keeley; hit by pitched ball, Steele by Hogan; passed balls, Marsey, 1; Moore, 2; time of game, 1 hour and 40 minutes. Umpire, Cloak; scorer, Hoffecker.

A band of loyal rooters accompanied the boys to Elk Mills. Keep it up friends. A little encouragement goes a long way.

Mr. Keeley for the opponents "had the goods," but we are wondering if he has resided in or near Elk Mills very long. If so the base ball scouts of this league are rather slow in finding pitchers.

Every body turn out for good hard practice this week and bring up that percentage column.

Aberdeen defeated Oxford, the leaders of the league, on the former's grounds by the score of 4 to 2. By bunching their hits in the sixth inning Aberdeen scored 3 runs. The feature of the game was the hitting of 1st baseman Hansen of Oxford. Score by innings:

	R.	H.	E.
Aberdeen.....	0	0	0
Oxford.....	0	0	0

Batteries—Bennett and Bruff; Reynolds and Thomas.

Elkton by costly errors lost Saturday's game to Havre de Grace on the Elkton grounds. Finn, who replaced Smith in the third inning held the visitors to three scattered hits. Score by innings:

	R.	H.	O.
Havre de Grace.....	0	3	2
Elkton.....	0	0	0

Batteries—Klinghoffer and Nichols; Smith, Finn and Scott.

Standing of the Clubs:

	W.	L.	Pct.
Oxford.....	9	4	.693
Elk Mills.....	8	5	.615
Aberdeen.....	7	7	.500
Havre de Grace.....	6	8	.428
Elkton.....	5	8	.384
Newark.....	5	9	.357

PENN-MAR LEAGUE.

Newark Field Club increased their percentage in the Penn-Mar League by defeating Bay View on the Newark diamond by the score of 10 to 3. By bunching their hits in the fifth inning the home team scored six runs. The score:

	R.	H.	O.	A.	E.
Ferguson, lf.....	2	0	2	0	0
Herdman, 3b.....	0	0	1	0	1

	R.	H.	O.	A.	E.
Lovett, 1b.....	3	2	7	1	0
Dawson, rf.....	1	1	1	1	0
Goodnow, ss.....	1	2	1	1	1
Murray, 2b.....	1	1	5	1	0
Gray, cf.....	1	2	1	0	1
O'Daniel, c.....	1	1	8	2	0
Holton, p.....	0	2	1	3	0

10 11 27 9 3

BAY VIEW

	R.	H.	O.	A.	E.
Biddle, cf.....	0	0	0	0	1
Brickley, c.....	1	1	9	1	1
Cameron, 3b.....	0	1	2	0	1
Reynolds, ss & p.....	1	2	3	1	2
A. Armour, 2b.....	1	3	2	4	0
Fox, rf.....	0	0	0	1	0
Harris, lf.....	0	1	1	0	0
Russell, p & 1b.....	0	0	5	2	0
Goodnow, 1b & 3b.....	0	0	3	0	1
E. Armour, lf.....	0	0	0	0	0

3 8 24 9 6

Newark.....2 0 2 0 6 0 0 0 x-10

Bay View.....2 0 0 0 0 0 1 0 0-3

Holton was invincible after the first round, keeping the hits well scattered.

Lovett played a pretty game at first, taking all that came his way.

The visitors did considerable kicking, practically about nothing. Every body chimed in. What is a captain for?

A double bill on for next Saturday. Get together and take both games.

The percentage table looks better this week. Keep that coveted "rag" in mind and "go get 'em."

Providence defeated Iron Hill at Providence by the score of 13 to 4. Providence scored eleven runs in the fifth inning.

Strickersville surprised Appleton on Saturday by defeating them to the tune of 7 to 3.

Standing of the clubs:

	W.	L.	Pct.
Providence.....	9	2	.819
Iron Hill.....	5	4	.555
Newark.....	6	5	.545
Appleton.....	5	6	.455
Bay View.....	4	5	.455
Strickersville.....	2	9	.182

Schedule for Saturday, Aug. 9: Newark at Strickersville (2 games); Appleton at Iron Hill (2 games); Providence at Bay View.

Fossett pitched fine ball, keeping the hits well scattered and fanning fifteen men.

NOTICE!

To the Taxpayers of PENCADER HUNDRED

The Taxpayers of Pencader Hundred are hereby notified that I will be at the following places to receive County, Poor, Road, Capitation and Dog Taxes, for the Year 1913.

COOCHES BRIDGE.

July 28, August 20, 1 to 2 p. m.; September 23, October 21, November 18, December 16, 9 to 12 a. m.

GLASGOW

July 28, 2:30 to 4 p. m.; August 20, 1 to 4 p. m.; September 23, October 21, November 18, December 16, 1 to 4 p. m.

SUMMITT BRIDGE

July 30, August 21, 9 to 11 a. m.; September 25, October 22, November 20, December 17, 9 to 12 a. m.

KIRKWOOD

September 25, November 20, December 17, 2 to 4 p. m.

AT HOME, SUMMITT BRIDGE

Every Thursday Afternoon.

EXTRACT FROM THE LAWS OF DELAWARE, GOVERNING THE COLLECTION OF TAXES OF NEW CASTLE COUNTY, SECTION 3, CHAPTER 30, VOLUME 21, LAWS OF DELAWARE, AS AMENDED:

Section 3.—That on all taxes paid before the first day of October there shall be an abatement of five per centum. On all taxes paid before the first day of December there shall be no abatement of three per centum. On all taxes paid during the month of December there shall be no abatement whatever. And on all taxes unpaid on the first day of January there shall be added one per centum per month until the same shall be paid.

HOYD MCCOY, Collector.

Send Stamp for reply.

AUGUST 6, 1913

WE SAY DELMARVIA

For an editor born and reared within a few miles of the Harrison's Nurseries to attempt to describe the visit of last week—well in the first place we couldn't do it justice and again, rural New Castle would hold us accountable for violation of the rules of newspaper truth if we were to tell what we really saw.

Realizing this, our report in another column was written by a stranger in that locality. He says, after that dinner, he was too full for utterance and words describing the visit failed him too.

Just as the recent editors' dinner was the beginning of a closer relationship and heartier co-operation between the different sections of the tri-State peninsula, this visit to Berlin will mark another red letter day in this campaign of development and better things.

The Chamber of Commerce did themselves proud and those in charge are to be congratulated for the success of the special train, loaded with Delmarvia enthusiasts. And the hosts, well for a royal entertainment and hospitality with out stint and ostentation, Berlin, Harrison's and Maryland—all mean about the same thing—they can't be excelled.

But aside from the enthusiasm, aside from the social intercourse, the results of which cannot be reckoned, the meeting afforded a striking lesson of the possibilities of agricultural and fruit growing on this peninsula.

The saying that this is the Garden spot of the world is true but by constant repetition has become more or less trite. We fail to grasp the significance of its truth. The realization of this vital faith, by the whole people, is the responsibility of the Chamber of Commerce through its publicity department. We are glad to say, they seem to sense the duty well and unforeseen results are predicted. It is suffice to say that the visit was a revelation to many of the guests. Wilmington realizes better than ever before that there is a rural peninsula worth of her pride and attention and that her "Acres of Diamonds" as usual, lies at her very door.

Those who did not attend should make it a duty to visit Harrison's nurseries. There every farmer can be taught a lesson well worth while. It is a striking example of what can be accomplished by "work, scientific treatment of the soil, commonsense, nigger and the mule."

We are in receipt of a fine basket of peaches this morning with the compliments of the Harrison Nurseries. On exhibit in our window today, they are attracting merited attention.

Question Of Auto Assessment Reviewed

(continued from page 1)

Another suggestion was that "the automobiles be divided into three classes; and the 1st class assessed at \$100; the second class at \$200 and the third class at \$300." This would make the owner of a \$600 machine pay \$6 a year school tax on it while one who owned a \$5,000 car would only pay \$9 on his. This was not considered an equitable division of the school tax.

The State law requires the Board to make up the assessment list of the "rates of persons" and of the "rates of personal property," and of the "clear rental value of all the assessable real estate."

The Board has been trying to carry out the requirements of the law and have the amount to be raised apportioned among the tax payers in as equal a manner as prescribed under the law. The Board has been criticized for not assessing pianos and other personal property but the Board's attorney advised that household goods could not be assessed for school purposes.

Yours truly,

Joel S. Giddilan.

Weakness Of Auto Arguments

The weakness of the arguments of owners of automobiles are these: (1) The question of legality for assessing the machine for school purposes has been decided by the Courts. Whether it appears to be a discrimination by assessing this

particular piece of personal property is not pertinent to the real question. The decision handed down by the Courts is the strongest and, to the general public, a sufficient answer.

(2) The argument that an automobile is assessed at a higher rate than real estate is not a strong point at all. This condition is merely an example of our whole system of taxation. Not only is there a wide difference in rate of assessment of autos and the same investment in real estate but there are in many instances even wider distinctions in real estate investments.

The confusion in this question arises from the fact that real estate is assessed on rental value and autos on 25 per cent of real value. In our real estate here in Newark, some properties worth \$25,000 to \$50,000 pay less tax than other properties worth on the market perhaps only \$5,000 to \$15,000. This seems and it is unfair but it is the legal method of taxation and the small property owner or investor has no redress. It is the system that is wrong and while practically every man recognizes this fact, it has for years, been impossible to remedy this by act of Legislature. The reason for this has been the deterrent influence of large owners, who by the assessment on rental value, escape this just tax and throw the greater burden on the tenant. This same condition applies to properties in town.

(3) Another weak point is this: At the third meeting of the School Board, it was understood that the automobile owners would accept without protest an assessment of 20 per cent of the value. This meeting was held at the request of the owners of cars. They had a representative at that meeting who made this suggestion. The Board felt that their original agreement of the sliding scale of assessment based on age of cars was a fair one, yet in the spirit of harmony and in deference to the opinion of these tax payers, compromised and fixed the rate at 25 per cent the first year, 20 per cent the two succeeding years, 15 per cent the fourth year.

Now if 20 per cent was agreeable and legal in the opinion of the autoists, why does 25 per cent become an outrage? If the Court says it is legal to assess cars that is all there is to it. If, with that power, the Board of Education says the rate shall be 25 per cent, who decides that this is illegal? The Board certainly fixes the rate. This is entirely out of the jurisdiction of the Courts. The attempt to fix the rate on the earning capacity would place the auto in the same category as real estate. Instead the assessment on automobiles is based on a rate on real value as in stock and all other personal property.

Five thousand dollars invested in horses is assessed at approximately two-thirds of real value, while the same amount invested in auto is assessed at one-fourth of the real value.

The proposition made to the Board was a rate of 20 per cent. This for 4 years would amount to 80 per cent. Instead of making it a flat rate of 20 per cent for 4 years, the Board thought that a equitable way would be to assess a new car for 25 per cent and lower the rate in succeeding years as is illustrated by the methods of the insurance companies. The rate as agreed upon by the Board totals 80 per cent as suggested by the automobile owners. The only difference is the increase the first and last year.

Though not exactly pertinent to this question, it is, however, an interesting observation that owners of high priced cars are owners of high priced homes where \$5,000 to \$15,000 to \$25,000 is invested, yet they pay but little more tax than the \$3,000 property because the assessment on real estate is based, not on the real value but on the market rental value. Every one will admit the injustice of this, yet it is the legal system in this State.

While in theory it might seem that to assess auto is a discrimination against a class, yet in very fact, the auto owner is fortunate in his assessment.

PEOPLES' COLUMN

Owing to bulk of other matter the "Peoples' Column" is unavoidably crowded out this issue.

Here and There

John H. Wharton will replace his large store burned at Houston recently with a fine brick structure.

The funeral of John Francis Atkinson, a well-known wing shot and fisherman of New Castle, formerly of Elkton, was held last Monday with interment in St. Peter's Cemetery.

Coroner John T. Spring was severely injured by falling down the front steps at his home in Wilmington one day last week.

Fifteen schoolhouses in Sussex county have been condemned as crowded and unsanitary and will be replaced by new structures.

General Manager Myers of the Wilmington Southern Traction Company will have 200 Norway maple trees planted in Ocean Beach Park, New Castle, this fall.

Hon. W. J. Bryan, Secretary of State, is booked for a lecture at Oxford, Pa., Chautauqua, on August 30th. Postmaster J. D. Moore and others are planning for a rally of the local admirers of the "Commoner" on the occasion of his visit.

George W. Padley and William E. Taylor, both of the First district, will seek Republican nomination for County Commissioner, the former for the long and the latter for the short term, at the coming primaries in Cecil county or September 8. Charles W. McKenney of the Ninth district will oppose Walter C. Martindell, Democrat, the incumbent, for nomination for Assistant Treasurer or Clerk to the County Commissioners.

The work of improving the Elkton-Northeast section of the old Post road is nearing completion. The surface of the road, save for one stretch of gravel, is of concrete which the State Road Commissioner will favor largely in future contracts.

For the month of July the Clerk of the Cecil Circuit Court issued 110 marriage licenses at Elkton compared with 190 for the whole of last year.

Elkton dogs are now wearing muzzles owing to the visit of a strange hound that ran through the streets last Monday night snapping at or biting dogs that it met. It was killed on Landing Lane by Malvern Jeffery and Bailiff Potts after escaping a dozen or more shots from pursuers.

The dwelling of Frank Burns, Jr., near Singler's, was burned with its contents during the absence of the family on Wednesday night. It is thought that the house was robbed and set on fire. The property was partially insured.

The funeral of Mrs. Clara Alexander, wife of James P. Alexander, rural carrier on the Elkton-Glasgow-Pivot route, was held on Wednesday with interment in Elkton Cemetery. She died on the previous Sunday of paralysis, aged 57 years. Her husband, two sons and a daughter survive her.

Jackson Union Sunday School of Covantown, cleared \$18.24 from the recent lawn sale.

Three young daughters of John Russell of the Leslie Station section were poisoned early last week, the eldest, Leora, aged 8 years, fatally, by eating berries of night shade or belladonna along with blackberries and wild cherries which they picked near their home.

Odd Fellows of Kent and Cecil counties will hold a rally at Betterton on August 22. An excursion will be given from Elkton to Betterton on the day of the meeting.

The concrete work on the new P. B. & W. R. R. bridge over Bush River has been completed and workmen are now putting the draw in position.

A marriage license was issued at Elkton on Friday to Mark Yen, a Chinaman and Catherine Thoms, a white woman, both of Philadelphia and the couple had the knot tied promptly. Lee Wang, Elkton's laundryman has had two white spouses.

Wilmington Board of Assessment, Revision and Appeals will shortly proceed to exercise the power

conferred upon it by the Legislature to frame a model system of assessment so as to equalize taxes, increase revenue and prevent annually recurring deficits.

Delaware's oysters are becoming more profitable than her oysters. A Dover special says Capt. Harry Haggerty recently shipped 250,000 of the former to Philadelphia which sold there at \$11 per thousand.

Lightning last Tuesday night fired and burned the dwelling of Harvey D. Venables, near Laurel, causing a loss of \$4,000 with no insurance. The whole family were stunned but the parents revived in time to rescue their unconscious children, aged 4, 7 and 9 years, and Mrs. Minos Hastings, the aged and invalid mother of Mrs. Venables.

William Bonlden, aged 70, Jacob Monk, 37, and Bert Truist, 35, the latter of New Castle, all colored, were suffocated in a sewer man hole at Thirteenth and Lombard streets, Wilmington on Friday. Monk went to Boulden's and Truist to the help of both, and the three lost their lives. John Washington and Anthony Boston were also overcome by the fumes but recovered. Coroner's Physician Briggs concluded that sewer gas alone did not cause the death of the men, which will be fully investigated.

The Sheriff's jury cut the values by more than one half put by the owners of properties in the Tenth, Eleventh, King and French streets block in Wilmington, sought for a site for the new joint city and county building, fixing the total value at \$119,200 as against \$246,500, the estimate of the owners. The jury's awards were as follows: Dr. S. G. Elbert, \$39,000; mortgages, \$9,000; John W. Godwin, \$13,000; mortgages, \$12,000; Delaware Turf Club rental, \$1,200; The Knights of Columbus, \$14,000; mortgages, \$7,000; rental, \$1,500; Joseph T. and William S. Hill's, \$30,500. The awards are regarded as final. The City Council will shortly authorize a bond issue of \$900,000 and the Levy Court one for \$600,000 to defray the cost of the new structure.

ESTATE of Robert Armstrong, deceased. Notice is hereby given that Letters of Administration upon the Estate of Robert Armstrong, late of White Clay Creek Hundred, deceased, were duly granted unto Rachel Jane Armstrong and Robert L. Armstrong on the 19th day of July, A. D. 1913 and all persons indebted to the said deceased are requested to make payment to the Administrators without delay, and all persons having demands against the deceased are required to exhibit and present the same duly probated to the said Administrators on or before the 19th day of July, A. D. 1914, or abide by the law in this behalf.

CHARLES B. EVANS, Esq., Atty.

RACHEL JANE ARMSTRONG,

ROBERT L. ARMSTRONG,

Administrators.

NOTICE

The assessment of the Town of Newark for the present year 1913 has been posted at George W. Rhodes' Drug Store on Main street. The Council of said Town will hold a Court of Appeals in Council Room of Town Building on Academy street on Monday, June 23rd, 1913, from One to Six O'clock P. M. when they shall hear and determine appeals from the said assessment and make corrections or additions to the same.

A rebate of 5 per cent will be allowed on 1913 taxes paid before August 1st, 1913.

S. B. HERDMAN,

Secretary and Treasurer

Per order of Council.

SALES PROPOSALS—BIDS WILL be received by the Levy Court of New Castle County, at the County Engineer's Office, Court House, Wilmington, Delaware, up to 12 o'clock, noon, on July 8, 1913, for two ten-ton Road Rollers, driven by either gasoline or steam. Bids must be made to Benjamin A. Groves, President of the Levy Court of New Castle County, and each shall give a guarantee of good workmanship and performance for one year from purchase of same. June 12, 1913-July.

Newark, Delaware, June 25, 1913.

To our Depositors and Customers:

We take pleasure in announcing to you that the arrangement proposed, in our letter to you of May 1st, 1913, by which the Farmers' Trust Company, of Newark, was to purchase and take over all of the Capital Stock, property and assets of The National Bank of Newark, was finally completed on June 24th 1913, and that every share of the Capital Stock of The National Bank of Newark was represented and voted for the plan.

The new Company now owns all of the property and assets of the Bank, and will continue its business under the management of the following officers and Directors:

OFFICERS.

J. Wilkins Cooch, President, Alfred A. Curtis, Vice-President, Joseph H. Hossinger, Secretary, Henry Edwin Vinsinger, Treasurer.

DIRECTORS

J. Wilkins Cooch, Alfred A. Curtis, Samuel M. Donnell, Nathan M. Motherall, Crawford Rankin, Ernest Frazer, Joseph H. Hossinger, Eben B. Frazer, Daniel Thompson.

There will be no necessity for making any alterations in the checks now used by you, as the checks on The National Bank of Newark will be honored, in their present form, by the Farmers' Trust Company, of Newark.

We believe that under the present arrangement our facilities for promptly transacting any business entrusted to us have been greatly increased, and desire to thank you for your patronage in the past, and hope for a long continuance of our pleasant relations.

ALFRED A. CURTIS, J. Wilkins Cooch, President, Alfred A. Curtis, Vice-President, H. Edwin Vinsinger, Treasurer.

GUESTS AT HARRISON'S NURSERIES—BERLIN, MARYLAND

VISIT TO HARRISON'S A SUCCESS

Royal Entertainment—Nurseries A Revelation—Possibilities Of Peninsula Recognized

Maryland and hospitality have always been synonymous and never was this more fully demonstrated than on last Thursday when the Maryland and Peninsula Horticultural societies, Wilmington Chamber of Commerce and Delmarvia Press Association, totalling about 2,000 persons, were entertained by J. G. Harrison & Sons, nurserymen of Berlin, Md. Finding the proverbial needle in a haystack would be a delightfully easy task in comparison to finding a single disappointed person who took the trip. Their hospitality was of the lavish variety one reads of in stories of old kings and feudal lords, but seldom hears of in these days of aviating prices of living, much less being privileged to participate in.

Just to give a faint idea of the treatment accorded the visitors here is a list of the dinner served: 750 chickens, fried, 6 lambs, 50 hams, 250 pounds of fish, 4,000 Maryland biscuits, 250 loaves of bread, 5 crates of lemons, 2 barrels of sugar, one-half carload of cantaloupes and watermelons, thirty-five gallons of ice cream. This was served on two tables, each 200 feet long, placed under a rustic arbor covered with green boughs, affording a delightfully cool spot in which to enjoy the delicious cooking. An epicure would have considered himself fortunate indeed to

er and purer water and progress toward perfect sanitary conditions. A number of the speakers at the meeting of the horticultural societies spoke of the agricultural possibilities of the peninsula, declaring that at the present rate of progress in market gardening and fruit growing the entire peninsula promises to become a great garden section because of its proximity to the United States, and a few more years will witness still greater improvements.

Although in a number of sections the houses are widely scattered the ground gave indications of being able to produce many times its present output. It is only a matter of time until these lands will have been taken up and be supplying the wants of the city markets.

And no one has demonstrated more forcibly the possibilities of the peninsula than the Harrisons. The story of their achievements reads like a pleasing romance. For out of the apparently sandy waste they have built a business second to none of its kind in the world, and whose output is shipped to the far points of the earth.

It is an industry of which the peninsula should be proud. It is a huge laboratory demonstrating the wonderful possibilities of agricultural development of Delaware and the Eastern Shore. No more convincing proof could be given a prospective farm buyer than a trip to these nurseries. They completely surround the town of Berlin, covering thousands of acres of ground and are devoted to the scientific propagation of nearly every known fruit, plant and shrub in the world. The standard

ORLANDO HARRISON
(Head of Firm)

have been allowed to partake of such cooking. Ladies of the town turned out en masse to serve the hungry guests, who did full justice to the viands.

Talk about your lands flowing with milk and honey! They are "hum" imitations compared with the real thing on the Delmarvia Peninsula. Just try to convince a solitary one that was there that the Peninsula is nothing but sand and swamp and an unhealthy place in which to live as you could talk until black in the face and he would not be convinced.

The growing crops seen from car windows were an impressive object lesson of what the land will do under proper management. The trip was a revelation to many in more ways than one; they were particularly impressed with the appearance of the lower part of the peninsula and with the strides being made in the farming communities. Everything indicated a happy people living in peace and plenty. Many of the improvements are being brought about through the efforts of the horticultural societies, such as the more general cultivation of land, better drainage, deep-

fruits and berries are the main products but shade trees, flowers and ornamental shrubbery are all grown here on an immense scale. A mere printed description can give but the faintest idea of the reality, and even personal observa-

tion, limited to a fraction of a day, as this trip was, can convey only a suggestion of the magnitude of these orchards and nurseries and the achievements of the proprietors. They are the kind of men who make the desert bloom as a rose

and two blades of grass grow where but one grew before. After luncheon the guests were conveyed by automobile to the nurseries and orchards. The peach orchards were of greater interest to (continued on page 7)

NOTICE!

Get Ready for Fall Sewing

Needles, Shuttles and Bobbins for
use in All Makes of Sewing Machines.

Did You Ever Start
Your Sewing, Break
a Needle and Being
Unable to Replace
It Have To Send
Away To Get The
Exact Make Before
You Could Continue?
Nuisance, Isn't It?

Heretofore the Hardware Dealer kept only a few assortments and was unable to supply the demands for the many machines.

Well I have an ASSORTMENT HERE where In A Minute, by Revolution of the Dial, I Can Supply Just The NEEDLE YOU WANT.

In itself, it is a Wonderful Invention. When that needle breaks, send up here to get a supply. It makes no difference what make the machine is, I Have the Needle.

ANOTHER THING---The Most Trying Thing About Sewing Is Threading The Needle. It tires the nerves, strains the eyesight.

HERE'S THE REMEDY

This Little Contrivance
Makes It Seem Like a
Sleight of Hand Trick.
Easy! Any one can Use
It at first trial.

Stop in and see these
Machine Supplies before
starting your Fall Sewing.

Simple, durable, automatic.
It threads any needle (sewing in the dark,
blind stitching, 1 and 2 attachments,
No twisting, biting or cutting thread.)

NOTES---As soon as it rains, you will want some Turnip Seed. I Have a Full Line, Fresh, Just Received.

ALSO; Plow Equipments for Fall Plowing. Get fixed up before you start. It will save time. Come here and you save money.

Here and There

The Laurel-Bethel Camp Meet-
 ing sale of privileges yielded \$300.

Delaware marksmen will not
 participate in the National rifle
 matches at Camp Perry, Ohio, this
 summer but members of the Militia
 will have practice at the State
 Range next month.

Sixty students at Girard Col-
 lege, Philadelphia, were entertain-
 ed at New Castle on Thursday by
 Prof. and Mrs. H. H. Hay.

Ladies of Red Lion M. E. Con-
 gregation expect to clear upwards
 of \$100 from the sale of a mono-
 gram quilt which they are making.

Dorsey Bowen brought the first
 home grown grapes of the season
 to Milford on Thursday.

A bug on Wednesday evening
 entered the left eye of Mrs. John
 L. Johnson, wife of the pastor of
 New Castle M. E. Church, while
 she was seated on the porch at her
 home, and for a time it was feared
 that her sight would be impaired.

Wilmington City Council is con-
 sidering the erection of a wharf
 along the Christiana, at the foot of
 Church street, for the convenience
 of Jersey truckers serving the city
 markets.

Retiring Clerk of the Markets
 Victor Cael suggests to Wilming-
 ton City Council that the Farmers'
 market be moved from King to
 French street and King street re-
 served to hucksters.

Committees of the Wilmington
 City Council and Chamber of Com-
 merce will co-operate in arranging
 for the Old Home Week celebra-
 tion, to be held during the week of
 the State Fair in September.

Chicken thieves are active in the
 Milford section and residents are
 roused by their depredations.

John W. Bassett of Georgetown
 has a new variety of sweet potatoe,
 grown in seven weeks.

Anglers are reported as catch-
 ing fine specimens of bass and
 trout along the shore of Delaware
 Bay.

Weeacoe and Brandywine Fire
 Companies of Wilmington pur-
 pose purchasing auto-tractors to
 draw their apparatus, displacing
 horses.

A valuable Angora cat owned by
 Elmer Robinson of Wilmington,
 died from swallowing a ball of its
 own fur.

Camp Ideal A Success

(continued from page 1)

The cooking is done by details, each consisting of four boys, who take a day's turn at doing the work. Their attempts are interesting as well as amusing and they will probably be expert cooks by the time they return to Newark.

But it is as hosts that the Scouts shine. Anyone coming away from Camp Ideal and saying they hadn't enough to eat can

boys and have more of the fun. And it's hard to decide which enjoys the fun most—Scouts or visitors. The fine bathing was taken advantage of by nearly all, and the Scouts were always willing to take the visitors for a row or a sail or to aid in giving them pleasure in any way.

Last Thursday night a camp fire was held. A big bonfire was built, the Scouts all gathered around and sang and told stories until bed time.

PROSPECTIVE PRIZE GARDEN

thank only themselves. For visitors first is the rule at the table—and at all other times as well. The table stands under a large shady tree where cool breezes blow and a fine view across the water is seen. Any one sitting down to the Scouts' table and served by Scouts with Scout cooking and not enjoying the meal, never did enjoy eating and probably never will. If you don't believe it ask the visitors who tried it.

And any one visiting the Scout camp and being sorry they did so may be sure their liver is loafing on the job, for the boys' enthusiasm is so contagious that the most frequently heard comment from visitors, old and young alike, is: "Gee, wish I could stay with the

Friday night a heavy thunder storm came up and made things interesting for several hours. Some of the smaller tents failed to stand the test and the inmates were forced to seek shelter in the larger tents. But that failed to discomfit the Scouts in the least. They sang and read and thoroughly enjoyed themselves.

Saturday and Sunday were big days at the camp for the folks from home came to see how the boys were faring, and most of them brought well filled baskets of "eats." And when the Sunday dinner was placed on the table with all the additional "trimmings", in comparison it made a swell feed at the Waldorf Astoria look like a quick lunch handout. All the visitors

were cordially urged to join in the meal. Newarkers visiting camp during Saturday and Sunday were Mr. and Mrs. E. L. Richards and daughter Ruth, Mr. and Mrs. Grime, Miss Elizabeth Grime, Misses Laura, Helen, Eleanor and Violette Fader, Mr. G. Fader, Mr. Frank Fader, Mr. Fred Henning and son Herbert, Mr. and Mrs. John Powell, Mr. J. R. Rose and two granddaughters, Mr. Gilbert Chambers, Mr. H. F. Reed, Mr. and Mrs. A. C. Stiltz, Mr. George Leuk, Mr. John Pennington, Mr. Alfred Scott, Mr. Edward Watts, Mr. Earl Dawson, Mrs. Dawson, Miss Morris, Miss Frampton, Mr. Walter Holton, Mr. Wm. Smith, Mr. James Conner, Mr. John Cunningham, Mr. and Mrs. Thomas Potts and children, Mr. and Mrs. John Ramsey, Mr. Wilbert Ramsey, Mr. and Mrs. Clarence Evans, Sr. A number of the visitors came by teams and automobiles.

The visitors were very much impressed by the camp as showing the value of the Scout movement in developing boys into good self-reliant citizens in a pleasant and healthful manner.

If the boys were asked to name the person contributing most to their enjoyment they would immediately answer, "Scoutmaster Manns." Anxious parents may rest assured that the boys are receiving the best of attention while in his care. Above all he is striving to inculcate in them the true Scout spirit which makes for every quality worth while.

The training in patriotism is of particular interest and should serve as an example to many older folks. At sunset the boys fall in line before the flagstaff and sing the "Star Spangled Banner" and salute the flag as it is slowly lowered. On how many occasions like this do we see grown folks loitering negligently around like so many bums on a log, failing to show the least respect and taking no pride in the fact that they are Americans! This is scarcely due to ignorance but more to plain neglect. And this is only one of the many things a true Scout can serve as a better example of.

On Sunday afternoon the troop marched with a Philadelphia troop of Scouts from a neighboring camp, to Sunday School in Charlestown. The boys were in full uniform and presented a fine appearance. On Sunday evening the Newark Scouts visited the Philadelphia Scouts, who left on Monday morning at 5 o'clock.

An illustrated lecture on "Lin-

coln—A Master Scout", delivered by Scoutmaster Manns, entertained the boys at Camp Ideal last evening. During the week illustrated talks will be given on "A Week-end at Naples" and "A Week in Rome."

During this week the boys will practice a number of outdoor scout activities, such as signalling, wood craft, plant collecting, etc.

Camp will be broken at 7 o'clock Saturday evening and the troop hike back to Newark.

The Literary at Flint Hill M. E. Church will hold a bazaar and bake at the home of Mrs. Robert Tweed, Lewisville, on Tuesday evening, August 19th. For refreshments, cake, candy, all kinds of pastries, fruit, etc. for sale.
