

NEWARK POST.

VOLUME 1

NEWARK, DELAWARE, WEDNESDAY, JUNE 8, 1910

NUMBER 20

DIRECTORY

MEMBERS TOWN COUNCIL.
Mayor—J. P. Wright.
Eastern District—L. B. Jacobs, Howard Leak.
Middle District—H. M. Campbell, Dr. Walt Steele.
Western District—D. C. Rose, Am. R. Kennely.
Secretary of Council—L. B. Jacobs.
Clerk—T. H. Chambers.

BOARD OF TRADE.
W. H. Taylor, Secretary.
Meeting of Building & Loan Association, first Tuesday night of each month.
W. H. Taylor.
Meeting of Directors National Bank, every Tuesday.
Meeting of Directors Newark Trust and Safe Deposit Co. Every second Tuesday night.

NEWARK POSTOFFICE.

MAILS DUE:
From points South and 6:30 A. M.
Southeast: 10:45 A. M.
3:45 P. M.
From points North, and 6:30 A. M.
West: 8:30 A. M.
9:30 A. M.
5:30 P. M.
For Kembleville: 7:45 A. M.
and Strickersville: 4:15 P. M.
From Avondale: 11:45 A. M.
6:30 P. M.
From Landenberg: 11:45 A. M.
From Cochr's Bridge: 8:30 A. M.
5:30 P. M.

MAILS CLOSE:
For points South and 8:00 A. M.
West: 10:45 A. M.
4:30 P. M.
For points North, East, 8:00 A. M.
and West: 9:00 A. M.
2:30 P. M.
4:30 P. M.
8:00 P. M.
For Kembleville: 9:30 A. M.
and Strickersville: 6:00 P. M.
Rural Free Delivery—
Close: 8:00 A. M.
Due: 2:30 P. M.

LODGE MEETINGS—Opera House.
Monday—Knights of Pythias, or K. of P. 7:30 P. M.
Tuesday—Imp. Order Red Men. 7:30 P. M.
Wednesday—Heptasophis, or S. W. M. 7:30 P. M.
Thursday—Ladies' Circle, S. W. M. 7:30 P. M.
Friday—Modern Woodmen of America, No. 1070 7:30 P. M.

ODD FELLOWS' HALL.
Monday—Jr. Order American Mechanics, 7:30 P. M.
Saturday—Knights of Golden Eagle, 7:30 P. M.
Thursday—L. O. O. F., 7:30 P. M.
Town Council—1st Monday night of every month.
Delta Fire & Hose Company—1st Friday night of the month.

Presbyterian Church
(Rev. W. J. Rowan, Ph. D., Pastor)
Sabbath Services:
Sabbath School, 9:45 a. m.; Preaching, 11 a. m.; Praise and Song Service, 7:30 p. m.; Christian Endeavor, 8:45 p. m.; Wednesday evening Prayer-meeting, 8 o'clock. Teachers and Officers' Meeting, 7:30 o'clock. A cordial invitation to all.

Big Open Air Meeting
Congressman Richmond P. Hobson, famous as the "Hero of the Merrimac" in the Spanish-American war, and now prominent in the political life of his native State of Alabama, will speak in Newark on Sunday afternoon next, June 12th, at 3 o'clock, on behalf of the present Local Option Campaign in this county.
Congressman Hobson is a foremost advocate of school abolition and his deep study of the question, combined with his marvellous gifts of oratory, make him a speaker well worth hearing.
The address will be delivered on the Academy Green, at 3 p. m., and will doubtless be largely attended. The distinguished visitor is expected to be present at the oratorical contest on Saturday night, 10th, and to act as one of the judges.

Miss Ferguson Entertains
Miss Alice Ferguson entertained the Kinetic Club, of which she is a member, last Saturday. A pleasant afternoon was spent, the guests surrendering themselves to the joy of the open air, and a day in the country, all joining heartily in game of ball, target shooting, etc.
A course dinner was served to the guests, after which the evening was spent at cards.
The guests were Misses Black, Thompson, Hought, Edwards, Mrs. Scott, Messrs. Scott, Brown, Spruance, Reese, Everett and Morrow, all of Wilmington.

BASEBALL

Newark Defeats Eastern Laboratory (duPonts)

Last Saturday afternoon the Newark baseball team won over the Eastern Laboratory nine by the score, 6-5. Although the final score was close, Newark played by far the better game and but for a few costly errors would have defeated the Gibbstown team worse. The features of the game were the pitching of Murray, the fielding of Montgomery, and the batting of Williams. The line-up:
NEWARK. R. H. E.
Willis, 2b.....1 0 0
Massey, c.....2 0 1
Grogan, 1b.....0 0 0
Haley, 3b.....0 0 0

Umpire—Pappertman.

Newark Will Play Perryville
Next Saturday the local team plays the last nine from Perryville, and although Newark is crippled by the loss of Haley and Jackson through illness, a good game is expected.

Concert At Methodist Church—A Musical Treat

The streets of Newark presented the appearance of a very wide-awake town, indeed, on last Friday night. The noise and bustle of twenty touring cars and the pleasant chatter of their passengers created a scene of animation. The cause of it all was the concert given by the choir of Epworth Church, Wilmington, in Newark M. E. Church. A large audience thoroughly appreciated the chorus of one hundred voices, led by the choir-master, George E. King. The compositions of Adam Gietel, J. Lincoln Hall and others were delightfully rendered.
The singing by the Junior Chorus was particularly pleasing. The way the little folks carried the air through "Kenny's Bells" called forth much admiration and showed cleverness and careful training.
Former City Councilman William P. White played selections on the harmonica, which were heartily applauded. The double male quartet pleased everyone. The last number was the full chorus on a melody of familiar songs, which closed with the stirring air, "Dixie," the tune that never fails to stir the listener.
After the concert the ladies of the church served refreshments to the members of the choir and their friends.
The cars making possible the auto ride were loaned by citizens of Wilmington. Mr. Thomas, the well-known jeweler of that city, acted as chief marshal of the procession.

Children's Day In Presbyterian Church

The Children's Day service held in the Presbyterian Church on Sunday morning was enjoyable. The program followed was the one issued by the Presbyterian Board called "Jesus and the Children." The selections by the infant class comprised most of the program. The duets by Misses Manon Campbell and Leila Herber were very pleasing. All the music had happy swing, which belittled the day of sorrow. The church was tastefully decorated with daisies and ferns.
Dr. Rowan reported a total of 106 members in the Sabbath School; 129 in actual attendance, 33 on the e-mail roll and 14 in the home department.
Three children were baptized.

Postmaster Clarke's Announcement

Editor of the NEWARK POST,
Dear Sir:—I wish to acknowledge through the columns of the POST, the general courtesy of the patrons of the Newark Postoffice, to the officials in charge, and to the generous support given to the office. I wish to announce to the public, that after July 1st, Newark, by the order of the Postmaster-General, will be placed in the second class. I hope by the higher classification, that the patrons of the Postoffice will receive greater consideration, for it is owing to them alone where the Postoffice will stand.
Very truly yours,
DELAWARE CLARK,
Postmaster, Newark.

Welsh Tract School Has Election

At a largely attended meeting of the tax-payers of the Welsh Tract School District, on last Saturday, Thomas Green was elected Commissioner to fill out the unexpired term of Harry Draper, who has moved near Strickersville, and L. M. Whiteman was elected clerk, formerly held by T. R. McMillen.
The tax rate was discussed, and it was unanimously decided to raise the taxes so as to clear off the debt incurred in rebuilding the school house which was destroyed by fire last winter.

A LIVE WEEK FOR NEWARK

PROGRAM FOR THE WEEK

June 10, Friday evening—
High School Commencement
Opera House.
June 11, Saturday evening—
Temperance Contest
College Oratory.
June 12, Sunday morning—
Sermon before Y. M. C. A.
College Oratory.
June 12, Sunday afternoon—
Open Air Mass Meeting
Temperance Rally
Academy Green.
June 12, Sunday evening—
Baccalaureate Sermon
College Oratory.
June 13, Monday—
Farmers' Day
At College Farm.
June 13, Monday afternoon—
Class Day Exercises
College Oratory.
June 13, Monday evening—
Farade.

June 13, Monday evening—
Athletic Society Anniversary
College Oratory.
June 14, Tuesday morning—
Meeting Board of Trustees
College.
June 14, Tuesday afternoon—
Field and Track Meet
Athletic Field.
June 14, Tuesday evening—
Farade.
June 14, Tuesday evening—
Delta Phi Society Anniversary
College Oratory.
June 15, Wednesday morning—
Commencement Exercises
College Oratory.
June 15, Wednesday noon—
Luncheon for Visitors.
June 15, Wednesday afternoon—
Meeting Alumni Association.
Review of Cadets and Competitive Drill.
June 15, Wednesday evening—
Farwell Dance to Seniors by Junior Class.
Gymnasium.

NEWS

Here and There

Lieutenants McKeon and Corkran, of the local company, are attending the school of instruction at the Fort this week.

Messrs. Haley, Phi Sigma, and Watts of Principio Furnace—both Delaware boys, are on the sick list.
"Give us the man who sings at his work. He is the man who sings at his work. He is equal to any of those who follow the same pursuit in silent sullenness. He will do more in the same time—he will do it better—he will persevere longer."—Carlyle.

There is a movement on foot by the Fire Company to secure an auto fire engine. The sentiment thus far expressed seems to be heartily in favor of it. Representatives of several firms have been called and the matter will be thoroughly investigated. A detailed description of the machine with its advantages will be given in an early issue.

The Street Committee has given the Board of Health a man to clean up the town. Work will be started on Cleveland avenue.

Get your name in for next week's issue.

Rev. Dr. Wilson, who preached at old Drawers on Sunday, said that what this country and the country church needs most today is more Harry Haywards. With such as he, the flock to the cities would be lessened, and the country church and country school would again take their place in developing it that is the really best in American life.

Byron Griffin, of Norfolk, formerly of this town, is spending a few days with his parents. Mr. Griffin, with his brother, have established themselves as contractors in Norfolk, and have shown that trait peculiar to many of our boys—making good, and are with the leaders in their work.

Miss Ethel Ferguson has returned to her home for the summer, after a successful year's school work.

The friends to Miss Cornelia Pilling have received invitations to the Commencement at Western Boarding School, which will be held Wednesday, June 15th. Miss Pilling is a member of the class of 1910.

The Odd Fellows of this town will attend the morning service of the Methodist Church, on June 10th. Mr. Hoffecker, the District Superintendent will preach in the church the evening of the same date.

Great preparations are being made for the open air meeting on Sunday of Commencement. Ex-Congressman and all-hero Hobson will deliver his lecture on Temperance. The meeting will be held on the Academy Green. Coming on this day, with many Commencement visitors and the gay fever in general, it is likely to be a big meeting.

There was a sigh of relief when the house turned the corner on Delaware avenue.

Newark is a second-class Postoffice now. Postmaster Clarke is walking very proud.

Friends of John M. Rogers will be grieved to learn of his death in Camden, N. J. Mr. Rogers lived formerly in Wilmington, and was prominent in all affairs leading to the City Beautiful.

He operated for some years the printing plant known as the John M. Rogers Press. The work turned out from there was perhaps the finest ever produced in the State. He died at the Cooper Hospital, following an operation for stomach trouble. He leaves a widow and two sons.

Prof. Maxwell, assistant in English literature, having accepted a position elsewhere, will not return to Delaware next year.

Miss Laura Campbell, of Wilmington, was the guest of Mrs. H. M. Campbell, the first of the week.

Around Town

"Japanese Love Song" at the Methodist Church was much enjoyed. Some one said the chorus was better than when he heard it at Keiths.

Main street resembled the Great White Way on the night of the concert.

Town Council held five meetings last month.

We have been asked to present the following for debate: Resolved, that an official who can make Newark a Second Class Postoffice should wear a hat.

"To the POST."—Considering the weather, we have had since you started, it looks to me as if an overcoat and umbrella establishment would have been better.

A word to the wise is sufficient. Chairman of Street Committee: A general cleaning up of the streets would be much appreciated. Commencement is on hand.

A forlorn looking man was brought before a magistrate for drunkenness and disorderly conduct. When asked what he had to say for himself, he gazed passively at the judge, smoothed down a remnant of gray hair and said: "Your honor, man's inhumanity to man makes countless thousands mourn. I am not as debased as Swift, as profligate as Byron, as dissipated as Poe or as debauched as—." "That will do," thundered the magistrate. "Thirty days!" And, officer take a list of these names and run 'em in. They're as bad a lot as he."

MAN

A man's life is full of crosses and temptations.

He comes into this world without his consent, and goes against his will, and the trip between the two is exceedingly rocky. The rule of contraries is one on the important features of the trip.

When he is little the big girls kiss him, but when he is grown the little girls kiss him.

If he is poor he is a bad manager, if he is rich he is dishonest.

If he needs credit he can't get it, if he is prosperous everyone wants to do him a favor.

If he is in politics it's for pie, if he's out of politics you can't place him, and he's no good for his country.

If he doesn't give to charity he is a stingy cuss, if he does it is for show.

If he is actively religious he is a hypocrite, if he takes no interest in religion he is a hardened sinner.

If he shows affection he is a soft specimen, if he seems to care for no one he is coldblooded.

If he dies young there was a great future ahead of him, if he lives to an old age he has missed his calling.

The Road is rocky, but man loves to travel it.

Children's Day At Methodist Church
An excellent Children's Day program was carried out in the M. E. Church last Sunday. In order that the plan might represent all the grades of the school, and not prove too lengthy, the whole day was given up to the children.

The part by the primary department in the morning was thoroughly enjoyed by the older folk.

The evening program by the older members of the school gave evidence of much work and careful training.

The flag and fan drill, together with the singing by eight little girls were excellently given.

Professor Messersmith Appointed
Professor Messersmith received a telegram to-day (Wednesday) at 1 p. m., that he has been elected principal of the schools of Lewes, Del. His appointment was made over 30 applicants. Congratulations from THE POST.

FOR THE LITTLE ONES

Rev. Mr. Beeson, Of St. Louis, In For A Few Days

Rev. J. R. M. Beeson, St. Louis, Mo., who has been for eight years introducing the literature of the Christian Omnipotence of Council Bluffs, Iowa, was in Annapolis to-day and called upon the Capital telling some facts in regard to the work he represents.

The home was founded in 1882 by Rev. J. G. Lemen and his wife, both of whom are at rest. Mrs. Lemen gave twenty-two years before death called them.

A drinking man committed suicide leaving a wife and six little ones. Rev. Lemen preached the funeral of the man, and two weeks later the funeral of the baby. Rev. Lemen took a collection for the poor woman and organized a committee for the care of the poor.

While earnestly caring for his church work, the committee work of charity and caring for his own family of three boys and a girl, the oldest child H. R. or Roscoe, as he is most widely known only ten years old. Mr. Lemen was a very busy man. He gave his money, nearly \$5,000, the saving of years of work as lawyer and editor before he became a Baptist minister. He gave his salary for two years and in 1884 resigned his pastorate to devote his life to the rescue of the orphan and the destitute child. He sent out "The Christian Home," a little paper that is the only agency employed to make the needs of the home and the work of the home known. During the 27 years' work of the home, no agent has been sent out to collect money or to receive a salary for work.

Eight years ago Mr. Beeson started out to get 20,000 subscribers to the little paper—the organ of the home, and without the paper the home could not be kept going. Mr. Beeson takes to him in his work of getting subscribers a beautiful souvenir of the home—twenty-six little tots in evening prayer. The paper is 50 cents a year. The picture is 25 cents. Mr. Beeson gets commission on the paper and picture, but if anyone will give donations of \$5, \$10, \$20 or \$500, Mr. Beeson gets none of it.

The motto of the home is "It is wiser and less expensive to save children than to punish criminals."

One rule of the home greatly comforts mothers of small brothers and sisters, are kept together when adopted out of the home.

The home is absolutely non-sectarian, and supported by voluntary offerings of charitable people from all parts of the country being reared in 49 States and Territories, taking children from all parts of the land on same terms, no fees to be paid.

The home has cared for more than 4,000 and has had to send only four to the reform school. It has at present an average of 300 to care for daily and all one can do for such work is credited in the Christian home paper.

For any other information address all communications to H. R. Lemen, Council Bluffs, Iowa.

—From Evening Capital.

Newark On Top Again—Dainty Betty Wins Prizes

Mrs. E. S. Avis' lovely chocolate toy Porcelain, "Dainty Betty," proved a great success at the two largest summer kennel shows so far held, winning at the Mincola, Long Island, one, under the English judge Mr. Marsden, who came over for this event, 1st prize class—special "for best American bred toy brown Pom bitch, shown at an A. K. C. Show. Also at Dream land, Coney Island, under the well-known Pom fancier, Mrs. Allard, 1st limit brown, 1st open brown. Reserve winners and special "for best American bred toy chocolate bitch."

"Dainty Betty's" home place should feel proud of her achievements, which doubtless she may repeat several times again before she returns home.

A Good Day's Work For The Farmer

The best work that the farmers of this vicinity can do on next Monday is to attend the Farmers' Day exercises at the College Farm.

Don't get the idea that this is a professional affair; it is so, only to the extent that all farmers are professional and, for that matter, all professors of farming are amateurs, and recognize the fact, perhaps, even more than you do. This is your affair. The gathering there, judging from the past, will be the most representative audience of really Delaware people that assemble during the year.

You farmers here are looked upon by the men from down State as a sort of host on this occasion.

Make every effort to be there and you will go home proud indeed, that you are the Man on the Farm.

Delta Phi Invites Friends To Exercises

All the old members and friends of the Delta Phi Literary Society are invited to attend the 70th Anniversary of the Society June 14th, 1910, in the College Oratory, at 8 o'clock.

The speaker this year will be the Rev. Joseph Brown Turner, D.D., of Dover, Del. Dr. Turner comes well-known to many of Newark. He is sometimes called the Historian of Lower Delaware—a charming speaker and no doubt will give us a rare treat.

The committee earnestly desire a large attendance.

Sixty-Fourth Wedding Anniversary

Mr. and Mrs. Edward Wilson celebrated the sixty-fourth anniversary last week. The event was observed very quietly, many friends dropping in to offer congratulations.

Mr. Wilson is 65 years old and holds the title of the Grand Old Man of Newark. Mrs. Wilson is 88, and in excellent health. She attended the Barnum and Bailey shows at Wilmington, recently, making the trip in an automobile.

Heartiest congratulations are offered and best wishes for many returns.

PERSONAL

Miss Laurence Robinson, of Washington, D. C., is visiting Mrs. Charles Blake.

Mrs. A. N. Raulb left Friday last to spend a few days with her daughter, Mrs. George G. Henry, of Brooklyn, after which she will go on to Boston to make a visit to her son, Mr. Edgar L. Raulb.

Charles Blake, of Baltimore, spent Monday with his son, Dr. C. H. Blake. Miss Margaret Handy, of Woman's College, Baltimore, is home for the summer months.

Miss Ethelwyn Maloney, of Townsend, is visiting Miss Elsie Wright. Misses Bryson and Hickins, of Camden, N. J., and Miss Gray, of Moore, Pa., were the guests of Miss Edna Lilley, over Sunday.

Miss Agnes Medill, who has been sick, returned this week to her school work.

Benjamin Campbell spent the day here last week among old friends.

Dr. Thomas Turnbull, Jr., of Allegheny, Pa., was the guest of Prof. and Mrs. Hayward, at the College Farm, over Sunday.

Mrs. Frank Williamson, with her two daughters, Sarah and Mildred, of Greensboro, N. C., visited her sister, Mrs. Frank M. Smith, on Chouteau street, this week.

Mrs. Milton Dancer, of Longreen Valley, Baltimore county, has been visiting friends in and around town this week.

George L. Medill, of Wilmington, is spending the week with his parents.

Robert Shepherd, who is employed at Highbridge, N. J., spent a few days home last week.

William Vezey, of Summit Bridge, was a Newark visitor this week.

Harlo Curtis, of Philadelphia, spent Sunday with relatives.

Mr. and Mrs. Harvey Perkins visited Dover last week.

George Medill is visiting his brother, Will Medill, Lancaster, Ohio.

Miss Fannie Briscoe, of Baltimore, is visiting Dr. Henry and family.

Edwin Landreth, of Philadelphia, visited his aunt, Mrs. Rebecca Wilson, the first of the week.

Mr. and Mrs. William Smith, of Philadelphia, are spending the week with relatives in town.

Messrs. Bradley, of Wilmington, Hayes, Chicago, Stewart from Boston and Little from Philadelphia, are visiting friends in Newark.

Farmers' Day At Delaware College

June 14th, which is Farmers' Day at Delaware College, promises to be of unusual interest. Congressman Head is confident that the Hon. James Wilson, Secretary of Agriculture, during the administrations of three Presidents, will be present. Governor Pennell has promised to attend, and the members of the State Board of Agriculture are expected, as well as others who stand for progress in Agriculture in this and other States.

Dr. Seaman A. Knapp, who has made a national reputation in his work of farm demonstrations, is to be the speaker of the day, and will discuss "The Successful Farmer of the Future." Dr. Knapp is considered an exceptionally entertaining and instructive speaker.

The Station Farm has something that will appeal to everyone who is interested in any of the phases of Agriculture. Each farmer can get practical suggestions from the carefully planned experiments either in Soil Fertility, in Crop Rotation, in Orchard Management, or in Animal Husbandry.

The trustees have made every effort to make the day of the greatest possible interest to the constituents of the College, and it is hoped that everyone in the State who is interested in Agriculture will consider himself personally invited to spend the day at the State Farm next Monday as a guest of the College.

Temperance Oratorical Contest

Saturday evening of this week the annual oratorical contest for the prizes offered by the W. C. T. U. will be held in the College Oratory. This contest is open to all students in the college. The orations must be on some subject pertaining to Temperance. The prizes offered are:

First prize.....\$25 in gold
Second prize.....\$15
Third prize.....\$10
The contestants are—
Merrill Boushal Hutchinson, '13, "Effects of Strong Drink."
Elmer Ellsworth Rhodes, '14, "Prohibition, the Final Solution of the Temperance Question."
Harris Evans Spruance, '11, "Has Local Option been a success in Lower Delaware."
Howard Taylor Emis, '12, "Man, and some Effects of Alcohol on Him."

All of the contestants are strong speakers and an interesting evening is promised.

Uncle Sam May Turn School Teacher

(Reprinted from Phila. Press, by request.)

It is being arranged that every farm boy in the United States may receive the advantages of an education that teaches him to get the best possible returns from the soil. Each of the 15,000,000 girls that is growing into womanhood is to be taught the practical science of home-making. Every lad in the cities is to be given the manual training to fit him to become an intelligent and skillful unit in the nation's industries.

Congress is now in the very act of accomplishing this extraordinary service. The Dilliver-Davis vocational education bill, which lays down the ground work for this new education is scheduled for a clear track through the nation's legislative body. Before the session ends it will, barring accident, be a law with certain of its provisions immediately operative.

Professor W. J. Spillman, in charge of the farm management work of the Department of Agriculture, says that when this law has been in operation for 20 years the farmers of the nation will be capable of producing two and a half times what they now harvest because the boys will have learned the right sort of farming.

KNOWLEDGE TO SUIT ENVIRONMENT

The object of the new education is to teach the child to perform intelligently the task of the environment in which he is placed. The mass of educators admit that the present school system is based upon the idea of preparing the student for the university rather than usefulness in his own sphere. His education leads always away from the productive callings. (It is shown that but two children in a hundred ever finish college.) The whole educational system is, however, operated for the benefit of this two per cent. (The new idea is to base it upon the greatest good to the 98 per cent., at the same time not depriving the two per cent. of its opportunity.) The child that leaves school when but twelve or fifteen years of age is to be given the things that will help him most to usefulness. The importance of this is shown by the statistical fact that 95 per cent. of them never pass fifteen in school. With these facts in mind the farm boy is to be taught to farm while yet young. The boy in the city is to be given mechanical skill. The girl everywhere is to be taught home-making and the care of children. The result aimed at is a greatly improved race, better living conditions, greater prosperity through a greater production.

The committee on agriculture of the Senate, under the guidance of Chairman Dilliver, is unanimously in favor of this bill, and it has not an enemy on the Senate side. The bill is about to go over to the House side, where it was first introduced, but was not allowed to come out of committee. Three men on the House side oppose the bill: Speaker Cannon and Representatives Tawney and Scott. The latter is chairman of the House Committee on agriculture. These men have not allowed the bill to come to a vote. Representative Davis, of Minnesota, was removed from his position on the Committee on Agriculture because he insisted on this. But when the bill comes over from the Senate with its accumulation of endorsements, its progress cannot be stopped by the few men who oppose it.

The vocational education act recognizes the fact that teachers are not available to carry on the work that the bill intends to inaugurate. It therefore appropriates \$1,000,000 a year to be placed in normal schools and used in instructing prospective teachers, in agriculture, trades, industries and home economies. It is expected that in two years there will be sufficient instructors available to start the main features of the work.

At that time an additional \$10,000,000 a year will be available. Roughly, this will give \$25,000 a year to each Congressional district, or 400 schools for the entire country. In the farming districts \$20,000 of the money will be used in maintaining an agricultural high school and \$5,000 in maintaining a demonstration farm. In the city districts the whole fund will be used for instruction in trades, industries and home economies. But every community in the nation, city or country, will have its industrial school.

A PRECEDENT.

As early as 1862, under the Morrill act, the Federal Government appropriated funds for the maintenance of colleges of agriculture and mechanic arts. Each State now gets \$80,000 to be used for this purpose, the appropriations having increased from time to time as the idea gained in popularity. This was the basis of the vocational education idea which is but now maturing on so large a scale. In this original plan the States were required to furnish sums equal to those provided by the national Government. As a matter of fact they have voluntarily provided sums that have amounted to ten times those required by the law, and the work has proven the most popular education in the nation.

In this way two links in a vocational education are assured. The State university, supplemented by the normal school, is provided for. Then the present bill provides for the agricultural or mechanical high school. The third link is the consolidated rural school, the best school in the nation to-day and one that is developing rapidly in many farming communities.

The consolidated rural school is formed by bringing together a number of small district schools. Five schools of twenty pupils each may be combined into one school of a hundred pupils. This central big school may be well built, well equipped and graded. It may be supplied with three teachers of special training with the same money that was required to employ five inferior teachers. The old system, where one teacher in a one-room schoolhouse heard 20 recitations a day is superseded by the graded school, where the teacher has a third as many.

This consolidation idea depends upon one thing—leading the children to school. The greater size of the district makes the distance too great for walking, and wagons are maintained at the public expense. These leave the outskirts of the district and gather the children as they go, reversing at evening. It works practically. There are 600 successful consolidated rural schools in the country to-day. There are scores of them in Indiana, Iowa, Minnesota, Massachusetts, Virginia, Georgia. They are a proven success. There are today in the United States 300,000 isolated rural schools. Of these, 200,000 might be consolidated into 30,000 larger schools.

As an example of the possibilities of the right sort of farming some experiments of the Department of Agriculture last year may be cited. Boys were set to work on an acre each of corn farmed under direction in a dozen States. The average yield in these States had been 15 bushels to the acre. The boys harvested 50 bushels to the acre, and one lad got 152 bushels off an acre which his father had farmed for twenty years, with never a return of more than 20 bushels. Much of the cotton land in the South yields light crops because the soil has been exhausted by a lack of rotation of crops. A single year in soy beans will double the yield of the land. These fundamental things will be taught every boy, and in applying them he will prosper and the nation will benefit.

The advantages of a technical training have long been recognized throughout the country. The Newark Technical High School, for instance, has kept a record of its 3000 graduates. These men got their training by attending night school while they worked in factories. In the beginning the so-called skilled mechanic received \$20 to \$25 a week. To-day the figures show that the average wage of the graduates of the school 45 years old is \$60 a week. Such results as these are convincing.

Willot H. Hays, Assistant Secretary of agriculture, has spent many years in working out the system now proposed. The bill now on the verge of passing is the result of his labor and enthusiasm. The whole people have long recognized the necessity of giving this direction to the schools. It has been done here and there fitfully. The present plan is to place on a national basis that sort of education that has proven so effective in many individual cases in this country and which has been worked out in so many countries of Europe on a national basis, notably in Germany. Should this bill fail it will probably appear again next fall, and continuously until it is enacted into law.

—William Atherton DuPuy.

Cowpeas For Soil Improvement

The Cowpea is not only the greatest orchard cover crop grown in the

Ohio Valley, but it is one of the factors upon which the building up of much worn soils is dependent. It does not follow that it is the best crop to grow in the orchard under all circumstances, nor is it the only factor in soil improvement, but it fits the bill in more places than does any other plant.

Being a legume, it augments the available supply of nitrogen in the soil; its extensive root system makes the soil more porous and mellow. It may be sown late enough, July 1, while it is so as not to stand in the way of clean cultivation during the spring. A hard, lumpy, crusty soil does not respond well to cultivation. If it is difficult to get the land in good shape, a single crop of Cowpeas will mellow it to a great extent. The more porous and spongy the land, due to the growth of Cowpeas, the better it will withstand drought.

Cowpeas add humus to the soil, which enhances its water-holding capacity. The fact that the soil becomes more porous also makes it possible to form a better dust mulch by cultivating, which also increases the possibility of checking evaporation. The ill effects of bad tillage are overcome more readily by growing a crop of Cowpeas than that of any other crop.

Where Cowpeas are to be pastured by hogs, varieties that produce many seeds are desirable. Among the best varieties for this purpose are Whimperwill and New Era. These varieties mature in a short time. Some of the late sorts also make many seeds.

It is well to ascertain what varieties seed well in certain localities and select these if they are to be used as feed. When grown for hay or as a soiling crop, the seed of the black or gray varieties should be planted as they make a large growth of vine and a fair amount of seed.

I have tried several methods of planting the Cowpeas, such as broadcasting and plowing them in, putting them in with the grain drill, stopping each alternate hole so as not to get them too thick, and with a one horse, Cammell Corn drill with a plate with small holes especially made for peas and beans. This last method gives much the best results. With the Corn drill they are put in rows, 30 inches apart for the bush sorts and 46 inches for the heavy vine sorts. Amount per acre of the small seeded varieties one bushel; and of the large seeded varieties one and one-half bushels per acre.

Clean culture is given the soil from early spring until the seeds are planted. Just as the seeds are coming up the spike toothed harrow is started. By the time the peas are five or six inches tall we have been over them twice. Sometimes it seems as though we are tearing them all out by the roots, but we just keep on stirring with the harrow and the peas just grow that much faster.

The peas are cultivated until the vines meet between the rows; this to keep down weed growth as much as anything else. When the growth of vine is heavy enough to shade the ground all over, there will be no weeds able to grow and mature seed.

We do not cut Cowpeas for hay, as we prefer feeding them in the field, or plowing them under. Peas, vicia, and all.

The field of Peas shown in the illustration was pastured with hogs. They were turned on when the crop was about half ripened. The hogs ate the Peas but paid no attention to the vines or the leaves. These they tramped under foot, and trish with the manure left by the hogs, when it is all turned under will fill the soil full of decayed vegetable matter, which will put it in fine condition for corn or potatoes to be followed by wheat.

On this field ten years ago we could produce only 35 bushels of corn and about 8 bushels of wheat; it will now yield 100 bushels of corn and 25 of wheat.

With a rotation of wheat, cowpeas, corn and potatoes, and sometimes the wheat seeded to clover for a crop of hay for the milk cows, we are building up our soil and at the same time producing paying crops.

OVERLAND IS THE CAR

The Reason

The car is amazingly simple. Three of the models operate by pedal control. Push a pedal forward to go ahead, and backward to reverse. Push another pedal forward to get on high speed. It is as simple as walking. A 10-year-old child can master the car in ten minutes.

The Overland has less parts than any other highgrade car. One invention alone does away with 47 pieces. The car is almost trouble-proof.

A 40 h. p. Overland with 112-inch wheel base. Price with single rumble seat, \$1,250—double rumble seat, \$1,275—with 5 passenger touring or close-coupled body, \$1,400

OVERLAND "Model 38" is the first real car for \$1000. Built by the same expert mechanics who made famous the costly Pope-Toledo cars. It is the only car at the price that gives plenty of room everywhere; that is really comfortable either on long or short rides or country tours; it is the easiest car in the world to drive—barring none; and it will stand up and give absolutely perfect service under conditions which none except the most expensive and carefully constructed cars will endure.

Like all our Planetary Models, the well known Overland Motto applies—"Only pedals to push and no noise but the wind."

The Reason

The Overlands' supremacy—wherever known—is due to the following reasons:

The Overland engine is a wonderful creation. It is so automatic, so silent and powerful, so free from the usual troubles, that it appeals to the average buyer.

The OVERLAND stands the test.

There may be stronger and more serviceable cars than this—but no one around here knows which one it is.

Look for the "Story of an Overland" in next week's issue.

Overland Model 38—Price \$1,000. 25 h. p.—102-inch wheel base. With single rumble seat, \$1,050—double rumble seat, \$1,075—complete Toy Tonneau, \$1,100

All prices include Magneto and Full Lamp Equipments.

THE NEWARK POST

Is a Little Sheet Published at NEWARK, DEL.

The man who runs it is said to be impudent and kind—independent and in debt—a rabid partisan and on the fence.

He is said to be backed by the leaders of the town—an enemy to our existing institutions.

He is said to be booming Newark to boom himself—bidding for favor—he has no respect for his

superiors.

Part or perhaps all of which is true—just according to the way you look at it.

Anyhow, all this makes the paper worth a Dollar—whether you agree with it or not.

Taken seriously or as a joke, most people think it worth the price.

What's his politics?

Is he wet or dry?

What's he driving at?

Is he sincere?

Where's he from?

Will he last?

All of which will be answered in the moon changes and the stars are right.

Sunday School Lesson

By R. S. Holmes

Lesson XI. June 12, 1910.
THE CANAANITISH WOMAN
(Matt. 15: 21-28)

Golden Text: "Great is thy faith; be it done unto thee even as thou wilt."

Between Lessons 10 and 11 Jesus was at home in Capernaum. Pharisees from Jerusalem sought him and engaged him in discussion over ceremonial acts. The visit afforded Jesus to declare an entirely new doctrine concerning things clean and unclean. Food defiles no one. Real defilement comes from the heart. In all probability the utterance caused excitement and created renewed hostility. Perhaps this was the occasion of his departure into the coasts of Tyre and Sidon.

Vs. 21. Once before in discussing the movements of Jesus, in Lesson 9, we have spoken of the journey into the coasts of Tyre and Sidon. The reason was because the second miracle, of feeding four thousand, was coupled with the former one of feeding five thousand, and the second came after going to the coasts of Tyre and Sidon.

Vs. 22. "A woman of Canaan," Heathen—Gentile. No salvation for her. She had no rights which a son of Abraham was bound to respect. Canaan was the old name of the whole land. Phenicians took possession of the northwestern portion. The name Syria appears here too. She is elsewhere called a Syro-Phenician; that is a Syrian Phenician in contrast to the Libyan Phenicians who lived in Africa. They were an amalgamated people, and the Jews especially despised them. She was a most unprepossessing person as far as birth and race were concerned.

She knew all about Jesus. In some way she had learned how to address him. She may not have believed in him, except only that he could work miracles. She wanted that power displayed for her daughter. It was the same old complaint, an insane or demon-possessed daughter. Her cry was "Have mercy on me."

Vs. 23. He played the part of a true Jew. He paid no attention to her. That must have been hard for him. His companions must have been stirred by the cry. That was surely hard for her. Was she alone of all the many who had made such appeals to be denied? Then the twelve came with their complaint. "She crieth after us." She annoys us. We do not like to have this refuse of the world disturbing us. "Send her away." How little these men knew Jesus. How little they did comprehend the power of that mother's persistent love.

Vs. 24. He answered and said, "I am not sent, etc." To whom did he say this? Was it to his twelve? Why did he say that to them? Did their request, "Send her away," mean send her away satisfied? Did they mean heal her daughter and let her go? Per-

UNDERWOOD STANDARD TYPEWRITER

A LEADER

The principle of construction in the Underwood was found first in the Underwood, and every typewriter seeking business in the same field with the Underwood which has been put on the market since the advent of the Underwood, has been an imitation of, and in general appearance like, the Underwood.

The last "Blind" advocates of importance have now fallen into line, and there is not to-day a single "blindwriting" typewriter actively on this market. Recall all the arguments you have heard in past years by Underwood opposition, and you will realize what an advance agent to progress the Underwood has been; then bear in mind that the Underwood was the first fully "visible", has had time to develop and improve, and is to-day the most perfect typewriter made.

"The Machine You Will Eventually Buy"

UNDERWOOD TYPEWRITER COMPANY INCORPORATED

Philadelphia Branch,

725 Chestnut St.,

PHILADELPHIA, PA.

haps so. At least he answered as if he so understood them. "I cannot heal her daughter. I am not sent to such as she. I am sent only to the lost of Israel."

Vs. 25. She probably overheard. She drew near to him with a very earnest and simple appeal. "Lord help me." It was a short prayer. It was better than a long one. It made Jesus understand just what she wanted. It was effective, too, in a way.

Vs. 26. He took notice of her now. He answered nothing at first. Now he tells her she is only a dog—an uncircumcised outsider. She was no child of the Covenant. The bread of the children must not be wasted on such as she was. It

was a truly Jewish answer. I can hardly conceive of Jesus saying it. It was utterly unlike him.

Vs. 27. Her answer was a wonder. She did not become angry. She was too miserable to be angry. She would not endanger her plea by showing any wrath. Her wits were quick. She saw her opportunity. "Dog, am I? Yes, from the standpoint of a Jew. But dogs must eat. Yea, dogs do eat of the crumbs that fall from their masters' tables. You are my Master. Give the bread to the children. But let me have a crumb, just one crumb from the floor."

She had tact and grace. We would not enjoy being called

"dog." She did not, probably, but what she wanted was far too great to be put off by what she did not like.

Vs. 28. The answer conquered. He had tested her completely. She was equal to the test. Great faith is the greatest power in the world. The lesson of absolute trust in God is here taught in loud tones. The woman held on for just one thing. That thing was given at last. "Thou shalt have exactly what thou dost desire." That exhibits again the nature of the heart of Christ. He was willing all the time. He made her exhibit to others the intensity of her faith. Then the cure came.

There was one happy home in the Tyre-Sidon country that night. A mother had won a victory. What did she care now that she had been called "a dog?" She had also been called "a woman," and to the woman of great faith had come victory.

PRACTICAL.

The most pitiful people in the world are they who want nothing which Jesus Christ can give.

Jesus sought refuge from the mean criticisms of his own people by going among the heathen. The first one to speak to him among the heathen called him—"Lord, Son of David." That was what his own people would not do.

A prayer for mercy must always be a prayer that God loves to hear. He calls himself a God "showing mercy unto thousands of them that love me."

A silent Saviour is not always an unwilling Saviour.

If the Saviour seems to be passing on without answering, keep on crying. Make him know that you mean to have him hear.

Get as near to him as you can. Get into the house where he is, if possible. If not, make his disciples understand that you mean to stay.

Do not mind trials. God does try us often. Never mind; plead his promises. Let the names go. Let the disappointments go. Cling close to Christ.

"As thou wilt" was a great big loaf. "I yield," said Christ. "Take what you want." That is Christ's way when he knows you trust him absolutely.

WEDNESDAY, JUNE 8, 1910

A WISE SETTLEMENT

It is quite the thing in these days to bid for public favor by theatrical attacks on the railroads. Men of small mind are inordinately delighted with every such performance, and the demagogue is proportionately inflated. Cat-calls and aged eggs await the man who ventures to suggest that this "baiting" of the railroads can be disastrously overdone, that unwarranted attacks on our great transportation lines, for political effect, is a dangerous pastime, that it is easily possible to plunge the whole of our commercial and industrial life into the very "wreck of things" by senseless stabs at its arterial system. No man can appreciate this fact better than Attorney-General Wickersham. Hence the amazement, in conservative and thoughtful circles, at his intemperate proceedings against the new rate schedules of the Western railroads. Things looked squally for a few days. Another "panic" loomed in sight, and panics mean idle shops and idle men. President Taft and the transportation officials have done the wise thing, the commendable thing, by taking counsel together, whereby the injunction is withdrawn, the railroads agreeing not to put their increased rates into effect until the same have been submitted to and approved by the Commerce Commission. It is, after this, and it is good to know this, at the head of our national Administration is a man so just, so broad, so trusted, as that he can bring an honorable and wise adjustment out of what threatened for a time to be a disastrous commercial controversy. The world of industry, which is the world of men (barring political agitators), can be thankful, once again, for Taft.

Town Council Meets

Council met in regular session on Monday evening and all the members except L. B. Jacobs were present. After the reports of the several committees were made and bills ordered paid, D. C. Rose asked that ordinance passed last year forbidding members of Council from doing any work for the town be read.

Newark, May 2, 1910.
To Council of Newark:

Hereby I give notice to repeal an ordinance passed November 3, 1906, entitled, An ordinance to prohibit members of Council from being directly or indirectly connected with any work or contract for work by the Council of Newark.

Signed—D. C. ROSE,
Member of Council.

The ordinance was then read as follows:—Be it ordained by the Council of Newark,

Section 1. That, pursuant to notice given at a previous stated meeting of the Council of Newark, it is hereby ordained that the ordinance passed by the Council of Newark on the 1st day of November, A. D. 1906, in providing that no member of the Council of Newark shall contract for, perform or do, or be interested in, directly or indirectly, any work or labor required to be done or performed for the Council of Newark, nor shall any member of the Council of Newark or any officer thereof, directly or indirectly, sell or furnish, or be interested in the selling or furnishing of any goods, chattels, wares, merchandise, tools, implements, machinery or appliances to the said Council of Newark, be, and the same is hereby repealed and all of the provisions and penalties thereof rendered null and void.

A ye-a and nay vote resulted as follows:

Wright, Rose, Steele, Campbell—yes.
Kennedy, Leach—no.

BIDS FOR CURBING AND GUTTER

The contract for laying approximately 2000 feet cement curb and gutter was awarded without opposition to L. B. Jacobs.

Contract for laying pipe to Prospect avenue was awarded to out of town firm.

D. C. Rose then presented the following resolutions, all of which were passed.

Notice to Newark Cemetery Company:

Resolved, That the Secretary notify the Newark Cemetery Company that

the city proposes to improve the street in front of their property on North Chapel street, and request them to cooperate with us by curbing and paving in front of their property.

(Signed)—D. C. ROSE,
Chairman Street Committee.

NOTICE TO BALTIMORE & OHIO

Resolved, That the Secretary notify the Baltimore & Ohio R. R. Co. that the city proposes to improve North Chapel street, by curbing and paving and their piers for bridge are in line of gutter and curb. Some changes will have to be made in line of street or changing the piers to conform to street (on west side only) and as the city usually pays for curb and the property holders must pave in thirty days after curbing is set. But if they will pay for both curb and paving the city will change street to conform with piers.

D. C. ROSE,
Chairman Street Committee.

NOTICE TO TELEPHONE AND TELEGRAPH COMPANIES.

Newark, Del., June 6, '10.
Resolved, That the street committee have all poles owned by the city painted 16 feet from ground, and the Secretary notify all companies owning poles on street to have same painted uniform color with city poles. As the street committee have had all signs removed from trees and poles and propose to have our street present a neat appearance in all things, we think this will add greatly to same.

(Signed)—D. C. ROSE,
Chairman Street Committee.

EXPERT TO CLASSIFY PROPERTY.

Resolved, That the President employ some expert to make a complete estimate of the town property, classifying same so that each department may know just what it is doing. This estimate to include all curbing and street improvements. Light and water plants, buildings and grounds owned by the city.

This resolution was adopted in order that a new set of books might be kept. The old books are in such a shape that until a new appraisal is made the new set can not be started.

The Secretary was instructed to write Thomas Davis, Esq., that the permit to remove the house on Main street has been withdrawn.

On complaint filed Council ordered Secretary to instruct Edward Herlner to discontinue playing graphophone on the street.

An ordinance was passed forbidding the selling of fire crackers over one-half inch in diameter.

Meeting adjourned.

A Timely Article—Newark Take Notice

The automobile and team collision on Tuesday night (in which the automobile containing six persons turned turtle, and the carriage with its two occupants, was also wrecked) might have caused the death or serious injury of all concerned.

Out of a mass of conflicting accounts a few things seem reasonably certain and are proper matters for comment.

1. The night was dark, the accident happening a full hour before the moon rose.

2. The fact that a big, heavy car, whose center of gravity is low, turned turtle, brake or no brake, plainly indicates a high speed certainly more than 12 miles an hour.

3. The statement in The Smyrna Times, (presumably correct) is that the auto blew for the team when 50 yards away; if so, had the team been going at the lawful rate of 12 miles an hour, no collision would or could have occurred, no matter if the team had made a wrong turn.

4. There was some whiskey saved in the wreck, at least one bottle, hence it is not a violent deduction that there was more or less of the same article being transported in other than bottled form.

Finally, one thing is very sure, the law of April 20th, 1909, which only permits under certain other restrictions, a speed of 20 miles an hour in the country, and 12 miles going down hill or overtaking a team, is very often violated—in fact, pretty near a dead letter, so generally are its provisions ignored.

This new law imposes a fine from \$10 to \$25 or imprisonment for 10 days for the first offense; \$25 to \$100 or 20 days in jail for a second; and \$100 to \$200 or three months in jail, for a third offense.

The law forbids any motor under 10 driving an auto, but makes no requirement of fitness in a licensee other than his own written statement that he "is qualified to operate a motor vehicle." This is not enough to protect the public.

The railroad company would never think of putting its even the locomotive of a gravel train in the hands of a man who had only had a year's experience as a fireman or engineer; yet a man with no knowledge of machinery or engines or experience in using either, may under the law buy a car, and if he please, operate it 15 minutes thereafter.

The locomotive runs upon its own track and the accidents which may happen are limited in number and character; the automobile runs on the thronged public highway where almost any number of accidents may happen by reason of new and unexpected combinations of circumstances. Therefore safely to operate an auto it should require at least some of the skill and experience needed to run a locomotive; therefore some provision evidencing skill and fitness to drive these whizzing road locomotives called automobiles, should be added to this law.

Again, the law should require all vehicles to carry warning lights at night, like the auto, front and rear and this rather more for the protection of the vehicle than of the auto.—Editorial Middletown Transcript.

To The Board Of Health

Mr. Editors:
You have devoted space to the question of a clean town and now I am going to ask for more.

The Town Council and School elections fade into insignificance compared with the issue of a clean, healthy town.

The Council and School Board are important organizations; the committees of these organizations are important, but there is no Committee or Board that is so vital to the interests of the community as that of the Board of Health. And strange as it may seem, oftentimes these men are merely figure heads. Usually they are made up of men whom you would suppose would take the most radical actions to preserve the health of the town. I know that oftentimes they are not given the powers to carry out their plans and their recommendations are often put aside.

In the case of this town, I have understood that the present Council, seeing the needs of the community, have given the Board of Health almost absolute authority to do what it may deem wise and whatever power that they are unable to delegate, they have promised to stand by and act upon any recommendations that the Board of Health may make.

The fact that typhoid has made its appearance this early in the season is cause enough for immediate action to be taken. There is absolutely no occasion for this if Board of Health will proceed at once. Newark is one of the most healthy towns in the State. The town water here is exceptionally pure. The cases of fever that have developed so far have come from surface wells.

LUMBER OF ALL KINDS

It seems indeed strange that people would continue to use this water against all competent advice, but if they so insist, it is the duty of the Board of Health to see that these wells are closed and compel the owners to put in town water.

This is meant in the kindest spirit.

It is merely a suggestion to the new Board and to say that I, for one citizen, will approve of any action you may take toward making this a cleaner town. You know, perhaps, even better than I, what it would mean to us to have the stigma of a typhoid epidemic against us.

Western Union Telegraph Office

A thing that has been overlooked—
that strange as it may seem, requires
no knocking—is that of the office of
the Western Union Telegraph office
recently installed here.

The generosity of the company had
been questioned, so we decided to in-
vestigate and find out the factor in
securing this office. In talking with a
representative of the company we find
that our Mayor, J. P. Wright, backed
by Council, was the man instrumental
in this improvement. The company
claimed that though the office did not
pay here, that at suggestion of Mr.
Wright it would be well to put in the
office, considering the fact that their
poles were on our streets and that
Council might make some requests
regarding same.

Here is an instance of the effective-
ness of getting together.

Suggestion To Elk River

Mr. Editor

I should like to ask through your
columns, why it is, that since Elk
River has been furnishing the electri-
city, that the street lights are so much
improved, while those in the houses
are not so good.

I have noticed from the very begin-
ning a decided improvement in town
lights on the streets, but the lights in
my residence are poor and have heard
several complaints.

This is no kick—merely a notifica-
tion of the conditions. The attention
of the company should be called to
this and no doubt it will be immedi-
ately rectified.

Yours, ETC

Milford Cross Roads

A quiet school election was held on
Saturday at the X-Roads. The old
members were re-elected.

The school children had a picnic last
Saturday afternoon, in the grove at
Beechwood. There was much fun and
good cheer. After many games, ice
cream and cake was served.

Mrs. Morrison, of Diamond Hill has
recently had a new kitchen added to
her house.

Mr. and Mrs. George Christopher
spent Sunday with the latter's brother,
near the X-Roads.

The coming festival at the school-
house promises to be a gala affair.

Pleasant Hill News

Mrs. Thomas Moore and daughter,
Alice, spent Saturday in Wilmington.
Wawa Tribe, I. O. R. M. will hold
their annual strawberry festival in
their hall, Thursday evening, June 9.

Mrs. Elizabeth Hibbert and daugh-
ter, Lillian, of Philadelphia, are visit-
ing Thomas Moore and family.

Mrs. W. P. Stinson has been spend-
ing some time with her daughter, Mrs.
C. T. Eastburn, of Red Mills.

Miss Bertha Eastburn, of North
Star, spent Saturday with her cousin,
Catherine Minsley.

Pleasant Hill base ball team de-
fied the Strickersville Juniors on Sat-
urday, the score being 33 to 1.

William Chandler, of Wilmington,
made a flying visit to the home of
Thomas Moore, on Wednesday.

William Warren and Ernest Gam-
born visited John E. Buckingham on
Sunday.

Children's Day services will be held
at Ebenezer M. E. Church, Sunday,
June 12, at 11 o'clock.

Harvey J. Davis and family spent
Monday evening at the home of Har-
ley Minsley.

Emma Welsh and Louise Harkness
spent Saturday and Sunday with
Brandywine Hundred friends.

Harley Minsley and family and Ber-
tha Eastburn spent Sunday with Mr.
and Mrs. Wilson Smith, of Beaver
Valley.

Miss Rachel Mitchell is laid up with
a very sore foot, caused by the horse
tramping on it.

An Exciting Runaway Accident

W. K. Brooks and sister, Miss Julia
Brooks, of Glasgow, had a narrow es-
cape from serious injury in a run-
way accident late yesterday afternoon on
Hwy. 101. Brooks, aged 21, and injured
is a mystery.

Mr. Brooks and his sister, who had
been visiting friends in Newark, were
on their way home when the crash
happened. He was driving a sported
Ford and started to run. In some way
one of the rear wheels of the big
car was smashed and Mr. Brooks thrown
out. He was dragged for probably 100
yards before he got his clothing loose
from the wagon.

The horse continued to run, drag-
ging the buggy on three wheels and
the fish with Miss Brooks sitting in-
side. The animal dashed through
Glasgow and when some distance on
the south side of the town, jumped a
fence, thereby taking 1000 yards
from the vehicle. Miss Brooks was left
sitting in the three-wheeled buggy un-
injured, but badly frightened. Mr.
Brooks was slightly injured.

College Farm Folks

All the efforts of the Agricultural
Department of the College are now
being directed towards farmers' day,
which will be held on June 13. It is
expected that an unusually large num-
ber of the State officials will be re-
sident. Large delegations of farmers of
the lower part of the State will be
present.

A fine program has been arranged
and it is likely that all former records
of attendance will be broken.

The Agricultural Department of the
College has had a number of photo-
graphs taken of the farm buildings,
stock and views of the crops. These
photographs are intended to be used
in a brochure of the Agricultural De-
partment to be issued sometime this
season. The pictures were taken by
the J. Paul Brown studio of Wilming-
ton.

Director Hayward was one of the
judges at the York Horse Parade
in Philadelphia, today. On June 8th
he will go to Hagerstown, Pa., and will
also be one of the judges of the New
York State Fair during the week of
September 12th.

Messrs. Kirby, D. Hill, G. and
Kensinger, 13 students in the Agri-
cultural Department will spend the
summer on permanent terms in Dela-
ware, Pennsylvania and New York
devoting themselves to practical work
in the lines of agricultural work.

College Boy Taken Home On Stretcher

Gordon Hays, Phi Sigma, who was
taken sick a few days ago, was taken
to his home in Philadelphia, N. J. This
morning a very ill boy, who had been in
physician's hands for some time, was
taken to his home on a stretcher on the
train.

"On With The Dance"

"On with the dance" at the Yale un-
iversity was the spirit of the affair
given by Miss Wright, of the Opera
House, last Thursday night. It was
one of those occasions where every-
body has the very best time. The spirit
of jollity and freedom prevailed as is
usual when the guests are mainly in-
vited. The boys danced in coats and
enjoyed the dance "shirt-waist style"
about forty couples participated in the
good time.

Breed to a Winner!

STORY OF A

Business Growth.

This month 3 years ago I
started here at 34 New London
Avenue just above B & O.

From a very small stock of
groceries I have now a full line of
general supplies.

My store is considered a little
out of the way but some one has
said, you know, that if a man
make a better mouse trap or sell
a better article the world will
make a beaten path to his door.
I am getting that path.

I buy from the leading firms
and my goods are fresh and of
the first quality. I positively re-
fuse to hold goods. So I sell at
a small profit.

I carry full line of flours and
feeds of leading brands.

A line of Shoes and Working
Men's Furnishings of all kinds.

I am very proud of my store.

I am grateful to my patrons. I
have built up this business and
hope to continue.

I have purchased this property
during the last year; have improv-
ed it and am ready to give you
my best service.

Work Of Poultry- man's Wife

Frequently I am asked how I became interested in the poultry business. It was simply because my husband's heart and soul, as the saying is, were in the business and I being very much interested in him and his welfare, could not help it. I believe that a man's success is largely due to the help and encouragement that his wife gives him, and believing this, it is natural that I should take an active interest in his business.

While Mr. Fishel was still in the hardware and implement business, we raised poultry on a small scale. As his mercantile business took all of his days, it forced him to attend to his poultry correspondence at night. It was more than he could manage alone and my household duties being light, I spent my evenings assisting him. When the poultry business increased and we sold out our mercantile business, we moved to the farm where we are now living and then it took all of my time to assist in the office. We figured that it was cheaper to employ help in the kitchen and house than in the office; that the office work was easier; that it enabled me to keep in touch with the business, and the main point was that I liked the work.

While I have never done any actual work in the yards, I feel that should it become necessary for me to do so, I would be competent. I have taken care of the incubators, sometimes nine or ten at a time, and so am pretty well trained in that part of the work. The business increased so much that we had to have an office girl, but I still have plenty of work to do and like it as well as ever.

Several years ago Mr. Fishel turned the turkeys over to me. We do not keep them on the home farm, but have them with a farmer who is one of the best turkey men in the United States. He certainly knows what a good turkey is, and he has excellent success in rearing them. He does not raise them all, as we have quite a number reared on other farms. One man raised as many as fifty, though most of them raise from ten to twenty-five and think they are doing well. The market price for turkeys was high this fall and winter, which means that the demand for turkeys for breeders will be greater, for when the market price is high more people are inclined to raise them. Just think of the market price the first of December being twenty cents a pound for toms and 22 cents for pullets and hens in a small country town and then say there is no money in raising turkeys for the market!

Turkey culture is very interesting. One cannot help feeling pride when the big fellows go strutting around. They are more difficult to raise than chickens, but when you get them beyond a certain age they will take care of themselves and one is assured of a good profit, whether they are bred for the market or for sale as breeders. We generally sell from fifteen hundred to two thousand dollars' worth of turkeys each year, and we figure on getting at least fifty per cent. net profit. I believe that lowest amount I ever made in one season was \$300, while the largest amount was \$1,400. Even the smaller sum would be regarded by the most women as a good amount of "pin money." To be sure, it is true that every one could not make so great a sum, for our turkeys have the benefit of the advertising of the chickens and have a reputation established, but I believe it is equally true that anyone that lives on a farm can raise turkeys with profit.

PARTNERS IN FACT.

Many poultrymen come to visit us, and quite a large number have said: "I would give anything if I could get my wife to take an interest in my poultry business." It seems that there must be something wrong with this sort of woman, for a wife should be interested in anything in which her husband is interested, so long as it is a legitimate business. They should be partners in fact.

It seems a great pity that more men and women do not realize how much better it would be for them to be out in the open air on a nice farm not too far from town, than to be shut up in some office or store from morning until night in city or town. Such people do not know what living is.

We could never again be satisfied in town after living as we have for almost ten years. How beautiful everything is in the spring, when the trees are putting forth their leaves and the orchards are

in bloom, when the grass is a green carpet and the tiny chicks are running here and there in the little yards surrounding the brooders and the older fowls, so beautiful and white, are scattered over the farm, singing merrily and everything in nature calls you into the open to be happy with her. This is a picture we have from our office windows. Can you blame me for loving it? And it is not for my husband's sake now; I love it for itself. Sad, indeed, should I be if called upon to leave it now, though fifteen years ago I never even dreamed of living on a farm, having been born and raised in town. Neither did I imagine I should ever be interested in the poultry business. So I would say to wives who think they would not like it, try it. By trying to be a true helpmate to your husband you will become interested in what he is doing and soon learn to love the work and you will be proud and happy when you hear your husband tell his friends, "I could never have done it but for the help of my wife." If you cannot be anything but a silent partner, you will be blessed in being that.

—Contributed.

Delaware College Catalogue

The Catalogue Number of the Delaware College Bulletin for 1910, which has just been issued, presents a new and attractive typographical appearance. The smaller type for the body of the subject matter and greater consistency in such details as punctuation and main and sub-headings are commendable features.

Prospective students should first of all read carefully the requirements for admission, as given in detail on pages 13 to 21. Candidates for admission to the Engineering courses will notice that Solid Geometry is an additional requirement in Mathematics. Provision for satisfying this requirement will be made by the Department of Mathematics for those boys who are unable at present to take this subject in their local high schools. Similar provision will be made in 1911 for those students who, entering any of the courses but the Agricultural, have not had the opportunity to study either French or German in the preparatory schools. One modern language, as stated in a Note on page 14, will be required after 1910 of applicants for admission into all courses but the Agricultural. The co-operation of Principals of high schools throughout the State is asked by the faculty of the College in their endeavors to raise the standard of admission and thus increase the efficiency of their courses. Special attention is directed to the detailed explanations of the requirements in English and Latin. The recommendation for preparation in these subjects, made by committees composed of high school and college teachers, should result in a higher grade of efficiency in the work of boys and girls in our secondary schools.

Several slight changes have been made in the courses of study during the academic year 1909-1910. The addition of a Physical Director to the teaching staff has made possible a requirement of two years of physical training for all students. Seniors in the Classical, Latin Scientific, and General Science Courses must elect subjects from at least three of the departments of instruction, which are indicated on pages 23 and 24 by brackets. Hygiene is required of students in the General Science, Agricultural, and Civil Engineering Courses and is elective for Seniors in the Latin Scientific and

Classical Courses. Two new subjects—Water Supply and Sewerage—have been added to the required work of the Senior year of the Civil Engineering Course.

Students in attendance during last year number 103, apportioned as follows: Classical, 10; Latin Scientific, 5; General Science, 7; Civil Engineering, 14; Electrical Engineering, 39; General Engineering, 5; Agriculture, 11; Irregular, 7; Special, 5. The Agricultural and Electrical Engineering Courses shows the greatest gains in the first year students. Fifty-two students come from Wilmington, 72 from other parts of Delaware, and the rest from other States. Within the State, Sussex falls far below the other counties in the number of students sent to the State College. The small number of Sussex Countians is especially noticeable in the Freshman class, in which appear the names of but two or three boys from the lower part of the State.

Value Of Manure

A well kept manure heap may be safely taken as one of the surest indications of thrift and success in farming. Neglect of this resource causes losses, which, though little appreciated, are vast in extent. Waste of manure is either so common as to breed indifference or so silent and hidden as to escape notice.

According to recently compiled statistics there are in the United States, in round numbers, 19,500,000 horses, mules, etc., 61,000,000 cattle, 47,000,000 hogs, and 51,600,000 sheep. Experiments indicate that if these animals were kept in stalls or pens throughout the year and the manure carefully saved the approximate value of the fertilizing constituents of the manure produced by each horse or mule annually would be \$27, by each head of cattle \$20, by each hog \$8, and by each sheep \$2. The fertilizing value of the manure produced by the different classes of farm animals of the United States would, therefore, be for horses, mules, etc., \$520,500,000; cattle, \$1,220,000,000; hogs, \$376,000,000, and sheep, \$103,200,000, or a total of \$2,225,700,000.

These estimates are based on the values usually assigned to phosphoric acid, potash, and nitrogen in commercial fertilizers, and are possibly somewhat too high from a practical standpoint. On the other hand, it must be borne in mind that no account is taken of the value of manure for improving the mechanical condition and drainage of soils, which is fully as important a consideration as its direct fertilizing value.

Discussing this subject from a more practical standpoint, Professor Roberts has suggested \$250 as a conservative estimate of the value of the manure produced during seven winter months on a small farm carrying four horses, twenty cows, fifty sheep and ten hogs.

If we assume that one-third of the value of manure is annually lost by present methods of management, and this estimate is undoubtedly a conservative one, the total loss from this source in the United States, as indicated by the first figures, would be about \$708,400,000, or, using Robert's figures, the annual loss for each farm would amount to \$83.33.

It should be clearly understood that when the farmer sells meat, milk, grain, hay, fruits, vegetables, etc., from his farm, or neglects to save and use the manure produced, he removes from his soil a certain amount of potash, phosphoric acid, and nitrogen that must be restored sooner or later if pro-

ductiveness is to be maintained.

A Prayer

I've labored in Thy vineyard, Thou dost know;
I've sold ten tickets to the minstrel show;
I've called on fifteen strangers in our town,
Their contributions to our church put down;
I've baked a pot of beans for Wednesday's spree,
An old time snapper it is going to be;
I've dressed three dolls too, for our annual fair,
And made a cake which we must raffle there.
Now, with Thy boundless wisdom so sublime,
Thou knowest that these duties all take time;
I have no wish to fight my spirit's foes;
I have no time to mend my husband's clothes;
My children roam the streets from morn till night,
I have no time to teach them to do right.
But thou, O Lord, considering all my cares,
Wilt count them righteous, also heed my prayers.
Our chicken supper bless and minstrel show,
And put it in the hearts of all to go,
Induce the visitors to patronize
The men who in our program advertise;
Because I've chased these merchants till they hid
When e'er they saw me coming—yes, they did.
Increase the contributions to our fair,
And bless the people who assemble there.
Bless Thou the grab-bag and the gypsy tent,
The flower table and the cake that's sent;
May our whist club be to Thy service blest;
The dancing party gayer than the rest.
And when Thou hast bestowed these blessings, then
We pray that Thou wilt bless our souls—Amen.

Agents for Locomobile, White, E. M. F. 30, and Flanders 20.

The Flanders for \$750.00 is the sensation of the year.
The Biggest little car on the market.

Four cylinder, 20 H. P., 100 inch wheel base. Magnets included—of course. 5 Lamps, Tube horn and generator. The design is simple, and follows the line of best engineering practice—no faddish novelties nor inventions. These ideas lend themselves well to quantity production and in this way only is the price possible.

IMITATION

say is the sincerest flattery. Hence we were highly gratified to find some of our friends so soon adapting the above to their own advertising.

Although this catch phrase was strictly our own original conception as applied to newspaper advertising, yet it is copyrighted, and we are glad to see anyone make use of it who may be so bold.

One, come all. The more the merrier.

EXPLANATION

At the Post Card and Music Shop next time you are down Main St., and

At some of the attractive little novelties at equally attractive prices in the window, then step inside and

to some of the latest Indestructible Graphophone Records, and if you haven't already a machine you will be interested in what we have to tell you about the latest Columbia Machines. A nice stock of Victor and Edison Records, also.

Decoration Straw Ride Party

On Decoration Day a straw-
ride party left the home of Ran-
dolph, 1315 Cedar street, Wil-
mington, for the home of Mr. and
Mrs. George H. Shepherd, near
Newark. They arrived there about
noon and immediately dinner was
served on the lawn which was
beautifully decorated for the occa-
sion. The day was spent in play-
ing games and all kinds of sport.
A most interesting game of base
ball was played. There was also

some fancy horse-back riding.
Supper was served on the lawn,
and in the evening all were en-
tertained with vocal and instru-
mental music.

Among those present were—
Misses Carrie and Rose Richards,
Lucy Austin, Helen Cahall, Helen
Vande-grift, Sue Fortenbaugh,
Adaline Tazewell, Helen and Alice
Shepherd, Messrs. William Van-
degrift, Harry and Philip Webb,
John Moore, John Miller, Mr.
Surserum, Robert Shepherd, Mr.

and Mrs. Rudolph Wilson chap-
eroned the party.

Delaware Militia Now In Camp

The Organized Militia or Na-
tional Guard of Delaware went
into camp on Sunday, to remain
until Thursday, at the State Ride
Range, below New Castle. Major
Styer, Capt. Nelson, Lieut. Knox
and Lieut. Whelan of the Regular
Army were the officers assigned
for instruction, and Capt. Keith
was the observer.

The Hayes Double
Cylinder Force Pump

is the only pump that throws
a steady stream, works the
easiest and the only pump
that does not taint the water.

connecting us in 6 miles
with Delaware Division
and Cape Charles

"My Son the Almighty
is making Folks every
day, but He is not mak-
ing more Land."

Why We Are Of Interest

The Delaware State Col-
lege located here.
(Free tuition to Delaware boys.)

Newark is the Center of
Education in the
State

The State Experiment
Station and the
State Experimental Farm

Newark is the Center of
Agricultural Interests
in the State.

THE Red Men's Fraternal Home
makes Newark of interest.
Every seventh man in Dela-
ware is a Red Man.

Center of Health Belt of United States

17 minutes from Wilmington.
60 minutes from Philadelphia.
1 hour 45 minutes from Baltimore.
2 hours 30 minutes from Wash-
ington.
3 hours from New York.
IN THE CENTER OF THE
HEALTH BELT.

The Hills of White Clay and Pencader
afford the most beautiful scenery in the
State, teeming with history and romance

THE FARMING DISTRICT

THE possibilities have never
been realized. As good soil
as can be found anywhere,
and at the threshold of the
best markets in the world.

AS a suburb of Wilmington or
Philadelphia it is unsurpassed.
For a manufacturing site we can
challenge the East.
For a home—just a home—ask
any one who ever lived here.

NEWARK

What shall we do with our Possibilities

My Son the Almighty
has made lots of Folks
and lots of Land, but
none better than you
have around Newark.

Buy a lot and build

Our Manufactures are among the Big Concerns

American Vulcanized Fibre Co.
Continental Fibre Co.
Nonantum Paper Mills.
Jacob Thomas Wall Paper Co.
American Machine Co.
Kennedy Machine Co.
A. Jedell Manufacturing Co.
Marble Yard.
Brick-yards.

Value of these plants is estimated
at \$1,250,000.

Wages paid out during last year
..... \$500,000.

Savings represented by Banks and
Build and Loan, \$500,000.

This does not concern the smaller
concerns and wages paid to
builders and contractors.

This does not include the money
for farm produce.
