Prefatory Note

The articles in this little book are offered as an indication of intellectual activity on the part of the faculty members of the University of Delaware. Its modest title, "Notes", accurately measures its scope. There has been no attempt to secure any uniformity as to subject matter between these articles. In fact they were selected from different fields to make the whole as representative as possible of our University life.

It was at first planned to have a considerably larger volume, and several articles not appearing here were accepted, but limitation of finance compelled us to reduce the size of the volume to less than half that desired. It was, however, thought best to publish what we could at this time with the hope that the future would make possible the realization of a more ambitious plan.

EZRA B. CROOKS,
Editor.
