# College of Business and Economics 

## - Accounting

- Business Administration
- Economics

Through a wide variety of courses at both the undergraduate and graduate level, students in the College of Business and Economics investigate and discover the ways in which business people, economists, government people, accountants, and others work together to achieve common purposes.

The college offers baccalaureate degrees in accounting, business administration, and economics. Within the business administration program, students may choose to concentrate in management, marketing, finance or operations management. Minors are available in business administration, economics, international business, and management information/decision support systems. Both the accounting and business administration undergraduate and graduate programs are fully accredited by the American Assembly of Collegiate Schools of Business.

At the graduate level, the College of Business and Economics offers degree programs leading to the Master of Science degree in Accounting, Master of Business Administration, and Master of Arts and Master of Science degrees in Economics.

Undergraduate students already admitted to the University of Delaware may apply to change their degree program to accounting, business administration, or economics after earning 30 credits at the University. Applications for changing majors and for applying to the
business administration and economics minors are reviewed each October 15 and March 15; the chief criteria used in selection is academic performance, both cumulative index and grades in required courses. Applications for the management information/decision support systems minor are reviewed each March 15 and are only available to students matriculated in the college. Students wishing to apply for readmission to the College of Business and Economics must generally meet the same standards of academic performance as those accepted for change-of-major. In recent years the number of available spaces has been limited and competition for acceptance is quite keen. Additional information and application forms are available in the four departmental offices.

## ACCOUNTING

The undergraduate accounting program is designed to prepare the student for an accounting career in industry, in government, or in public accounting. During the first two years, the accounting major follows a format of courses that enables the student to acquire a broad liberal arts
background The accounting program is designed to provide flexibility in the selection of humanities and social and natural science courses from broad groupings to augment the professional development of the student. The only courses that are specifically designated are either required by the University or needed to support the professional program. The undergraduate accounting major includes work in accounting information systems, intermediate, cost, income tax, advance accounting, and auditing.

Case studies and practical exercises give students the opportunity to work directly with accounting problems. The programprovides preparation for the Uniform Certified Public Accountant Examination, the Certificate in Management Accounting and other professional certifications.

The State Education Department, Division of Professional Education of the State of New York, under Section 15 of the regulations of the Commissioner of Education, has registered the four-year curriculum in accountancy leading to the degree of Bachelor of Science in Accounting. Graduates who have completed the full curriculum meet the education requirements for admission to the New York State license examination for certified public accountancy.

The major in accounting leads to the degree of Bachelor of Science in Accounting. Each candidate for a Bachelor of Science degree must: (1) earn a minimum of 128 credits, (2) achieve a minimum cumulative gradepoint average of $\mathrm{C}(2.0)$ on all work undertaken at the University of Delaware, (3) fulfill the course requirements of the degree program, and (4) achieve at least a $C$ in specified business, economics and accounting courses. In order to receive a B.S. in Accounting, a student transferring in credit must take at least five of the seven required technical junior- and senior-level accounting courses (ACCT 302, 315, 316, 327, 413, 415 and 417) at the University of Delaware.

Students majoring in accounting must take a broad range of nonbusiness courses (courses offered in colleges outside of the College of Business and Economics) including a specified number of courses of the humanities, science and/or mathematics, social sciences, and in other disciplines that develop specific skills. Fourteen credits of free electives are required to give each student the opportunity to choose courses most consistent with his or her interests and career goals.

Electives ..... $8-14^{1-9}$

Fourteen credits of elective subjects of which six credits may be taken outside the College of Arts and Science. Six credits from the College of Business and Economics may be elected in the elective category. Economics courses must be at the 200 level or higher and Business Administration, Finance, and Accounting courses must be at the 300 level or higher A student who elects ROTC may apply twelve credits of ROTC to the elective category. No more than two credits can be from PHED 120

CREDITS TO TOTAL A MINMMM OF

## BUSINESS ADMINISTRATION

The Business Administration program offers a balanced, professional degree program by combining a wide range of courses in Arts and Science and in Business and Economics. The curriculum also provides for concentrations of direct application to employment and career opportunities immediately upon graduation. In addition, it strives to prepare students for graduate study in business administration or other professional fields.

The undergraduate program in business administration reflects the ever growing demand for greater management capability in virtually every field of endeavor: private industry, government, or nonprofit institutions. Since most of the skills and techniques of management originate in private industry, much of the curriculum focuses on the private business sector However, it is also designed to demonstrate the applicability of management skills and techniques to nonbusiness institutions and activities.

Professional education in business administration should not be confused with vocational education. The programs in the department are not designed to train technicians. Rather, they serve to develop the capabilities of students so that they may assume positions of leadership and responsibility at all levels of management in an organization.

The faculty of the Departments of Business Administration and Finance strive to develop the resources of each student through a variety of teaching techniques: lectures, case studies, role playing, seminars, and directed study. No single teaching technique is emphasized to the exclusion of others. To enhance the instructional process, the departmental faculty is actively involved with business and governmental leaders through research, seminars, and consulting activities. Thus, in addition to being technically sound, the program maintains relevance and practicality.

Students pursuing a program of study leading to the degree of Bachelor of Science in Business Administration will select one of four areas of concentration: management, marketing, finance, or operations management. The concentration in finance is administered by the Department of Finance within the College of Business and Economics. Business administration majors may also pursue a minor in international business and/or apply to the minors in management information/decision support systems, economics or a variety of other fields. A minor in business administration is also available to students majoring in other fields.

Each candidate for a degree must: (1) earn a minimum of 128 credits, (2) achieve a minimum cumulative gradepoint average of $C(2.0)$ on all work undertaken at the University of Delaware, (3) fulfill the course requirements of the degree program, and (4) achieve at least a $C$ in specified business courses. Students seeking a Bachelor's Degree in Business Administration may take only one of the four required concentration courses at another institution.

Students majoring in business administration also take a broad range of nonbusiness courses (courses offered in colleges outside of the College of Business and Economics) including a specified number of courses in the humanities, sciences, social and behavioral sciences, and in disciplines that develop specific skills in mathematics, statistics, and written and oral communication. Additional electives are also required to give each student the opportunity to choose courses most consistent with his or her interests.

It is recommended that students take BUAD 301, 306, 309, 311 and ACCT 261 during the first semester of the junior year. A concentration is selected after taking these introductory courses.

All 400-level courses are restricted to Business Administration and Accounting majors and to students whose programs require the course. Preference is given to concentrators.

## REQUIREMENTS FOR THE MINOR IN BUSINESS ADMINISTRATION

The minor in business administration provides students in degree programs other than in business with an opportunity to acquaint themselves with the basic concepts of business administration. Completion of the requirements for the minor provides a basic understanding of the language and major functional areas of business. The minor is awarded only to students who have applied and been admitted to the program. Applications are reviewed each October 15 and March 15. This program is not available to students whose major program requires all of the following courses. Students seeking a minor in Business Administration may only take one of the required Business or Finance courses at another institution.

| Required courses for the minor are: | Credits |
| :---: | :---: |
| Accounting I, ACCT 207** | 3 |
| Accounting II, ACCI 208** | 3 |
| Introduction to Business Information Systems I, ACCT 260 | 3 |

| Prerequisites for these courses include: |  |
| Introduction to Economics I, ECON 151** |  |
| Introduction to Economics II, ECON 152** | 3 |
| Introduction to Statistics, I, STAT 201 | 3 |
| Introduction to Statistics II, STAT 202 | 3 |
| Calculus I, MATH 221 | 3 |
| Finite Mathematics with Applications, MATH 230 | 3 |
| CREDITS TO TOTAL A MINIMUM OF | 42 |

## REQUIREMENTS FOR

## THE MINOR IN INTERNATIONAL BUSINESS

The minor in international business is designed to give increased understanding of the important international dimension of business to students with a minor or a major in business administration or a major in accounting. The minor in International Business is not open to

[^4]Economics majors. The 18 credits required for the minor may also be used to meet other distribution requirements. Students meeting the following requirements will be awarded the minor. To qualify, a change of classification form must be filed in the office of the Dean of the College of Business and Economics upon completion of, or enrollment in, the last required course; this application must be filed no later than the end of the sixth week of student's final term. Students seeking the minor will not be given preference in registration for these courses. Students seeking a minor in International Business may only take one of the required Business or Finance courses at another institution.

Required courses for the minor are:

1. Nine credits with one course from three of the following four sets of courses:
A. BUAD 307 International Business Management BUAD 391 Seminar in International Administrative Management
B. BUAD 392 Seminar in International Financial Management BUAD 415 Finance Seminar: International Finance
C. BUAD 393 Seminar in International Marketing Management BUAD 475 International Marketing
D. BUAD 341 Environment of Multinational Corporations BUAD 394 Seminar in International Operations Management ECON 340 International Economic Relations
2. Nine credits taken outside the Department of Business Administration from a list, maintained by the department, of supporting courses, with no more than one course taken in a single department. Included will be all foreign language courses at the 200 level or higher and courses that emphasize current international issues or provide background for understanding other countries or cultures.

Economics is often confused with business administration. Economics and business administration courses both deal with the production and distribution of material goods and services. Both are concerned with business firms, with industrial organizations, and with governmental policies affecting such matters. They differ sharply, however, in both the methodology and viewpoint taken in these studies. Whereas, quite properly, the point of view of most business administration courses is that of the business firm and its well-being, the point of view of economics courses is that of society and society's economic well-being. Economics focuses on the question of how individuals in society can improve their material wellbeing and society can achieve its economic goals.

The program leading to a Bachelor of Arts degree with a major in economics for a student enrolled in the College of Arts and Science has the same group and language requirements as other Bachelor of Arts programs offered in the College of Arts and Science.

Both a Bachelor of Arts and Bachelor of Science degree are available to students enrolled in the College of Business and Economics. The group and language (Bachelor of Arts) or quantitative proficiency (Bachelor of Science) requirements for students enrolled in the College of Business and Economics are described below in addition to the concentration and related work requirements that apply to all economics majors.

A minor program in economics is also available..
Students majoring in economics will be advised by the faculty of the Department of Economics.

Departmental requixements and course descriptions are subject to descriptions, and departmental policies are available in the department office

## Application for Major:

Any University student who is not an economics major but wishes to become one must apply for admission into the major.

The principal criterion for acceptance is academic achievement, although it is also helpful to have taken some or all of the economics and quantitative courses required for the major No student whose index is less than 2.0 at the University will be considered, and it is unlikely that a student will be accepted unless his or her index exceeds 2.25.

Students may apply at the Office of the Department of Economics, 406 Purnell Hall The department office will obtain a transcript to accompany your application. Applications must be submitted no later than October 15 and March 15 for consideration. Decisions about acceptance will be announced by November 15 and April 15 and will be made only at these times. Students not accepted may reapply the following semester; no waiting list is maintained.

The number of students admitted into the Department of Economics during a semester is limited because of constraints imposed by the size of the faculty, the number of sections of economics courses offered to our majors, and the sizeable number of sections offered servicing students majoring in other departments.

## THE MINOR IN ECONOMICS

The minor in economics provides students in other degree programs an opportunity to study at a fairly intensive level the basic concepts and methodology in economics and to gain formal recognition for their efforts. The emphasis of the minor on upper-level courses is to help insure that minors can claim a reasonable level of competence in the field

## Required courses in minor:

Six courses ( 18 credits) with a grade of $C$ or better, including ECON 151, 152, 302, 300 or 301, 303, and one more course at or above the 400 level.

## Application for minor:

Same as application for major:

## DOUBLE MAJOR IN BUSINESS ADMINISTRATION AND ECONOMICS

## Overall requirements:

For graduation, 131 credits are required rather than 128 (business majors) or 124 (economics majors).

## Application and advisement:

Students must apply to both departments for this option. The student's double major program will be developed in consultation with an adviser

## INTERDEPARTMENTAL MAJOR IN ECONOMICS

The interdepartmental major consists of 51 credit hours selected from related fields with a minimum of 21 credit hours selected from each major field. In general, the Economics Department requires that the 21 hours of economics include ECON 151, 152, 302, 300 or 301, and 303. Before considering an interdepartmental major program, the student should strongly consider the option of a major in one field and a minor in the other.

International Relations is an established interdepartmental major in the College of Arts and Science. Interdepartmental majors have also been established for

Economics and either French or Spanish, Economics and Political Science, and Economics and Mathematics.

Students wishing to explore the possibility of developing an interdepartmental major with other departments should arrange conferences with their faculty advisers and the department chairpersons concerned to plan their programs. Approval of the program is also required by the dean of the college or colleges in which the student is registered.

See also the section on Interdepartmental Major in the College of Arts and Science section of this catalog for the requirements for an interdepartmental major combining economics with any field in the College of Arts and Science. The application process for an interdepartmental major in economics is the same as the application for a major in economics.

## REQUIREMENTS FOR THE MINOR IN MANAGEMENT INFORMATION/DECISION SUPPORT SYSTEMS

This minor was created to provide students within the College of Business and Economics with the opportunity to acquaint themselves with the rapidly expanding field of computer-based management information systems. Applications to be admitted to the Management Information/Decision Support Systems minor are reviewed each March 15, and admission is limited to College of Business and Economics students. The minor requires the following five 3 -credit courses:

Modern Business Computing, BUEC 325................................ 3
Systems Analysis and Implementation, BUEC 330......................... 3
Information Planning and Data Management, BUEC 430 ............ 3

[^6]
[^0]:    *Superior figures indicate year or years in which the course is normally taken, i.e, ${ }^{1}$ freshman year, ${ }^{2}$ sophomore year, etc.
    \#This requirement may be fulfilled through a course taken to complete major, group, breadth, or elective requirements. See page 27
    **A grade of C or better is required in this course
    ***Note that ACCI 352 and ACCT 313 may not be used for degree credit.

[^1]:    $\ddagger$ A grade of C or better is required in all but one of these courses.
    **A grade of C or better is required in this course.

[^2]:    *Superior figures indicate year or years in which the course is normally taken, ie, ${ }^{1}$ freshman year, ${ }^{2}$ sophomore year, etc.
    \#This requirement may be fulfilled through a course taken to complete major, group, breadth, or elective requirements See page 27
    **A grade of Cor better is required in this course
    $\dagger$ Students must take a total of six credits in any combination of the courses marked with a dagger as professional electives.
    $\ddagger$ A grade of $C$ or better is required in all but one of these courses

[^3]:    *Superior figures indicate year or years in which the course is normally taken, i.e., ${ }^{1}$ freshman year, ${ }^{2}$ sophomore year, etc.
    \#This requirement may be fulfilled through a course taken to complete major, group, breadth, or elective requirements See page 27.
    **A grade of $C$ or better is required in this course.
    $\dagger$ Students must take a total of six credits in any combination of the courses marked with a dagger as professional electives.
    $\ddagger$ A grade of $C$ or better is required in all but one of these courses.

[^4]:    *Superior figures indicate year or years in which the course is normally taken, ie., ${ }^{1}$ freshman year, ${ }^{2}$ sophomore year, etc.
    \#This requirement may be fulfilled through a course taken to complete major, group, breadth, or elective requirements See page 27
    **A grade of $C$ or better is required in this course
    $\dagger$ Students must take a total of six credits in any combination of the courses marked with a dagger as professional electives.
    $\ddagger$ A grade of Cor better is required in all but one of these courses

[^5]:    *Superior figures indicate year or years in which the course is normally taken, i.e. ${ }^{1}$ freshman year, ${ }^{2}$ sophomore year, etc.
    \#This requirement may be fulfilled through a course taken to complete major, group, breadth, or elective requirements See page 27
    $\dagger$ A course may be applied toward both the major requirements and a breadth requirement (unless otherwise indicated), but credits are counted only once toward the total credits for graduation.

[^6]:    *A grade of C or better is required in 12 of the 15 credits and an overall C average for all five courses in the minor.
