

MILITARY APPOINTMENTS AND DRILL

At the drill held this afternoon, the following appointments were made:

Major—D. L. Sloan.
Adjutant—Robert Lewis.

Quarter-Master—Samuel Tammany.
Commissary—B. W. Ward.
Ordinance—Eugene Manning.

Captains—

R. R. Whittingham.
W. S. Almond.
W. A. Reynolds.
C. H. Taylor.

First Lieutenants—

George Sawlin.
F. L. Maier.
R. G. Hill.
J. C. McCafferty.

Second Lieutenants—

H. T. Ennis.
J. G. Atlix.
B. L. Rice.
L. A. Russell.

Sergeant Major—W. A. Sawdon.

Quartermaster Sergeant—William Butts.

Ordinance Sergeant—Samuel Knopf.

Color Sergeants—

E. R. Todd.
T. J. McLoughrey.

First Sergeants—

Arissae Smith.
A. S. Houtchins.
A. F. Walker.
E. G. Brown.

Company Quarter-Master Sergeants—

E. E. Blades.
J. P. Dicks.
G. N. Goff.
A. L. Price.

Sergeants—

E. P. Jolla.
C. B. Wells.
W. T. McCall.

Private First Class—

J. S. Lank.
R. R. Foster.
R. P. George.
J. P. Mullin.
H. T. Hurlock.

Corporals—

A. B. Gray.
E. L. Bennett.
C. H. Brown.
A. H. Dean.
C. E. Grob.
A. R. Hammel.
E. W. Loomis.

Privates—

J. W. McCafferty.
O. R. McNeal.
N. J. McDonald.
Thomas Rudolph.
P. A. Townsend.
J. E. Watts.
A. C. Connolly.
R. W. Cranston.

Band.

First Lieutenant and Drum Major—

George W. Millington.
Second Lieutenant—
H. B. Ayers.
R. L. Jacobs.
R. B. Harvey.

Sergeants—

A. B. Raughley.
C. L. Linderman.

Fun Prevails At Class Day

Class Day exercises held in the oratory on Monday afternoon attracted the usual crowd of people anxious to share the fun.

Promptly at 3 o'clock "Dutch" Maier, class 1912, came rushing in to tell of his great difficulty of getting here in time to conduct the exercises.

The orator of the occasion was Peritz Wallace, of Delaware City.

C. T. McChesney, of Elkton, carried his audience in imagination to 1913 from which viewpoint they reviewed the class-mates of 1911 and wonderful indeed were some of the careers.

A note of fact revealed by the class history of John Van Gaskin Postles is that this is the largest class in the history of the college.

The rest of the afternoon was in the hands of the mercurial Junior, who proceeded to administer "knocks" to every possible victim.

The presence of Professor Short, showing a willingness to take all that's coming called forth a "hat's off, we admire your nerve, Professor."

"Dr." Frazer was presented with a bunch of carnations as the college boys' best friend in Newark.

GREATEST COMMENCEMENT IN THE HISTORY OF DELAWARE COLLEGE

LARGEST CLASS EVER GRADUATED--GOVERNOR SPENDS THE WEEK

Ex-Governor Lea Made President Of The Board Of Trustees--Secretary Of State Smithers Orator Of The Day

Delaware Commencement of 1911 passed into history as a great success. Long before the hour had arrived friends from far and near lined the passage way waiting for permission to enter. After the entrance of graduates, Board of Trustees, etc., the stately and standing room was at a premium.

The invocation by Archbishop Hall, of Wilmington, preceded the orations of the graduates, a representative from each department enumerating the merits of his chosen field.

Willard Perkins Shakespeare, who represented the classical department, owing to illness, was unable to be present. The first oration by John Van Gaskin Postles told of the engineer's function in conservation of our National Resources. He mentioned the period of settlement when it was necessary to clear the land, followed by careless waste of the timber characteristic of the later period, stating that at the present rate our forest could only last 70 years. The past has dealt all our natural resources with too generous a hand. To gain like results with less expenditure is the problem of the engineer--new alloys of iron, construction of machines to save metals, irrigation, opening up of streams to navigation. Such men must be the product of colleges where he has been taught to think.

C. T. McChesney, of Elkton, Md., discussed The Utility of a Practical Education. The technically educated and the self-made men were compared and the point strongly emphasized that a "technical education does not offer a panacea for negligence and inability."

H. S. Garrison, Cheswood, represented the Agricultural Department. He told of the change of ideas in this teaching, which now aims to reach all people, rather than merely the young. He believes no other institution with the exception of the church is doing so much for the country, and that the agricultural college and church should work shoulder to shoulder and side by side.

The commencement address by the Hon. W. T. Smithers was filled with faith in this generation and appreciation of the times.

He stated his object: the dropping of a few words of encouragement and suggestion. The trend of his thought was on "New World Problems" in this age of unparalleled opportunity.

The child of the century, the speaker said, is OPPORTUNITY. Now there is a flower growing in every garden, on every mountain top, at every cottage door, as well as by the palace--the flower OPPORTUNITY. It has not always been so. To older civilizations the door was shut and across its front was carved in roughest characters--NO ADMITTANCE.

In far-off ages the flower scarcely bloomed. The world never knew the meaning of the word until the beginning of the 19th century. The struggle of the ancient world was for power and promotion of vainglorious things rather than for human betterment. The fifteenth century was well-nigh ended when the little boat touched the West Indian shores and brought one faint glimmer to the world. On July 4th, 1776, the doors hung wide and OPPORTUNITY scattered her precious flowers. But man had been rendered stupid and recognized it only slowly. It remained for the nineteenth century to open the eyes--this age, the grandest that ever fell from God's beneficent hand.

Turning to the graduates, the speaker impressed upon them the richness of their environment. Little comes without effort. The eagles wings grew out

of the impulse to soar. The desire must come first to be followed by the willing. The time has come for the producer. Once was reigned supreme and destruction left no room for him. Until the 19th century man plowed with a sharpened stick, cut with the game sickle that Ruth used in Boaz. The Tudors never saw a window pane nor Washington a locomotive.

The secret of all progress and prosperity lies in organization. Not such organization as disgraces the land, but organization that is aspiring and warmed with all the vigor of youth.

Who are the producers of the world today? They are not found in the Eastern Hemisphere. The producers of today are the Americans--the alert, progressive, productive American--the pride of the present and the hope of the future.

This is a golden age for opportunity. It is the duty of the young men to see and seize it. The spectacular age is gone--don't deal in romance. The old order is changed. Aladdin has rubbed his lamp in the world of art and science, the waste places have become gardens of beauty.

Ruckle on the armor of energy. Like the youth passing through the Alpine villages, let your cry ever be EXCELSIOR.

After the address the following prizes were awarded:

PRIZES

The list of prizes and those who won them were as follows:

Bishop Coleman Memorial Prize, \$25, to graduate having best standing in all respects in the senior year, Joseph Lafetra Marshall, of Lewes.

Alumni Prizes, to best two debaters in the annual contest, 1, \$20, Peritz Wallace of Delaware City; 2, \$15 Charles James Schaefer, of Delaware City.

The Bush Literary Prizes, for best and second best literary essays written by an undergraduate student, 1, \$15, William Perkins Shakespeare, of Wilmington; 2, \$10, Thomas Bell Tinney, of Smyrna.

Lieutenant Clark Churchman Memorial Prize of \$25 for highest proficiency in military department, Levin Irvin Handy Jr., of Smyrna.

The Philo Sherman Bennett Prize of \$25 for the best essay discussing the Principles of free government, Horace Evans Spruance, of Smyrna.

Woman's Christian Temperance Union prizes in Oratory and Composition; 1, Howard Taylor Ennis, \$25; 2, Elmer Ellsworth Blade, \$15; 3, Emory White Loomis, \$10; 4, Alfred Preston Scott, \$5.

William D. Clark, prizes for the students showing the greatest efficiency in mathematics during freshman and sophomore years, 1, Arthur Lee Price, \$25; 2, Wallace Atterbury Sawdon, \$12.50.

The Garrett Stout Smith, Jr., Memorial Prize, for member of class of 1913, who has the best standing in Mechanics, \$10; William Butts, William Marion Mattingly, honorable mention.

Perkins Prize, for best stories written by undergraduates, 1, James Gilpin Lewis, \$5; 2, Thomas Bell Tinney, \$5.

Trustee Prize, highest general average of proficiency in College activities, Howard Taylor Ennis, \$50.

Agricultural Prizes to Students who have made the most progress in their work during the year: 1, Harry Slaughter Garrison, \$15; Robert George Hill, \$10; Elmer Graciar Bennett, \$5.

Dr. Harter then read a letter of greetings from Professor Robinson, who, owing to illness, was unable to attend.

Greetings on Commencement Day to officers, students, alumni and friends of "Old Delaware."

Regretting beyond expression, an enforced absence, I sincerely congratulate all who, today, receive their degrees. Especially noting the largest section in civil engineering ever graduated, do I the more regret that I am not able to express in person my congratulations. Allow me to wish you all abundant success manifested in professional lines of great honor and usefulness.

And for you, Mr. President, congratulations and best wishes for continued success in the service of the college.

FREDERIC H. ROBINSON.

Graduates At Delaware

Bell, Davis Hankins, Electrical Engineering, Smyrna, Delaware.

Davis, James Rankin, Latin Scientific, Wilmington, Delaware.

Davis, Ralph Gray, Civil Engineering, Elkton, Maryland.

Dunn, Robert George, Civil Engineering, Camden.

Eastman, Arthur Bartlett, Civil Engineering, Wilmington, Delaware.

Eaton, Joseph Horace, Civil Engineering, Port Penn.

Fisher, John Hough, Electrical Engineering, Dover, Delaware.

Frazer, Dudley Gassaway, Civil Engineering, Elkton, Maryland.

Garrett, Ralph Edward, Electrical Engineering, Elkton, Maryland.

Garrison, Harry Slaughter, Agricultural, Cheswood.

Gilbert, Frank, Civil Engineering, Seaford.

Hagner, John Sayers, Civil Engineering, Atlantic City, N. J.

Handy, Levin Irvin, Jr., Civil Engineering, Newark.

Heldler, Charles Harrington, Civil Engineering, Philadelphia, Pa.

Hodgson, Laurence Altemus, Civil Engineering, Wilmington, Delaware.

Houston, Liston Alexander, Civil Engineering, Clayton.

Hubbard, Winfield Washington, Civil Engineering, Federalsburg, Md.

Kidd, Crawford Coates, Civil Engineering, Wilmington, Delaware.

Kirby, William Livingston, Agricultural, Smyrna, Delaware.

Marshall, James Orton, Electrical Engineering, Lewes.

Marshall, Joseph Lafetra, Electrical Engineering, Lewes.

Morrow, Robert Holman, Civil Engineering, Wilmington, Delaware.

Patterson, Peyton Boman, Civil Engineering, Blytheville, Md.

Postles, John Van Gaskin, Civil Engineering, Smyrna, Delaware.

Raughley, Robert Francis, Civil Engineering, Wilmington, Delaware.

Schaefer, Charles James, Jr., Electrical Engineering, Delaware City.

Scott, William Hart, Civil Engineering, Townsend.

Shakespeare, Willard Perkins, Classical, Wilmington, Delaware.

Spruance, Horace Evans, Classical, Smyrna.

Stump, John, Jr., Electrical Engineering, Perryville, Md.

Taylor, Clarence Edward, Electrical Engineering, Harrington.

Taylor, Roland Wallace, Civil Engineering, Kenton.

VanArsdalen, Charles Irwin, Civil Engineering, Wilmington, Delaware.

Vandegrift, Bayard Aldrich, Civil Engineering, McDonough.

Wagner, Peritz, Electrical Engineering, Delaware City.

Walls, Foster Irving, Latin Scientific, Smyrna.

Willey, Ralph Emory, Civil Engineering, Greenwood.

Alumni Well Represented

The Alumni was well represented on the campus this morning. On all sides friend greeted friend and good fellowship prevailed. Among the ones returned to Alma Mater were W. H. Heald, '82; J. H. Mitchell, '83; Floyd Wingett, '89; C. E. Watts, '89; W. J. Bratton, '10; J. J. Jones, '11; Wm. Stubbs, '88, etc. H. H. Curtis, ex-'87; L. L. Curtis, '94; Louis DuHadway, '89; G. M. Fisher, '85; Brooks Jackson, '89; Harrison Manning, ex-'11; L. T. R. Ward, Jr., '88; A. P. Shaw, '10; Paul Pie, '86; Geo. St. C. Pie, '85; H. Van Dyke Stewart, '89; J. L. Obier, '10; Sterling Evans, ex-'84; Alfred McVey, '84; W. P. Constable, '84; Geo. D. Kelly, ex-'82; Victor Davis, ex-'13; Thos. Davis, '85; Charles Stockley, '81; Ayres Stockley, '85; Frank Collins, '89; Cummins Speakman, '82; W. S. Corkran, '10; T. M. Gooden, '85; M. H. Wilson, '85; R. S. Rodney, ex-'84; Charles Blake, '87; H. A. Miller, '88; Heisler Harrington, ex-'10; R. T. Cann, Jr., '89; J. N. Lyndall, '10; S. L. Connor, '87; R. B. Wolf, '86; G. A. Papperman, '89; R. T. Palmer, '89; R. T. Ward, '89; E. McGarvey, '89; J. L. Soper, '85; Alex. J. Taylor, '82; George Bacon, '10; William Schaefer, '10; E. D. Hearn, '89.

Miss Julia McMullin, of Glasgow, Mr. Presley Geoghegan, of Union, Mr. W. L. Wright, of Haddonfield, attended the commencement exercises.

TRACK MEET SUCCESS FIVE RECORDS BROKEN

In the seventh annual inter-class track and field meet yesterday afternoon the 1912 class won the Alumni-challenge cup and as it is the third successive year that this class has won the cup it now becomes the property of the class. The class of 1912 secured 64 points; 1913, 23, and 1914, 32. College records were broken by Millington in the shot put and discus throw, by Veale for throwing the hammer and by Dean in the 120 yard hurdles. Class 1912 also broke the college record in the relay race. Those who broke records receive gold medals. Howard T. Ennis was elected captain of the track team for next year. The result of the events follow:

Event 1--100 yard dash. First Ennis, '12; second, Manning, '12; third A. Dean, '14. Time 10 3/5.

Event 2--High Jump. First, Walker, '13; second, Bennett, '14; third, Dawson, '14. Distance, 4 ft. 2.

Event 3--Shot put. First Millington, '12; second, Veale, '14; third, Taylor, '12. Distance 35 ft. 1 inch.

Event 4--Half-mile run. First, Sawdon, '13; second, Mullin, '13; third, Manning, '12. Time, 2:15.

Event 5--220 yard hurdle--First, Taylor, '12; second, A. Dean, '14; third, McCafferty, '14. Distance, 19 feet.

Event 6--8-mile run. First, Cranston, '14; and Jacobs, '12, tied; third, Grubb, '14; time, 5:14 4-5.

Event 9--440 yard dash. First, Sawdon, '13; second, McCafferty, '12; third, Lewis, '12. Time, 59 4-5.

Event 10--120 yard hurdle. First, A. Dean, '14; second, Harvey, '12; third, McCafferty, '14. Time, 19 3-5.

Event 11--Pole Vault. First, Harvey, '12; second, Houston, '11; third, McCafferty, '14. Distance, 9 feet.

Event 12--Discus throw. First, Millington, '12; second, Taylor, '12; third, Veale, '14. Distance, 35 ft. 2.

Event 13--Relay Race. First, Class 1912; second, 1911; third, 1914. Time, 3:36 4-5.

Preston Lea Head Of Trustees

In the annual election of officers former Governor Preston Lea was elected president of the board; John C. Stockley, vice-president, and Charles B. Evans, secretary and treasurer. The committees as they stand at present were continued.

The Agricultural Extension Department was taken up and the Board authorized the committee to proceed with the plan outlined by Professor Hayward.

The Chair of History furnished considerable discussion. The matter was referred to the committee on instruction and discipline. A special meeting will be called later on.

George B. Dutton, son of State Senator Dutton, was elected by the board assistant in English, this being the only change made in the faculty with the exception of the appointment of Lieutenant F. B. Eastman as military instructor.

All the professors at the heads of departments in the college were granted an increase in salary from \$1,900 to \$2,000, and Joseph N. McVey, assistant in mathematics, was granted an increase from \$1,200 to \$1,500.

A long discussion took place at the meeting on a resolution offered by Senator Marshall, to the effect that the work in the several departments of the college be divided more than at present, thus giving each department a head with several assistants. No action was taken on the resolution, and the subject was laid over until the meeting next year.

It is understood that the adoption of this system, which is known as the departmental system of instruction, would involve changes in the salaries of several instructors.

The trustees, following the business session, adjourned to the Deed Park Hotel, where luncheon was served.

After luncheon, the members of the original Board met in the parlors of the hotel. Two new members were elected to fill vacancies caused by the deaths of Manlove Hayes and F. W. Curtis, Henry Ridgely, of Dover, and Chancellor Curtis, of Wilmington, were elected.

No other business was reported.

Improvements On South Chapel

The property of D. C. Rose, on South Chapel street is being improved. The houses are being painted, the fences removed, cement pavements being laid, etc. The new house is about complete.

Commencement Began On Sunday

Optimism Marks Y. M. C. A. Sermon

For the third time the anniversary of the Delaware College Y. M. C. A. was held under unfavorable circumstances, and pouring rain kept the usual crowds who enjoy these services at home.

H. T. Ennis, class 1911, presided. The opening hymn was followed by prayer by Rev. G. T. Alderson, and the reading of the Scripture lesson, the XII chapter of Hebrews, by Mr. Ennis. The sermon was delivered by Rev. Henry L. Bunstein, of Milford, Del.

Mr. Bunstein took for his text the 28th verse of the 12th chapter of Hebrews:

"Wherefore we receiving a kingdom which cannot be moved, let us have grace, whereby we may serve God acceptably with reverence and godly fear."

The first thought with which the text impresses one, the speaker said, is "Christianity is indestructible."

One hears much of Sabbath desecration. All sorts of literature is circulated showing the danger of losing this day of rest. But is not the Sabbath a divinely appointed observance? If we acknowledge such to be true it is as sure to endure to the end of time as Sinai itself to stand.

We are told that the Bible is now-a-days only regarded as literature. Again it is not the word of God and does that not insure its living forever?

Some cry that the Christian church is dying out. That has always been the cry—since its beginning, but still it has gone on, increasing in number and usefulness until today it has reached greater success than was ever before known.

The speaker pointed out the advance of national ideals and national responsibility, which shows itself in arbitration replacing war as a settlement of differences.

The greater humanitarianism of monarchs is noticeable. An instance illustrating this was told—the story of the Potsdam Mill. Frederick the Great realizing that the old mill obstructed a view from certain part of the palace sent a messenger to the owner to ask his price to which the reply that no money could buy it was given. The mill was torn down, but the miller fought the action in the courts, saying Prussia was a great and fair country. The decision was that the mill should be rebuilt and the property restored.

Frederick complied, saying he was only proud of the integrity of the judges and the justice of his country's laws.

A number of years ago the representative of the same family, the owner of the mill, found himself in desperate financial circumstances. He wrote to the emperor, "the property is yours at whatever price you will," to which he received the reply:

"Dear neighbor,
"You must keep the mill. It is a part of the history of Prussia."
"Affectionately your neighbor,
"WILLIAM."

along with a sum of money to make right the difficulty.

The improvement in the monarch only indicates the improvement of the individual.

Mr. Bunstein believes that the Christian church has come to understand its mission—no longer regarding its sole duty to be taking men to the Kingdom of Heaven, but the greater one of bringing the Kingdom of Heaven down to earth. Its aim is to establish "Peace and good will on earth."

The whole sermon was an earnest appeal of "the world is growing better" doctrine, to which the words uttered from President Hadley's address before the students of Yale, "Young men, thank God you live in an age of faith," seemed a fitting summary.

Forceful Sermon By Tennessee Bishop

The baccalaureate sermon delivered by Bishop William P. Anderson, of Nashville, Tennessee, attracted a large crowd to the Oratory on Sunday evening. The speaker, with all a Southerner's flow of words, gave a practical, straight from the shoulder talk that appealed to all the hearers.

He chose for his text parts of the 26th and 27th verses of the 20th chapter of Matthew: "Whoever will be great among you, let him be your minister; and whoever will be great among you, let him be your servant."

When the Son of Man came into the world He brought with Him a new standard of measurement. How new that was, a review of the history of the world at that time will prove. Since that time has lived the consensus of right thinking people calls that man greatest who serves until that idea now dominates our ideals and permeates our education. The German idea of education is scholarship; the English idea, culture; the American, service. We honor scholarship, we revere culture, but these must only lead to the end-service. True scholarship better makes; true culture is shot through with a Christian spirit which lays itself upon the altar of sacrifice.

The growth of Democracy has robbed the world of the idea that kings have divine rights. The new decree proclaims every man a King in divine right and calls really great only him who serves humanity. The age demands that a true preacher must stand for progress, peace and human brotherhood.

The speaker referred to William Allen White's book, "A Certain Rich Man," which has been called the most characteristic story of America that has been written, and he rejoiced in the fact that it contained such wholesome truths, all of which tend to emphasize the statement that the man who leads a selfish life gains no rewards worth having.

The same writer in an address before a fraternity of Columbia University defined the principle of Spiritual Growth as the Universal desire of the best spirits of today to pour out their life in service. This Bishop Anderson called ethical, modern, practical religion.

It has ever been the custom of youth to indulge in day dreams. Young people from the beginning of time have tried to answer the question: "How much can be gotten out of life? How much of influence, leadership, etc., will

the world allow to me?"

He illustrated his idea with a bit of personal experience. While conversing with a friend who had recently celebrated a birthday, he remarked upon the fact that they were both advancing in the forties, to which the other replied: "Yes, it excites me, makes me indignant to think of it. I am afraid I am not getting all I should out of life."

The Bishop said he expected to broach the subject again and talk to his friend in this wise: "Suppose you were about to make an investment. You would inquire about the company, and all the details to be sure, but before seriously considering the returns would you not first have to settle the question, 'How much shall I put into the concern?'"

Let these words of truth and soberness be the question that absorbs each young life—what shall I put into life?—for the answer to how much I shall get out, lies in the prior fundamental question of the amount to be put in.

The providential workings of Almighty God are as inevitable as the law of gravitation. Put in broadly, confidently, earnestly and get all the joys of this life and of eternal life. There is no joy comparable for one moment to the joy of service. It is the great principle upon which is built the civilization of centuries. Whenever one exclaims with Browning over the "wild joy of living" we know that one is an earnest worker somewhere among God's material world.

Service has been the means by which he has been expanded, multiplied, enlarged, transformed and shot-through with divine content and potentiality.

In one of Whitman's sweetest poems he talks of the "dear delight in doing good." Thus we gain the transcendent dignity of living.

There is a fallacy among men that the highest place means the place where there is nothing to do. In conversing with a business man of sixty, the speaker was told about the years of hard work and the ambition to retire. Bishop Anderson scorned the idea of being past usefulness at sixty, saying a man had only then his best equipment derived from accumulation of experience and years of wisdom.

The speaker, in closing, beautifully told the story of the Telling of Felix. The poem grew from a historical incident. In the winter of 1897, a fragment of a papyrus book was found in the rubbish heap of Egypt. This single leaf contained short sentences introduced by the words, "Jesus says":

"Henry VanDyke with his fertility of imagination and versatility of genius, has elaborated on one of these:

"Raise the stone and thou shalt find Me; Clave the wood and there am I."

The poem tells of the Egyptian boy, vainly seeking for inspiration from the sight of the face of Jesus, until he joined the brotherhood of labor and served his fellowman. The speaker gave the beautiful closing words as an impressive summary:

"This is the Gospel of labor—find it, it is the life of the world—
The Lord of long years down from above, so live with the man who work."

This is the rule that He planted here in the dawn of time—
Heaven is blessed with perfect rest, but the blessing of Earth is toil."

Almighty God is the greatest lover of the universe. We are introduced to Him in Genesis as a mighty, infinite worker. There is only one condition of fellowship with Him, and that means by which we can make Him our daily Companion and Elder Brother—earnest work in a worthy field. Let us labor and make our lives deep, rich, divine, vigorous. Then we shall have immortality of influence and personal immortality with God through out Eternity.

SCHOLARS MUST NOT CEASE TO BE MEN

Dr. Craig's Strong Address

The exercises on Monday evening represented the Phi Kappa Phi honorary fraternity. Prof. E. L. Smith explained the aim of this organization which originated with President Harris of the University of Maine. It pleads for union in a world of cultivated men accepting all who stand well in scholarship, either as men of letters or scientists.

Only those are eligible who have stood among the leading third in their classes. The first chapter of this fraternity started at the University of Maine in 1891; the second in Pennsylvania State College in 1899; the third, the University of Tennessee, 1900; the fourth Massachusetts Agricultural College in 1901, and the fifth at Delaware College received its charter in 1904, though not really installed until early in 1905. The total membership is now 1119, of whom 71 come from Delaware.

The charter members of this fraternity are: Doctor Hart, Doctor T. R. Wolf, deceased, Prof. F. H. Robinson, Prof. Conover, Prof. Ford, Prof. E. L. Smith, Prof. Edwin Dawson and Prof. Van G. Smith, representing the faculty; and Prof. C. A. Short, Messrs. Reginald Constable, Pusey Jones and J. McVey, of the Alumni.

The present officers are—Van G. Smith, President; J. W. McVey, Vice-President; E. L. Smith, Secretary and Treasurer. Members of the graduating class lately initiated are Messrs. Hubbard, Eastman, Garrison, McChesney, Heister, Taylor and Wainer.

The strong address of the evening was delivered by Rev. Alfred E. Craig, of Grace Church, Wilmington, who took for his subject "Educational Equipoise."

Dr. Craig believes that educationally speaking this is an age of dissolving views. The cultural idea as it comes from the past does not meet the need of the life of the present day. Its purpose was to keep a man as far as possible from the ordinary walks of life. This has been less true of the training received at American Universities than at those of Europe, where the tendency was so pronounced as to cause the Uni-

versity to be defined as "a place where nothing useful is taught." This has resulted in a challenge of all cultural education, and we now find our colleges in danger of being brow-beaten by the materialism of the times. Dr. Craig said he did not mean to belittle vocational training for one who needs to visit the complicated centers of American life to realize we need technicality and special training. He wished to sound the warning expressed in the German proverb: "Be careful you do not empty out the baby with the bath."

Our institutions must tend to the broadly democratic; the equipment of many rather than the personal adornment of the few. A scholar must not cease to be a man; must not forget he is a citizen.

Benjamin Kidd has pointed out the fact that in all the great reforms of the last century the educated men of England were on the side which was afterwards commonly accredited to be wrong. The educated man was a recluse who forgot to keep close to the interests of the common people.

A serious criticism of the tendency of the day is that too often education is demanded to give an account of itself in the coin of the realm, overlooking the great fact that our aim is not to make a living but to benefit humanity, counting toward wealth, of the head and not the heart.

Henry VanDyke has defined the educated man as the one who sees clearly, reaches widely and wills nobly.

W. L. DOUGLAS

\$3.00, \$3.50, \$4.00

& \$5.00

SHOES

Best in the World

UNION MADE

Boys' Shoes

\$2.00 and

\$2.50

Fast Color Eyelets Used

W. L. Douglas shoes are the lowest price, quality considered, in the world. Their excellent style, easy fitting and long wearing qualities excel those of other makes. If you have been paying high prices for your shoes, the next time you need a pair give W. L. Douglas shoes a trial. You can save money on your footwear and get shoes that are just as good in every way as those that have been costing you higher prices.

If you could visit our large factories at Brockton, Mass., and see for yourself how carefully W. L. Douglas shoes are made, you would then understand why they hold their shape, fit better and wear longer than other makes.

CAUTION: W. L. Douglas shoes and price is stamped on the bottom in golden lines. Beware of cheap imitations. Take No Substitutes. If W. L. Douglas shoes are sold for less than the price here, they are not the real W. L. Douglas shoes.

CHARLEY NOROWSKIE,
Sole Agent for Newark.
Center Hall Building

Long Distance Supervision

Far from my office and I manage to direct and supervise my plant in the suburbs or in another town, with as much ease as if it were in the basement below.

The agent which can so efficiently place of the important details of a business—put it hand or at a distance—should surely be placing your orders, tracing your shipments, acting as your salesman, as well as performing a thousand other functions for you.

The lines of the Bell System place every market and customer east of the Rockies at your elbow.

The Delaware & Atlantic T. & T. Co.
E. P. BAROD, District Manager

BREED TO A WINNER

Gitche Manito 2.09½ Race Record on a Half Mile Track

SIRE OF ELIZA L., 2.12 1-4

Will make the Season of 1911 at

Huber Driving Park, Newark, Del.

Gitche Manito is a beautiful brown horse, 16 hands high and weighs 1250 pounds. He is sired by Jay Bird by Geo. Wilkes, and his dam is Kate Patchen (dam of 3) by Mambrino Patchen. He obtained his record in a winning race on a half mile track. In the last three years he started in 34 races, winning 15 first, 13 seconds, 2 thirds and 1 fourth. Come look him over. You will like him.

Service Fee \$25. \$5 Cash at time of service, the remaining \$20 when the mare moves in foal. Address

Quotations From Prof. Waugh's Speech

"The farms of Delaware produced nearly 6 1/2 millions of dollars, in 1909 they produced over 9 millions; in 1910 they produced roughly estimated over 12 millions of dollars. Can such an advance be shown in any other industry under the stars and stripes? And remember, this enormously increased production of food and goods has been made on a constantly diminishing area. Delaware farmers are actually cultivating a great deal less land than they were 10 years ago, and about 8 per cent less than 20 years ago."

"Must people have given a great deal more attention to money saving than they have to money spending. It is just as important to spend money as to get it. In many ways money spending is the more complicated matter, and fewer there be who have mastered it."

"It is said that charity should begin at home. Let us be charitable therefore and spend our surplus profits first upon our homes. There are a good many farmers now-a-days who can afford to build new homes. * * * There are far too many city houses going up in the country. A thoroughly satisfactory house is to have it planned to suit its surroundings, to suit its occupants and all local conditions."

"The fact is farmers are every year moving to the city for the sake of enjoying these modern conveniences, while all the while the same conveniences can be better secured on the farm and actually at less cost."

"Road improvement is one of the most fundamental kinds of community improvement."

"Village streets everywhere are flanked by rows of trees. Such plantings of trees are seldom seen in the country. They ought to be quite common. I do not believe that every country road ought to be lined its entire length by parallel rows of trees, but such plantings ought to be the rule rather than the rare exception as they are today."

"Every town and every rural neighborhood ought to have open public grounds. Villages and farm communities also ought to have special public grounds reserved for play."

"Play grounds in the city are regarded as a necessity, but the farmer and his family are just as much entitled to their recreation as the street car conductor and his family. It is one of the characteristic faults of country life that sufficient plans are not made for recreation."

"I have recently seen some signs in the way of community ownership of land which were very attractive to me. Last summer I visited a number of villages in Germany and Austria where extended tracts of land are held in common ownership. In the majority of cases these are forest lands though not in all cases. These forests are managed for public benefit, and return a revenue to the cities, towns or cantons owning them."

"I learned that there are 140 towns in Germany where a greater or less proportion of the expenses of government are met by the revenues from town lands. I learned that several of these towns secure sufficient revenues from their own lands to pay the fire expenses of government-police force, street improvement, fire armament, schools, and even the salary of the preacher. In some instances on first of the year the town government distributes \$20 apiece to its citizens."

"The community can unite the improvement of the public buildings. It is a public duty of the highest importance to see that all such public buildings are well built and of attractive design, befitting the self-respect of a progressive and intelligent neighborhood. A mean, ugly, undignified schoolhouse or court house is a blot upon neighborhood, a genuine public disgrace and a source of inconceivable grief."

"There are two principal ways of improving schools in any community. The first and simplest way is put more money in them; the second the thorough overhauling by a prejudiced outsider."

"Most communities would benefit by working out at least one existing church. If the number be reduced to half, congregations merged, funds better distributed, get preaching engaged and the work otherwise adjusted to the present time and needs, the church would gain enormously in time and influence."

It would be of great advantage to many granges to undertake some definite practical improvements in local affairs just to give them something concrete to do. It would be better that the constant discussion of reciprocity and parcels post which, however important, are outside of our immediate disposition."

"In places the local church might undertake the lead in practical improvements. It is said that 'cleanliness is next to Godliness' and if some church would clean up the streets and the public places in its locality it would be making a long move in the direction of its principal business."

"Farm life is naturally broad and generous. Kindness, generosity and hospitality are the characteristic qualities of farm life. They ought to be made more directly available to the large number of people in the world who need kindness, hospitality and generosity. Most of the fresh air excursions of poor children to the country are organized by city agencies. Ought not these things to originate in the country? Would it not be quite the correct thing for the country church, or especially for the local grange, to organize such an enterprise?"

KEMBLESVILLE ITEMS

The festival on H. T. Kelley's lawn on Thursday evening was a decided success. The Kemblesville Cornet Band has \$50 more in the treasury as a result.

The farmers of our community turned out in force on Monday and hauled a car of lumber from Yentman Station for C. T. Richards' new house. Mr. Richards bought the lumber in Meretta and it is of fine quality. This house will be among the finest in our village. He is building it on the same site as the one destroyed by fire early in the spring.

S. C. Kenner's new shop and garage is in the hands of the painter. It is looking fine in its new suit. When this business block is completed it will be one of the finest in the county.

A number of our enterprising farmers visited Newark on Monday and greatly enjoyed the program rendered at the State Farm.

E. C. Spencer and George R. McCleary believe in pushing work and never allowing work to push you. The merry music of the mowing machine was heard in their fields last Saturday.

A. C. Mearns has the finest field of corn on the road from New London to Elkton, standing waist high all over the field.

Our farmer friends say that wheat in this community will be ripe and ready to cut by the 27th inst. From all appearances it will be a bumper crop.

Potato bugs are right on their job, but are being treated to a generous dose of Paris green.

Mr. and Mrs. Thomas W. Perry, of Wilmington, were visitors last week at the home of Mr. and Mrs. William McMullen.

Miss Mary O'Daniel is visiting her sister, Mrs. William Chen.

Mrs. Saul Snyder has returned to her home after an extended visit with Delaware friends.

Arnold Ewing and family, of Newtown Square, spent Saturday and Sunday with Mrs. Ewing's parents, Mr. and Mrs. William Willard.

Anna T. Fred is home from West Chester Normal School for the summer. The school closed last Friday.

Calvin Wilkinson, of Ohio, who came on to attend his brother's funeral, is circulating among his old acquaintances.

Miss Mame Wickersham spent a few days last week with friends in New Garden.

Mrs. Margaret Greenfield is visiting friends in Avondale.

Mr. and Mrs. Thomas Perry, of Wilmington, are visiting among friends in this vicinity.

Mrs. Mame Ewing and children, of Newtown Square, are visiting at the home of Mr. Wm. Willard.

Rev. C. J. Benjamin, of Quarryville, former pastor of this place, spent a few days last week with friends in this village.

New Officers

Officers were elected for the coming year by Hiram Lodge last Monday evening. The new officers are as follows:

Worshipful Master, W. J. Rowan; Senior Warden, G. L. Brooks; Junior Warden, Mel T. Cook; Secretary, R. S. Galaher; Treasurer, H. G. M. Kollock; Tyler, Isaac Vassant.

Absent Ones

Absence makes the heart grow fonder, but the memory of the absent one becomes vague and dim. You long to picture in your mind just how "HE" or "SHE" would look, but there's a mysterious something which makes this mental picture impossible.

But if you had a photograph before you, then you could recall the forgotten face, yes, even the kind acts, the gentle words.

Wouldn't that "ONE" so far away appreciate your photograph too?

Why not call today at the NEW STUDIO over Ed. Herbener's Post Card & Music Shop, and look over the latest styles.

JUNE 21, 1911

WE are giving all our space to the news of commencement. Any comment we might make will in no way add to the occasion. It has been the greatest commencement in the history of the college. The interest being taken by all classes of citizens is indeed gratifying, but this we must not forget, adds responsibility to the Trustees and Faculty. Delaware College is no longer a private institution, but a State institution. The citizens of the State are at last beginning to realize this and to voice sentiments regarding its management.

The State Farm connected with the College, aside from the good work it has done, has brought about much of this interest. But the work is not complete. The College has not reached the height of its influence.

The keynote of most of the speeches made has been—SUCCESS.

And this is what Delaware demands of the College.

WE wish to express our appreciation to the Junior Class and the Sunday Star for the use of the cuts in this issue.

Delaware Clark Dies Suddenly

Delaware Clark, aged 54 years, was seized with an attack of vertigo from which he never recovered early Friday morning. The deceased had been subject to these attacks which were similar to paralytic strokes, for several years.

As he was on his way to the post-office Mr. Clark was seen to stagger and fall. Friends rushed to his assistance, physicians were summoned, but the stricken man never regained consciousness.

Mr. Clark has always called this community his home and was one of the most widely known men in rural New Castle county.

He was appointed postmaster of Newark about three years ago. He was a Republican and had taken an active interest in politics for some time. He was elected, and served one term from 1890 to 1903 as recorder of deeds in New Castle county.

Mr. Clark nearly all his life lived on a farm between Couch's Bridge and Glasgow, but discontinued farming about seven years ago at the time his residence, Elfricks, was burned to the ground, where he moved to Newark.

He was a son of the late Cantwell Clark, who was one of the largest landowners in the State, as he owned from 1,000 to 1,200 acres of valuable land between Couch's Bridge and Glasgow, Mrs. Clark, who before her marriage was Miss Harriet Curtis, was in Philadelphia at the time of her husband's death.

Besides his wife the deceased is survived by seven children, as follows: Elizabeth, Frederick, Cantwell, Julian, Catherine, Frances and Winslow Clark.

The funeral was held Monday afternoon at 2 o'clock. Services were held in the St. Thomas P. E. Church. Interment in Glasgow Presbyterian Cemetery. The pallbearers were J. Wilkins Couch, Chas. B. Evans, Eben Frazer, S. J. Wright, J. W. Brown and Daniel Thompson.

Distinguished Guests

A large and enthusiastic gathering of the greatest Red Men of the United States visited the Red Men's Home last Sunday. Among the guests were the Great Inebriate of the Great Council of the United States, G. B. Griggs, of Texas, Great Senior Sakamore, Carl Foster, of Bridgeport, Conn.; Great Junior Sakamore Hon. Frederick C. Downs.

Our Associate Judge Hon. Wm. H. Boyce, of Delaware, who now occupies a place on the great Board of Appeals of the Great Council Great Sachem Harry V. Vickers, of Delaware, Great Chief of Records, Edward McIntire, and many other prominent Red Men of Delaware.

Fifty-six guests dined at the home. This represented the official visit on the part of these men.

The highest compliments were paid the managers for their zeal and integrity. All expressed their admiration, saying the home showed all they claimed and more.

The membership in Delaware of this order is the largest per capita of any reservation in the Great Reservation.

The Blue Hen

"The Blue Hen," this year's Annual, issued by the Junior Class is the most ambitious work ever attempted at Delaware in the way of a college publication. The class deserves great credit for the work accomplished. It is not only a reflection on the ability of the staff of editors, but also will place the college in a pleasing light before the public.

The printing is the work of the Star Printing Company. Many complimentary remarks are heard on all sides on the artistic manner of printing. Special mention should be made of the clever drawings by Knopf.

House Party

Governor Himeon S. Pennell will be a commencement guest at old Delaware. He is being entertained by Mr. and Mrs. J. P. Wright. Other guests in the party are Miss Alice Hunn, of Wyoming, daughter of former Governor John Hunn; 140 Misses Helene and Marion Mustard, of Lewes; Miss Anne Cahill, of Bridgeville; G. S. Messersmith, of Lewes; Dr. J. R. Brown, of Frankford, Ind.; and Dr. W. Mrs. Emma Burnett, of Dover, and Col. William D. Denny, of Dover, Professor O. Ryherd, of Newark.

A Good Time

The pupils of the fourth and fifth grades of the Newark Grammar School spent last Saturday in the grove adjoining the old Welsh Tract Church, south of town. Mr. Victor Willis generously furnished team for the carrying of the lunch baskets and provided sandwiches, fruit and candy for all. The children were under the charge of their teachers, Misses Agnes Medill and Anna Zebley.

The majority of the party walked to the picnic grounds. Many games were played under the beautiful old trees. The ever welcome dinner hour arrived. After the inner man had been satisfied the scene shifted to the banks of the stream and the youngsters indulged in the time-honored delight of paddling.

Many expressed gratitude for the courtesy of Mrs. Jacob Griger, who gave them all much pleasure by inviting the party to inspect her collection of curios collected from all parts of the world by her grandson, who is in the U. S. Navy.

Goldie Catalogue Out

The twenty-fifth catalogue of Goldie College recently circulated, bespeaks the class of the institution which it represents. The publication is the work of the New Amstel Press. A beautiful, soft gray cover on which is a shield in red and gold bordered by the symbolic oak and laurel prepares us for the quality of the catalogue proper, inside.

A short historical sketch tells us the college was founded in 1886, by Professor H. S. Goldie, for many years well known to Newark. The first session was held on a single floor in the Wilmington Institute Building. From this small beginning the institution has grown until now 700 students are enrolled, the school proper occupying a floor space of 7,000 square feet.

The fine, half-tone illustrations give one a good idea of the conditions under which the work of the different departments is carried on.

Among "What the Graduates Say," we find a letter from H. C. Pierson, of Strickersville, Pa. Mr. Pierson is now receiving teller of the Franklin National Bank, Philadelphia, having about twenty years under him. He sends best wishes for the success of Goldie College.

A cut shows the location of Wilmington, which is spoken of as being in one of the greatest business and manufacturing sections of the world. It also states the fact that there has never been a national bank failure in Delaware.

The college has ever aimed "to encourage integrity, industry and ambition; to aid in developing character and self-reliance," as well as to prepare for a commercial profession. With such a "mission" the best that can come will only be deserved success.

Side Lights By The Old Man

Governor, ex-Governor and the next Governor were in town yesterday.

Senator Ellison, of this district, was at the Farm Monday, seeing that his Fire-arm Bill was in effect.

It is said not only History was discussed at the Board Meeting, but that several members gave their views on Economics and Political Science.

No shirt-waists at the dance, but oh, you peek-a-boos!

Some one said the spirit of Willard Salisbury was here yesterday. We thought he was still in the coal cellar at Dover talking of the duPont road.

Capt. Stayer may have caught it in the Annual, but he is still the idol of the boys.

It is rumored the Faculty held a meeting this morning and compared notes. Who had their salary increased?

Prof. Messersmith from Lewes port is here—walks and dresses like a true yachtsman.

A Sword For Capt. Stayer

Capt. Stayer, Commandant of Cadets, whose term expires July 1st, will receive a handsome sword from the Cadet Corps. This is an expression of appreciation from the student body. Capt. Stayer has been a hero during his term here. Ruling with a master hand, he has at the same time won the love and respect of all connected with the college. He has not only brought the military department to a high degree of efficiency, but by his interest in all the college activities, has done much toward building up the work of the institution.

Major Handy is slated to make the presentation speech.

Guests At Maplehurst

Miss Alice Hamul, Mrs. Thomas O'Connor, Miss R. Lafferty, Misses Lynch, Misses O'Connor, Miss Alice Kelly, Mrs. Leary, Mr. and Mrs. Fairweather, of Bala; Mr. and Mrs. Joseph Ford, Mr. and Mrs. Stout, Mrs. Mary E. Brown, Mr. P. Donahue, Mr. Jack Gartland, Mr. Joseph McKinney, of Philadelphia; Mr. and Mrs. Charles Pennock, of Brooklyn, are the guests of Mr. Charles Lafferty, Maplehurst.

The "Lalley Improved" couplings recently purchased by the Aetna House, Hook and Ladder Company, were delivered on Monday. This marks a great improvement over the old screw couplings which called for the use of two wrenches which these new are in place without the use of tools.

JUNE WEDDINGS

The friends of Miss Margaret R. Lank have received announcements of her marriage to Mr. William Harris, of Wilmington. Miss Lank was married from the home of her aunt, Mrs. Elizabeth Smithers, Smyrna. The ceremony was performed by the Rev. Dr. Robert Watt, Superintendent of Eastern District of the Wilmington Conference.

Mr. and Mrs. Harris will reside in Wilmington.

PRESS-DEAN

William H. Dean, of the Newark Hardware Company and Miss Maybelle M. Press, of Wilmington, were married at the home of the bride last Saturday, by Rev. William Homewood, an uncle of the groom. Only members of the immediate family and a few intimate friends were present.

Mr. and Mrs. Dean are residing at Deandale.

LAFFERTY-FORD

A very pretty wedding was solemnized at St. John's Roman Catholic Church, Newark, on Saturday, June 17th, at high noon, when Mr. Charles Lafferty, of Philadelphia, gave his daughter, Elizabeth, in marriage to Mr. Martin A. Ford, of Bala, Pa. The bride was becomingly gowned in an imported gown of handkerchief linen, trimmed in rare old lace from the wedding gown of her grandmother. She carried a white ivory prayer-book. The maid of honor was Miss Jane Madeline, the youngest sister of the bride, who was beautifully attired in an imported gown of batiste, trimmed with real Duchesse lace, sash and trimmings of pink. She carried a flower bouquet of sweet peas. Mr. John Fitzpatrick, of Philadelphia, was best man.

A wedding breakfast was served at the summer home of the bride's father, Maplehurst. Covers were laid for seventy guests. Amid showers of rice and confetti Mr. and Mrs. Ford left on the 4:36 train for an extended honeymoon. The bride received many handsome and beautiful gifts.

Milford Cross Roads

Miss Anna Wein visited her parents, Sunday, near the Cross Roads.

The Milford Sunday School held their Children's Day services last Sunday, and it was very well attended.

Mr. and Mrs. Walter Truitt visited the former's parents, at their home near the Cross Roads, Sunday.

The road between the Cross Roads and Newark is being thoroughly fixed. It is hoped that the good work will continue.

Many of the farmers of this vicinity visited the experimental farm Monday.

Mr. and Mrs. Hearty of Wilmington, spent Sunday with Mr. and Mrs. Samuel Little.

AROUND HOCKESSIN

Misses Elizabeth, Edith and Alice Mitchell and Lydia Flinn are attending the Friends' Summer School at Swarthmore College.

Mrs. James Polk is entertaining her mother, Mrs. Sarah Flinn, of Newport. Harmony Grange held a business meeting last Monday. The literary program was dispensed with. They hope to have a large meeting next Monday.

Friendship Lodge No. 22, I. O. O. F., attended services at the M. E. Church last Sunday.

The friends of Abram Dennison celebrated his progress on the road to recovery by surprising him on Monday evening. About fifty friends from Avondale, Wilmington and New Castle were present.

Cement and terra cotta culverts are being placed at the entrances to the

various residences along the Lancaster Pike, which is being macadamized. A lady girl came to the home of Mrs. John Walker, on Sunday, June 11. A case of scarlet fever has developed in this vicinity. Miss Margaret Murphy, the victim. The home has been quarantined and every effort will be made to prevent an epidemic.

Farmers' Day

Farmers' Day was a success. It has now proved itself to be the real Delaware meet of the year. It is estimated that at least 2,000 farmers gathered at the State farm on Monday. Prominent men from all over the State were present and words of praise and commendation were heard on all sides.

That the State farm is recognized as a State institution has been clearly proven. It has now received the approval and support of its constituents and its success is now assured.

After an inspection of the experimen-

Bids Solicited

Bids will be received for building the second floor of the new school building. Bids are also solicited, separately, for installing additional heating in the above. Plans and specifications are to be seen by calling on Robert G. Stetson. Bids will be opened July 1st, 1911. The Board reserves the right to accept any or all bids. By order of the Board of Education.

Notice

Notice is hereby given that, by order of the Council of Newark, passed at its regular meeting June 7, 1911, from this date it is unlawful to sell or offer for sale, or have in possession in or to be placed any three-quarter larger than the half inch in diameter, in the town of Newark.

By order of Council,
S. B. HERDMAN,
Recorder.

WANT COLUMN

The Want Ad Column in this paper is an innovation to country newspapers. The usual rate is higher than most people wish to pay for a notice. Any little thing you have to sell, it will pay you to run in a notice in this column. Lost, Found, Wanted, Ads, all come under this heading. Be sure to always look at the Want Column. It has paid others. It will pay you.

Just the place for a small notice. Put it in the column and it will bring a buyer.

WANTED.

COOK WANTED—A white woman to cook. Apply, Walter Powell, Restaurant.

BOARD WANTED—An old soldier to board. Soldiers widow preferred. Address K. Office Newark Post, Jan 1.

STORAGE—For rent (one large room for storage—dry and airy. Apply, Dan Grimes, Newark. Phone 13-A. Jan 1.

WANTED—A first class carpenter. Steady employment. Apply to The Continental Fibre Co., Newark, Del.

HELP WANTED—Boys and girls to work in factory. A J. J. J. Co. m15-17

FOR RENT.

FOR RENT—Second story of a warehouse. J. F. Wilson.

FOR RENT—Three rooms and bath. Second floor. Apply, J. R. Armstrong.

DESIRABLE rooms for rent in Academy Building. Call on J. S. G. Hillan, corner N. College Ave. and Main street.

Pasture For Rent

Good meadow pasture. Horses and cows pastured for the summer. Apply J. D. Jaquette, Newark, Del. may24 ft

FOR SALE

FOR SALE—Roseville stone. See by the perch. Inquire Alfred Stoltz.

PLANTS FOR SALE—Sweet pea plants—ready as soon as it rains. E. C. Johnson, Newark. Phone 6-4.

PLANTS FOR SALE—Cabbie plants and various plants—different varieties. E. C. Johnson. Phone 6-4.

FOR SALE—15 shares of Capital Stock of the National Bank of Newark. Lyda R. W. Wilson, Administrator.

FOR SALE—Two good driving horses, one set of harness, good as new, on buggy in good condition. W. M. Corradale, Newark. may11

FOR SALE—31 the College Farm, Newark, Del. Selected White Exotic Seed Corn from an eighty-bushel bushel per acre crop.

FOR SALE—Six year old martine driver—perfectly safe. Runabout—new buggy and new set of harness. Apply, M. Reside, No. 10 Prospect ave., Newark, Del. 16-2

FOR SALE—A valuable property, located at corner of Delaware and South College avenues, Newark, Del. is a very desirable building site. For particulars call on or address S. M. Bennett, Agent, Newark, Del. Jun 14 67

PLUMBING—I am ready to attend to any work you may have. DANIEL STOLL, Rear basement of Armstrong's Store.

"There must be open to farmers the chance for technical and scientific training, not theoretical merely, but of the most severely practical type. The farmer represents a peculiarly high type of American citizenship and he must have the same chance to rise and develop as other American citizens have had."

—Theodore Roosevelt

AGRICULTURAL EDUCATION IN DELAWARE

Sketch Of Its Development And Plans For Future Work

That the farmers of Delaware and the citizens of the State in general are realizing more and more each year the great importance of the State farm is shown by the fact that the State farm is the only one in the State where the work of the farm is being done there in teaching and in the advanced and scientific husbandry, but advanced and scientific husbandry, has been manifested in the increased interest shown in the work done during the past year. This interest was displayed many times during the session of the past General Assembly at Dover. It is shown in the large numbers that were

present on "Farmers' Day" and also in the increased inquiries that the State Farm officials are receiving from all parts of the State for advice in all parts of farm work.

When the farm was first purchased by the State several years ago, there were a large number of skeptical persons who were of the opinion that it was money wasted and that the farmers of the State would never see any personal benefit from such an outlay of money. This skepticism is now fast fading away and in fact few farmers can be found who will even pretend to say that husbandry has not advanced under the scientific teachings of the State Farm. More and more are they beginning to place confidence in the work of Professor Harry Hayward and his able and efficient staff and to seek their advice when in doubt as to the best thing to do. This of course means that the usefulness of the farm will increase and rapidly.

GENERAL FUNDS FOR THE WORK.

After its doors had been closed for 11 years Delaware College was reconstituted in 1879, became a beneficiary under an act of Congress known as the "Morrill Bill," which appropriated to each State large portions of land to form the basis of endowments for colleges especially devoted to the teaching of Agriculture and the Mechanical Arts, and Military Tactics.

By act of the Delaware Legislature in 1889, the Delaware College Agricultural Experiment Station was established as a department of this College, under the provisions of the "Hatch Bill." This federal act appropriates \$15,000 annually for the purpose of acquiring and disseminating among the people of the United States useful and practical information on the subjects connected with agriculture and to promote scientific investigation and experiment respecting the principles and applications of agricultural science under direction of the College or Colleges established in each of the States and Territories. In accordance with the provisions of the "Morrill Bill," in 1899 a second "Morrill Bill" was passed by the Federal Government. Under this bill \$15,000 was appropriated the first year and that amount increased \$1,000 a year for ten years so that now the annual appropriation under the second "Morrill Bill" is \$25,000. The bill sets out that the money shall be applied as follows: "Only to instruction in agriculture, the mechanical arts, the English language, and the various branches of mathematical, physical, natural, and economic science, with special reference to their applications in the industries of life and to the facilities of such instruction Delaware receives four-fifths of this appropriation annually, the other one-fifth going to the College for Colored Students at Dover."

In 1909 the "Adams Bill" was passed, which appropriated \$5,000 for the first year to be increased \$2,000 a year until the amount reaches \$15,000, so the ending year the entire \$15,000 under this bill will be appropriated. The "Adams Bill" of 1907 appropriated \$5,000 to be increased \$5,000 each year until the amount reaches \$25,000, so that full amount will also be available the ensuing year, but \$2,000 of this also goes to the Colored College at Dover. This will make the annual income from the National Government starting the coming year \$70,000.

In 1909 the "Adams Bill" was passed, which appropriated \$5,000 for the first year to be increased \$2,000 a year until the amount reaches \$15,000, so the ending year the entire \$15,000 under this bill will be appropriated. The "Adams Bill" of 1907 appropriated \$5,000 to be increased \$5,000 each year until the amount reaches \$25,000, so that full amount will also be available the ensuing year, but \$2,000 of this also goes to the Colored College at Dover. This will make the annual income from the National Government starting the coming year \$70,000.

It is evident from the wording of some of these acts of many years ago that our national law makers even at that time saw the great opportunities in the future for advanced and scientific farming and made provisions therefor.

ADVANCEMENT OF EXPERIMENT WORK

Professor Hayward, in speaking of the work at the Experiment Station and State Farm several days ago, said: "When I came here in October, 1908, the Station staff numbered 7 and the coming year there will be fourteen members of the staff. Practically no land was available for experimental work. There was a couple of acres at the northeast corner of the campus, but the ground was so low and soiled so heavy that it was impossible to carry out work of any value there. The previous administration had been opposed to a State farm and concluded that it could not be maintained on the funds available. The laborers were small and the station workers much handicapped because of lack of equipment. The work was nearly at a stand still."

STATE BOUGHT A FARM.

Continuing Professor Hayward said: "The first thing that I did on arriving here was to set out to get a suitable farm on which to carry on experiment work. I find it is impossible to get the farmers interested in what you are doing along this line unless they know that you are meeting the same problems as themselves during all seasons and under similar conditions, and there was no other way to do this than to get a farm. Some of the trustees thought it would be impossible to get the State to appropriate money with which to purchase a farm, but the fact that a number of progressive farmers championed the cause, a bill presented to the General Assembly of 1907, appropriating \$20,000 with which to buy the farm, passed with hardly a dissenting vote. A Legislative Committee of which Governor Lea was chairman, finally selected the Ballew farm (the present State farm), as being the most suitable for research work. To get the farm however, the Commission found it necessary to expend the entire State appropriation. Therefore, when the College took possession there was not a cent of the State funds left for equipment. However the college went on using what funds it could and the work was started in April, 1907. At the next session of the Legislature, a bill appropriating \$17,500, to remodel the old building and erect new ones suitable for the work was presented. Owing to a lack of funds the General Assembly finally passed a bill appropriating \$10,000. This amount was used to remodel the old barn, erect a suitable horse and storage barn and to build the present dairy barn, which is considered a model of its kind."

"The last Legislature appropriated \$10,000 for a new tenant house, dairy house, a storage pit for manure and to make some additions upon the present dairy barn and Dutch repairs of old buildings. It will be noticed that all the State appropriations have gone towards the land and buildings. The equipment of the farm including tools, machinery and live stock has been secured from the Federal appropriations and sales. Up until the present time the State has put \$40,000 into the Experiment Station plant, the College has spent over \$10,000 in live stock and other equipment besides improving the land materially. It should be seen that the plant should be worth more than what it cost the State and as the State holds it is all the property, from a business point of view, it can not be a loss."

STATE FARM PRODUCTS SOLD.

The act appropriating the money to buy the State farm, states that the funds obtained from the sale of the farm produce shall be used for maintenance and farm equipment. Director Hayward says that up until the present time the annual farm sales have amounted to from \$2,500 to \$3,000, but that it should be remembered that this represents what is obtained from only 100 acres and an incomplete equipment. The live stock equipment and especially dairy cows is not complete. The Horticulturist has about 25 acres set in trees, that are not old enough to return any income. The Agronomist has 25 acres devoted to several hundred small plots and there are very little if any marketable material from this land. Aside from the amount of farm sales mentioned the farm has supported a large number of working stock, as well as some young stock, with farm produce. It is hoped, says Professor Hayward, that when once the State farm is fully equipped as the present basis, there will be an income considerable larger than at present. This is on the assumption that the orchards will bring substantial returns and the sales from the herd of cattle and pigs will be considerably larger than now.

GROUND NEEDS UNDERDRAINING.

Professor Hayward says that much yet remains to be done before the farm can be expected to produce maximum crops. He also states that those familiar with the nature of the land will appreciate the fact that much of it is low and needs under drainage, before it is as fertile as some of the better drained pieces now. It is the plan of the trustees to begin laying under drain tile shortly. This will not only have a tendency to increase crop yields, but will give better results on experimental plots. To show how part of the college farm was held by practical men, Dr. Hayward says, a mem-

ber of the Commission that purchased it, advised him to abandon the south field of about 50 acres, as too poor to warrant anything being done with it. The first crop however on this field under the station management was timothy hay and the yield was two tons per acre. Last year the poorest part of the field produced between 40 and 45 bushels of corn to the acre and it is hoped that in a short time to demonstrate the value of under drainage with land of this kind.

According to Professor Hayward, the farm has been handicapped considerably owing to the fact of many demands made upon farm sales as this is the only free fund available for the agriculture department. The State and Federal appropriations can only be used for certain specific purposes, and in consequence the farm sales are drawn upon for certain other necessary work not provided for in those appropriations. Owing to a misunderstanding with the office of Experimental Stations, as to the use of the Adams Fund, in the construction of concrete tree pits, it was necessary to pay for those pits almost entirely from the farm sales, in spite of the fact that the Federal Government heartily approved of the experiment in itself. The Experimental Station office however, felt obliged to rule that these pits be in number, were buildings in the technical sense of the word and as such only five per-

Courtesy of State Board of Agriculture.

cent of the Adams fund available that current year could be used in payment for their construction. In consequence, the balance of the amount necessary had to be drawn from farm sales. In as much as there have been a number of other calls on the proceeds of the farm sales, besides those from the current expenses for carrying on the work of investigation, both in the laboratory and on the farm, not until the present time has the farm been able to catch up with itself.

FARM HAS BEEN DOING DOUBLE DUTY.

It will be seen from this explanation that the farm has been doing double duty ever since it was purchased, namely laying out for the plant from its very foundation and at the same time complying with the laws concerning the expenditure of Federal funds for research work in spite of difficulties encountered. The trustees feel that they are now out of the woods and also feel grateful for the loyal support accorded them by the farmers of the State. The work of the station, according to Dr. Hayward, has increased rapidly and it is not surprising if some mistakes have been made in the efforts of the trustees to meet all demands put upon them. Most of the work connected with the farm has been entirely new in Delaware and the growth has been so rapid, there has been scarcely time as yet to strengthen the weak places or abandon them as may be wise in some cases.

The trustees and station staff are certain that the support from the State is growing that the services that they are rendering to the State are increasing and that the reports received from the official inspections made by representatives of the Federal Office of Experiment Stations are very satisfactory. They feel, stated Professor Hayward, that the people are only beginning to appreciate the value of the Agricultural Department as a Public Service Institution, and there is no reason why its usefulness and efficiency should not increase for the welfare of the entire State.

STOCK ON THE FARM.

In continuing his talk on the State farm work, Professor Hayward said: "One of the functions of the State farm is to demonstrate the value of improved machinery and tools, improved live stock and different varieties of the various commercial orchard fruits. To this end the State farm of Delaware has made considerable progress. A visitor to the college farm will find a great variety of modern machinery and tools in actual use. The live stock perhaps is one of the most attractive features of the farm at the present time. The people of Delaware by a visit to the farm can see imported Percheron horses at work in the same field with their old standard mules, and have an opportunity to compare the efficiency of these two classes of working stock. The farm has three brood mares of this breed, all doing their regular quota of farm work, besides producing a pure bred foal each year. One of these, a yearling, could have been sold for \$400 during the past winter. Aside from the brood mares there is a two year old stud colt weighing over 1500 pounds and a yearling filly nearly as large and two spring foals, one of which is a rather unusually good one."

"There are also three span of mules, each of a different type, one pair being Cotton Mules, one pair of Mules and the other pair heavy Mules. Among the horse stock is a registered buckeye brood mare, with three foals either registered or entitled to registration. The farm also has a flock of about 25 pure bred sheep, which either are or will be registered in due time. There are three breeds represented, each of different type. Most of them are Shropshires, a mutton breed, of the kind of which is an imported high class ram. There are five Rambouillet Merinos. This is a breed of sheep founded by Napoleon Bonaparte, who took great pride in their development at the government flocks. The other breed repre-

at the same time possess so much upland fertility. The herd contains two high-class cows, imported from the West. Another member has produced more than her weight in milk each month for the past four months. She gave in three months as much milk as the average cow.

age now produces in a year. The herd of the herd is a son of the famous imported sire "Mayrose King," a bull that has done as much to improve the modern guernsey as any other animal that was ever imported. The grand dam of the bull has an official record of 10,500 pounds of milk in a year, and considerable over 800 pounds of butter in the same time. It is the plan of the trustees to increase the herd by the purchase of additional animals at an early date. The herd will aid in upbuilding the fertility of the land, consume a large amount of roughage that would otherwise be unmarketable and afford material for class room work in husbandry and in dairying.

VALUE OF THE STOCK.

Professor Hayward gives the value of the stock now on the farm as follows: Sheep, 20 in the herd, \$400; 40 pigs, \$1,000; 30 cattle, \$4,000; 7 horses, \$2,500; 6 mules, \$2,400; 6 hackneys, \$1,000; total value, \$11,300.

ORCHARDS INTEREST VISITORS.

Another feature of the farm that interests most visitors is the orchards. At the present time there are 435 varieties of currants, gooseberries, peaches, nectarines, apricots, plums, cherries, quinces, grapes, apples and pears. Some of these of course are only represented by a few trees, just enough to give an idea of their value in Delaware and serve in class room demonstrations. These plantings include quite a large commercial peach and apple orchard. As good an authority as the Hon. Oliver Newton, president of the State Board of Agriculture, has said that the college peach orchard was the best looking orchard that he has ever seen. Most of the trees were set in the spring of 1908 and in spite of the dry weather last fall, quite a few of them will bear peaches this year.

WHAT CRIMSON CLOVER HAS DONE.

Dr. Hayward, in speaking of Delaware's part in regard to crimson clover states as follows: "The Delaware Station has done more to develop crimson clover crop in the South Atlantic States than any other Experiment Station. Dr. Neale, the former director, began to investigate crimson clover, soon after the station was organized in 1887 and early in 1892 published, presumably, the first bulletin ever written upon this important subject. The edition has been exhausted for some time, but has created a great interest in this member of the clover family, which has done more than any other single crop to improve the light, sandy soil, which is so common in the Southern two-thirds of the State. By acquainting the farmers of the State with crimson clover they have been able in many instances to increase the yield of corn from 10 to 20 bushels per acre, and a great many farmers particularly in Kent and Sussex counties attribute their success in farming very largely to the use of crimson clover, a crop which was introduced very largely through the efforts of the Experiment Station. Altogether three bulletins have been published on the subject by this station and the station is now looked on as an authority, as to the value of the crop as a nitrogen gather and its cultural requirements."

INVESTIGATIONS OF ANTHRAX.

"Another very important work that the Station has done is the part that it has played in the control of anthrax in the State. Without the studies made by Dr. Neale and Professor Chubb, the loss to the live stock owners of Delaware would have been incalculable. These two members of the station staff for a number of years carried on important investigations and made it possible for the owners of live stock to protect their animals with scarcely any cost against this fatal and infectious disease. If the Delaware Experiment Station had never done anything else for the farmers of the State, its work on crimson clover and anthrax is sufficient

in pay for its maintenance for many years to come." Dr. Cook, the present Plant Pathologist, has performed a very important service to the bush berry growers of the State, in working out the cause of the disease known as "Double Blossom" which has made serious threats upon

the berry patches of the State and in many instances have driven them out of business. Dr. Cook found by a series of investigations covering a period of over two years past that this disease was caused by a fungus and that it could be controlled by the simple method of picking the double blossom off by hand when they appear in the spring. This discovery as simple as it is will make it possible for the bush berry growers of the State to again take up the industry with a reasonable assurance of success.

SOY BEAN CROP.

Professor Grantham, Agronomist, also performed a signal service to the State, in his study of the soy bean crop, and its adaptability for Delaware conditions. It is not generally known that this crop aside from its value as a hay producer, has great possibilities as a source of oil. The oil of the soy bean is similar in nature and composition to linseed oil and it has been found to be used as a partial substitute for that important fat, the production of which is decreasing quite rapidly in this country. An acre of soy beans will produce twice as much oil as an acre of cotton seed and three times as much as an acre of flax. We are at the present time importing large quantities of this oil from Scotland and Manchuria, and if the promise that the crop has given on the college farm, is born out in the State, there are reasons to believe that it will be a valuable crop for the Delaware farmer to produce. Professor Grantham has just distributed enough soy bean seed of the best varieties to 100 farmers in different parts of the State to produce 200 bushels under favorable conditions. It is said in

favorable conditions. It is said in

WORK.

There are the maintained by the Department of the Plant Pathologist at the time is conducting investigations under the provisions of the Adams Fund, on the relation of Parasitic Fungi to the contents of the cells of the host plant. He is also studying the sweet potato diseases, it being the policy of the department to study specific problems rather than try to spread over a large number.

The chemical laboratory is engaged largely in doing the chemical work for the other departments. The Agronomist, Plant Pathologist and Horticulturist all call the Chemist for the chemical side of the questions that they are studying. In spite of the fact that the Chemist has two assistants, most of his time is occupied in doing chemical work for the other members of the college staff. The Chemist, however, is engaged now on a problem under the provisions of the Adams Fund, the composition of Humus and it is expected that when this question is finally solved, it will throw much light on the question of soil fertility.

The other Laboratory at the Experiment Station is Animal Pathologist. His work for the past four years has been to study Anthrax. Dr. Dawson is also working on the problem of forage poisoning a disease which destroys a great many horses in Delaware each year. The work of the Laboratories can never become so well known nor can it become the show places or other departments, yet their value when measured by absolute results can not be overestimated.

AGRICULTURAL EXTENSION.

Dr. Hayward is fully in sympathy with the Agricultural Extension plan and in discussing the matter said: "The Station officers feel the need of the greatest steps forward in the way of Agriculture resources of Delaware was taken when the Legislature passed the Agricultural Extension bill, creating a Division of Agriculture Extension in the Agriculture Department of Delaware College. The purpose of this bill is to

The Breath Of The Hills

"All those who love nature she loves in return, and will richly reward, not perhaps with the good things, as they are commonly called, but with the best things of this world—rich with money and titles, horses and carriages, but with bright and happy thoughts, contentment and peace of mind."

"A window is but another name for a slatted picture. There are no such landscapes on canvas as those which you see through glass. There are no painted windows like those which trees and leaves look standing in open space, with all the story of God looking on them."

An avenue of trees warms the most arid cathedral that art ever accomplished.

"Places, if you're blue, are the best friends I know. They shape and sign, and cheer your feelings."

The green ground beneath us, tu, I know.

You half forget you're not a body on."

"Mountains seem to have been built for the human race, as at once their schools and cathedrals, full of treasure of illuminated manuscript for the scholar, kindly in simple lessons for the worker, quiet in pale cloisters for the thinker, glorious in boldness for the worshiper. They are great cathedrals of the earth, with gates of rock, pavements of cloud, choirs of stream and stone, altars of snow, and vaults of purple traversed by the continual stars."

"The glad life because it gives you the chance to love and to work and to play and to look up at the stars."

"And above, most beautiful of all the clouds, fleecy and white, circling around the horizon, and the wonderful, clear blue space infinite and eternal, above your head."

"The delicate loveliness of the flower is as much in the human eye as in its own fragile petals, and the splendor of the heavens as much in the imagination that kindles at the touch of their glory as in the shining of countless worlds."

"The tree which moves some to tears of joy is in the eyes of others only a green thing which stands in the way. Some see Nature all ridicule and deformity, and by these shall not regulate my proportions; and some scorn to see Nature at all. But to the eyes of the man of imagination Nature is imagination itself as a man is, so he sees."

"My garden, with its silence and the pulses of fragrance that come and go on the airy undulations, affect me like sweet music. Rare stops at the gates, and gazes at me wistfully through the bars. Among my flowers and trees, Nature takes me into her own hands, and I breathe freely as the first man."

It is a great moment in a man's ex-

perience when he awakes to the wonder of the world about him, and begins to see it with his own eyes, and to feel its pulse and its own pulse beating again. From that moment the world is new, and his spirit is hourly re-created in their presence.

When I would forget content and increase confidence in the power and wisdom of Almighty God, I will walk the meadows by some gliding stream, and there contemplate the lilies that take no care, and those very many other little living creatures that are not only created, but fed and man knows not how by the goodness of the God of Nature, and therefore trust in him.

Nature, like a loving mother, is ever trying to keep land and sea, mountain and valley, each in its place, to hush the angry winds and waves, balance the extremes of heat and cold, of rain and drought, that peace, harmony and beauty may reign supreme.

Added To The Library

An interesting old volume has recently been presented to Delaware College by Lewis P. Mustard, of Lewes, Delaware. This is a collection of catalogues, programs, etc., of the college between the years 1841 and 1856. The volume was compiled by David L. Mustard in 1855. Aside from its historical value in making complete the annals of the college, it gives us a glimpse into the student life of the "time before the war," the catalogues showing the ideas of education that prevailed, the ideals that they followed, etc. A number of the student publications remind us of the pranks those who are now gray-haired dignitaries once played.

The first part of the book is comprised of Laws, charter and catalogues. The complete list of graduates from the years 1836-1844 is given. This is followed by the catalogues of Newark Academy, the Preparatory Department of Delaware College.

In the College catalogue for the year 1854-55, the name of Daniel Kirkwood, LL. D. heads the list of the faculty. Dr. Kirkwood won renown in scientific circles from his investigations concerning asteroids, the "small planets" which revolve about the sun.

A number of programs are given which show the commencements in those days to have been much later in the summer, in 1853 the date being the twentieth of July.

The mock program of the Junior class of March 29th, 1853, has many references to Africans, "Dark-ies," Alabama Niggers, Uncle Tom's Cabin and Abolitionists, in the course of their fun.

The salary of the postmaster at Oxford, Pa., has been increased \$100, making it now \$2200.

The announcements of the Weather Department state that the last month was the driest May in eleven years.

Delaware Federation Of Women's Clubs

The fourteenth annual meeting of the Delaware State Federation of Women's Clubs will be held in Rehoboth, Delaware, and Friday, June 21 and 22. The headquarters of the Federation will be at the Hotel.

The program as arranged follows: Thursday afternoon, "Greetings from Delaware," by Mrs. Albert Kelley, of Philadelphia.

Friday morning, Business meeting and election of officers and directors.

At 10 a. m., Reports of chairmen of the standing committees.

Mrs. Henry Kelsey, of Dover, will bring a message from the State Library Commission.

A general discussion will follow.

Friday afternoon, Mrs. Anna B. Scott, of Philadelphia, will lecture. Her subject will be, "The Woman's Movement in the Financial Frontier in the Home."

Friday evening, Lecture by Mr. Robert W. Van Kirk, of Boston.

Installation of officers followed by reception.

Delegates giving the greetings will not consume more than three minutes as chairmen of standing committees not more than eight minutes.

The present officers of the Federation are:

President, Mrs. Robert J. Tindale, Wilmington. First Vice-President, Mrs. J. Harvey Speakman, Smyrna. Second Vice-President, Mrs. Louis Mustard, Lewes. Third Vice-President, Mrs. E. N. Trump, Wilmington. Recording Secretary, Mrs. J. R. Cook, Seaford. Corresponding Secretary, Mrs. James L. Crossmore, Wilmington. Treasurer, Mrs. Daniel Short, Laurel. Auditor, Mrs. Clayton W. Fisher, Dover. General Federation Secretary, Mrs. R. T. Cann, Middletown.

Harmony Of Mind And Heart

From an address delivered January 14th, 1853, before the Delta Phi Literary Society, by William H. Furnell, Esq.

"The man with harmony of mind and heart to the tastes of a diseased public opinion, but with independent boldness, desiring the true weal of the public, as he throws himself fearlessly forward to check the current of popular error—to roll back its waves, or to fall buried beneath them."

Heart is himself a reality. He is no sham man, no ingenious impostor palming off his worthless wares upon a credulous community, but a genuine, honest man who confers a benefit, or at least returns a quid pro quo for all that society grants him. He is not a cringing hypocrite, a sickly sycophant with a morbid desire for popularity; no pander-

Mrs. Darlington, of Middletown, Del., also spent this week in Newark.

NEWS NOTES

Misses Marion and Ethel Campbell will attend the dance in Milford this week after which they go to Rehoboth.

Mr. Street, Secretary of the Snider Insurance Company, was in town yesterday and took a drive through the surrounding country inspecting the tomato crop which he has contracted for during the season. He expressed himself as very much pleased with the prospects and said the crop in this vicinity is much better than in their western territories.

He is much pleased with the location here and very enthusiastic over the prospect of establishing the eastern plant in this vicinity.

Jacob Rupp has purchased 24 acres of the Kinsey Chambers property on road leading out South Chapel street, adjoining the Pennsylvania Railroad. The sale was made through the Newark Trust Company.

Look out for the announcement of the Firemen's Carnival. It's going to be something great.

Woodrow, Woodrow—Would-Run Wilson
Six—Boom—Tiger
Harmon.
Champ Clark—all Boom—Ah!
It's Bryan.

Mrs. B. A. Whittingham was a recipient of an invitation to the silver wedding anniversary of President and Mrs. Taft, at the White House.

Mrs. A. T. Neale and Mrs. R. A. Whittingham have been elected delegates to the convention of the Federated clubs of Delaware, to be held at Rehoboth on Thursday and Friday.

Mrs. Hayward will also attend the convention.

Mrs. R. M. Dennell and Mrs. Harry Hayward attended the annual meeting of the I. A. R. held in Smyrna on Flag Day.

Miss Annie Reynolds has been appointed principal of Montebank school.

Ladies' Circle of Newark, No. 7, of H. of S. W. M. will hold a bake next Saturday evening, June 4, in William Jester's yard on Choate street. Bread and ice cream for sale for the benefit of the circle. Everybody welcome.

Council has received car-load of stone and will start in to repair the streets. The loose dirt has been scraped and hauled away. Other cars will be received and put on places most needed.

The programs used at the dance last night are the work of the Whittingham Press and is in keeping with the standard, "a little better than before." We challenge the State to produce a more artistic piece of work than can be turned out by Newark's master of the Printer's Art—Dick Whittingham.

The Robert Morrison property, East End, has been greatly improved by the removal of a high board fence and the placing of an iron one.

Prof. Van G. Smith who has been suffering with malaria is able to attend commencement.

H. W. McNeal attended the seventh annual meeting of the Peninsula Retail Coal Merchants Association, held in Philadelphia on Friday.

Contractor Griffin has been awarded the contract to build the new house on the College farm. The contract to paint the farm buildings has been given to H. T. Pyle.

Mrs. Joseph Hossinger is suffering with the measles.

G. S. Messersmith has been reappointed Principal of the Lewes Public School.

Captain Edgar S. Stayer, Military Instructor at Delaware, has been notified to join his old regiment the Twenty-third Infantry. He will join the regulars in November.

The Delta Phi and Athenaeum Literary Societies jointly celebrated their anniversary on Tuesday evening.

The welcome was extended by Charles Shaffer, of Chesapeake City, representing the Delta Phi Society, and L. Irving Handy an Athenaeum, made the farewell address. The address of the evening was made by Rev. Julius A. Herold, of Lewes, who talked on the Message of Henry Rosen, whom the speaker pronounced the King of Romanticists.

The Senior Class of Delaware banqueted at Atlantic City last Thursday.

The ladies of the M. E. Aid Society cleared about \$60 from the strawberry festival held on Professor Short's lawn.

The dance in the Newark Opera House last Friday night was an enjoyable affair, where pleasure reigned supreme. A large number were present from Newark and surrounding country.

The oratorical contest held in the oratory last Thursday night, revealed the fact that Delaware has among her students a number of forceful, earnest speakers. H. T. Eunis won the prize of \$25, Elmer E. Blades the second of \$15, and E. W. Loomis the third of \$10.

W. R. Powell's property is being improved by a coat of paint.

The house of Harry Heibel, east of town, is well under way.

D. C. Rose attended the dinner given in honor of the chiefs of the Red Men at Hotel Wilmington last Saturday.

The Senior Club of the Newark Grammar School spent Tuesday at Brandywine Springs. They enjoyed both dinner and supper in the grove. All reported having had a good time. Mrs. Annie Slack chaperoned the party, which included the following:—Miss Jennie Slack, Mr. Earl Gillilan, Misses Anna Richards, Helen Slack, Blanche Towson, Sarah Potts, Helen and Alice Shengard, Marion Law and Myrtle Adams.

Heart Cheer

"Prepart to live by living."

"Reform yourself and lessen the rogues by one."

"He alone is great who can suggest a thought in such a way that the other man believes he originated it."

"Complete success alienates man from his fellows, but suffering makes kinemen of us all."

"The best preparation for good work tomorrow is to do good work today; the best preparation for life in the hereafter is to live now."

"The outcome of the battle is of no importance—but how did you fight?"

"Neatness in moderation, is a virtue; but when it is carried to excess, it shows littleness of mind. Good taste rejects excessive nicety; it treats little things as little things, and is not hurt by them."

"We live in deeds, not years; in thoughts not breaths."

"In feelings, not in figures on a dial. We should count time by heart throbs. He most lives Who thinks most, feels the noblest, acts the best."

"A man has no more right to say an uncivil thing than to act one; no more right to say a rude thing to another than to knock him down."

"It is not growing like a tree a bulk doth make men better be, Or standing long an oak, three hundred year, To fall a log at last, dry, bald and sear. A lily of a day Is fairer far than May, Although it fall and die that night; It was the plant and flower of life."

"Alas for the rarity Of Christian charity Under the sun!"

"Then gently scan your brother man, Still gentler sister, woman; Though they may gang a Kennin wrang, To step aside is human."

"What's done we partly may compute, But know not what's resisted."

"The one serviceable, safe, certain, remunerative, attainable quality in every study and in every pursuit is the quality of attention. My own invention, or imagination, such as it is, I can most truthfully assure you, would never have served me as it has but for the habit of commonplace, humble, patient, daily, toiling, drudging, attention."

"For this is my maxim, I hold that the party receiving an obligation should ever remember it, the party conferring should forget it immediately, if the one is to act with honesty, the other without meanness. To remind and speak of your own bounties is next door to reproaching."

"Poor human nature," we sometimes say, forgetting that through every character runs a vein of gold. Now and then kindly chance rends the base earth that covers it and shows us a hero or a heroine. But revealed nature is rich in the possibility of greatness."

"Here and there we build a monument; but if for every deed of noble daring some memorial were raised, earth's monuments would be as the stars of heaven or the sands of the sea."

New Hardware Store For Newark

Thomas Potts, who has been connected with the H. B. Wright Company for over 25 years and for many years vice-presi-

dent of that company, will enter into the business himself in the near future.

Mr. Potts has purchased the vacant lot adjoining the garage now in process of erection by A. F. Fader. A two story brick building will be erected with glass front and filled with up-to-date appliances. This building with warehouse in the rear, will make a fine business

OUR DEVELOPMENT REPRINTED

Mr. Editor—

In reply to your request for a few observations upon the growth of Newark, and such other comments as I might see fit to make along municipal lines, I might for a beginning observe that Newark is quite an old town, antedating the American Revolution, and in all those years should have acquired a large fund of township wisdom and experience. Whether it has or has not, I am perhaps not qualified at this time to say. With a population of, possibly, 2500, the impression upon a stranger coming among us, would be that for the age of our community we have not much to show in the way of progress, and indeed it must be true that our forefathers, pretty generally moved with a very deliberate gait. When I first knew the town, about 23 years ago, the building of one or two, or may be three, modest homes, with incidental property improvements, would about constitute a year's growth. But for the last 15 years I doubt if we, ourselves, fully realize all that we have been doing.

Commencing with 1895, running along for a period of ten years, to 1905—I find there were 43 to 45 houses built, having a value of about \$75,000, being a very large percentage of increase over the preceding twelve years. During the time of 1905 to 1910, five years, there were 54 dwellings erected approximating in value \$161,000. The increase means about one-third more in number of houses, and more than as much in value, in one-half the time. For the year 1910, I find 43 were built, or in process of building, having a value of at least \$75,000. A remarkable coincidence is to be noticed in connection with the above figures, in that for the year 1910 we have practically the same number of dwellings, and of the same value, as for the ten years of 1895 to 1905, 1900 per cent increase.

Surprising as these figures are they do not include conservative estimates on the American Vulcanized Fibre Co.'s buildings of \$60,000; the Continental Fibre Co.'s of \$75,000; Jacob Thomas Co. of \$25,000; Curtis — Brother, \$25,000; Delaware College buildings, or \$45,000. Add to all this extensive remodelings and home improvements, such as New-

ark Opera House, S. J. Wright's home, and properties on opposite side of the street, the Methodist Church extension, Benj. Campbell's Elkton avenue improvements, H. M. Campbell and Wollaston's store additions, and many others of equal and less magnitude, together with nearly outlying properties, and a general brightening up, throughout the town, which we may reasonably put at one-tenth of the value attached to the new homes, viz.: \$21,000, giving us a grand total of \$463,000 or nearly half a million for material progress in sixteen years. I feel very sure that I have underestimated rather than over-estimated. This is a record to be proud of, and a town to declare by.

Though in this article I have indicated only our stable character and solid worth, yet there are other features worthy of thoughts and expressions from an abler mind than mine. If I were writing a book, paper, which I am not, I would speak of our splendid location for industrial plants and for homes; of the country surrounding and the cities nearby affording us the advantages of both, I would speak of our material prosperity and creative comforts; of the educational, moral and social environments, tending thereby to induce right living. Splendid as are all these things, they of themselves are not sufficient to promote our best interests and permanent welfare. There is work for our best citizenship, a slotted and self sacrificing citizenship, the work of sowing, piping, macadamizing, lighting, &c., for the town as we would for ourselves. Bearing for a year or two financial burdens, though heavy for the time, would result in the accomplishment of a completed work, a work that cannot, however, be done in a year, and a task that needs the co-operation and encouragement of us all. Reach out for a new industry no wand then, and in the reaching, employ the same methods adopted by other successful communities. Yes, it means work, and we are working and doing well. But we can do better. The impetus we are now enjoying is of real value, and I have faith to believe that we are moving on to a larger Newark and a splendid future.

Yours truly,
GEORGE W. GRIFFIN.

NEWARK

What shall we do with our Possibilities

My son the Almighty
has made lots of folks
and lots of land but none
better than you have
around Newark.

Buy a lot and build.

Our Manufactures are
among the Big Concerns:

American Vulcanized Fibre Co.
Continental Fibre Co.
Nonantum Paper Mills.
Jacob Thomas Wall Paper Co.
American Machine Co.
Kennedy Machine Co.
A. Jedell Manufacturing Co.
Marble Yard.
Brick Yards.

Value of these plants is estimated at \$1,250,000

Wages paid out during last year \$500,000

Saving represented by Banks and Building
and Loan \$500,000

This does not consider the smaller concerns
and wages paid to builders and contractors

This does not include the money for farm
produce
