BLUE HEN II TALKS TO DR. ARNOLD GORDENSTEIN

Dr. Arnold Gordenstein is a former assistant professor in the English department and chairman of the American studies program. After a long controversy regarding tenure, he left the university and currently holds a position in the Departamento de Lingua e Literatura Estrangeiras at the Universidade Federal De Santa Catarina, Brazil. Dr. Gordenstein received his Ph.D from Harvard where, he is proud to say, he was "the assistant of the great late scholar Perry Miller." Dr. Gordenstein received the Excellence-in-Teaching award in May, 1973.

BLUE HEN: How do you view the relationship of the university to student and community?

GORDENSTEIN: It seems axiomatic to me that the university exists to service the students and the scholars. Their aims are not identical but they often overlap. As for the influence of the university on the community — I suppose it is felt when the students graduate and move into the community. I'm not certain that the interests of the university and the community are identical however, nor am I certain that it is a good idea to try to obliterate the distinction between town and gown. It is even possible that there must be friction between them because of the nature of the institutions, the nature of the work they do, and the nature of the people who are often attracted to academic life.

BLUE HEN: What do you think of the University of Delaware as a teaching institution? How would you describe the "nature of the people" here and the work they do?

GORDENSTEIN: I often had the feeling that everything is there, ready to begin — the buildings, warm rooms and chairs, blackboards and chalk, a lot of good faculty, an

intelligent student body even though a little uniform, an atmosphere of freedom, enough money. Sometimes even a willingness to experiment (though usually in small things) in some areas of the administration. Then (and I share this feeling with many faculty and students, I believe) why didn't it *begin*? There's small recognition of the possibilities, there's little urgency about the place, little sense of the inherent excitement about what they used to call the life of the mind. A lot of people are on rails and so the university is not getting proper mileage out of its own assets. The administration usually seemed like a foreign government. I should think that their function would be to collaborate with the faculty to improve the academic possibilities but instead they often seemed like adversaries. The library could be better but they're working hard on it and it was improving noticeably during my time there. Many times the university seemed like a great big frat house. I believe that that particular atmosphere is intimidating to young students, encouraging conformity and mob behavior where we are committed to thoughtfulness and strong individualism. I don't know what the *university* can do about that except to offer students an attractive alternative.

BLUE HEN: Had you noticed a change in students' attitudes?

GORDONSTEIN: One really only knows the students one works with. The others we only pass on campus. I'd heard how they had become less political and more career-oriented, had gone from Bobby Kennedy to David Eisenhower. That is possible but I didn't see much of this change among my own student-friends who were vigorous, beautiful, proud, touching in their desire for fulfillment. We teachers often depend on these qualities, live off them and take inspiration from them.

BLUE HEN: Did you develop a specific teaching style?

GORDENSTEIN: First, any given day, I try to know as much as possible about the book and the literature that surrounds it. Then insist on the same for the students. *Then* I listen a lot and give a lot of feedback, try to suggest possibilities that originate in what the students say. I consider the classroom — excuse the hyperbole — a nearly holy place, where the rules are off, where one listens, respects, argues, but where one does not fake, pose, pontificate, or defend one's ego. The classroom then is a laboratory for ideas rather than a place for either a performance or a speech.

BLUE HEN: Why did you accept the teaching position at the University of Delaware?

GORDENSTEIN: I took the University of Delaware job in 1967 because it seemed like the most promising one pedagogically. I was promised the directorship of the American Studies program in a short time (in 4 months, as it turned out), as well as what seemed then like a virtual blank check to invent and teach courses, to restructure what was then a small program and to have considerable voice in the direction American Studies would go. The salary offer, by the way, tied 3rd among 4 job offers.

BLUE HEN: Finally, why did you go into American Studies?

GOLDENSTIEN: It was a matter of identity, mainly. As a second-generation American I realized rather early that my identity was a prize that could be won only after I understood the pressures my environment had exerted upon my inner urges. And, since so much of that environment had been internalized through the years, the line down into myself led directly through a veritable warehouse of hitherto unacknowledged American beliefs and values. If we are to be serious about discovering our identities we must be Americanists, I believe.

Everybody I talk to is ready to leave with the light of the morning.
They've seen the end coming down long enough to believe that they've heard their last warning.
Standing alone, each has his own ticket in his hand, and as the evening descends I sit thinking about Everyman.

Seems like I've always been working for some other place to get it together.
 While with a few of my friends I could give up the race and maybe find something better.
 But all my fine dreams, well thought out schemes to gain the mother land, have all eventually come down to waiting for Everyman.

Waiting here for Everyman. Make it on your own if you think you can.
If you see somewhere to go I'd understand.
Waiting here for Everyman, don't ask me if he'll show, baby, I don't know.

Make it on your own if you think you can.
Somewhere later on you'll have to take a stand, then
your gonna need a hand.

Everybody's just waiting to hear from the one who can give them the answer, and lead them back to that place in the warmth of the sun where sweet child is still dancing.
He'll come along and hold out that strong but gentle father's hand, Long ago I heard someone say something about Everyman.

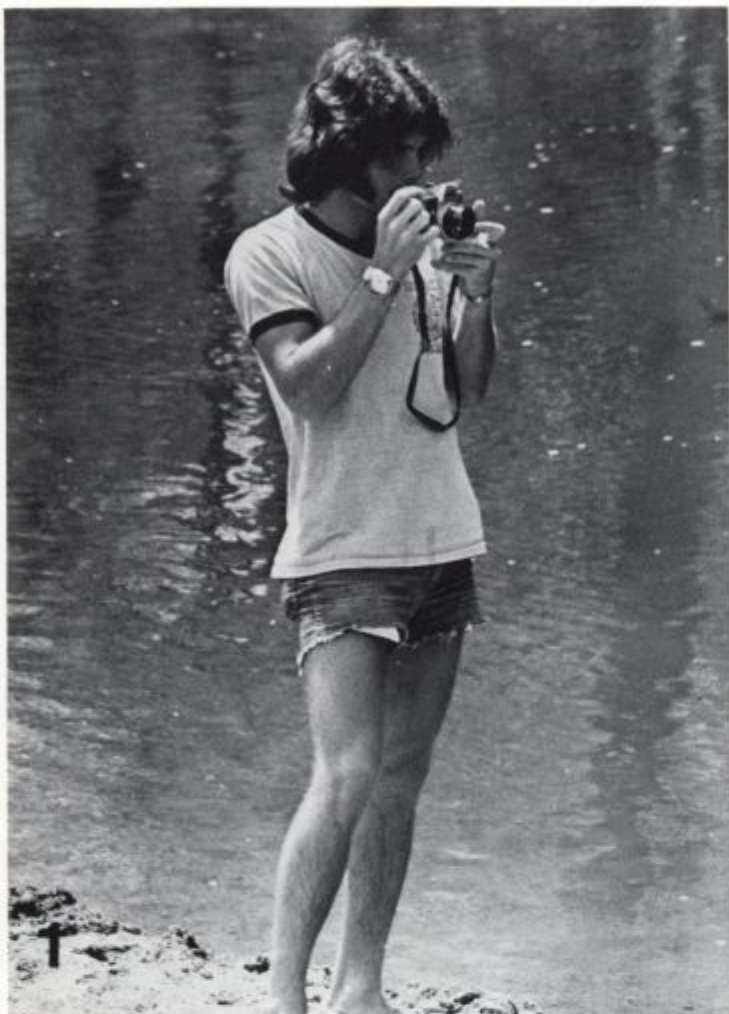

I'm not trying to tell you that I've seen the plan.
 Turn and walk away if you think I am.
 But, don't think too badly of one whose left hold-
 ing the sand.
 He's just another dreamer dreaming about
 Everyman.

JACKSON BROWNE'S
 FOR EVERYMAN

BLUE HEN II

These are the Blue Hen II pictures. Each picture is numbered. Your job, or duty, is to place the proper caption under each picture. Here are the captions:

Caption A — Where's the money?

Caption B — Of Course I know where the photos are, I hid them.

Caption C — Girl saying to boy, "you're what"?

Caption D — This is where we store the Cretins.

Caption E — Why does she have to sit like that?

Caption F — I'm taking pictures that no one will ever see.

Caption G — You lied, the photos I need aren't in here.

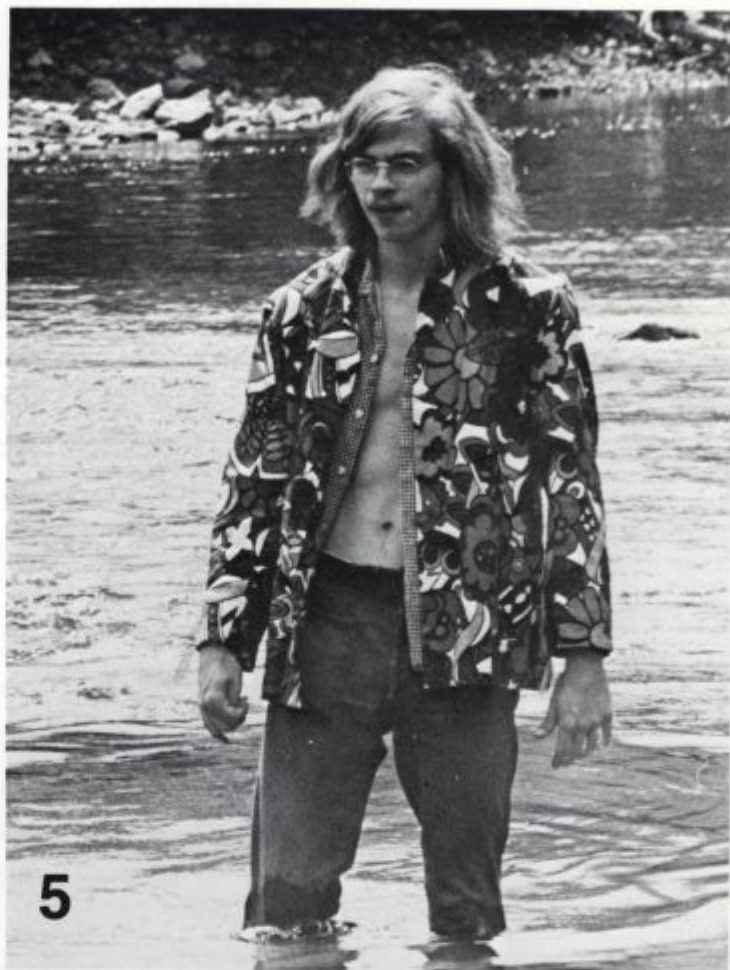

Caption H — Why does he always hand out this awful candy?

Caption I — This is water, not beer.

Caption J — There's the fish I need for my collection.

Possible answers are on page 329.

LETTER FROM THE EDITOR

Many new ideas were introduced in this year's *Blue Hen II* that have never been done on this campus before. More than likely you have already noticed these differences and I hope you prefer them to the old way. Some of the most notable differences were, for instance: I have eliminated the usual message from the President of the University, simply because we've heard all that bullshit before. I believe that the interviews that replaced the messages from the President and Deans are far more pertinent to the students. These professors are well-liked by their students, and maybe these interviews, if read by the administration will give some insight into what teaching methods are effective.

Another major change in this year's book is the seasonal idea. Although this method has obvious flaws, I believe it reflects the events of the year much better than any sectional book would.

Finally, I want to speak about this year's staff. I believed from the start of this year's yearbook that enough responsible people could be collected and allowed to do a section almost entirely on their own. I am now convinced more than ever that I did the right thing and I am forever grateful to most of the staff members. Of course there were times when I grew very tired and wanted to give up on the whole thing, but these same people came through over and over again.

College is one of our rebirths in life. It is a time when much of a personality is finalized and it is a time when one realizes what he or she will need in his or her life. I have found and learned one thing in this one year as Yearbook Editor, and that is your true friends will always be with you. They have been with me and I truly love them all. This entire year's experience has truly been, to quote a Jackson Browne line, "a taste of something fine."

With regards
Philip Keim
