## Gen. Reybold Will Speak at U. Hour

### Army Career to be Topic Of Noted Alumnus Talk

The return of a native will mark the University College Hour on April 10. Delaware born-and-bred Lt. General Eugene Reybold, an alumnus of the U. of D., will tell the faculty and the student body of his personal experiences during his long service in the Army. General Reybold's address will be the feature presentation of Army Week at the University.

General Reybold's service folio reads like something from the brush of Milt Caniff. Obtaining a second-lieutenancy in the Coast Artillery Corps in 1908, he later transferred to the Corps of Engineers. After serving an apprenticeship in such activities as Mississippi River Flood Control, he found China more to his liking and headed a commission which made a study of the control of the Yellow River for Chiang Kai-shek's government. In 1941, Reybold was appointed Chief of Engineers, a post which he held throughout World War II. He completed thirty-eight years of service last year. Now, Gen. Reybold is connected with the State Highway Department as engineer in charge of construction of the proposed Delaware River Bridge.

Amplifying the designation of April 6 as "Army Day," the Department will celebrate "Army Week" for the first time, beginning April 6 and continuing through April 12. Its purpose: (1) to honor American Veterans, and (2) to increase public awareness of the need for adequate defenses. The War Department's high-powered publicity campaign, designed to combat mounting complacency and indifference among the public, will utilize some of radio's lush Hooper-ratings in airing its plea for support.

General Reybold's talk on April 10 at 11:15 a. m. in Mitchell Hall will culminate the celebration on this campus.

## U. of D. Faculty Gets \$200 Raise April 1st

### Part Time Workers; Pres. Carlson Are Not Included

A \$200 annual cost-of-living grant to all full-time employees of the University of Delaware was approved on Monday by the University's Board of Trustees at a special meeting in Newark. The recommendation for the grant, effective April 1, was made by President William S. Carlson of the University.

A cost-of-living increase to other state employees, effective last January 1, excluded the University's approximately 400 employees. The grant is the first general salary adjustment at the University in 30 months, since October 1, 1944, Dr. Carlson pointed out.

Included in the action are the teaching members of the faculty, members of the staff of the University library, members of the administrative, secretarial, stenographic, maintenance and operating, and dining hall staffs; the research staff; and the persons connected with the Agricultural Experiment and Extension Service. The only full-time employees not included are Dr. Carlson and those who became connected with the University since March 1.

Part-time employees will receive a grant proportionate to the time they are employed, and employees who are on a weekly or hourly basis.

## Spring Informal

Photo by Al Smith  
Dancing to the muted trumpets and sweet voice of Chuck Gordon's musicians last week at the spring informal were the above two couples.

## Candy Barr's Song Hit of Spring Hop

A large crowd enjoyed the music of Chuck Gordon's band at the Spring Informal Saturday night. The decorations carried out the Spring Rain theme of the dance and a parachute was hung to look like a big parasol. Candy Barr's song, "Spring Rain," played by Chuck Gordon and sung by Candy herself, proved to be the hit of the evening.

The only complaints heard about the dance were the usual ones over the condition of the Field House floor. It is apparent that something should be done to improve the floor before the time of the next dance.

## Photography Club To Meet April 10

### All Prospective Members Are Invited To Attend

At the first regular meeting of the newly organized Photography Club of the University of Delaware on Thursday night, March 20, the members heard a lecture on Elementary Photographic Darkroom Technique by Malcolm Colton, Head of the Darkroom Committee. The lecture was supplemented by United States Army Training Films obtained through the courtesy of Col. Pendleton of the Military Department. The lecture covered techniques employed in contact printing and film development. After the lecture, members were given the opportunity to try their hand at making contact prints. Many members who had never before made contact prints turned out some very nice work.

In the business part of the meeting the Darkroom Committee submitted its proposals for the operation of the Club darkroom and reported on the equipment which the Photography Club is going to purchase. The darkroom has been obtained through the club's Faculty Advisor, Dr. Parker of the Physics Department.

The next meeting of the Photography Club will be on Thursday.

(Continued on Page 2)

## Theta Chi Elects Joyeusaz Pres.

Dick Joyeusaz was elected to the Presidency of Alpha Xi Chapter of the Theta Chi Fraternity at the weekly meeting held on Monday evening. He replaces Earle Leaman and will serve for the 1947-48 term.

Other officers elected were Barney Runcie as Vice-President, Woodrow Branner as Secretary and Byron Palmer as Treasurer. Bill Cavanaugh was elected to the office of Pledgemaster.

Joyeusaz, a Pre-Law student from Dover, attended the University of Delaware from 1939 until 1942. He was a well known campus personality on this campus in 1941 when he held class office as well as Student Council office. In 1942 he volunteered for service in the Army, serving in the European Theater with the Chemical Warfare Service and the Military Intelligence. He was returned to inactive duty in the ORC as a Captain and returned to his studies in the January, '47 term.

The ever-popular Barney Runcie will assume the duties as Vice-President at the installation on April 14. Playing coach and spark-plug of the strong Theta Chi band.

(Continued on Page 2)

## Mr. Cooper Speaks At AICHE Banquet

Last night marked the annual banquet sponsored by the University of Delaware student chapter of the American Institute of Chemical Engineers. This yearly event makes it possible for student chemical engineers to meet and talk to men prominent in the chemical world. The speaker at last night's banquet was Mr. Charles M. Cooper, Director of the Engineering Research Laboratory, duPont Experimental Station. Mr. Cooper discussed his experiences in connection with the chemical engineering practice school of the Massachusetts Institute of Technology. The event combined a steak dinner with a social function, through which students, alumni, faculty, and friends could meet on a common ground. Many leading figures of the duPont, Hercules, Atlas, Atlantic and Sun Oil companies attended as guests.

## Sigma Tau Phi Now Alpha Epsilon Pi As National Fraternity Groups Merge

### 350 Names On First Term Dean's List

### Vets Maintain Majority, Freshman Class In Lead

Dean Squire's office reports that the Dean's List for the first semester (1946-47) is completed. Three hundred and fifty students comprise this list, 211 of which are veterans.

By breaking down the list into classes, the following statistics are revealed: 119 First term Freshmen, 23 second term Freshmen, 82 Sophomores, 70 Juniors, 46 Seniors, and 10 irregulars. The Arts and Science School is in the lead with 171 names and is followed by the Engineering School with 120. Agriculture claims 26, Education 24, and Home Economics 9.

The list is as follows:

## Univ. Concert Band To Start On Tour Of Lower Delaware

### Mr. King Also Announces Local Concert For May

The U. of D. Concert Band will go on tour April 16th for the first time in the history of the University. It was announced today by Dr. William S. Carlson, University president. Concerts will be given at Seaford, at Georgetown and at Caesar Rodney High Schools.

"The trip was arranged by the U. of D. School of Education in conjunction with the State Director of Music, Mr. Floyd Hart," said Dr. Carlson. "It will serve to acquaint High School musicians with the opportunities for continuing their musical activities and instrumental training at the University. Also it will give to some of our citizens at a distance from Newark an opportunity to hear some interesting concert programs. I am gratified by the Band's progress in concert music. Since their last appearance on the football field at the Muhlenberg game they have been constantly at work on concert music."

Early on Wednesday morning, April 16th, the forty-five bandmembers will board buses and travel to Camden-Wyoming where a concert will be presented in the Caesar Rodney High School Auditorium at 11 a. m. Then they will proceed to Seaford to present a concert at 2:30 p. m., after which they will journey to Georgetown where a formal concert will be given at 8 p. m. The paid admissions at this concert will be used for the purchase of music equipment for the Georgetown High School Band.

(Continued on Page 4)

## Carlson, Heim, Go To UNESCO Meet

Dr. William S. Carlson, President of the University of Delaware, and R. W. Heim, Professor of Vocational Agricultural Education, attended a meeting of the United Nations Educational, Scientific, and Cultural Organization in Philadelphia, on Monday, Tuesday, and Wednesday, March 23, 24 and 25.

Dr. Carlson attended the meeting as a representative of the National Association of State Universities, and Professor Heim represented the American Vocational Association at the UNESCO gathering.

### Del. Group Known as Rho Deuteron, Is 40th Chapter

Rho Deuteron chapter of the Alpha Epsilon Pi Fraternity announces with this issue of the REVIEW the merger of the Sigma Tau Phi National Fraternity with Alpha Epsilon Pi. Previously the men at 151 West Main Street were known as the Delta Chapter of the Sigma Tau Phi Fraternity.

A leading group on the University of Delaware campus since 1924, AEPI's have served as the primary social and cultural outlet for the Jewish students of the University. Scholastically AEPI has long maintained a superior position, as well as having been a leader in extra-curricular activities. They have distinguished themselves many times by winning the interfraternity cup for high scholastic honors, as well as many awards in the intramural play contests, and have held many editorial positions on university publications. The fraternity has also been well represented in varsity and intramural sports.

Alpha Epsilon Pi, a senior member of the National Interfraternity Council, has more than 40 undergraduate chapters throughout the United States. These are located at the University of Virginia, the University of Maryland, besides George Washington University and Johns Hopkins University. The merger with AEPI of STP brings into the AEPI fold groups at the University of Cincinnati, Pennsylvania, Penn State and New York University, as well as the one at the University of Delaware.

Having recently obtained their house on West Main Street, the AEPI's have at present planned a

(Continued on Page 6)

## Sophomores Urged To Consider ROTC

### Senior Course Offers 3 Credit Hrs. Per Semester

The Military Department desires to call to the attention of all sophomores the many advantages of enrolling in the R. O. T. C. Advanced Course. Veterans with a year or more of active service are eligible for enrollment provided they are citizens of the U. S., physically fit, and have not reached their 27th birthday.

The course requires five hours per week throughout the Junior and Senior years and a summer camp of six weeks duration, attended normally after completion of the Junior year. The student receives a ration allowance amounting to about \$20.00 per month for the period of his attendance at college while a member of the Advanced Course, and the pay of a private in the Army while at summer camp. He also receives the necessary uniforms and textbooks without charge. He is exempt from Selective Service while a student in the Advanced Course, and upon successful completion of the course and graduation from college, will be tendered a commission as second lieutenant in the Officers Reserve Corps. These are advantages which will certainly appeal to many thoughtful young men today.

A credit of 3 points per semester is allowed by the University for successful completion of Advanced R. O. T. C. Courses; thus in courses where electives are required the student is not assuming additional work but is merely substituting R. O. T. C. for some other elective.

The War Department limits enrollment in the Advanced Course by assigning each unit a quota which

## Final Examination Schedules

Just before, during, and following last term's final examinations we heard a great deal of complaining concerning the confusion in preparing and final scheduling of the mid-year tests.

We understand the unending griping that is an essential part of any and every examination, but in this case we feel it was perfectly justified. When a student does not find out until eighteen hours before a three hour final exam which of several conflicts he is to take, then something is very definitely wrong!

One student we know of did not learn until the afternoon before the first day of finals which two of three he was to take the following morning and afternoon. It is conceivable that this could exert an adverse effect on his term grade. And we are sure that many more students found themselves under the same handicap of not being given enough prior notice to arrange their time schedules for effective studying.

Not only did this prove detrimental to the students, but was inconvenient to the faculty as well.

We are not blaming anyone for this confusion. Because of the short time remaining after the listing of the temporary schedule, confusion was to be expected. We are sure that those in charge did their level best under those circumstances.

But as long as we shall be judged by the marks we receive, and these marks shall depend heavily on a final three hour examination, it is only reasonable that the unfortunate happenings of January past shall not occur again.

Many schools throughout the country prepare and post examination schedules in the early days of the term giving ample time for conflict adjustment and study planning. Last minute rush is eliminated. We think it can be done here.

In light of this, the REVIEW recommends that the office in charge of preparation of the examination schedule at the University of Delaware draw up and post the tentative schedule as soon as possible and further that this shall become a permanent policy for the future.

—The Editors.

## The Weather Angle

By BILL BERGMAN

The 27th and 28th will have occasional rains with cool conditions. Cloudy and cool on the 29th with occasional rains continuing through the 30th.

April 1st will be rainy followed by clearing with dropping temperatures. April 2nd through 4th will continue clear and cold. The thermometer will rise on the 5th and continue rising through the 8th; however, it will be cloudy with intermittent showers during this period.

I DON'T GET THE POINT...ARE THEY BUILDING US UP...  
OR TEARING US DOWN.....

## TO EACH HIS OWN

By JACK BEACH

We read with interest Ginny Smith's column in the REVIEW last week in which she discussed campus elections. In her closing sentence she stated—to quote—"Instead of sitting back honking our horn, let's move up to the front seat and drive."

We didn't get the wrong connotation of the sentence, but in toying with it we pictured the women as the back seat drivers and letting our imagination roam we took it to be a call to arms for all the women on campus.

Slowly the print blurred before our eyes like a camera going out of focus, and we found ourselves walking up a strange campus. It looked like Delaware campus, but it was oddly changed. The girls had moved into Brown and Harter Hall since they wanted to be closer to Pops. Brown Hall was done in pastel pink and Harter was a soft robin blue. Lace curtains were in the windows and a flower box hung from every ledge.

As we moved along we found a depressed looking little fellow standing beside a familiar looking building so we stopped and inquired, "What is this building?"

"This is Carpenters Gossip Center," replied the little fellow. "It used to be a field house."

The little fellow reminded us of Flibber McGee's postman but as we started to step around him he held out his hand and timidly said, "I'm sorry, you can't go in there...you see its for women only."

"Say, what goes here," we asked, then it began to dawn on us. "Have the girls gained control of the S.G.A.?" we asked.

"Yes," he answered. "Back in '47 they voted to have the constitution changed, then voted themselves into every office. Once they had gained control they found the constitution too complicated to understand so they tore it up. Miss Crawford's president of the University now and, but wait a minute, don't you have your date card?"

"What's that," we asked.

"Every man must carry his date

card at all times. It has the chain of command listed on the back. You must know that and on the front it has your age, chest measurement, and serves as a grading card. Each man is required to have a minimum of three dates a week and he is graded by the girls after each date. If you don't have a B average you must attend Dating lecture on Saturday morning. All dates have to be made three months in advance and if a date is broken you are tried for expulsion by the S.G.A. Girls are allowed to break dates up to ten minutes before date time and all men have to call at the dorm a half hour early for his date."

"What about the REVIEW," we asked, "Are they running that too?"

"Certainly," he answered, "They meet every Monday night to edit the paper. Since only girls work on it word has spread around by Tuesday morning to its exact content so they never bother to have it printed. You would be surprised at the money it saves since the girls insist that if it is ever printed that it must be on scented pink paper."

"What are the classes like now," we inquired.

"There are only morning classes. The girls reserve the afternoons for sun bathing. And another thing that they passed just last week. The profs can no longer interrupt a girl who is talking to her neighbor. This is especially unpardonable if the girl has just picked up a meaty piece of gossip during change of class. All the men are required to major in home economics while the girls mostly major in business economics. They take to their studies very readily and only last term decided to eliminate the middle man by having the subsistence checks mailed directly to them."

We were about to ask the little fellow why the men didn't rebel when we caught a whiff of Chanel No. 5. We turned to see a baby blue roadster pulling to the curb beside us so we eagerly jumped into the back seat and it is from there that we quite contentedly blew our horn this week.

## The Corn Is Not All Green, Or I'm Not Seedy 'Cause I'm For Lawn

Many months ago there was a very lazy farmer who found winter fast approaching without his having cut the fire wood for the winter. This lazy farmer was at a loss for what to do so he went down to the barn and made a little lamb chop. As soon as the other animals on the farm heard of this they rose up in revolt and left the farm for the big city. A group of cows reached New York and found employment in a railroad station carrying baggage. One day the cows were sitting around the Porterhouse talking over the events of the day when a cow from Brooklyn announced that he was going to go to college. Of course the other animals were quite surprised for who ever heard of a cow going to college? One of the other porters asked the cow why he was going to the college. This cow from Brooklyn answers with a smile saying "I 'tenderloin a profession." All the animals laughed. "What are you going to study?" asked one animal. "I think I'll study journalism; maybe I'll write a book like LIVER TO HEAVEN or become a cartoonist and draw a comic strip like MUTTON JEFF." Later the Brooklyn cow explained that he had a big steak in the future and he wanted to make sure that people wouldn't chuck his interests to the four winds. As soon as the other animals were sure that he wasn't giving them a bum steer they all decided to go to college. It was decided that they would study on the continent because the schools there didn't care if you pasture finals in high school or not. They sent letters to a bull in England named Sir Loin who might help them gain admission to schools. Sir Loin referred them to one of his French friends named Fillet Mignon. They were disappointed to find out that they could not go to college because there was an epidemic on the continent called the Red Menace and they didn't want it to spread to the United States. Well, they decided to return to the farm because they couldn't keep their jobs without joining the union and they didn't veal right in joining because their forefathers

were slaughtered by union men. So back to the farm they went with their tails between their legs as all naughty cows and other animals do. Upon returning to the farm they found that spring had come. They felt a little sheepish about asking the farmer to take them back but they did it anyway. Ah yes, there was good news in the barnyard that night. The next morning they went out in the pasture to look around. It really was spring. All the vegetables and flowers were beginning to bloom. The garden was really a gem of many thousand carrots, it was hard to beat. A South American neighbor from Peru was there too. He was known as the Lima bean. This could go on forever but newsprint is scarce so I'll continue next week. I dare you to come back for more. As a closing thought I want to impress upon you that although the story is only two-thirds complete it doesn't make P. U. out of a PUN.—M. A. C.

## Paul Dolan Speaks

This is the sixth in a series of articles by well known campus personalities.

Too often our college days take on the atmosphere of a slugging match—courses, exams, papers, credits—all in a confused welter of so-called educational activity. Our American collegiate system is responsible for this, and there is little the student can do but submit. We can only hope that by the slow process of evolution the curricula of the universities will eventually eliminate those bookkeeping maneuvers which serve only to create psychological obstacles to the acquiring of a really liberal training. While awaiting this millennium, what can you do, as students, to get the most good from the maze of lectures, quizzes, and grades that constantly confront you through the four year sojourn. Perhaps the answer to this depends on the individual student.

There are, for general purposes of discussion, three types of student. The first is so accustomed to spoonfed knowledge that he is lost the moment an instructor introduces the slightest deviation from the mimeographed outline handed to the class. To give this type of student any assignment which is not included in the homework blueprint is to commit sacrilege. The second group consists of those who would welcome some opportunity to be treated as grown-up men and women, but who sense that their high school training has not provided the proper educational antecedents. They are loath to venture on their own for fear of running afoul of the quizmaster. For this group there is great hope. They must have the gumption to trust their native ability, to ask obvious and perhaps, stupid questions in class, to listen to the even more stupid questions of their classmates, and to demand of themselves a clarity and preciseness in their thinking even though it hurts. Our third type is of the diamond-in-the-rough variety. He is usually of the top rank in intelligence, likes to think, isn't afraid of making a fool of himself, if by so doing he can learn something he needs to know. He has sufficient feeling of personal security so that to him the obtaining of grades in themselves isn't worth the risk of losing his

## Spring

By "LUCKY" LOU COXE

This deep-rooted urgent compelling thing!

This desirous intangible almost futile feeling!

This stretching yawning joyous fluttering of wing!

This wondrous beautiful time of year—Spring!

Those unconquerable budding blooming things!

Those birds and bees and others on wings!

Those youths in love whose hearts all sing!

Those all usher in Nature's life giving Spring.

The tides of passionate hate are held in sway,

By the moon-like magnetism of April and May,

The pent-up sorrows and sadness give way,

To the healing gladness of the twenty-first day.

Why can't men all over this earth recognize and say,

That Nature intended in her own glorious way,

That each should partake equally of her splendid foray,

And share harmoniously her April and May?

## Conflict

Let us dance;  
Let us sing;  
For everywhere  
Are signs of Spring

Let us study;  
Let us cram;  
For we must pass  
That next exam!  
Aggie Berger.

members of the Student body and the Faculty interested in Photography. The lecture for that meeting will be on Photographic Equipment.

# SPORTS

## HEN CHATTER

By DICK KIDD00

Shack Martin's Hen baseball team will leave on their curtain-raising Southern trip next Tuesday, and will meet the Randolph-Macon Yellow-jackets on the same afternoon in Ashland, Virginia. Coach Martin distributed 22 uniforms last Saturday, and he will carry 18 men on the trip.

It seems that we find the same situation prevailing on the diamond this spring which kept the Delaware basketball team out of the MASC play-offs. We mean that Coach Martin has had hardly time this spring to choose his squad, let alone work with any of his talent. It is hardly fair to ask a coach or players to start an intercollegiate schedule, which includes big-name schools such as Richmond and Navy early in the campaign, after only two weeks of practice which was confined to about one hour a day. Coach Martin, like Coach Joe Brunansky last winter, must devote a good part of his afternoon practice session to working with the football team. Granted that spring football is over, and he will be free to devote his full time to his diamonders, but we're afraid that the damage has already been done. Even though we have perhaps the best baseball team in the history of the university, you can look for few if any wins when the Blue and Gold journey south next week. Most of the ball-players have not found their batting eyes and have lots of kinks yet to work out before they should be expected to win ball games. We hope that when the final consideration of the 1947 baseball season is made, we'll all remember that the first half-dozen games should be neglected. We forgot that fact during the cage campaign, but let's give the baseball club the break they deserve.

The REVIEW radio program last Friday night, which featured Delaware athletic stalwarts, was a howling success. Billy "Smiles" Cole and Jack "Pardon Me" Messick stole the show, but Phil "Senator" Doherty has been getting all the big offers. After hearing Cole's discourse on the ills of the basketball team, Herm is ready to give up the ghost.

The softball league will be getting underway as soon as spring vacation has ended. Look for some real powerhouses this spring. Theta Chi, nosed out in both the intramural football and basketball leagues, are promising some stiff competition to all comers. Manager John "Lippy" Hitchens claims to have the answer to the Phillies' shortstop problem under cover for the season. Big Fred "Bahe" Sposato will be aiming for bigger and better fences this season, and he doesn't seem the least bit worried about the planned "Sposato Shift" which opponents are reportedly devising to combat the powerful stickler.

The big inter-squad football scrimmage last Saturday provided some real thrills for the few onlookers. One of Coach Murray's 1947 deviations is to scramble the teams and to let the starters and scrubs be mixed up, and on opposing sides of the scrimmage line. This system really makes for some rough and tough sessions.

It seems that Phil Genthner, rangy tackle, and Franny Hill are the two tackles who will be battling for Captain Tony Stalloni's position in the starting eleven when fall rolls around. These two and Ray Ciesinski have shown some good football this month, and a battle royal should ensue for the starting position next autumn.

Coach Martin has been working Fred Sposato in the blocking back position, and there seems to be no holding the big one-time Wilmington High Star. Joe Hearn, second-string blocker, was sidelined last week with a broken hand, and we will have to wait till fall to see if the shift will be permanent.

Back to baseball for a minute, we find that big Luke Selby, elongated first baseman on the 1946 Conference champions, has been lost to the club for the year. The effect of his loss will be felt in the Hen batting order severely. Luke's .300 average last year would sure come in handy in retaining the crown again this year. It looks as if Joe Pennock will be called upon to fill the first sacker's shoes, and he may be just the boy who can do it. Pennock has looked good around the bag, as has Jimmy McFadden, but neither has yet displayed the punch at the plate which was synonymous with Selby.

Jim Gilson seems to be the only infielder who is sure of his post. No less than a half-a-dozen talented infielders are vying for the second and third base slots, which were filled last year by Billy Cole and Phil Doherty, respectively. Both Dutch Clark and Barney Runcie will be hard to keep out of the starting lineup when the season gets underway.

Coach Shack Martin is four deep in first-class catchers, with Tom Scripps, George Schaan, Gene Gallagher and Bill "Bulldog" Murray all looking good in the backstop position.

## Mason-Dixon Conference Champs

Photo by Poffenberger Studios

The University of Delaware swimming team, which walked away with the Mason-Dixon Conference swimming championship several weeks ago in the Taylor Pool. The mermen, under the able direction of Harry Rawstrom, also took ninth place in the Eastern Intercollegiate Meet held at Rutgers University two weeks ago.

## Freshman Sextet Downs Jr.-Sr. Team

The Freshman team, after dropping one battle to the Sophomores, outscored the combined Junior-Senior squad by one point in a basketball game Friday afternoon. Edging out their opponents in the last quarter by a one point margin, the Frosh hit the nets for 22 points to the Junior-Seniors' 21. Leading scorer for the contest was "MLiz" Pettit who racked up eighteen points for the underclass team.

In the Soph and Junior-Senior game the Sophomore squad spurred to the lead by half-time. With the score 21-13 at the half, the Sophs maintained their margin, with the final score 31-21. Doty Davis, Sally Wooleyhan and Jean Cameron were high scorers for the fray.

## The Basketball Team

Photo by Poffenberger Studios

First row, left to right: Manager Bob Hunter, Pauls, Newell Duncan, McFadden, Scotty Duncan, Cole, Hoffstein, Manager Sammons; second row: Trainer Gus Seaburg, Manager Branner, Nash, Wright, Wood, Lewis, Zink, Managers Walsh and Onley, and Coach Joe Brunansky. The 1947 Blue Hens had the best won-lost record of any quintet to represent Delaware since 1938.

## Coach Brunansky Tries Out Golfers

### Southern Trip Is Planned With Del. Baseball Team

The Newark Country Club golf course is to be the testing ground for all the Blue Hen shotmakers who hope to make the trip to the sunny south during the Spring vacation. The tryouts will be held on Wednesday and Friday afternoons of this week. Coach Joe Brunansky issued a call for all golfers, duffers and Demarets alike to turn out for these two afternoons of 18 hole medal play. Similar tryouts will be held at other times during the season to see who will compose the team to represent the University in its later intercollegiate matches.

The southern trip, planned in conjunction with the baseball team's junket, will find the stick wielders in action against the University of Richmond and Randolph-Macon College, while present plans call for two matches with the Gobs.

## Hen Tracksters Adding Final Polish for First Meet With Catholic Univ. Apr. 12

## Yacht Club to Hear Ex-Dinghy Champ

If you like the laziness of lying on a boat's deck, feeling the sun's warm caress and watching the sunlight sparkle on the water, or the thrill of a boat close-hauled and heeled over in a good breeze with the water rushing past the bow, come on along and join the Yacht Club. We expect to have a boat ready to sail by the end of Spring Vacation, so that the Club may spend the warm spring weekends on the water down at Northeast.

For all of you who would like to sail and can't tell a whisker pole from a centerboard or would be apt to forget to duck when the skipper says, "Ready about!" a course in the fundamentals of sailing is being given by Mr. A. C. Smoot every Thursday night at 7:15 on the second floor of Recitation Hall. Come on along to class and find out what it is all about.

Election of officers will be held at the next meeting of the Yacht Club on Thursday night, April 10, at 7:00 in the lounge of Old College. On Thursday night, April 17, same time and place, Mr. George Abel, the former Middle Atlantic States Dinghy Champion, will come all the way from Media, Pennsylvania, and speak on "Sailing in General and the Fine Points of Racing."

## 14 Previous Lettermen Backbone of '47 Squad

Coach Kenneth Steers' thin-clads continue to work out, despite the lack of balmy weather, in preparation for the opening meet with Catholic University at Washington, D. C., on April 12th. Since this is but slightly better than two weeks away, Coach Steers is anxious to get his men thoroughly limbered up and in good condition before taking on the Capitalites. Valuable experience, although no material reward, was gained last Saturday in the indoor AAU meet in the Fifth Regiment Army in Baltimore when a small squad composed of Bernie Chasens, Jack Waples, Bill Gordon, Carl Lasker, Paul Montague, Ed McGovern, Frank Lanza, Harry Cannon and Bill Piper represented the University against opposition well out of its class.

The large 1947 roster is well-sprinkled with lettermen from last year and before the war; they include Gene Carroll, Jack Catts, Bob Cofer, Pete Currier, Jim Holden, Don Klester, Jack Lewis, Jim Otten, Bill Otten, Bill Piper, Jim Riley, O. T. Roberts, and Bill Tawes. Jack Simmons, high-point man of last year's aggregation, and Bill Buckworth, distance ace, have been forced to abandon track because of injuries.

The squad at Coach Steers' disposal, in addition to those mentioned, is as follows: Frank Adams, Bob Ayres, Walter Bartaschky, Bill Bergman, Bill Bilski, Phil Bohman, Harry Camper, Harry Clark, Henry Cofer, Marion Davidson, Ed Engel, Gus Everett, Gene Fielder, Jack Gallagher, Tom Galley, Bauduy Grier, Tom Griffin, Dick Heitmiller, Dick Hutton, Carl Jahn, Bob Kane, Paul Lawton, Bob Logan, Sam Lukens, Don Lynam, Chuck Masten, Wallace McFaul, Al Meli, Bill Murray, Jim Myers, Ralph Palmer, Hank Paris, Wayne Peoples, Charles Pinto, Stuart Pratt, Jim Rathmell, Dave Scott, James Sease, Bob Stabler, Nine Stalloni, Bill Talley, Buck Thompson, Ray Waski, John Webb, Ray Wright, J. T. Shannon, Pete DeShan, Don Greenfield, E. B. Zebbley, Tony Storti, Bob Glisson, Tony Stalloni, R. E. Bleier, Jay Thorpe, Ernie Mettenet, Joseph Boggs, Henry Lewis, Harry Cannon, and Richard Tyler.

## Sig Nu Captures Intra-Mural Crown

The swimming pool of Taylor Gym was the scene of a great deal of activity on Wednesday afternoon, March 19. The Sigma Nu swimming team thoroughly trounced all competitors to win the Intramural Swimming Championship. The Sigma Nus won seven of the eight events, before a large and enthusiastic crowd.

The first three places in the meet were:

Sigma Nu ..... 74 points  
S. P. E. .... 19 points  
Theta Chi ..... 15 points  
Sigma Nu had 49 points and received 25 additional points for winning the championship.

The results:  
50-yard free style—Won by F. S. Craig of S. N. Time, 27.2  
100-yard breast stroke—Won by A. R. duBell of S. N. Time, 1:23.8  
100-yard free style—Won by F. S. Craig of S. N. Time, 1:02.8  
100-yard back stroke—Won by H. Huxford of Theta Chi. Time, 1:15.8  
200-yard free style—Won by W. Grier of S. N. Time, 2:42.9  
Diving—Won by A. R. duBell of S. N., with 67.8 points.  
200-yard relay—Won by the Sigma Nu team of M. Prettyman, W. Grier, A. R. duBell and F. S. Craig. Time, 1:34.1.

Theta Chi's Bob Campbell dinged the tying basket. Two quick baskets in the waning seconds of the ball game, one by Sig Ep's Miles Powell and the other by Theta Chi's Carl Lasker, put the finishing touches on the contest and the final whistle found Theta Chi in the win column.

The final playoff for the Inter-Fraternity cup will be played this Thursday night at 7:30 p. m. in the

(Continued on Page 5)

## Theta Chi Takes Cup Semi-Final By 2 - Point Victory

### Lasker Sinks 2 Pointer To Put Game On Ice

In one of the most hotly contested games ever to be played in the Carpenter Field House, Theta Chi Fraternity in the dying moments of the Inter-Fraternity basketball cup playoff came from behind to eke out a two point win over University intramural champions, Sigma Phi Epsilon, 30 to 28.

Closely paralleling the fight and spirit of their first encounter two weeks ago, the fraternity fives gave their respective loyal supporters a game for their money. Trailing at the close of the first period by a score of 13 to 2, Sig Ep doggedly met the resistance of a towering Theta Chi team and midway in the last quarter led the "Hill five" by a three point margin, 19 to 22.

Displaying a last minute drive,

## Campus Bridge

By ROBERT N. LATTOMUS

This week's hand, which started an argument which raged in Brown Hall for several days, concerns the three opening bid. The theory, of a three opener subscribed to by all the expert players except Culbertson, is that the bid is purely an attempt to prevent the opponents from bidding a game which they probably have. It is therefore made with a long suit and a low honor count. The factor of safety is the only limit on the general weakness of a distributional hand which should be opened at the three level. When vulnerable, the hand should be reasonably sure of taking seven tricks, when not vulnerable, it should contain a probable six tricks.

The hand in question was as follows:

S: A K 10 8 7 4 2  
H: A 6 3  
D: Q  
C: 5 2

When the hand was played, Dealer, who had the hand shown above, opened with a three spade bid and the hand was then passed around the table. It will be seen on close inspection that the hand is much too strong in honor count to be opened at the three level. The hand contains three honor count, plus a singleton and a strong spade suit, which will enable the holder to get the bid at the lowest level in case of competitive bidding from the opponents. The only proper bid on the hand is a bid of one spade. While it is true that the hand may take seven tricks unaided, it is not strong enough to open at the two level, and its strength may be shown later in the bidding by a jump rebid of the spades at the next opportunity.

The hand becomes a borderline case between a three bid and a one bid by changing the heart Ace to the Queen. The hand has now barely below two and a half honor count, and may be opened either way at the discretion of the bidder. The hand set out as follows would be a borderline case between a bid at the three level and a pass:

S: Q J 10 8 7 4 2  
H: Q 6 3  
D: 9  
C: 5 2

This hand must be passed when vulnerable, but may be opened with three spades when not vulnerable. Any weaker hand must be passed even though it contains a seven-card suit.

As can be seen from the foregoing examples, the partner must have a very strong hand to respond to a three-bid. A minimum of three honor-count is necessary, and even three honor-count should be passed if it does not contain two Aces. The lower cards, Ks, Qs, and Js, do not have their normal value when opposite an opening bid at the three level, because the three-bid hand is necessarily short-suited in all the suits except that bid. Next issue we will discuss responses to three-bids and one-bids, showing how games and slams will be missed by opening with a three level bid when the hand contains the required honor-count for a one-bid.

## War Veterans Must Register Firearms

That German "burp gun," your Japanese sawed-off shotgun, that Italian sub-machine gun, or your prized shooting cane; they must all be registered with the U. S. Treasury Department.

The power-that-be don't object to ex-G. I.'s owning these deadly souvenirs. They know that the war veteran is proud of his loot and enjoys showing trophies to admiring friends, but the government does not want the weapons to fall into the hands of criminals.

So the national firearms act, not a widely known law, has been passed to require registration of all dangerous firearms, and a prohibitive transfer tax of \$200 has been designed to keep the guns in the veterans' hands. Failure to register such war trophies leaves the vets open to prosecution and severe penalties.

## "He Lied to Her Husband"

Photo by Waski & Symonds

As a climax to the "Playbill" held in Mitchell Hall last Thursday and Friday the E52 players presented the play "He Lied to Her Husband." Howard Hitchens (left) and Andy Bolton (right) are helping Verda Vane to her feet during an exciting part of this play.

## Voos and Millman, Another Contest; On Greece, Turkey British This Time

### Defeat Of Communism Subject At Smoke Talk

The first in the series of "Smoke Talks" was held in the Lounge of Old College, Monday evening, March 24th. The purpose of these talks is to provide a way in which students and faculty can get together informally and discuss topics of mutual interest.

The general topic of the evening was "Should the United States Underwrite British Commitments?", but the actual discussion narrowed down to the more exact topic of "What if anything, should be done about the Spread of Communism."

Huguette Voos and Art Millman were the student speakers and Mr. Finch, of the History Department, acted as moderator.

Miss Voos expressed the opinion that in order to prevent the spread of Communism, not only in Greece and Turkey, which were the countries in the spotlight for the evening, but in every country which has been devastated by war, it is necessary to make them economically sound. She suggested that if this were done, they would have no cause to turn to a Communist way of life. She also believes that the U. N. should undertake this task, in preference to having it done by any one country, as America or England.

Mr. Millman also expressed the belief that these countries should be put on a firm economic basis, but he believes that it could be done more effectively by the intervention of the United States. He made the point that most of the money and goods being sent to Greece and Turkey are not being used for the benefit of the people but are instead being used to strengthen their military power.

There was no hesitancy on the part of the group to express their opinions on these matters, and a lively and informative discussion ensued. It would be difficult to cite what the main consensus of opinion was, as the group was large and so many points of view were presented.

The group agreed, however, that some steps should be taken now to help these countries regain a reasonably sound economic basis, and then let them choose their own form of government, they differed as to the method to be employed to accomplish this end.

Applause should be given to Mr. Rogers, of the English Department, who is the sponsor of these talks. It is hoped that many more will be held in the future and that the response will be as great.

Coffee was served after the general discussion and this tended to break the group into many smaller units, in which more opinions were aired.

## Another Contest; British This Time

Not to be outdone by "Mademoiselle," Sammy Kaye, and the local English Department, the American & British Commonwealth Association, Inc., (all of it) has announced that it is holding a CONTEST.

This is to be a very exclusive contest limited to undergraduates of a "selected list" of American colleges or universities. It is not quite clear how Delaware came to be selected, but REVIEW reporter Jack Beach is investigating the case. The whole sordid story will doubtless appear in his column in a few weeks.

The subject of this contest is to be "Respect for the Individual Man—Democracy in America and the British Commonwealth." The A. & B. C. A. has neglected to translate this title into English; that, probably, is part of the contest. The subject, the association announces, may be approached from the point of history, government, economics, philosophy, etc., or from a purely personal point of view.

Essays will be judged on (1) significant thought based on the study of source material, (2) interest, and (3) literary quality. They must be between four thousand (1 said 4000!) and seven thousand words in length.

In case anyone is really interested, the contest closes June 15, 1947. Essays should be mailed to: British Essay Committee, 8 Arlington Street, Boston, Mass. Further information may also be obtained from the above address.—H. A. W.

## Theta Chi

(Continued from Page 3)  
Field House. Two Sig Ep regulars, Henry Winchester and Kenny Barnes, promise to be back on their feet after an attack of the grippie that kept them off the court in last Monday's game. Sig Ep and Theta Chi each having one a game in the playoff promise a thriller this Thursday evening when the "fighting fives" meet again—this time for blood.

The REVIEW urges that the student body turn out en masse to witness the final contest.

The following interviews are scheduled at the Business Guidance Office for the week of April 7, 1947:

9 April—Wed.—Retail Credit Co. (A & S).

10 April—Thurs.—General Electric Co. (A & S).

## Research Lectures Continue April 10

### D. Benjamin D. Merritt is Scheduled as 2nd Speaker

The second in a series of research lectures planned by the University Committee on Research will be given on April 10th, at 8:00 in the auditorium of the Chemistry Laboratory. This lecture will be given by Dr. Benjamin D. Merritt, who will speak on "The Open Door in Humanistic Study." Professor Merritt, who was obtained through the efforts of Dr. Eva Clift of the University Ancient Languages Department, has distinguished himself in the fields of Greek epigraphy and history. Before his appointment to the Institute for Advanced Study at Princeton, New Jersey, he was professor of Greek at the Johns Hopkins University, Professor at the American School of Classical Studies at Athens, and Lecturer at Oxford. In 1940 he gave the Martin classical lectures at Oberlin College and in 1945 he was appointed Eastman professor at Oxford. His many publications include works on the Calendar, Chronology, and Financial Documents of Athens. In these days of renewed interest in the Humanities this lecture by an engineer, thinker and gifted speaker in his field will be both timely and interesting.

Every one is invited to attend these research lectures, and no admission is charged. The first lecture was by Vincent J. Schaefer who spoke on "Creating Planned Snow Storms." The third lecture will be held May 14, when Robert R. Williams who was formerly Chemical Director of the Bell Telephone Laboratories, will speak on "Natural Science and Social Problems."

## Review Reporters Unveil Mystery

Sometime last week trucks began to roll across the muddy grass of our beautiful campus. From their capacious bodies appeared assorted piles of boards, beams, braces, and miscellaneous lumber. Among the student body a furore of interest arose, "What the heck is this rubbish," they wondered.

REVIEW reporters, always on the ball, set out to investigate. The explanations they gathered were many and varied. Some students postulated that this was:

- (1) a shipment of rubble from Stalingrad—received by reverse lend-lease;
- (2) the new Student Union Building;
- (3) a pilot plant for the "Marriage and Family" course;
- (4) the beginning of a stock pile of fuel for next fall's football bonfires; or
- (5) that Len Dougherty has been dabbling in the building materials black market.

Undaunted by such malicious rumors, our reporters struggled on until finally, in desperation, they went to the school authorities. From them came a new and far less romantic story. The lumber, it seems, is to be transformed into temporary classrooms and laboratories, to accommodate next fall's record enrollment. One will be used by the Chem Engineers Dept. The others are as yet unassigned.

I'll Meet You There!

## Mail Box

Dear Mr. Editor:

Last week you asked for the student opinion as to what was wrong with the dances. Speaking from the feminine viewpoint I can give at least three reasons. First, advertising. Why must we always wait until three days before a dance before we start advertising? And why not advertise over the air since we now have our own radio station? I, for one, would be glad to help make posters if I felt that was the main trouble, but there is also the fact that students go home weekends even more than before now that the 5-2 meal tickets are in circulation. Thirdly, we never get student support unless we have some good name bands. Witness the success of the Junior Prom. Frankly, I think the student body would prefer to put their money into fewer dances with good orchestras instead of half-baked dances every week. You have probably heard all this before, but you asked for it and there it is.

(Name Withheld by Request.)

P. S. I might add that if it is bashfulness that is holding the men back, they needn't worry. To my knowledge, there are very few girls who dislike dancing and who would not attend a dance if the males applied themselves a little more. And who said there was nothing to do during intermission?

(Ed. Note: Thanks to our WC Deb for her nice answer. And incidentally, our only answer! We think the last sentence of your P. S. constitutes the most fascinating news story of the week!)

## Behind Bushes . . .

BILL BUSH

Those pre-vacation blues accompanied by those pre-vacation tests are enough to get any one down. Everyone goes home to recover from the strain and then returns to campus to recuperate from the vacation. It's a vicious circle!

It looks as though Beverly finally broke away from the books long enough to have a good time at the Spring Informal.—There was one group that decided to really go "all the way" on the theme of the dance. They rushed the season and came in Spladings, bow ties and light gabardine—at least they have the spirit and that's what constitutes 90% of a good time.

Did you notice:

All those slinky black dresses at the dance Saturday night?

Janie's new boyfriend from the big city?

Some people never seem to learn their lesson—the fellow who is futilely trying to recover his class ring is planning to give it away to his present "one and only" as soon as he recovers it. He should know better by now!!

Jean Barlow's jokes were the sensation of the evening last Saturday—it seems as though the criterion of whether a joke is presentable in mixed company depends upon whether it was obtained from a relative or in-law.

Seen Deer Parking—Dick Guerke and Sybil Levenson, also Jenny and Jimmy along with "Shickum" and date. . . . We overheard this conversation between two brilliant belles on their way to the Deer Park for the first time—1st, "What's the pass word for this joint?" 2nd, blankly, "I'm twenty-one." We understand that one of these two has a mania for drawing imaginary white lines across a middle of the room and then walking said line in order to determine her sobriety.

It's believed that Jack Budd and his "dream girl" have definite plans for the future—Bill Crony and Janie Gordon are the couple of the campus. They too are said to be making plans. We wonder just

who is the secret passion holding the key to Chuck Mitchell's heart. She must be really out of this world. There is one blonde who couldn't stand the strain of worrying about her heart's desire, and so she drowned her sorrows this weekend—waking up Monday with more than one headache. Pardon me mademoiselle, but the torch you are carrying is showing. Eleanor Records and Barbara Brenner both have secret admirers in their classes, but not so secret is the admiration of Lou Liarakos for Stella up in Wilmington. "Smoky" claims that he has found the "Jane Russell" of the campus.

First signs of spring on campus. . . . Two couples returning Sunday afternoon with a blanket and big lunch basket from White Clay. . . . Couples sitting on the gym steps, Robinson Hall steps, any and all steps—greater percentage of cutting of afternoon classes—Twosomes pausing with dreamy eyes in front of jewelry store windows. Term papers due in the very near future.

Sally Dodge plans to link arms away from the altar on the 29th—The best to Sal and Al!! Fruff and Dick have formally announced their engagement.

Carolyn Storms date over the weekend was an import from Ohio. Rodie Hoke, who really gets around, was seen this time in the company of Dewey Cooke at last Saturday dance. Jane Forman—nicknamed "eyes," for an obvious physical attribute, was also at the dance in the company of "Big Baby." Seen everywhere together are Judy Thomas and Art Millman. They call him "straight A" Millman, but it looks like straight Judy from this corner.

Don't want to let the Catt out of the bag but there is a female cheer leader who feels just that way about that Ch. E. But, M. A. S., he wants a gal with a car. Just remember that when your date admits to havin' a checkered career—it's your move.

## R. O. T. C.

(Continued from Page 1)

cannot be exceeded. In order to establish a list of eligibles for enrollment next fall, applications for enrollment will be received now from interested students, although enrollment cannot be completed until the beginning of the fall term.

As a feature of Army Week, the Military Department will be open for inspection daily from 8-12 and 1-5, April 7-11 inclusive, and April 12 from 8 to 12 noon. All Sophomores are urged to visit the Military Department during this period, talk over the R. O. T. C. with members of the Department, and apply for enrollment. Come to the second floor of Old College, east wing, Room 308.

## Ag Club to Hold Meeting April 21

The next meeting of the Agriculture Club will be on April 21 at 7:15 p. m. in the lounge of Old College, announced Mr. A. H. Esham, president. A program including a talk on frozen foods, a film on farm oddities, and a discussion of the employment possibilities in one of the specialized fields of agriculture is tentatively planned. All members are urged to attend as the nominations for election in May to club offices will be announced.

ability to think independently of the text.

I believe this last type of student can do a great deal toward relieving the pernicious stranglehold our present educational credit system has upon the development of a well-rounded, liberally-minded personality. If these independent thinkers among the student body would encourage the instructor, by engaging in intelligent and earnest discussion, to teach not by the book, but through the facts of the students' own experience, their efforts would be contagious among their classmates. From this would grow alert, inquisitive, and challenging classes—the greatest inspiration to a teacher. Here might be the nucleus of an overpowering force that would send our present credit system into the limbo of discarded ideas.

## Civil Service Exams To Be Given For Jobs With US Navy

### All Applicants Must Pass Written Test To Qualify

An examination for filling Chemist, Physicist, and Engineer positions at the P-1 grade (\$2,644 a year) has been announced by the Board of U. S. Civil Service Examiners for Scientific and Technical Personnel of the Potomac River Naval Command. The positions to be filled are in various Naval establishments in Washington, D. C., and in nearby Virginia and Maryland.

To qualify for these positions, all applicants must pass a written test. Persons filing application must meet the following requirements: For Physicist and Chemist, applicants must have completed a 4-year college course which included 24 semester hours in physics or 30 semester hours in Chemistry, or they must have had such courses plus experience in the appropriate field to equal 4 years of education and experience. Applicants for the position of Engineer must have completed a standard college professional engineering curriculum or have had 4 years of experience in technical engineering, or a time-equivalent combination of this education and experience. Further details are contained in the examination announcement.

Application card Form 5000-AB should be filed with the Executive Secretary, Board of U. S. Civil Service Examiners for Scientific and Technical Personnel of the Potomac River Naval Command, Building 8, Naval Research Laboratory, Washington 20, D. C. Full information and application forms may be secured at first and second-class post offices, from the Board of U. S. Civil Service Examiners of the Potomac River Naval Command, from Civil Service Commission regional offices, or from the Civil Service Commission in Washington, D. C.

Applications will be accepted until further notice. However, persons who wish to compete in the first examination scheduled should apply not later than April 4, 1947.

## Welch to Speak At B.W.M. Conference

The Better Work Methods Conference to be held on Monday, March 31, in Room 216, Wolf Hall, will feature Mr. Herman Welch of the Labor Utilization Division in Washington. The purpose of the conference is to instruct the county Extension staff and any other interested persons in the work efficiency methods learned during the war in industry. Mr. Welch was active in this project in the war years when the shortage of farm help made it particularly important.

The U. S. Department of Agriculture states that the object of Job Method Training is to establish "a practical plan to help get more and better work done in less time and with less effort by making the best use of the manpower, materials, and equipment available." The county staffs have already had five hours of this training and the conference will enable them to exchange information on how they have applied it to farm and home problems in their districts.

After opening remarks by Mr. George Worrlow at 10 a. m. Mr. Aladar Kish will speak on the theory and application of Job Method Training. Then the movie entitled "Take It Apart and Put It Together Again" will be shown. A talk by Mr. Welch on Better Work Methods Projects for 4-H members will conclude the morning session. At 1:30 in the afternoon Mr. Welch will explain how other states have used Job Method Training. This talk will be followed by a discussion of how it can be applied in Delaware. A movie entitled "Making Minutes Count" will close the program.

## A.V.C. Finishes Poll For GI Subsistence

The Newark Memorial Chapter of the American Veterans Committee culminated a campaign for increased student-veterans subsistence allowances last week with the distribution of over 1,000 questionnaires to Delaware student-vets, determining the income and expenditures of single and married veterans.

Compiling the information obtained, the AVC will select representatives at this week's meeting who will travel to Washington next Monday and present the figures showing the need for increased allowances to Congressmen who are at the present time considering Bill H. R. 870 which would raise the monthly stipends under the G. I. Bill to \$100 for single men and \$125 for married vets.

All veterans who are interested in active veterans' group are invited to attend this meeting to be held at 7:15 p. m. tonight at the Newark Elks Club, 59 West Cleveland Avenue.

World War II Veterans of the Army, Navy, Marine Corps, Coast Guard or Merchant Marine are eligible for membership.

## Dr. Duenner Lists Five Precautions

Doctor Duenner of the Student Health Center has requested that the students take the following precautions and preventives against the evident epidemic of respiratory diseases going around the campus.

1. Do not get over-fatigued.
  2. Do not overindulge in food or drink.
  3. Eat nourishing foods.
  4. Avoid over exposure.
  5. Get plenty of sleep and rest.
- If students follow these suggestions, Dr. Duenner said, there will be fewer stuffed heads and sore throats.
