TWO PLAYS LIVEN CAMPUS

"UNCLE HARRY" "A CHILD IS BORN"

ADULTS ACT FRIDAY, SATURDAY

The University Drama Group, composed of Newark townspeople and faculty members of the University, will present the play "Uncle Harry" Friday and Saturday evenings, December 8 and 9, at 8 o'clock. The play, in Mitchell Hall, is being presented for the benefit of the Playground Fund of the Lions Club and the Newark Red Cross.

Uncle Harry, a mild and placid man who is bullied by his sisters, jilted by his sweetheart, and patronizingly liked by his neighbors, thinks himself an admirable fellow;

but others mingle scorn with their approval of him for there is something timid and spineless about everything he does. In truth, the real indication of what his home town really thinks of Harry is that, despite his comparative youth, everyone speaks of him as
(UNCLE HARRY, p. 4)

STUDENTS PERFORM SUNDAY

Sunday, December 10, the dramatic Club of the University, a student organization directed by Mrs. Jane Hastings Sinclair, will present a short play entitled "A Child Is Born" in conjunction with the Music Department. The program, which is more in the nature of a pageant than a play alone, will begin at 6:00 p.m. in Mitchell Hall.

Glee Club To Sing

As part of the pageant Mr. A.J. Loudis will direct the Glee Club, which is composed of approximately sixty girls from

the Women's College.

Immediately after the Christmas Pageant there will be a tea in Brown Hall for the members of the cast and committees and their parents and friends. The tea is expected to start at about 8:30.

This play is the first production of the reorganized Dramatic Club.

ARE WE HEATHENS?

Something new has been added to campus life! It is something which has been needed for a long time and should have been started before this. It is a religious organization, temporarily named "The Christian Society".

This aspect of life has been lacking here at Delaware for many years. The much worn-out excuse of the accelerated program cannot be used, for this deficiency was present before the accelerated program went into effect. There is not an actual chapel on the campus, although Mitchell Hall has been used for this purpose several times. The college hours of the Women's College at one time were referred to as chapel in which the Lord's Prayer was repeated. But even this has been discontinued now.

It is the desire of the newly formed! (HEATHENS, page 4)

PHYSICS BUILDING PLANNED

COST TO NEAR \$500,000

EXAMS ARE COMING

The practice suggested in the following poem is not advocated by the REVIEW! The poem may, however, tickle somebody's funny bone, in view of the fact that finals are at hand.

IRE

There are to me
two kinds of guys,
And only two
that I despise.
The first I'd really
like to slam,
The guy who copies
my exam.
The other is the
dirty skunk
Who covers his and
lets me flunk.

REPRESENTATIVES AT DOVER

Miss Harriet Bailey, fine arts instructor, was the principal speaker at a meeting held in the Elizabeth Murphey School at Dover on November 28. Those attending the meeting were senior girls from Caesar Rodney and Dover High Schools and students from Wesleyan Junior College. Miss Bailey spoke on the subject "What College Means to Girls." A tea was served under the auspices of the American Association of University Women.

Barbara Shaw and Betty Center accompanied her to represent the Schools of Arts and Science and Home Economics, respectively.

At the end of the war the present antiquated physics building will be replaced by a modern structure which will take its place among the more important buildings on the campus. Although the plans are by no means complete, a building costing about \$500,000 will probably be erected next to Mitchell Hall.

The architect's plans call for a two-story building in colonial style which will include classrooms, laboratories, and storerooms. Perhaps the most important feature will be a large lecture room, two stories high, which will be similar to that of the Chemistry Building. Its main entrance will be on the ground floor, but auxiliary doors will also open to the inclined floor of the room from the second story. In the front of the room it is planned to have a large lecture table, behind which will be a storeroom for frequently used apparatus.

Around the perimeter of the lecture room, the first floor will contain classrooms and offices. On the second floor two large laboratories, a storeroom, and several small classrooms will be designed. The basement will include research laboratories and general storerooms.

This new building is among the first of a large number of improvements which are being planned as a part of the post-war development of the University.

NEWS OF OUR ALUMNI

Lt. Carl H. Allen, class of '43, is now in the Netherlands East Indies.

Radio Technician Sterling Ayerst Dunbar, class of '44, is stationed at the Naval Research Laboratory in Washington, D. C.

Roland Reed and A. Hastings Carey, both of the class of '44, were commissioned second lieutenants in November.

Weston Beale, class of '45, is in the ASTU at Oregon State College.

Ens. Jack Dougherty, class of '44, is in an Intelligence School in New York City.

Jacques Weinstock, class of '46, was commissioned a second lieutenant. He is a navigator and is stationed at Lincoln, Nebraska.

HEATHENS (from page 2)

Christian Society to resume an interest in religion and to stimulate interest in it. This group is not attempting to impose religion on the students — that is not the attitude or feeling to be created. Religion is of little value when it is forced on the people. Therefore, this is a voluntary, not compulsory, organization; and it is, of course, inter-denominational. Meetings are to be held twice a month, and the members will have the opportunity to express their opinions and ideas on religion and its merits. There will be singing of hymns, and probably some scripture readings and some speakers.

The society is now in the formulative stage and needs the assistance and co-operation of both the Men's and Women's Colleges. And they should definitely be able to get it.

Cpl. Albert duBell, class of '46, graduated as a tail gunner last month.

Ens. Burt Willard, class of '45, was recently sent out into the Pacific in a LSM.

PLAY (from page 1)

"Uncle."

However, there is the quality of the turning worm in him, and a murderous spirit is concealed by his friendly mask. So, when his unpleasant sisters, Lettie and Hester, push him too far, Harry arranges an ingenious vengeance; and his crimes are so skillfully managed that no breath of suspicion is raised against him. That, in fact, is the only trouble. For when Uncle Harry wants to confess, no one will believe him.

Elizabeth Kase is directing the play; and L. Parker Thomas is designing the sets.

The cast includes: Uncle Harry by G. Taggart Evans; Miss Phipps by Jean Hungerford; Mr. Jenker by Charles Lanier, assistant professor of Economics and Business Administration of the University; Lettie by Leah Ottey, an alumna and former E-52 member; Hester by Elsie Hungerford; Lucy by Virginia Schoenborn, wife of Dr. Schoenborn, assistant professor of Chemical Engineering; Nona by Mrs. Curtis Potts, an alumna and former E-52 player; George Waddy by Joseph Shields, formerly one of the athletic directors; D'Arcy by Leon Ryan; Albert by Robert Rohn; Blake by William Murray, director of Athletics and Physical Education; Ben by E. C. Mahanna; the Governor by George Boli; Mr. Berton by Jack Lacher; and the matron by Mary Meddill, an alumna.

THE GHOST OF BROWN HALL

Last week we promised you a solution to the various mysterious happenings in Brown Hall. Well, we're not sure whether a solution was found, but here is what happened:

Since Clark has left the dorm, Bill Hitchens decided to put "Peeping Park" Huntington and his "Jane" on the job. Setting up station in the lounge, Park and Jane prepared for their second night of waiting. Suddenly a noise attracted their attention. A dark figure slinked into the dorm and headed for the stairs.

Park said, "It looks like an animal! Is it the Mole or the Chipmunk?"

Jane began to shiver; Park began to shake. Finally, gathering together his first ounce of courage, Park began to follow (having no chaperone, he left Jane behind) this creeping figure. They began to ascend the winding stairs of Brown Hall.

They reached the fourth floor when P.P. recognized this creature. It was the Mole. Condemned to spend the rest of his life outside of B.H., he was now gaining his revenge.

Entering an empty room, the Mole began to bore a hole through the floor into Harris' room. Then he opened his little black bag and removed a cylinder with a hose attached. He placed the hose into the hole and opened the valve on it. Then Park saw the label on the cylinder. It read N_2O . He ran down the stairs to get a pre-dentistry student to tell him what N_2O is. Finding none around, he decided to tackle the Mole by himself.

BLUEBIRD OF HAPPINESS

As everybody says, the purpose of college is to give us an understanding of, or at least a speaking acquaintance with, a variety of subjects.

And it is just one of those unwritten laws that all we learn is not from books and professors. But despite the inadequacies of the curriculum, the majority of the University of Delaware students now consider their education a more rounded one due to the "Bluebird of Happiness." It is a known fact that before this year many students were unaware of the existence of the "Bluebird." To some he is an old friend; to others the discovery of this lovely aria was a unique experience. But no matter what the status of his friends, they are agreed that he offers to the world a philosophy equalled, in its benefits to mankind, only by that of Pollyana.

There must be many episodes connected with the profound impressions made by the "Bluebird", but in case you have not heard it, do let me add one more to your collection:

In the very early morning a group of weary girls clustered around the radio and were duly thrilled by Jan Peerce's rendition of TBOH. Later that morning, about 7:20 to be precise, our heroines were still bubbling with the "Bluebird's" message. Indeed, so deeply had the message seeped, that every conversation

(BLUEBIRD, page6)

Expanding his muscles he started up the stairs. With his last breath dying, he reached the fourth floor. Dashing into the room he - - (Continued next week)

LEMMON GIVES REPORT ON AERIAL ENGINE RESEARCH

The first public report on war research work on aircraft engine problems being conducted at the University of Delaware was made this week at the annual meeting of the American Society of Mechanical Engineers at New York by A. W. Lemmon, Jr., research fellow in Chemical Engineering. This paper was presented under the auspices of the Heat Transfer Division of the Society at a Symposium on Extended Surface Heat Exchangers.

The paper, entitled "Heat Transfer from Baffled Finned Cylinders," was prepared by Lemmon, Dr. A. P. Colburn, and H. B. Nottage of Pratt and Whitney Aircraft Corporation.

Shows Moving Pictures

Lemmon presented, in addition to the usual slides, a colored moving picture, showing the research apparatus, some unusual pictures of flow patterns around finned aircraft cylinders, and a pert, dark-haired young lady dressed especially for the occasion in a red sweater. The University has been employing photographic techniques to a good advantage in research work.

Dr. D. U. Greenwald, assistant professor of Mechanical Engineering and J. L. Cost, research fellow in Chemical Engineering, who also worked on the project, attended the meeting.

Lemmon, better known to the University family as Alex, graduated from Ohio State University in March, 1943. He came here immediately afterwards and has worked on Pratt and Whitney research. Four others working

(LEMMON, page 8)

SPORTS SIDELIGHTS

by Jean Dukek

An interesting hockey game took place last Tuesday on a muddy field which caused frequent spills. It was between the faculty and the varsity of Newark High School. However, several of the girls from the Women's College aided the faculty. Those adding their power to the teachers were Grace Snyder, Annabelle Prettyman, Doris Wilson, Peg Bosworth, and Marge Romley. Kay Carrick did both refereeing and playing. Laura Jane Cooper Mitchell, a graduate of W.C.D., also participated in the game.

The teams were evenly matched as far as speed and accuracy were concerned, the final score being 1-1. However, since the faculty lacked experience as a team, they lacked co-ordination and were forced to play a defensive game. This match ended the hockey season on the lower campus.

On Thursday evenings the weekly plunge hour is held from 8:15 to 9:15. C'mon, gals, don't be afraid to get your hair wet. Remember the "perfect 35"!

SOCCER LETTERS AWARDED; McKENRY NAMED CAPTAIN

Coaches Max Kurman and Ray Duncan have announced the names of the members of the soccer team who have won their varsity letters this fall. They are: Newell Duncan, Gordon Brewer, Ed Harris, Harry McKenry, Vic Talmo, Tom Riggan, Will Hitchens, Dick Ewing, Stan Lemon, Henry Jacobs, Jack Henry, and Horace Prall.

Henry McKenry was elected team captain.

HEN SCRATCHES by Red

The announcement by Coach Murray last Friday that Delaware would be represented on the court this year was greeted with cheers from all concerned. We think that the Hens have a good chance to cop the conference crown, if the club can develop the fighting spirit which was lacking on the soccer squad.

From this angle, it looks as if the starting squad will consist of Newell Duncan, Ray "Scotty" Duncan, Dick Ewing, Silent Bill Monaghan, and probably Alby Price. Reserves, such as, Rog Colleyhan, Vic Talmo, and Tommy Riggin should provide enough support to make a winning club.

With the Duncans and Alby Price as known quantities, we point to Ewing, Monaghan, and Colleyhan as the boys to watch.

The only team on the schedule which didn't meet the Hens last season is the University of Maryland, whom the Blue and Gold meet at College Park on January 20.

The University is going to play host to basketball coaches from schools all over the state this Saturday, holding a basketball clinic in the field house. Josh Cody and Harry Litwack, coaches (HEN SCRATCHES Page 8)

INTERCOLLEGIATE SPORTS FOR GIRLS?

by Jane Platt

The bogey word, "segregation", has meant that Delaware's world of sports, especially the women's world, must take it on the chin. In the future, however, a gleam of hope grows by the day, and this question looms large: Will there be intercollegiate sports for women next fall when we again move at a normal pace?

Anyone who has followed the W.A.A. hockey this fall will agree that terrific potential power is waiting for the chance to compete with other schools. A full team schedule would mean more organized practice, which is the only thing needed to make an unbeatable team built around Jeanne Nolde at center forward, Anne Stonemetz and Annabelle Prettyman in the backfield, Scotty Robertson on the forward line, and speedy Magoo at the wing position. These are all old hands at the game. Add the growing talent of the freshmen, like Beverly Diedreck, who can really carry the ball into enemy territory, and Kay Blades, the ever-dependable back, and we've got a team that can't miss.

Not to be outdone by hockey, basketball is next and drink to our court stars. Not many girls have had the opportunity to show their prowess, but of the few

(GIRLS' SPORTS, page 8)

BASKETBALL SCHEDULE SET; FIRST GAME JANUARY 13

On approval by the Athletic Council of the University, Coach William D. Murray has announced officially that Delaware will be represented on the basketball floor this year. A schedule of thirteen games was also approved by the council, mainly consisting of Mason-Dixon Conference contests.

Opening with Galludet University on the home court, the schedule includes:

Jan. 13	Galludet, home
Jan. 17	West Chester, away
Jan. 20	Maryland, away
Jan. 24	West Chester, home
Jan. 27	Washington, home
Jan. 31	Haverford, away
Feb. 3	Washington, away
Feb. 7	Loyola, home
Feb. 10	Loyola, away
Feb. 14	Johns Hopkins, home
Feb. 17	Johns Hopkins, away
Feb. 22	Galludet, away
Feb. 28	Haverford, home

Meeting with the Athletic Council, in addition to Coach Murray, were: Dr. W. O. Sypherd, president of the University; Dr. J. Fenton Daugherty, president of the council, and John J. De Luca, alumni representative.

LEMMON (From page 6)
in his research group are Shirley Tritten, Barbara Procter, P. R. Roberts, Jr., and A. E. Fogelberg, Jr. Alex attended the American Society of Mechanical Engineers a year ago and showed movies taken earlier.

Dr. Colburn has been appointed a member of the executive Committee of the Heat Transfer Division for a four-year term. This was announced at the meeting of the commission.

HEN SCRATCHES (from page 7)

the Temple court squads, will be the guest speakers, along with Joe Brewer of Wilmington High School. The program calls for the complete "taking apart" of basketball by these experts and giving of coaching hints and rule interpretations by well-known officials.

The momentous "Hot Rock"- "Flounder" football game which was scheduled for last Monday was necessarily cancelled by the slight precipitation which occurred on that day. However, a basketball game has been scheduled between the two rivals and the "Hot Rocks" have already been practicing. However, with five varsity men, the "Flounders" will be heavy favorites.

GIRLS' SPORTS (from page 7)
who have been practicing, "Catty Ann" Ewing, a beautiful shot and fast as a whip, Polly Burford, another demon on the ball and little "Peanut" Wright, who can run circles around most people, will make a stalwart foundation for a team that could put Delaware in the lights.

Our third source for athletic power and game would be a swimming team. The inter-class swimming meet last term should be ample evidence that we have our Eleanor Holmes Jarretts, too.

This idea of girls' inter-collegiate sports has been broached before, to meet with both disapproval and passive agreement. Now that the time-worn excuse of an accelerated program is out of the picture, let's show the sports enthusiasts what they've been missing and revive that famous Delaware school spirit.

FARMERS' WEEK BEGINS JANUARY 8

Courses To Be Given
For One Week By The
School of Agriculture

Farmers' Week, the University of Delaware's blitzkrieg short course in agriculture which begins January 8, will cover the most outstanding agricultural enterprises of the state, according to G.L. Schuster, dean of the School of Agriculture.

Under this new arrangement, all information concerning a particular agricultural interest will be given on the same day, rather than be carried over for an hour or two a day throughout the week as originally planned. The departmental heads, who are setting up the program, feel that this system will offer the farmers and other persons who cannot leave their work for the entire week an opportunity to attend the sessions of particular interest to them.

Better Methods

Improved methods of agricultural production, outlook on materials and equipment which will be available, adapted seed varieties, disease and insect control, and other important factors involved in efficient agricultural production will be presented through lectures, exhibits, demonstrations, and discussions.

Anyone interested in improving his knowledge of agriculture is invited to attend.

HORRORSCOPE

by Jack Henry

Claims have been stoked out for the ground surrounding the campus lamp posts, and local stores report that they are completely sold out of mid-night oil, which only means that the students are "happily" preparing for finals. Ugh!

The Christmas Dance was really well attended. In fact the line of couples waiting to go through the receiving line was so long it looked like the four o'clock shift at Dravo's.

Mitchell Hall is going to put the bright lights of Broadway to shame this weekend. Friday and Saturday nights the University Drama Group is presenting "Uncle Harry" and Sunday night the annual Christmas pageant will be held.

Pity the poor fellows registered in the Arts and Science School and taking Engineering School subjects. Under that system they start with the engineers and end with the Arts and Science and save Santa the trouble of giving them Christmas presents, since a vacation is denied to those lucky boys.

Dr. Kitry's psychology class took a trip to Farnhurst yesterday. We trust that all the members have returned safely.

Will Hitchens has his petition filed for the parking concessions around Robinson after dances. Not a bad idea, but Bill would have lost more money Saturday night than he would have gained.

NEWS OF OUR ALUMNAE

The Class of 1944 has already taken its place in the teaching world. In Wilmington, Dorothy Evans is teaching at No. 19, Anne Richards at Conrad, Betty Rose Bock and Ellen Van-Dyke are at the Bayard Junior High School.

Through the state are found Doris Regas teaching at Rehoboth, Agnes Long at Selbyville, Alma Bunting at Seaford, Ruth Webb at Smyrna, Marguerite Engberg at Georgetown, Jennie Cohen at Oak Grove, and Rosalie Selby and Elizabeth Zabenko at the Caesar Rodney High School in Wyoming, Delaware. Leah Ottey is teaching in Elkton, Maryland, while Dorothy Trimble is an art instructor at Middletown, Connecticut.

Teachers Before Graduation

Three girls who were already teaching received their degrees in August: Sue Anderson of Number 13 School in Wilmington, Emilie Carpenter of the Marshallton School, and Blanche Harman Smith of the Clayton School. Two members of the class who have not received their degrees are also teaching to help relieve the present shortage. They are Pauline Coudright at Caesar Rodney and Kathryn Holston in Newark.

Elizabeth Abrams has a position as a recreational teacher at the Child Care Center in Philadelphia.

BACK THE 6th WAR BOND DRIVE

GRADUATION OF ASTRP

The graduation exercises for the first group of ASTRP men to finish the full three term army educational program at the University of Delaware was held in Mitchell Hall, Friday, December 1, 1944 at five o'clock.

Mr. Lester Bucher, organizer, opened the ceremony with an impromptu medley of patriotic tunes. Immediately at 1715 the thirty-five men in the graduating class filed in and sat in the first three rows of the auditorium. The rest of the ASTRP unit and a few faculty members filled the remaining seats. At 1718 Colonel Donald M. Ashbridge, Colonel John E. Grier, Dr. W. O. Sypherd, Dean T. A. Baker, and the Rev. Andrew W. Mayer took seats on the stage. At 1722 Dr. Sypherd introduced the speaker, Colonel Grier, of the Second Service Command, who gave a brief speech outlining the possible future of the graduates. He also stated that they would receive no favors because of their ASTRP training and ended by wishing them "the best of luck." The certificates were given out at 1725 by Dr. Sypherd, and the benediction by the Rev. Mayer completed the ceremony. Total time: 17 minutes.

BLUEBIRD (from page 5)
was colored with it. In that state of half-consciousness which prevails at 7:20 a.m., one of our compatriots slopped coffee on her skirt. Ever-ready with consolation and advice, her roommate quoted with proper intonation, "Just remember this, life is no abyss...." Immediately, and with extreme bitterness, the coffee-spotted girl replied, "Well, it's a darned good trap!"
