SENIOR CLASS HISTORY

We Are the Berries

A MARINE on duty at the main gate of the Norfolk Navy Yard was confronted by the wife and daughter of Colonel Berry. When he asked the ladies for passes, they explained that they had gone for a ride earlier in the afternoon, were late because of a flat tire, but had no passes as they had intended to be in before sundown.

Said the marine, "I am very sorry, but my orders are to let *no one* in after sundown without a pass."

"But I have explained why we have no passes," answered Mrs. Berry.

"Madam, I understand the situation; but orders are orders."

"Sir! Do you realize to whom you are speaking?" blustered the irate Mrs. Berry. "*We are the Berrys!*"

"Madam, you may be the cat's whiskers; but you cannot get in this gate after sundown without a pass!"

Well, we are the berries! In the first place, we are Seniors, having been the mainstay and prop of this institution for highminded women for the past three years ("going on" four). In the second place, we are the most remarkable persons who have ever graced this campus with their presence! Why, before we had been here six months, we had carried off the coveted first place in the competitive class plays, and so thoroughly vanquished the Sophomores in physical combat that orders came from the powers that be that peace was declared! In fact, it is to be feared that the prevailing peace of the campus has been seriously disturbed from time to time by this wild class. However, as Freshmen, we played the game like gentlewomen, and thereby got a great deal more fun from being Freshmen than the classes which have followed us. What is the younger generation coming to, anyway?

Our Sophomore year was an extremely busy one. We started two movements which we hope will always be a part of college life here. It has been highly gratifying to us to see them taking root at last. The first one was the presentation of some worthwhile musical event to the student bodies of both colleges—and such other individuals as cared to attend. There was a need for this, and we trust that that need will always be met in the spirit in which it was met by our illustrious class. The second custom we hope to have started was the Big Sister luncheon. Since our Big Sisters were the then-important Seniors, we felt called upon to do something different. As teas were worn out, and as a theatre party was out of the question financially, we took them all to the Blue Hen to luncheon. It was an extra-special occasion! And all this while, we were keeping our part in the college game, with interclass activities going full speed.

The third year centered around the introducing of our sister class to college and the important business of running the Junior Prom. The first problem was met with typical '28 spirit; and we trust that when time has hung a few illusions over our faults, our little sisters will remember us with pleasure. And the Prom! For the first time in the annals of Women's College, the Prom was held off campus, on Friday night, and lasted until one o'clock! (Not because we have a pull, but because there was no place on campus big enough; but do not tell that!) We feel that that was a milestone. It marked the place where we had become women and put away childish things.

Now we are Seniors. We would like to feel that we own and run this place—but this younger generation! The Freshmen own it—the heirs of the

ages. And as far as we are concerned, they may run it. We are too busy being Seniors to have anything to do with the complicated business of running a college for women. It is a great responsibility, being Seniors—upholding the dignity of the college, representing it at all times, using unlimited overnights and late permissions judiciously enough to escape censure and yet exercising our

privileges enough to know that we have them, and incidentally, upholding our academic standard. And all of this we have done. We contributed ten shining stars to the Phi Kappa Phi firmament; and no doubt the whole teaching profession will be revolutionized by the influx of Delaware graduates next year. The world before us lies—and how! We insist, *we* are the berries!

CHRISSEY, one of the Home Ec Seniors, is a very busy person. Sometimes, we see her hurrying to class with a very business-like, efficient air about her. Again, we see her joyfully setting forth upon some expedition which promises to be entertaining. Of course, her otherwise busy days are further complicated by many and important cabinet meetings. Although most of us have never been to one of her cabinet meetings, we feel certain that at them is evident the same sweet personality which was responsible for her election to the presidency of the college Y. W. C. A.

TRULY it is astonishing that "Hats" can seem so much like a small and carelessly playful child and yet be so poised a young woman. While one could not say that she was a bookworm, her wealth of knowledge is frequently revealed in her bubbling, entertaining conversation. Not only does she occasionally provide the music to which we dance gaily around the Hilarium, but she has won the reputation of being truly art-loving and art-creative. Perhaps she has had outside encouragement; perhaps it is a natural characteristic. We can only say that the result is very charming in every way.

TO FIND words to describe Benson's varying moods and abilities! Like a certain member of the English department, we "bow to her intelligence"; but we also bow to her bursts of temperamental emotion—be they childish, despondent, or ragingly angry. She is a combination of cold intellect and sensitive feeling. Furthermore, she has the gift of words, as the delightful poetry which she writes and the occasional sarcasm which she speaks testify equally. It is a priceless pleasure to have known Benson, for she makes life seem doubly interesting.

MELANCHOLY takes wings when Edith starts telling us some of the incidents of classroom life, and especially of Chemistry Lab, which absorbs about three-fourths of her time, it seems. She has a well-developed sense of humor, which makes her a jolly person to know. Although she is much interested in the study of mathematics, she has not allowed her thirst for knowledge to interfere with her all-round development. She is one of the most likeable girls on campus; and those who can claim to be her friends, have a friend of whom they may well be proud.

JEAN is a clever child who never seems to crack a book; yet she always drags in the good marks. Her life seems to be a happy and peaceful one, and her outlook on things in general even more cheerful than that of most of us. We do wish, however, that we had been able to persuade Jean to join our ranks even for a semester so that all of us might have had an opportunity to know her more intimately. But we do know that she has several main interests in life, English, bridge, and "Pat" being some of them.

DOT has always been an asset to our class for many reasons: she has good looks, a good mind, and a good heart. "A face fair to look upon" and a personality as charming describes her. She is a democratic sort of person, who antagonizes no one. She always shows fairness in her judgment and has a good class spirit. Furthermore, Dot has a delicious sense of humor. Even a cheerful hello from her always gives one a warm feeling in the region of one's heart.

OUR earliest recollection of Nettie is in a classroom. Amid a bevy of clamorous, incorrect answers, she immediately quieted everyone by coming forth with the true solution of the problem. Nettie belongs to a group which likes Delaware and her classmates but which likes Wilmington just a little more. She won't stay down with us. She's ever smiling. The only suspicious thing about Nettie is a pin of cross bones and a skull, which we are sure doesn't mean death. It seems to have some relation to the University of Pennsylvania, or is it Harvard? We can't be sure that Nettie will ever teach school.

WE cannot comprehend how Peg can be so charmingly gay and irresponsible and yet always come out on top. Her "luck of the Irish" is absolutely uncanny. She is distressed because people stress her giggle as her chief characteristic; but under the circumstances, one can hardly do otherwise. We might add that beneath the giggle, however, is the most sympathetic understanding and generous impulse one could wish to find. Her work in athletics has always been tip-top and her popularity in social life immeasurable.

I VA is one of our three new classmates of last year. She brought with her a fund of humor and sympathy and the art of genuine ability in playing the piano. We are tempted to be so unoriginal as to say "her voice is low and gentle", for it really is. Her occasional bits of narration, with their funny little climaxes, always interest us. Her aforementioned sympathy is real, comforting, and understanding; and one can always depend on her to distribute it generously. One of her greatest interests, aside from music, is the study of French.

D OT CAULK is interested in whatever the new day brings forth. Not only is she interested in it but, what is more, she has an opinion on it. She is very business-like in her manner, but very, very kind-hearted. Dramatics interest her, especially the directing of a play. Imagine having ability enough to direct a play! Dot's room is always full of the most beautiful flowers. Where they come from, we can't disclose, although the traditional little birdie has whispered the secret to us.

S ALLY is a well-liked member of our class. Even the Freshmen were not long in discovering that she is an interesting companion. She and Betty are seen everywhere together, for the two have been inseparable friends throughout their college days. Sally is a lover of sports; yet we hardly think that athletics has the appeal for her that dancing has. She is ultra-modern in her beliefs; and we feel that she is going to find life extremely interesting.

MAE has "looks" and two dancing feet, combined with a mathematical mind. And to think that it took us two years to learn about the mathematical interests! What dreadful secrets two dancing feet may hide! Mae must be easy to live with inasmuch as two girls wanted to room with her this year, thus causing her to choose the big triple room on the second floor of Residence. We fear, however, that the library and Rhodes cause her to spend much of her time away from her roommates.

THINK of one who is an earnest student, a good sport, and a staunch friend, and you will have a fair idea of Judy. To her the Biology Lab is the most fascinating place on campus, for she has a perfect mania for dissecting worms and frogs. She enjoys athletics immensely, too. This year she has concentrated on rifle and was having a wonderful time until the night the Major exasperated her by addressing her in French. Judy insists absolutely that English should be spoken at all times and in all places—because it is such a beautiful language. She is a practical sort of person, and her calm outlook on life is rarely shaken.

IN the middle of our Senior year, there came into our midst a quiet, reserved, almost Sphinx-like individual—Mary Todd Garrett. Everyone listens when Mary once speaks, for we have come to realize that she usually remains silent until she has something of real importance to say. ALL of us know how happily Fran goes through life. She is a friend to all, and a mighty splendid one. Fran hides her good qualities way down under more than one bushel. She is an excellent hockey player; but would she ever admit it? She is a good student; but to hear her talk, wouldn't you think that she were flunking out? She is a generous and extremely lovable person, and no one could ask for a more loyal class member. DOTTY came back from her year in France with the Foreign Study Group with a slight veneer of sophistication and yet a more sociable air, thus enabling people to know her a little better than they had known her heretofore. To eternity, however, she will possess the incomprehensible and aloof streak of one who theorizes and philosophizes alone on the why's and wherefore's of human thought and activity. Although she has a pitiful aversion for sciences and mathematics, her love for highly edifying literature, masterly classic music, and futuristic art combine to convince us of the fact that she has scholarly ability. She even has the absent-mindedness of genius. But as long as she entertains us with gay, frivolous, yet spicily witty chatter, we can only be glad for what she cares to show us and admire and respect the more subtle strains of the finely sensitive mind we so often glimpse.

TIBBY is a distinct addition to our illustrious class. Perhaps all of us have not yet fully realized how thankful we should be that she decided to join us last fall. Tibby is cosmopolitan, widely read, widely travelled, and able to converse brilliantly upon any number of subjects. Her French is so excellent that she has been known to conduct a French class in the teacher's absence; and her natural wit and command of the language have made her the very life of the French table. She surely is a marvel.

HERE we have a quiet, dignified, good-natured Wilmingtonian who is much interested in campus activities—athletics, perhaps, forming her chief source of interest. This year, she has indeed proved a most capable president of the athletic council. In Martha, we have the college's most renowned dog fancier, her pack at present consisting of about thirty animals of every size, breed, and degree of ferocity! The Seniors have always felt just a bit more confident in playing a game when her bull dog was looking on from the side lines. Martha, however, never neglects her studies for any of the above-mentioned interests. She is a successful student and a splendid friend.

THE one phase of college life with which one always associates Bonnie is athletics. Not being satisfied with winning her big D in her Freshman year, she kept on piling up athletic credits until by her Junior year, she had the required number for a blazer—a prize which had to be designed especially for her, as no one had ever been entitled to one before. Although we know that Bonnie is much interested in Latin and History, we are glad that her especial interest in these subjects has not prevented her from upholding '28's reputation in athletics throughout our college career.

SARA is one of the most dependable girls in our class. She is not one who startles her associates with any spectacular activities, but she works steadily and always accomplishes her task. The dry wit which she occasionally reveals to her friends sends them into uncontrollable fits of laughter. She has a keen, logical mind, which has earned for her the best marks in difficult subjects. Furthermore, Sara is direct in her methods and gets to the root of matters without delay. She is an ardent lover of books and a most interesting companion.

WHEN Debbie came from Bucknell last year, the brunettes sighed in envious admiration. Debbie is like a bright summer day—her hair is golden sunshine and her eyes are clear sky blue. To complete the effect—if our poetic efforts are to be tolerated—she lilts and gurgles when she talks and laughs like the chattiest bit of a brook that ever tumbled over its rocky bed. We've seen her desperately solemn only once. That was after a week-end visit to gay Bucknell, when she had lost so much sleep that her eyelids and the corners of her mouth simply refused to assume their accustomed appearance.

JANE—the happy-go-lucky, the jolly good-natured! Altogether, she is one of the most interesting girls around campus. Last year, she had the honor of being the first president of the now-flourishing Home Economics Club; and as head of the Social Committee this year, she has once again demonstrated her ability as a successful manager. Jane is a most attractive individual even when she is in the act of making one of her amusing monkey-faces. When we encounter difficulties, she is thoughtfulness and kindness incarnate. In fact, we delight thoroughly in Jane and in her happy outlook on life.

JUST as iron filings spring to a magnet, so A's seem to flock to Maud—and rightly. The papers which she hands in are deep—so deep, in fact, that they frequently put everyone else's in the shade. She is a good student then? Well, rather! But that is not all one can say of Maud. She is a mighty fine friend. The very essence of obligation, she would do anything for anyone. She is never ruffled, never angry, never excited; in other words, Maud is steadiness itself.

JUNIOR CLASS HISTORY

YES, it was inevitable! As measly Freshmen we would simply *have* to grovel at the feet of the illustrious Sophomores. Resigned to this bitter stroke of destiny, we Twenty-niners edged our way into the precincts of the college walls. With the greatest pretense of humility, we underwent the proverbial horror of Stunt Night, ruined our complexions and permanent waves, branded ourselves with bows unforgivably green, and appeared to be obedient servitors of '28. A storm was brewing, however! Though we did not entirely throw off the yoke, we at least made life miserable for the Sophomores by our guerilla warfare.

But our babyhood as a class was more than harmless sniping. Many of us put up a hard fight on the hockey field; and though we lost the championship (the field was too muddy, or maybe our strokes were), we came out victorious in the annual indoor meet. Socially, we were not to be looked down upon, either. The early spring saw us reveling in plans for our Freshman dance, a riot of color and music. Another crowning achievement was our staging of the winning class play. It was with pride, therefore, that we crept stealthily out into the woods at the end of that jolly year to hold a gypsy frolic all to ourselves. After songs, cheers, and fond reminiscences, we rallied around "our Ann," newly-elected president for the coming year; then we trotted back on campus, full of the '29 spirit with which we were to rush headlong upon the hordes of incoming Freshmen.

During the next stormy period, the golden rule was a mere myth to us. True to the name and fame of the Sophomores, we had class-meetings at every conceivable hour, even after midnight; and our "Rep Board" did not fail to terrify the Freshies with "call-up's" and "call down's." When we had

trampled mercilessly upon the poor dears, we decided to heal their bruises by giving them a garden party. Though the weather goblins conspired against us, we packed the good old Hilarium full of people and fun. Besides feeding brass tacks to the Freshmen that year,

we bent our efforts toward attaining the hockey championship which we so coveted. As a result, our colors waved gloriously on the field as well as at the indoor meet. The song contest gave '29 another chance to advertise itself, for our song went nobly over the top. As June approached, we Sophomores experienced much of the thrill as well as the sorrow of graduation. We prided ourselves on the innovation we introduced at the Class Night celebration; our glowing lanterns of red and green seemed more effective than the time-worn daisy chain of previous years. After that impressive ceremony, and our own ranks were to be sadly depleted. Only a small band of us clung together to relish the joys of Juniordom.

Having emerged happily and with no broken bones from the physical strain of our Sophomore year, we Juniors have settled down in our old age. We have even reached such a stage of maturity that we can see in our little sisters, the Freshmen, only docility and not the devilment which we had regarded as synonymous with "Freshmen." Though our ranks have been too thin to warrant our striving for many athletic honors, we have not had to forego any of the pleasures of social life. In this connection, one thrilling night of light, color, and soft music will remain treasured in the archives of '29—our Prom. Our Junior year is at its height; and undaunted by the vast task of engineering a Year Book campaign, we propose to romp through to the close with brilliant success in the many duties which will challenge us as a class.

MANY might wonder why Louise did not take the Home Economics course since she is such a striking example of the type which the "stronger" sex is said to prefer. Nevertheless, she does exceedingly well in the course which she has chosen. Since she insists that she is going to teach history, we hope that there will be an opening in the Wilmington schools so that she will not be worn out by constant week-end commuting. We feel confident, however, that Louise will prove just as capable a worker in the future as she has during her college days.

HEDWIG is not one of those who seek the limelight; but she works quietly, efficiently, and well—how well, only her close friends know. Occasionally, however, the rest of the college has an opportunity to observe her ability. Each fall as the hockey season opens, we look for her on the hockey field, for she is a fixture as goal keeper on her class team. Though small in stature, she appears to be a most formidable person to members of the opposing team as they attack her goal. Here on the hockey field, as in all of her activities, she is always at the right place at the right time. She is fair, square, and dependable.

Alice has a very happy disposition which is never seriously disturbed by the ups and downs of college life.

A FLUFFY, curly, blonde head and brown eyes—what a rare combination! Chappie appears—oh so different! Some people insist on calling her exotic and eccentric; but then, few girls know Chappie. Underneath, she is much like the rest of us. We see her talking rapidly and with animation—no matter how important or how trivial the subject. Again, we see her in the Hilarium dancing joyfully and carelessly. In class—music appreciation especially—Chappie appears to concentrate her whole self in her attention. She likes to surprise people by her philosophy, and we have an idea that she even surprises herself sometimes. But she is always interesting, and the more one sees of her the better one likes her.

DURING her first two years in college, Sarah made two very interesting discoveries; namely, that hair slicked back from one's ears may be very becoming, and that the right shade of rouge is an immense help in keeping "that school girl complexion." However, Sarah must have learned a lot of other things, too, else she would not be such an interesting conversationalist on a great variety of subjects. Indeed, Sarah is an excellent student, whose sense of humor is never failing. That she is a most devoted worker for any organization in which she is interested is evidenced by the fact that she has stocked her room with a goodly supply of Year Book candy and at all hours of the day or night, has given the residents of Sussex a most cordial invitation to "Come buy, come buy!"

Possibly though, she is too much interested in the study of her favorite subject, history, to be bothered with the unimportant matters which call forth an opinion from most of us. However, if one chances to get into a discussion with Pete on some phase of history, or perhaps art or modern fiction, one may expect to hear many worthwhile ideas on the subject.

What she cannot say in words, she says very adequately with her eyes. However, her word play is fast and to the point when she gives an unruly Freshman a bit of advice.

EVEN before Marion lived on campus, she endeared herself to her classmates by her jolly, care-free disposition. She smiles and laughs a great deal and is a splendid individual to have around. She can find something funny in even the darkest situation. She is an excellent student; yet care will never cause grey hairs to come among her dark ones. Her work is easy for her and she enjoys it. Bridge is one of her favorite diversions.

HELEN always manages somehow to get her work accomplished. She works hard and is a good student. She has a very determined disposition—says what she pleases and does just what she wants to do. The Y is especially proud and glad to have her for a member. In her lighter moments, which are many, Helen likes to giggle and to dance. She is an extremely good conversationalist, too. Indeed, Helen exhibits splendid ability in all of her college activities.

ALTHOUGH Edith came to college with a ready-made introduction as "The Last of the Nuns," she did not rely on the reputations of her well-known and well-liked sisters, but immediately impressed us all with her own charm and distinctive personality. Anyone who has been in class with Edith knows of her propensity for napping. So accomplished is she in this art that she is able to slumber peacefully, yet never miss a single item of importance—a fact to which her good grades bear witness. We are confident that she will be just as successful in the field of nursing as she has been in college, and we wish her happiness in her life work.

THIS year while Kitty has been abroad, we have missed her winsome smile and her cheerful personality. We are looking forward to her return next year, when once again we may depend upon her for an occasional unique poster or an hour of delightful music. So marked is her ability in art that whenever we see a drawing with the pure joy of living in it, we look to see if Kitty's signature is not scrawled at the bottom. In short, one is not likely to forget either Kitty's ability or her charming self.

ALTHOUGH Edith is at times a demure little Quaker maid with her musical "thee" and "thy," she always contributes her share toward a laughing good time—whether the occasion be a Y. W. conference, a card party, a tennis match, or a long hike through her own Pennsylvania hills. Edy has a sense of justice, a loyalty to her friends, a jolly good nature, a desire to help, and an optimistic outlook on life that make her much sought after and always welcome. As a friend and fellow student, she is to be treasured.

WE have never quite decided whether Mil is the Damon or the Pythias of that well known combination: "Mil and Carmen, Ltd." Mil is primarily a true friend; then, she is a brilliant student. How in the world she manages to know so much with so little effort is beyond our comprehension. Notwithstanding the fact that she is a veritable magnet for A's, Mil devotes a considerable portion of her time to campus activities; and she is practically always ready to play a game of bridge. Indeed, although she rushes around with always one more thing to do before night descends, she is never too busy to be a jolly, interesting companion and a sympathetic friend.

WHEN you see the tilt of Marian's head and the snap of her eyes, you know that she is a determined person. She does have her own ideas about things; and, although she is always willing to consider those of other people, she holds her own ideas uppermost. Marian and Dot are the best of friends. It is indeed rare to see one without the other. In fact, theirs seems to be a true and fast friendship. Besides the capacity to acquire friends, Marian has decided intellectual ability; and there is a certain skill and finish which characterizes all of her work.

ALICE is heard more frequently than she is seen; but everybody from Freshmen to professors likes to hear her seemingly endless fund of witty remarks. But for all of her seeming gaiety, Alice really worries a great deal—not over lessons, since ability and study take care of them—but over the fact that her blond hair simply will not grow as fast as she thinks it should (something like six inches in two months). With this one exception, however, her sense of humor is unfailing—even when the class for which she is rushing has begun before her train has whistled for Newark. In short, Alice is an amusing, frank, unselfish friend.

WITH a hockey stick and a hand of bridge, Reesie is equally at home. We sometimes accuse her of being a spoiled kid, but she is really more grown-up than we think. She is very energetic and a most efficient manager of college sports. Moreover, Reesie is surprisingly faithful to her work and is correspondingly successful with it. We suppose that she will become a teacher; yet judging from her fondness for arguing, we feel that she would make an excellent lawyer. At any rate, she is a jolly person to have around.

ANNA is an elusive, will-o'-the-wisp sort of person. You never know just where you will find her when you want her. This is due mainly to the fact that she is another member of that group whose motto is: "There's no place like home" when home means Wilmington. Although not especially studious, Anna surely can accumulate honor points. Her usual quietness is somewhat deceiving, for at any moment she is likely to burst forth with some very decided opinion about the subject under discussion; and all the King's horses and all the King's men couldn't drag Anna away from her pet convictions.

THIS year, we were very glad to welcome Marjorie Ryther into our class. Though quiet and unobtrusive in her manner, she succeeds in making friends wherever she goes. In spite of her quietness, we know that she has interesting ideas on many subjects; and we wish that we might have an opportunity to hear her express them more frequently. From our observation of her in the classroom, we can well imagine that she is a very efficient and successful home maker.

"OH, horrors! There's the bell, and I haven't even finished my work." In reality, Theresa almost always has everything done neatly and meticulously; but she rushes around as though she had not a second to spare. She is a sweet, gentle individual and, for all of her worrying, a charming person to know. Sometimes, we see her in a highly serious mood when she is studying for some exam; at other times, we find her in a mood of enthusiastic gaiety when she is preparing for a dance or some other social function. Altogether, Theresa is an excellent pal.

"DID Myrtle see the Point?" "Quite!" is a pretty safe reply, literally and figuratively. Myrtle combines the charm of the truly feminine with a well-developed initiative. In her, we find sweetness but not saccharinity, for there lies below the surface a delightful temper, which can be easily aroused—and just as easily subdued. Myrtle has proved to us her dramatic ability in the various plays in which she has taken part. When she assumes the baby brogue and a coaxing air, what mere male could remain invincible? We haven't found him; but for all this, *frankly* speaking, just why did Myrtle take the "Bride's Course?"

GIN is an outstanding example of the all-round, lovable college girl. When she appears, everyone prepares to follow her lead in having a good time. And one has to hustle, too, if one intends to keep up with Ginger when it comes to doing good academic work. One cannot help liking Gin; and we are always glad to have her represent Delaware at conferences, for we are sure that she will be a credit to the college.

ALTHOUGH many of us know Alice only as the dainty, demure little miss that we see about campus, her Home Ec classmates have long been aware of another Alice—a girl whose wit often sends whatever class she happens to be in into gales of laughter. Indeed, Dr. Palmer threatened to write home to Alice's mother because she disturbed the class with her witty remarks; but one may be sure he didn't. We are certainly glad that Alice has been one of us, for she has enlivened many an hour.

"TWINKLE, twinkle, little star," does seem to be an appropriate line to apply to Twink Starling, for she is surely the daintiest, most vivacious little person on campus. THE sound of rushing feet, the bang of a door! Is someone trying to make a train? No, Carmen is merely returning from class. She is that august personage before whom the Freshmen stood in awe last year and that dreaded opponent in hockey. Her terrific whack at the hockey ball at just the right moment has made her an invaluable member of her class team. She excels not only in sports but in classwork as well. After this description, one would probably expect to see a rather unusual personage; and one's expectations are fulfilled by her boyish, curly head and Byronic expression.

DO we like Ruth? Rather. She is our one calm, dignified lady who leads a competent, unruffled life. Now, a secret—sub rosa—if you please: she receives telegrams all hours of the day and night from a little corner of New York.

Ruth brings her Ford to college that it may acquire much knowledge,

And so very much sagacity as to stretch its max. capacity,

To hold Dot, and Kitty, and Lib, and Ruth, and Aggie, and Sib,

Now we think that's quite enough for this super-twelve Rolls Rough.

OUR little Elizabeth! What a small girl to know so much mathematics and so very many other things, too! She is a busy little person, and how she accomplishes so much still remains a wonder. SINCE Ruth was destined to live this year in the peripheral region of Turvey, many of us know only the quiet, very reserved girl we see and occasionally hear in the classroom. But her intimate friends, however, think of her as a calm, even-dispositioned person with a carefree attitude toward life. In fact, Ruth simply refuses to take life seriously; and as a result, nothing ever seems to bother her. She enjoys cards, but is never happier than when lost to the world in an interesting new book.

ESTELLE is a most serious-minded young lady, whose motto apparently is: "Duty before pleasure." Therefore, it is not surprising that she leaves many far behind her on the trail of academic work. She is especially gifted in French; but then, she excels in many things. She is particularly fond of bridge and dancing and is so proficient in the latter that she has always been one of the stars of Miss Hartshorn's dancing class. We feel confident that Estelle will be as successful after graduation as she has been during her undergraduate days.

SOPHOMORE CLASS HISTORY

IN SEPTEMBER 1926, the class of 1930 arrived at the Women's College for the first official Freshman Week, several days earlier than the older and wiser students. The faculty and girls who welcomed us soon made us forget that we were only Freshies. But when the Sophs appeared, they showed their disapproval of our superior airs by ordering us to wear white cheesecloth baby caps, tied beneath the chin with bright green chintz bows. What undignified affairs they were! It was a surprise to everyone to see what a good-looking class we were when our baby caps were removed.

With Margaret Middleton to lead our distinguished class during our year of adjustment, we won applause in dramatics, and success—though not championship—in athletics. The first innovation of our class was to transfer the Annual Freshman Formal from our own inadequate quarters to the spacious Commons of Old College.

Early in the spring, the Sophs revealed their true nature and good will by entertaining our class at tea in the

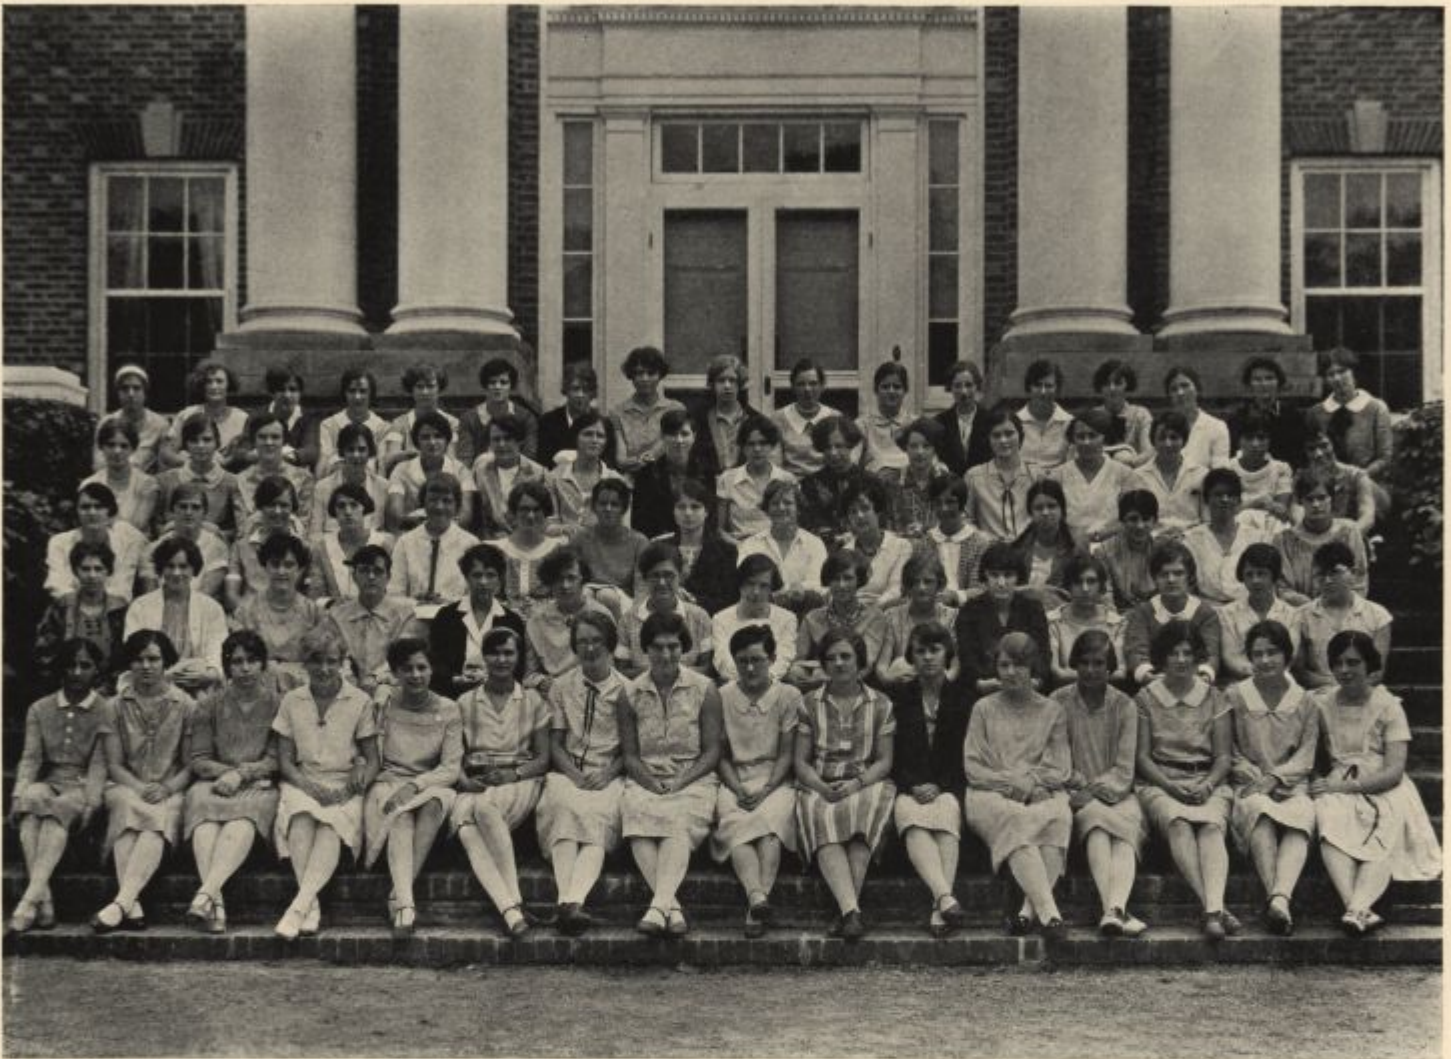

Hilarium. Not long afterward, we invited our Big Sisters to a movie party with peanuts, oranges, and stick candy served at the door. We Little Sisters were delighted when we were invited to attend a fireside party later that same evening at the home of Marjorie Johnson.

In September 1927, with Ann Barclay as our Sophomore president, we soon began to impress our authority upon the new Freshies. Stunt Night was the first proof that we had gained in dignity and importance during the summer. Then came the Hockey Tournament, and the Sophomore team was proclaimed champion. The tradition of arranging a musical performance was followed by our class when the Orpheus Club Concert was given in Wolf Hall early in December.

As the year draws to a close, we realize with regret that we are to lose some of our best members when the T. T.'s leave for their various teaching positions.

Now we are filled with high aspirations and wonder as we look forward to the two years that are to follow.

FRESHMAN CLASS HISTORY

WHEN we came to Women's College, we were greeted very delightfully by our Faculty Advisors, green cards, and mail-box combinations. We were successfully tided through registration by calm, capable upper classmen. Our first glimpses of rooms and roommates were queer—bare rooms and strange co-inhabitants. No sooner were our beds made up and our suitcases strewn around than we began a hectic week of lectures and talks—Freshman Week. Every school in Women's College was explained to us to prepare us for oncoming days, and we were instructed in the budgeting of time and money.

The next outstanding event was "Stunt Nite." We still regard this memorable evening with mixed feelings. The following day we were changed girls! Modest to an extreme degree, we blushed (one-sidedly) as we curtsied demurely to everyone we met, holding our dainty parasols with ladylike grace.

Unfortunately, some seventeen or more of us outgrew this demureness slightly too soon. The Student Representative Board held a meeting; and as a result, some of us found small slips of paper in our mail-boxes stating that our presence was desired at such and such a time in room so and so.

Founder's Day and Convocation have a place in our remembrance. On Founder's Day we received our color—

Green, symbolic of youth, virility, and *not* of raw immaturity.

At Convocation, we really marched at the head of the line—for a little while. As the puzzle worked out, we found ourselves lined on either side of the walk with everyone passing through. We were last after all.

Shall we ever forget one misty, moisty morning at four o'clock? Pillow cases and gym clothes have had a deeper significance since then. Nevertheless, we were allowed to go without our parasols from then on. We couldn't keep them as remembrances of the good old days, however; they went to the Sophomores.

Our class had another affair on an early morn, but it was secretly held. It resulted in two glaring 31's on the campus and two banners flaunting our numerals on the New Castle doors. These demonstrations were merely to show that we knew that we were a class—the class of '31.

Our Freshman Dance held on February 25, in the Hilarium was a memorable affair. The decorations were futuristic; at least we may say that because so many people asked, "What do they represent?" But everyone had a glorious time, and the colors of the dresses made lovely decorations in themselves.

And now that our Freshman days are drawing to a close, we are beginning to think of next year. Then there will be other Freshmen and we shall be *Sophomores*.
