## Thames River Lecture Topic Next Monday

**Captain J. B. Noel Will  
Take Audience Down  
Thames, by Color Dis-  
solvograph Picture.**

Captain John B. Noel will carry his audience along England's Thames River at the University Hour this Monday night in Mitchell Hall as he gives his illustrated lecture, "The Royal River."

The University Hour Committee has asked THE REVIEW to call attention to the change in time for the University Hour Program scheduled on Monday evening, March 8. In order to give ample opportunity for the guests at the Parent-Student Dinner at the Women's College to get to Mitchell Hall, the lecture will not begin until 8.15 instead of 8.00 as formerly.

"The Royal River" is the story of a travel along the Thames River. Castles, country mansions, cottages, palaces, and gardens and flowers pass in review. Windsor castle, built by William the Conqueror, Oxford, Hampton Court, Tower of London, and the city and port of London are all part of Captain Noel's pictorial story. The pictures have been produced through the Color Dissolvograph, Captain Noel's invention, which reproduces nature's color shades with natural luminosity.

Captain Noel has spent sixteen years in exploration, photography, and cinematography. He was official photographer and chronicler for the pioneer Mount Everest expeditions. His pictures, "The Epic of Everest," "Kashmir and the Taj Mahal," and "The Miracles of Lourdes and the Story of Saint Bernadette," have been produced before audiences all over the United States. Captain Noel is an Honorable Life Member of the American Museum of Natural History of New York, Honorist Royal Photographic Society and Royal Geographic Society of London.

## Debaters Drop Close Decision

The Delaware Varsity Debating team, composed of Clarence W. Taylor and Robert T. Wilson, dropped a close decision of a two to one vote to the Washington College team at Chestertown, Maryland last evening. The proposition debated by the two teams was: "Resolved, that Congress should be empowered to fix maximum hours and minimum wages in industry." The Delaware team took the negative side of the subject.

John Eivenhauf and Luther Bergdall represented the Washington College team. Mr. Eivenhauf, in his affirmative speech, stressed the need of Congressional control of hours and wages to alleviate the present unemployment situation and pointed out how such a system of regulation has worked well in Victoria, Australia for forty years.

Robert Wilson, in his constructive speech for the negative team, stated that labor's greatest protection can come only through collective action of employees in the form of unionization. In the rebuttal, Mr. Taylor, of the Delaware team, declared that if Congress held such control, industry would set up powerful lobbyists and defeat labor in the long run.

## New Chemistry Building

Here is the Library's new neighbor. The \$300,000 structure will be devoted to chemistry in all its phases, and was donated by a friend of the University whose name has not been disclosed.

### VANDY PASSES

"Admiral" Vandegrift was seen passing through Recitation Hall on Tuesday carrying a musket. Perhaps he has decided to forsake the fleet and join the army.

## Committee to Plan New Constitution Of Student Council

President Joseph Scannell named seven men at the Student Council meeting Monday night who will revise the antiquated constitution of that body. The members of the committee are George Spiller, Joseph Perkins, Thomas Cooch, Clark Lattin, Collins Seitz, John Healy, and Scannell.

Lattin, treasurer of the Council, announced that the Junior Prom made a profit of \$101.45. At the same time William Wells, chairman of the Prom Committee, publicly expressed his appreciation for the cooperation he and his committee got from the other Councilmen.

### Gymnasium Discussed

The complex gymnasium situation came in for long discussion. The Council was informed that Dr. Hulihan's building program fails to provide a new gymnasium in the near future, but took no decisive action. The Council agreed that certain members of the Physical Education faculty who use the gymnasium in the afternoon for their personal past-time at the expense of students wanting to use the floor should be mildly rebuked. No formal protest was filed, however.

The use of intramural sports equipment bought by student funds was also discussed. It was agreed that since the physical education department helped the intramural contests by coaching and officiating, the Council should allow them to use the equipment for class and practice.

### Editorship Considered

On Scannell's request, the Council discussed the various men who are candidates for succession to THE REVIEW editorship when Thomas Cooch's term expires next Monday. The Council refused to advise Scannell how to cast his vote in the election, which will be held Monday afternoon. George Cooch, Daniel Button, and Harry Stutman were the prospective editors mentioned during the meeting.

## New Chemistry Building Completion Nearing as Workmen Finish Exterior

With the exterior of the new Chemistry Laboratory practically completed, workmen are laying tile and plastering walls inside the building. It is expected that the building will be finished by commencement. Furniture and equipment will be moved into the building this summer. The lecture room, freshmen laboratory, and stock room will be ready for use during summer school. The building will be completely occupied next September. The transferring of apparatus from Wolf Hall to the new building will take time because glassware and delicate instruments will have to be moved by hand.

There are many interesting features in the new building. The chimneys are screened so that pigeons and other birds cannot enter the attic. At one time the attic of Wolf Hall contained so many pigeons that they threatened to become a serious nuisance. Another thing worthy of note about the chimneys is that they are for little more than appearance. They will be used, however, for ventilation to some extent. The building will contain a small elevator for lifting chemicals from the basement.

The class rooms will have a total seating capacity of over 450. The main lecture room, which is sloped like a motion picture theatre, will alone seat 270.

The large blank space at the rear of the building is back of the stock room, which will have no windows.

### Dr. A. S. Eastman Describes Features of New Building

In selecting the most striking characteristics of the new laboratory, mention should first be made of the unusual shape and interior arrangement of the building. It is nearly square, with the lecture room in the center. A hall-way extends all the way around the outside of the lecture room, giving access to the outside rooms. This arrangement is repeated on each floor. The square building is a very economical construction, and the cost per cubic foot will compare favorably with that of any college laboratory so far constructed, and this without any sacrifice of utility, appearance, or durability.

The inside lecture room needed, and received, lighting and ventilating systems planned with special (Continued on Page 5)

## J. E. Rogers Will Address College Hour

Dr. James E. Rogers, Director of Education for the National Recreation Association, will be the guest speaker for the College Hour program Tuesday, in Mitchell Hall.

Dr. Rogers will discuss phases of Physical Education as related to the college student's life. A keen student of Physical Education and its developments, he recently published "The Child and the Play." Dr. Rogers spoke to the University students at a College Hour four years ago.

Mr. George W. Ayars, newly-appointed State Director of Physical Education, and Mrs. Gertrude Hendricks, who has been acting director, are expected to attend the program. The Physical Education Department of the University is in charge of the program. Miss Beatrice Hartshorn will preside.

## Tryouts Planned For Music Show

A musical show, the first of its kind to be attempted by a University dramatic group, is being planned by the E 52 Players. The production will be made possible by the assistance of the newly-formed University Orchestra.

Demands for such a production have been great for the last few years, and now with the available talent and orchestra, the Players will be able to present a real musical show.

Tryouts for the large cast necessary for the show will be held Tuesday afternoon from three o'clock to five-thirty, and from seven to eight in the evening in Mitchell Hall.

Along with the try-outs for the many singing, speaking, and dancing roles, will be held the try-outs for positions on the production staff.

The musical show will be given on April 30. For further details concerning try-outs students are urged to consult the bulletin boards.

## Frat Council Votes Against Play Contest

**Members Claim Students  
Have Little Interest in  
Amateur Plays; Urge  
New Gym Construction.**

The Interfraternity Council at its meeting Tuesday afternoon voted 3 to 2 against participation in the Competitive Play Contest to be held in Mitchell Hall on March 17th and 18th.

The action was taken because of the apparent lack of interest of the students of Delaware College in amateur play production manifested by the small attendance at previous contests. It was also argued that lack of talent together with the inadequacy of scenery, make-up and costumes made it difficult for most of the fraternities to present good plays. The two fraternities favoring the contest were the Sigma Phi Epsilon and Sigma Tau Phi. After the vote was taken, the Sigma Tau Phi representative stated that if the other fraternities were not going to enter the contest, neither would his.

The decision of the Interfraternity Council struck many organizations in the college as a complete surprise. The Footlights Club had planned for a combination of the Interfraternity Play Contest with the Interclass Play Contest of the Women's College to be held as a joint tournament.

In view of the action taken by the Council, the Footlights Club has announced that there will be no change in plans for holding the joint plays on March 17th and 18th as scheduled. They have planned a new contest to take the place of the interfraternity plays and offer a prize of ten dollars to any organized non-fraternity group or fraternity which desires to reconsider its action and enter a play in the new contest.

At the same meeting, the Interfraternity Council decided unanimously. (Continued on Page 3)

## Non-Frat Group To Hold Dance

A non-fraternity house party is to be held tomorrow evening in the Lounge of Old College starting at 8.30 o'clock and finishing at midnight.

The party has been approved by the Faculty Committee on Social Events, and chaperons have been engaged. This is the first time that a non-fraternity group has attempted to compete socially with the Greek letter fraternities of the campus. With the success of this initial event, it is expected that the non-fraternity group will be so organized as to take an active part in the social life of the University.

At present, forty couples are expected. Arrangements have been made for refreshments and musical entertainment. The chaperons engaged are Miss Russell, Miss Fredrick, Dr. and Mrs. Cyrus Day, Dr. and Mrs. J. Fenton Daugherty, and Dr. and Mrs. F. H. Squire.

The new organization, composed of non-fraternity men, is expecting to participate in the Competitive Play Contest to be held March 17th and 18th in Mitchell Hall.

The officers of the new non-fraternity club are: Julius Reiver, president; George Vapas, vice president; David Crocker, secretary; and George Baker, treasurer.

## Folly And Farewell

We are taking this opportunity to bid our adieux, although it has been two weeks since we relinquished active duties. This was due to circumstances beyond our control. In the last two weeks the Editorship has been assumed by two candidates for our successorship, first, Mr. Stutman, and second, Mr. Cooke.

The next Editor-in-Chief will be chosen next Monday by an electoral committee consisting of the present Editor-in-Chief, the present Business Manager, the President of the Student Council, and the chairman of the Faculty Committee on Student Publications. Each of these has an equal voice, and each represents a different interested viewpoint.

At the last Student Council meeting, several alternative methods for selecting the Editor were suggested. All of these were based on the misapprehension that the persons electing were not always guided by the best interests of the paper. This we deny, and ask anyone interested what other motives could possibly have any weight other than the future well-being of THE REVIEW.

When a student becomes Editor-in-Chief of THE REVIEW, or President of the Student Council, he has gone as high as he can go. Politics therefore have no place in his mind, because there is nothing more to be gotten. That is our feeling in the matter, and will be when we cast our vote for the next Editor of THE REVIEW.

—Thomas Cooch.

## Footlights Save The Show

We cannot refrain from expressing our regret of the action taken by the Interfraternity Council Tuesday in deciding not to participate in the Competitive Play Contest at Mitchell Hall on March 17th and 18th. It had been planned this year to combine the Interfraternity Plays with the Inter-class Play Contest of the Women's College in the hope that much dramatic enthusiasm and rivalry would be aroused in the University as a whole.

The refusal of the Delaware College fraternities to participate is based, they claim,

upon the lack of interest manifested towards the one-act plays by both the fraternity men and audiences when they have been presented previously. Another obstacle, in the opinion of the fraternity representatives, is the lack of necessary equipment, such as scenery and costumes. If such reasons are justified, we can understand the sincerity of the Council in taking this step. Lack of interest makes it virtually impossible to carry forward any extra-curricular program, whether it be dramatics, debating or sports.

We feel, however, that there must be some latent dramatic talent in the fraternities, even though it may be lying hidden and undeveloped at the present time. It was hoped that the combining of the two contests this year would bring this talent forth. Apparently, the Interfraternity Council feels it will not. We trust that they have considered well the advisability of the decision they have made. THE REVIEW regards it as regrettable because the abolition of this dramatic rivalry between the fraternities will eliminate the only activity, with the exception of sports, in which they can compete. It also strikes a crushing blow at the development and stimulation of dramatic talent and interest in future presentations.

The Footlights Club has determined to attempt to salvage the Competitive Play Contest. Jack Alden, acting president of the Club, announces in an open letter to THE REVIEW this week, a new dramatic contest to be held on the same nights, March 17th and 18th, at Mitchell Hall in conjunction with the Women's College Competitive Plays. This contest will be open to any organized non-fraternity group as well as to any fraternity which may decide to reconsider and enter a play. The offer of a prize of ten dollars for the winning play should provide an adequate incentive for participation.

In planning the new contest, the Footlights Club will once again be fulfilling its function of promoting and stimulating interest in dramatics at Delaware College. We wish them the greatest success in their undertaking and hope that the students will prove by their attendance that they still want an Annual Competitive Play Contest.

—George W. Cooke.

## THE COLLEGIATE REVIEW

The University of Minnesota's "barefoot girl," Ingrid Larson, had to take off her shoes again. Having to forgo a lifelong habit of "barefooting it," acquired while living in Hawaii, she wore shoes until recently when an ulcer, caused by leather-rubbing, developed on her foot.

Regents at the University of Omaha voted in favor of a new dormitory which will cost \$600,000.

Campus politics at the University of Illinois went "professional" recently when seniors used a voting machine to count ballots in the election of class officers.

A course in amateur telescope-making, the first of its kind in the country, is being offered by the division of general education at New York University.

Inspired by P. G. Wodehouse, students at Nazareth College have organized a Goon Club, which has adopted this slogan: "A pun a day keeps your enemies away."

To learn the "kicks" of students and attempt to eliminate their causes is the aim of the Student Senate at Purdue University. It has placed a "gripe-box" in the union building to collect written complaints.

## Letters To The Editor

To the Editor of THE REVIEW,

The Interfraternity Council in their meeting on Tuesday voted against holding the Interfraternity Play Contest this year. In response to THE REVIEW's request for the comment of the Footlights Club on this action of the Council we regret that by this action the Council is removing the only remaining interfraternity competition. In the past the contest was received with marked enthusiasm by the fraternities, but the lack of interest this year is lamentable. The Club's first obligation is to promote interest in dramatics at Delaware College, and since this interest can best be stimulated by a play contest, we feel that we should provide an opportunity for such competition along other lines. Therefore, we wish to announce a new dramatic competition, to be given in connection with the Women's College Competitive Plays on March 17 and 18.

Any organized non-fraternity groups as well as all fraternities are eligible and invited to enter. A prize of ten dollars will be awarded to the winning group. The rules governing the contest will be the same as those recently drawn up for the joint production of the Women's College Competitive Plays and the Delaware College Interfraternity Plays. Copies of these rules may be obtained from either Tom Warren or Jack Alden.

We urge all groups interested to signify their intentions of entering the contest by communicating with us as soon as possible.

Jack Alden  
Acting President,  
Footlights Club

Editor of THE REVIEW,

The greatest mountains will some day fall. The most powerful animals will some day be vanquished. The greatest rivers will some day dry up—but not Percy Roberts.

E. J. Wilson.

## Military Students Hold Mock Trial

A mock court-martial began Wednesday at 10:45 a. m. in Mechanical Hall. The trial is being conducted by the Senior class in Military training.

Ernest Bannister, the defendant, is accused of threatening to strike the cook, "Ernie" Lomax, while the latter was in the exercise of his duty. He is further arraigned for offending Captain Wallis by singing: "Who's Afraid of the Big Bad Wolf" and causing a general disturbance while intoxicated.

Howard Preston is the President of the Court while Bernard Greenberg and Tom Cooch are Trial Judge Advocates. Bannister will be defended by Blair Ely and Joe Scannell.

## The Inquiring Reporter

By Bill McIlvain

What did you think of the Junior Prom?

Edgar Wile, '39 A. & S.  
Everyone who attended the Junior Prom will join me, I'm sure, in saying that this was one of the best dances that Delaware College has seen. Clyde McCoy has everybody's praise, and a better trumpeter is yet to be found. The Junior Class and the Junior Prom Committee have every reason to be proud of a good job.

Wilson F. Humphreys, '40 Eeo.  
The dance was fine and the music was swell. The floor wasn't too crowded. It's too bad I can't say the same for our car.

T. B. Ely, Jr., '37 Pre Law  
I would like to suggest that Clyde McCoy play a return engagement for the Spring Frolic. I would say that he has probably had lessons on the trumpet.

G. Leslie Timme, Jr., '40 C. E.  
It was swell. One of the best dances I have ever attended. The great difference between high school and college even shows through the social affairs. Clyde McCoy mixed them up in a way that was very agreeable.

A. D. Cobb, Jr., '39 M. E.  
Clyde McCoy was the tops. He could play for my dance any day! I think the Junior Class should be complimented on their swell prom. George Kelly, '39 Pre Law  
What a dance! and what a band! In my opinion it is the best affair this year. Clyde McCoy's band is almost as good as my father's.

E. K. Preston, '39 Economics  
The Junior Prom was in every way the best dance that I have yet attended here at Delaware. It was extremely informal for a formal dance and everybody seemed to be having a perfect time. Needless to say that the music was good, however, I do want to compliment those in charge of the dance for their good work in making this year's prom better than last year's.

Jean N. Bailly French Student  
The Junior Prom was topping, marvellous, glorious, etc., and I had a swell time! Everything was new to me but I was not lost, because I had a nice partner who could speak French fluently and explain everything to me. Clyde McCoy's orchestra was so good that, although I am a beginner in dancing, I did not have too much trouble to follow the rhythm and to stay on the floor. I was gladly surprised to see that President Hulihan could shake so many hands without being tired and to discover that there remained more dancers than drunkards, even at the end.

I see that the Junior Prom was a great success and that Clyde McCoy made a big hit with everyone who attended. CONGRATS TO THE JUNIORS!  
It seems that intramural sports are favored by some people while others object to them. We'll see the various opinions of the subject next week.

## Counahan, Hills Win Model Places

Winners of the stage model contest conducted by members of the class in Play Production at the University of Delaware have just been announced. Six models of scenes from as many different modern plays were entered in the contest. Miss Dorothy Counahan's set for "Another Language" and Mr. Benjamin Hills' set for "The Ghost Train" were awarded first and second places respectively.

The judges for the contest were Mrs. C. R. Kase, Mrs. Cyrus Day, formerly a member of the art department faculty at the Women's College, and Mr. Jack Mohr, of the Newark High School faculty.

The stage models are on display in the lobby of Mitchell Hall and will remain on exhibit for about a week. All models are made exactly to the scale of Mitchell Hall stage.

## Engineers Visit Sparrow's Point

Juniors and Seniors of the Engineering School made an inspection trip yesterday to Sparrow's Point, Maryland. The group visited the factories of the Bethlehem Steel Corporation. The trip lasted a whole day; the young engineers started in the morning and returned that night.

The visit was a very interesting one. One of the highlights of the visit was watching molten steel being poured from a huge vat. It was reported as a very spectacular operation.

This trip is made every other year and is one of the most popular made by the engineers. Other trips are made throughout the year to give the engineering students a more practical view of industry and engineering.

## Picture Shown to Chemistry Club

The sound motion picture entitled "The Wonder World of Chemistry" was shown to members of the Wolf Chemical Club on Tuesday afternoon at 4:15 o'clock.

The meeting was held in room 308 in Evans Hall. The picture, loaned to the society by E. I. Du Pont de Nemours and Company, showed how research is carried on by that company and showed the manufacture of synthetic products from natural raw materials such as coal, water, limestone, cotton, salt, sulfur, etc. One particularly interesting synthesis was the manufacture of a synthetic rubber, polychloroprene, commonly called "Duprene," from coal, limestone, water, and hydrochloric acid.

After the showing of the film the meeting was adjourned to the mechanical laboratory where refreshments were served. Ice cream was served from the recently acquired refrigeration unit.

## Delaware Students To Attend Model Senate Next Week

Delaware University will be represented at a Model Senate to be conducted at Princeton University on March 12 and 13 by Martha Trippe, Margaret Trumbull, Virginia Boston, Annette Hewes, Alfred Seitz, Clarence Taylor and George Cooke.

There will be students from thirty-eight colleges represented in the body, which will be conducted according to the regular parliamentary procedure used in the Senate of the United States. Various bills will be introduced, referred to their special committees, and finally brought to the floor of the Model Senate for debate and a final vote. During the two day session, such problems as neutrality, government regulation of hours and wages in industry and the proposed revision of the judiciary will be discussed.

## George Cooke in Charge of The Review This Week

George W. Cooke was in charge of planning this issue of THE REVIEW. He was under the supervision of the Editor-in-Chief, Thomas Cooch, who returned to school on Wednesday after an attack of grippe.

A new Editor-in-Chief will be chosen Monday.

## Ryan and Wilson Council Nominees

A sophomore non-fraternity group meeting was held at 1:00 o'clock this afternoon in the west wing of Old College. The purpose of the meeting was to select a new sophomore non-fraternity representative to the Student Council. The nominees selected by the group are Thomas Ryan and Robert T. Wilson.

The new representative will replace E. J. Wilson, who has become ineligible for the office since he has pledged to the Kappa Alpha fraternity.

## Exchanges

BY E. J. WILSON

*Editor's Note: This is a space for anybody with complaints, bright sayings, gossip, thoughts, brain children, musings, cheerion, and salutations. We might even print Percy Robert's poetry. We don't care how low we go to fill up space.*

To prove the bacteriological hazards involved in kissing, Instructor T. A. Anderson prevailed on several high school students of both sexes to kiss dishes of cold, jellied beef broth.

Examining the broth several days later under microscopes, students found flourishing clusters of germs on the lip imprints.

A survey next morning showed the students were deeply impressed—not a one went out the previous evening and kissed a dish of cold, jellied beef broth.

O'Connor (at dinner table): Will you please pass the nuts, professor?

Journey (absent minded): Yes, I suppose so, but there are a few who ought to be flunked.

—New Rochelle Tatler (Adapted)

## Frat Council Votes Against Play Contest

(Continued from Page 1)

mously to demand representation from all classes on the fraternity teams in the Intramural sport events. At the present time, members of the fraternity teams are limited to the Junior and Senior classes. This, it was argued, works a definite hardship upon the smaller fraternity houses.

The Council also voted to recommend more activity towards the erection of a new gymnasium. The feeling was expressed that the erection of such a building was more greatly needed than a new classroom building.

## Book of Romaines Tells of Americans

BY JEAN N. BAILLY

If some of you are interested in knowing what foreigners think about you, read Romaines' new book "Visite aux Americains" (Brentano's 85 cents).

It is a small book of 211 pages which has no ambition and which gives only the simple impressions of a traveler through the United States. "I do not," says the author, "bring America on a tray after it has been dissected, explained, laid bare in its machinery and its secrets, and readable in its present and future."

Romaines, who is one of the greatest French novelists and observers first came over in 1926 and was disappointed by the sadness, coldness, and lack of human life which he noticed in many Americans of that time. Since then, America has improved and changed for the better. New York is no more "Hard, mechanic, oppressive;" it has become a "merry, democratic town, a kind of Barcelona or Marseilles, multiplied by ten." Romaines likes Times Square with its loafing and careless crowd, its numerous shops, its drug stores, and its taxis flood-

ed with electric lights. He admires its endless life and the possibility it gives you to buy a book or have a hair cut at any time of night.

He praises the way in which New York is built, the usefulness of the blocks and of the red lights system. He describes in detail the American trains which are not only means of transportation but also complete dwelling places in which you have pleasure to live. Their club-bar, observation car, air-conditioned system are improvements on the European railroads, but their ordinary sleeping cars are not so comfortable and they are usually not so punctual (that I noticed myself when I arrived at Newark one hour late!)

The pages Romaines writes about the depression and the political life are not very accurate, but nevertheless, they allow us to discern a tendency—a tendency toward optimism which has easily seduced the author. The judgment he passes upon these "big boys" is generous, friendly and often flattering.

His book is full of living descriptions, and written with broad understanding in a vivid and clear style.

"They are inhuman and abuse their authority."

"They ought to be tarred and feathered."

**BEWARE OF  
LENTINUS  
LEPIDEUS!**

IT looks harmless, but this fungus destroys poles. So telephone research men wage war on it.

In the Bell Telephone Laboratories, they study many woods, concoct many preservatives. In Mississippi, Colorado and New Jersey—where conditions vary widely—they've set out whole armies of treated test poles. Their continuous experiments yield many a weird but valuable fact about destructive fungi and insects.

Since the Bell System each year uses over 500,000 poles for replacements and new lines, lengthening pole life is most important. It's one more way to make telephone service still more dependable.

Why not give the family a ring tonight?  
Rates to most points are lowest after  
7 P. M. and all day Sunday.

**BELL TELEPHONE SYSTEM**

# COURT AND TANK TEAMS REACH END OF SCHEDULES

## HEN QUINTET FINISHES YEAR OF FEW WINS

**Final Contests with Stevens and Pratt End In Defeats; Lewis, Carey and Captain Wilson Lead Scorers.**

The basketball team dropped both games on the New York trip, losing to Pratt Institute on Friday night 54-40 and on Saturday night Stevens Tech was victor in a game ending at 38-30. These were the last contests listed for the locals this season.

In the game with Pratt on Friday the Blue and Gold were unable to hold a lead that they secured in the first half. Delaware trailed at the intermission 26-25.

Zuraw, Pratt forward, was the game's leading scorer, with fourteen points, while Lew Carey led Delaware with eight.

Again Saturday evening the second half proved to be the Waterloo for Coach Clark's team. Led by Captain Teedie Wilson Delaware's attack functioned smoothly during the first period, rolling up a 19-15 lead. After the rest period, however, Stevens came back strong and the game ended with the score 38-30 in their favor.

The Delaware eagles had a rather poor season again this year winning but four games while dropping 12. This was the same record as the local team compiled last season. Osteopathy, Haverford, P. M. C. and Hampden-Sydney were the combinations that went down to defeat before the charges of Coach Clark. Let's all hope for a better record for the 1937-38 season.

## AMUSEMENTS

### Wilmington—

**Loew's**—Starting next Friday, March 12, 1937, is the world premiere of "Maytime," starring Nelson Eddy and Jeanette MacDonald. Now playing is "Men Are Not Gods," with Miriam Hopkins.

**Rialto**—Through popular demand it is necessary to hold over "On The Avenue" with Dick Powell, Madeline Carroll, and Ritz Brothers for another week.

### Newark—

**State**—Fri. and Sat. is "God's Country and the Woman" with George Brent. Mon. and Tues. is "Rembrandt" with Charles Laughton. Wed. and Thurs. is "We're On the Jury" with Victor Moore.

## Golf Prospects Good As Practice Nears

Captained by Robert Jamison, the Delaware golf team will open its practice within a few days under the supervision of Prof. F. C. Houghton.

Besides Jamison, there are several veterans returning to the team. They are Robert Good, Steven Wilson, William Moore, and George Stradley. Supplementary material will be gathered from the freshman class as soon as regular practice begins.

## SWIMMERS WIN ST. JOSEPH'S CONTEST HERE

**Bob Lippincott and Captain Charles Kenworthy Star As Hens Conquer Philadelphians.**

Coach Ed Bardo's swimmers defeated St. Joseph's College in a dual meet held in the Delaware tank Saturday afternoon. The score was 42 to 27.

First place winners on the Delaware side were Randy Carpenter in the 150-yard backstroke; Captain Charles Kenworthy in the 200-yard breaststroke; Bob Lippincott in the 100-yard freestyle; and Stearns, Kenworthy, O'Connor and Lippincott, who formed the victorious 400-yard relay team.

Reid Stearns and John Rogers took second and third places, respectively, in the 220-yard freestyle behind McAlarnen, St. Joseph's sprint star. Stearns also captured second honors in the 150-yard backstroke, and swam on the relay. Besides winning the 100 and swimming on the relay Bob Lippincott took second position in the 50-yard distance.

### Delaware, 42; St. Joseph's, 27

50-yard freestyle—Won by McGee, St. Joseph's; 2d, Lippincott, Delaware; 3d, Neff, St. Joseph's. Time, :27.2.  
100-yard freestyle—Won by McAlarnen, St. Joseph's; 2d, Reid Stearns, Delaware; 3d, John Rogers, Delaware. Time, 2:40.6.  
150-yard backstroke—Won by Randy Carpenter, Delaware; 2d, Stearns, Delaware; 3d, McKinley, St. Joseph's. Time, 2:08.2.  
200-yard breaststroke—Won by Charles Kenworthy, Delaware; 2d, Ed Manchester, Delaware; 3d, Horstmann, St. Joseph's. Time, 3:04.  
220-yard freestyle—Won by Bob Lippincott, Delaware; 2d, McGee, St. Joseph's; 3d, Randy Carpenter, Delaware. Time, 1:04.1.  
400-yard relay—Won by Delaware (Stearns, Kenworthy, O'Connor, and Lippincott). Time, 4:14.2.

## Federal Theatre Puts New Dress On Shakespeare

Over 400 people saw the Federal Theatre of Delaware present "Julius Caesar" in modern costume last Tuesday in Mitchell Hall.

El Thompson, who portrayed the part of Julius Caesar, closely resembled Mussolini and helped to draw the parallel between ancient Rome and modern Italy.

The male actors all wore the Fascist costume and used the Fascist salute, and, to add the final touch of 1937, Marc Anthony lit a cigarette at the conclusion of the famous "friends, Romans, and countrymen" speech.

When the play was over there was no doubt in the minds of most of the people in the audience that the parallel between the old and new is startling; however the two situations are not congruent. Old Rome was a republic with Caesar making the first attempts at supreme power. Italy today is a kingdom even if many do not know it—and the king is not Mussolini.

## WITH THE BLUE ★ AND GOLD ★

By Joe Perkins

Before basketball is entirely forgotten, and the season just completed might best be remembered for only a short time, we want to mark down a few facts and figures about the squad and the individuals composing it. It's always interesting to know, after a schedule is finished, who the players are who piled up the most points. We have just the right data. Top honors go, as many of you might well have guessed, to that star forward of the Blue Hen Five, Lew Carey. He chalked up a total of 127 points in a season of consistently brilliant playing. And Lew didn't try to set a record for personal scoring. He never forgot he was just one of five men.

Teedie Wilson, Captain of the cage squad, netted 91 points to capture second honors. In the Drexel contest alone he rang up a couple of dozen points in a spectacular but futile attempt to convert a close game into a Delaware victory. All through the season, Teedie's last of college basketball, he was a mainstay on the quintet. Then we have Earl Sheats with 85, a freshman with three years to go. Next we find Jack Daly, the player who put in too much time on the bench because of a series of injuries to be justly listed with his fellows in this matter of personal points. But despite prolonged absences from the court, due to a twisted ankle, then a cut brow, and finally another leg injury, Daly amassed a total of 68 counters to rate fourth place.

Our figures indicate that Rube Hayman scored 41 points, Tom Pennock, and Ferris Wharton, each 29, Bruce Lindsay, 24, and Earl McCord, 17. Lindsay and Pennock both saw little competition during the second term. Pennock injured his head in an automobile misfortune, while Lindsay was put into hibernation by a pending re-examination. But now, if you please, we'll take a look at the squad as a unit. The prospect isn't so pleasant.

Figures show that out of sixteen games played the Hens garnered only four wins, and that in the ten games following January 9, the Delawareans were defeated every time. Ten consecutive losses. But the locals were not so badly swamped in total points; the combined score of the sixteen opponents was 620, while Coach Clark's men made 528 points. That's your basketball season, gentlemen.

Turning to the swimming team, we find that they have won three meets out of the ten so far completed. The University of Maryland, West Chester, and St. Joseph's were defeated by Coach Bardo's aggregation. Tonight the squad will attempt to end a six-meet series of losses broken only by a victory over St. Joseph's last Saturday. Carnegie Tech swims against the Blue Hens tonight in the Delaware pool, it being the final dual contest of the year. The Hens have a chance to win four out of eleven meets.

About 1,000 members of the American Psychological Association will be guests of the University of Minnesota in September, 1937.

"They are good professors, but they shouldn't forget the clock."

## Swimming Meet Tonight

A post-season swimming meet is scheduled between Delaware and Temple to take place Tuesday night in the home gymnasium.

Tonight a strong Carnegie Tech team visits Newark as the final competitor on the regular schedule for Coach Bardo's natators.

## SQUAD ENTERS 2D CORPS AREA RIFLE CONTEST

**Leach Leads Team in Shooting for Postal Tournament; Records Shattered; Hearst Trophy Next.**

Thomas Leach leads the Delaware entrants in the 2nd Corps Area Rifle championships, firing in which was completed recently. Besides Leach, P. Derickson, J. Julian, and Sam Arnold led in the individual scores, which made a team total of 7131x8000. To date the final standing of the Hen team has not been learned.

Coached by Major Argo, the rifle team has established several new records. Leach shattered both the prone and kneeling marks, Nick Zabenko holds the record for the sitting position, while Wilmer Hoffecker has the high score in the standing event. The records are the following: prone, 100 points; sitting, 98 points; kneeling, 91 points, and standing, 83 points.

The riflemen have three more matches to complete before closing their schedule, including the William Randolph Hearst Trophy which is to be shot off this month.

The individual performances of team members who competed in the 2nd Corps Area Championships are summarized in the outline that follows:

The winners of the Delaware State section of the 2nd Corps Area R.O.T.C. Championship are:			
1st—T. Leach	759x800	P. S. P. K. P. S. P. P.	
2nd—P. Derickson	736x800		
3rd—J. Julian	714x800		
4th—S. M. Arnold	708x800		
S. M. Arnold	96	90	95
S. Hall	99	90	95
T. Leach	99	97	91
J. Geist	97	93	91
T. Leach	99	97	91
H. Preston	92	86	93
K. Preston	94	87	88
P. Derickson	97	95	96
J. Julian	93	89	90
N. Zabenko	97	91	85
H. Maull	93	82	86
O. Lott	96	83	91
J. Fooks	—	96	76

## DIAMOND MEN BEGIN WORKING FIRST OF WEEK

**Veteran Squad to Start Practice In Gymnasium Under Direction of G. P. Doherty.**

Delaware's baseball squad will begin practice next week with preliminary workouts held in the gymnasium. Three weeks of training will precede the opening games with Virginia Medical College, on March 30, and Lynchburg, Hampden-Sydney and Randolph-Macon on successive days.

While the Athletic Council has not taken action as yet in the matter of appointing a coach, Gerald Doherty will be in charge of the squad when early practice gets underway. Dick Roberts is the captain of the nine.

Coach Doherty will have a strong squad, what with many veterans and promising freshmen indicating their intention of coming out. Besides Roberts, Boney Jackson, Robert Greenwood, Phil Reed,

## TWO DEFEATS FOR SWIMMERS AT NEW YORK

**St. Francis and Manhattan Conquer Delaware; Team Meets Carnegie Tech Here Tonight.**

This week the Blue Hen tank team traveled to New York and dropped two contests with St. Francis and Manhattan.

In the St. Francis meet, Captain Charles Kenworthy was the Hen's sole first place scorer, taking the prime position in the 200-yard breaststroke event, and also capturing second honors in the 40-yard freestyle. In winning the breaststroke race, Kenworthy defeated George Price of St. Francis by the broad margin of seven yards. His time was 2:49.

Bob Lippincott, second in the 100-yard and 220-yard freestyle events, also was outstanding among the Delaware contestants. In the 140-yard backstroke, Randall Carpenter annexed second place after being nosed out by Charles Schaem of the rival team.

The rest of Delaware's points were amassed by Olaf Drozdov, in the 220-yard freestyle; Miles Wagner, in the 40-yard freestyle; Stephen Saltzman, in the diving; O'Connor who took second place in the 440-yard freestyle; John Rogers, with a third in the same event; and by Reid Stearns, in the 140-yard backstroke. Delaware's relay quartet lost their event to the St. Francis foursome.

### St. Francis, 34; Delaware, 30

220-yard freestyle—Won by Charles Schaem, St. Francis; 2d, Robert Lippincott, Delaware; 3d, Olaf Drozdov, Delaware. Time, 2:33.

40-yard freestyle—Won by Jack Farrell, St. Francis; 2d, Charles Kenworthy, Delaware; 3d, Miles Wagner, Delaware. Time, :20.

Fancy dive—Won by George Price, St. Francis (80.7 points); 2d, Jack Escales, St. Francis (73.8 points); 3d, Stephen Saltzman, Delaware (67.8 points).

440-yard freestyle—Won by Nat Ephraim, St. Francis; 2d, Rod O'Connor, Delaware; 3d, John Rogers, Delaware. Time, 6:30.

140-yard backstroke—Won by Charles Schaem, St. Francis; 2d, Randall Carpenter, Delaware; 3d, Reid Stearns, Delaware. Time, 1:47.

200-yard breaststroke—Won by Charles Kenworthy, Delaware; 2d, George Price, St. Francis; 3d, Howard Thompson, St. Francis. Time, 2:49.

100-yard freestyle—Won by Jack Farrell, St. Francis; 2d, Robert Lippincott, Delaware; 3d, Miles Wagner, Delaware. Time, 1:00.

400-yard relay—Won by St. Francis (Jack Farrell, Nat Ephraim, Charles Schaem, George Polatemus); second, Delaware (Olaf Drozdov, Reid Stearns, John Rogers, Robert Lippincott). Time, 4:10.

**Manhattan, 41; Delaware, 28**

220-yard freestyle—Won by Don Curtis, Manhattan; 2d, Bob Lippincott, Delaware; 3d, Olaf Drozdov, Delaware. Time, 2:41.

50-yard freestyle—Won by Paul Shea, Manhattan; 2d, Conway Cohalan, Manhattan; 3d, Charles Kenworthy, Delaware. Time, 25.8.

Fancy Dive—Won by Tom Cutrera, Manhattan; 2d, Sammy Grayson, Delaware; 3d, Stephen Saltzman, Delaware. Winning score, 65.1 points.

440-yard freestyle—Won by Charles Buody, Manhattan; 2d, John Rogers, Delaware; 3d, Rod O'Connor, Delaware. Time, 6:11.

150-yard backstroke—Won by Curtis, Manhattan; 2d, Randy Carpenter, Delaware; 3d, Reid Stearns, Delaware. Time, 2:02.6.

200-yard breaststroke—Won by Kenworthy, Delaware; 2d, Cohalan, Manhattan; 3d, Ed Manchester, Delaware. Time, 2:48.

100-yard freestyle—Won by Lippincott, Delaware; 2d, Shea, Manhattan; 3d, Jim O'Rourke, Manhattan. Time, 1:01.4.

400-yard relay: Won by Manhattan (Devir, Brennan, Cohalan, and Curtis); 2d, Delaware (Drozdov, Stearns, Rogers, and Lippincott). Time, 4:14.2.

Figures compiled by a reporter at Oregon State College indicate that 10,800 pounds of English instructors at that institution climb 74 steps daily.

and Bill Deaver, pitchers; Harold Hickman, Lew Carey, Kirby Preston, Bob Carpenter, and Earl McCord, infield and outfield veterans, will report.

Among the new candidates are Jack Daly, Earl Sheats, Harold Viden, Ferris Wharton, and Eddie Graham.

## Dr. A. S. Eastman Describes Features of New Building

(Continued from Page 1)

care. There is a separate ventilating system and fan. The lights are controlled by Thyatron dimmer equipment, which may be operated either at the lecture table or by the operator of the lantern at the rear of the room. There are special lights over the lecture table, and another set of lights to illuminate the blackboard back of the lecture table. These may be independently controlled. At the lecture table a push-button on a flexible cord may be plugged in for use of a lecturer showing lantern slides. This push-button operates a small signal light, which may be plugged in on a flexible cord by the lantern operator. At the rear of the room there is a separate provision for the lantern, and for a spot light, for special illumination of the blackboard or lecture table. By raising the blackboard back of the lecture table, apparatus may be passed to the preparation room, where lecture material is prepared and stored. This room is a fully equipped laboratory, as well as a store-room.

The interior walls of the building, except in the entrance hall and the library, are of 5 inch by 12 inch Natco hollow unglazed tile of a light buff color. This kind of wall is substantial and has a very trim and pleasing appearance.

The furniture in all the large laboratories is of steel with soapstone tops. There is a down-draft hood on each desk in the general and qualitative analysis laboratories, and all the laboratories, including the private rooms, are provided with hoods. All of the ducts from the hoods are of sheet lead, containing antimony for hardening purposes. There are six fans in the attic to draw air and fumes from these hoods, each fan serving a group of rooms.

Another feature of the building is the large amount of storage space. All the space under the lecture room is for rough storage, and the laboratories are all well provided with shelving and cabinets for reagents and apparatus.

There is one centrally-located stock-room to serve the entire building, making it possible for one stock-keeper to have all the supplies on hand under immediate control. These supplies include several thousand items, including apparatus, chemicals, and solutions. The stock-room is provided with facilities for reconditioning apparatus. There is a special instrument room on the second floor near the physical chemistry and private laboratories, where apparatus will be kept.

The chemical engineering laboratory, and the accompanying testing laboratory, deserve special mention. The former is located on the ground floor with windows on two sides. Part of it is two stories in height. This two-story portion has a balcony along one side half-way up and over the balcony and two story portion, there is a traveling crane. The still, distillation column, two-stage evaporator, and other tall equipment will be located here.

In one corner of the chemical engineering laboratory, there will be a room for crushing, grinding, and sifting, with ventilation of the dust to the outside of the building.

Provision is made for the installation of a gas-fired boiler. The rest of the room will be occupied with the usual equipment for the study of the unit operations of chemical engineering, all of which was located on the drawings. The laboratory is provided with numerous outlets for steam, air, gas, hot and cold water, electric power, direct current, etc., in order to provide flexibility.

The testing laboratory, to be used in connection with the chemi-

cal engineering laboratory, is, as the name implies, intended for the testing and analysis of engineering materials, such as fuel, gas, oil and water. One end of the room may be used for small classes, or for drawing tables, as needed.

Each of the laboratories is provided with a glass-blowing bench for the use of both students and instructors. In fact, more kinds of services are carried to more places in this building than in most laboratories, which, we think, will make it a very usable and adaptable building.

A list of the rooms not so far mentioned would include the library, which will be an especially attractive room, three class rooms, shop, photographic dark room, experimental dark room, water analysis room, Kjeldahl room, alcohol storage room, unpacking room, mineralogy laboratory, storage for inflammable materials, storage battery room, electro-chemistry labo-

ratory, three balance rooms and numerous rooms which are combination offices and private laboratories.

— The University News

### Kase Invited to Speak

Professor C. R. Kase, of the University of Delaware faculty, has been invited to speak on the program of the Dramatics Institute to be held in York, Pennsylvania, under the auspices of the Division of Dramatics at Pennsylvania State College.

The Institute is part of the state-wide dramatic program sponsored by Pennsylvania State College. It will be held Saturday, March 13.

The Institute program is devoted to all phases of dramatic activity. Professor Kase has been asked to speak on Stage Scenery. Delegates to the Institute will witness a performance of the Kingsland Marionettes in the afternoon, and of the

play, "Once In A Lifetime," produced by the York Little Theatre in the evening.

A University of Maryland student conducts a novel service that is a distinct snap. During lectures he keeps listeners from dozing off by cracking his fingers and snapping them.

### LOST

A gold Hamilton wrist watch was lost Tuesday afternoon in or around the gymnasium at Men's College. The finder will receive a reward if the watch is returned to Cecil C. Garvin, Box 394, University of Delaware.

"It makes me madder than heck."

## Carole Lombard says: "Advised by my singing coach, I changed to Luckies"

"In my new picture 'Swing High, Swing Low' I sing a song for the first time since I have been on the screen. To do this, I spent months taking singing lessons. And with this added strain, my throat was not in good shape. My singing coach suggested that when choosing cigarettes, I select a light smoke. And so I changed to Luckies. Since then I've found that a light smoke and my throat get along together just fine."

*Carole Lombard*

CURRENTLY STARRING IN PARAMOUNT PICTURES' "SWING HIGH, SWING LOW"

THE FINEST TOBACCOS—  
"THE CREAM OF THE CROP"

An independent survey was made recently among professional men and women—lawyers, doctors, lecturers, scientists, etc. Of those who said they smoke cigarettes, more than 87% stated they personally prefer a light smoke.

Miss Lombard verifies the wisdom of this preference, and so do other leading artists of the radio, stage, screen and opera. Their voices are their fortunes. That's why so many of them smoke Luckies. You, too, can have the throat protection of Luckies—a light smoke, free of certain harsh irritants removed by the exclusive process "It's Toasted". Luckies are gentle on the throat.

## W.C.D. Alumnae Will Sponsor 'Rembrandt'

The Alumnae Association of the Women's College will sponsor the presentation of the motion picture, *Rembrandt*, at the State Theatre Monday and Tuesday. Proceeds will go to the Benefit Student Loan Fund.

Tickets for the picture may be purchased at the Library desk, Science Hall, Room 5, Rhodes Drug Store, or from any Alumnae Association member. The tickets cost 30 cents each.

In connection with the picture, a selection of Rembrandt prints is on exhibit in the Library hall. The library also has three portfolios and a book containing all of Rembrandt's works.

The motion picture is a biography of Rembrandt. It follows him as he paints his first pictures, and continues as he marries, becomes destitute and trades his last few coins for some paint in order to make one of his famous self-portraits.

Officers of the Alumnae Association are: President, Nellie P. Lawton, '28; vice president, A. Estella Kite Warrington, '25; executive secretary, Edith A. McDougale, '18; corresponding secretary, Blanche Malcom Bicking, '29; recording secretary, Caroline J. Cobb, '35; treasurer, M. Elizabeth Cloud, '33.

## Expert Will Speak to T.B.P.

Mr. William Stanier, Transmission expert of the duPont Company and a member of the Delaware Alpha Chapter of the Tau Beta Pi, will speak at a meeting of the A.S.M.E. Club next Tuesday. The meeting will be held in Room 308 of Evans Hall starting at 7 o'clock, and Wilmer K. Benson, president of the Club, will preside.

## Tau Beta Pi Will Meet on March 13

The initiation of undergraduate and graduate candidates into the Tau Beta Pi, the honorary engineering fraternity, will be held on Saturday, March 13th, in Old College. The initiation will begin at 4.45 p. m. and a banquet will follow at 6 p. m. Bruce Roberts, of the 1938 class, will be the only student to be initiated.

The principal speaker of the evening will be Mr. Nevin E. Funk, Vice President of the Philadelphia Electric Company, who will talk on the subject: "What Makes the Engineer." Mr. Funk is prominent in the public utilities field and will discuss especially the relationship existing between engineering and business.

Wilmer K. Benson will preside at the meeting. Professor Leo Blumberg, of the Engineering School, is faculty adviser of the Tau Beta Pi.

## Twelve Students in Dean Smith Contest

Only three weeks remain for aspirants to the Dean Laurence Smith prize of \$50 for an original one-act play to submit their completed manuscripts. The contest closes on April 1.

The 12 students who have signified their intentions of entering the contest are: Jacob Kreshtool, '39; Percy Roberts, '40; Jane Trent, '40; Jeanne M. Davis, '40; Marshall McCully, '37; Herbert Warburton, '38; Thomas Warren, '38; Collins Seitz, '37; Robert J. Wilson, '39; Joseph Dannenberg, '40; John Swenehart, '40; and Emily Carr, '37.

The manuscripts must be submitted on a standard form which may be obtained from Professor C. R. Kase, director of the contest, in Mitchell Hall. Contestants are advised to submit summaries of their plays to the director for criticism and suggestions.

The prize was established as a part of the program at the University to make dramatics as self-sustaining as possible. The "Workshop" policy has been followed in the development of dramatics, so that now students do everything themselves in connection with the production of plays except writing them.

Each play must have a playing time of not less than 20 nor more than 45 minutes. The entrant's name must not appear on the play

itself but on a separate sheet together with the name of the play. According to Professor Kase,

several of the plays show possibilities and may be produced sometime this spring or next fall.

# Humming right along

All over the country, you hear more people mention the refreshing mildness and the pleasing taste and aroma of Chesterfield cigarettes.

You hear somebody compliment Chesterfields at a party. Another time, the grocer tells you it's a darn good cigarette. Or you see a group of men on a street corner, most of 'em smoking Chesterfields.

Because they have what smokers like, Chesterfields are humming right along..

# They Satisfy
