Tau Beta Pi Elects Officers of 48-49

Fourteen Men Pledged After Smoker Mar. 18

The Delaware Alpha Chapter of Tau Beta Pi, the national honorary engineering fraternity, in a recent meeting elected new officers for the year 1948-49. The society chose Jim Clements, popular chemical engineer in the class of 1949, as President, and Bob Campbell, well known football personality, as vice-president. Elected to the position of corresponding-secretary, was Dan Duhamell, and Jack McDonough was elected to the post of recording-secretary. Bob Hunter was elected as cataloger. The retiring officers of the Society are Arnold Shueller, president, Lou Larakos, vice president, Hun Sun Ling, corresponding-secretary, and A. J. Shank, recording-secretary.

One of the first jobs of these newly elected officers was to hold a smoker for the men eligible for pledgeship to the fraternity. This was held on March 8 with many faculty and student members attending as well as the prospective pledges, and featured a football movie and quiz show topped off by refreshments and a general "bull-session."

From the large group of scholastically eligible men, the following seniors were selected to be pledges: Paul C. Harrison, Fred W. Moore, and Harry Pollock. From the Junior Class eleven men were selected including William F. Lindell, G. F. Moore, J. J. Weinstock, D. E. Parker, H. S. Slack, H. H. Stayton, S. G. Lemon, M. M. Carpenter, J. F. Waples, Nathan Edelberg, and J. W. Williams. These men are to be congratulated for their high scholastic standing, unquestioned integrity, breadth of interest both inside and outside of engineering, and exemplary character, all of which are requirements of consideration for membership in the Tau Beta Pi Fraternity.

Public and Social Events Calendar

- Mar. 20—RSSO Dance — Brown Hall, 8 p.m.
- Mar. 20—Ag Club Father-Son Banquet—Old College Dining Hall, 6 p.m.
- Mar. 20—Delaware Library Association Meeting—Women's Faculty Club, 9:30 a.m.-1:00 p.m.; dinner at 12 noon, Kent Hall.
- Mar. 22—Hillel Meeting, Old College Lounge, 7:15 p.m.
- Mar. 23—Newman Club Meeting, Old College Lounge, 7:00 p.m.
- Mar. 24—University Women's Club Meeting — Old College Lounge, 8:00 p.m.
- Mar. 24—Alpha Sigma Delta Meeting—Brown Hall, 7:00 p.m.
- Mar. 25 and 26—E-52 Players, Playbill, Mitchell Hall, 8:15 p.m.
- Mar. 25—Delta Sigma Meeting, Old College Lounge, 7:30 p.m.
- Mar. 26—Theta Chi Formal Dance, 9:00 p.m.
- Mar. 29—Hillel Meeting—Old College Lounge, 7 p.m.
- Mar. 30—Newman Club—Old College Lounge, 7 p.m.
- Mar. 30—Phi Kappa Phi Business Meeting—Chemistry Auditorium, 5 p.m.
- Mar. 31—Alpha Sigma Delta Meeting—Old College Lounge, 7 p.m.
- April 1—Yacht Club Recitation Hall, 7:15 p.m.
- April 1—Army Day Program.
- April 1—Newark Music Society—Mitchell Hall, 8:00 p.m.
- April 1—Sigma Nu—Old College Dining Hall, 6:00 p.m.
- April 1—IVCF Meeting—Old College Lounge, 7:00 p.m.
- April 2—Freshman Formal Dance—Women's Gymnasium, 9 p.m.
- April 5-10—Spring Recess.

General L. Jaynes Visits Department

Major General Lawrence C. Jaynes of First Army headquarters, in a visit to the University of Delaware's military department Tuesday, March 8, called upon Dr. William S. Carlson, president of the University, and visited the entire ROTC installation of the University.

General Jaynes is commanding general of the New York-New Jersey-Delaware Military District of the First Army and is directly in charge of all ROTC, National Guard and Reserve components in those states. It was his first visit to Delaware since taking over the command last December. He previously had been in command of the Mediterranean theatre.

Four other officers of his staff accompanied General Jaynes to the University.

K. Seligman Cited

Kurt L. Seligman, of Arden, a cadet major in the Reserve Officer's Training Corps at the University, has been designated a distinguished military student. A joint committee of University authorities and members of the military department made the announcement yesterday in special orders issued by the military department.

Major Seligman is the third student to be so designated in the history of the University. The two previous recipients were Robert H. Papy and Phillip R. Tatnall.

A senior in chemistry, Seligman.

Delawareans to Go To College U.N.

Dean Daugherty Chooses Conference Delegates

The University of Delaware has been one of several colleges chosen to be represented at the National Intercollegiate Assembly of the United Nations which will be held at the University of Chicago on March 24, 25, and 26. Fifty-seven colleges from coast to coast including Princeton, Vassar, and Smith will send delegates.

The students, chosen by Dean J. Fenton Daugherty, are Dolores Tondat, president of the International Relations Club, Eugene Fisler, history major, and Lou Cox, political science major. They will represent Saudi Arabia at the conference.

As a nation-wide assembly of students representing the various countries, the model U.N. has been planned to promote understanding of the United Nations by affording students an opportunity to work within a facsimile of its structure, to create a nation-wide forum of students for the discussion of international problems, to bring students together with men well-informed in national and foreign affairs, and to stimulate study and understanding of various cultural, political and economic differences.

Three topics of vital interest will be discussed in the General Assembly. First is the question of trusteeship in regard to the disposition of former Italian Colonies. Lou Cox will be prepared for discussion on this question. Second will be a discussion pertaining to the International Bill of Human Rights for which Dolores Tondat is preparing. And third will be the dispute concerning the Veto Power of the Big Five. Eugene Fisler will discuss this topic.

The Security Council will discuss the Spanish question, with attention focused upon the relationships of "Sovereign Equality," "Domestic Jurisdiction," and the "Threat to Peace."

Dr. Felix Oppenheim, assistant professor of political science, is acting as faculty advisor and will accompany the delegates to Chicago.

Population Survey Of State Started

Fisher Predicts Great Possibilities for Future

A statistical survey of the population of the State of Delaware is the first major project of a newly formed statistics laboratory at the University of Delaware.

Dr. W. Halder Fisher, assistant professor of Economics, Dr. Frederick B. Parker, Chairman of the Department of Sociology, and Mrs. Sylvia Kaskey, a statistician, are combining efforts on the project, which will require two years to complete.

Originally serving as a central location for the more advantageous use of calculating machines from a few departments, the unit has enlarged its scope to include use by all 14 departments in the School of Arts and Science.

Dr. Fisher, head of the laboratory, has predicted, that the unit has great possibilities for the future, but development will be slow until the idiosyncrasies of operation are familiar to a larger percentage of the University faculty. Currently a pool of qualified personnel is being formed.

At present the unit can handle the flow of students and the ordinary work required by the administration.

Research Planned

This summer it is planned to open the facilities to the research problems of the faculty. A number of research fellowships will be made available to the faculty during the summer recess.

Meanwhile, as the possibilities of such a unit become realized more fully, its use is becoming more widespread. Graduate and extension students in particular are making use of it in the solution of complex data problems.

The advent of the unit made possible the central administration of all the statistics courses taught at the University. Because of its addition, several new courses in statistics have been added to the curriculum and have been made requirements in some courses of study. At present, the only prerequisite to the study of statistics is a course in college algebra.

Presently the laboratory is being used extensively by both the Physical Education division and the School of Agriculture.

Realizing a definite need exists for the statistical interpretation of data and the work that could be done on statistical surveys of value to the community, Dr. Fisher is interested in enlarging the facilities to include services of this kind.

Alpha Phi Omega Wants Del. Chapter

At the March 9 meeting of Alpha Phi Omega, National Scouting Fraternity, the following men were elected to office: Vice president, Ed Thompson; treasurer, Paul Thompson; historian, Ben Raphael. Bruce Ayars and Bill Bush were elected president and secretary, respectively, at an earlier meeting.

The fraternity has announced that the Red Cross drive is coming to an end this weekend. The drive was termed a success by Morgan Homewood, Service Projects chairman of the organization.

The next meeting of Alpha Phi Omega will be held on Tuesday, March 23, at 7:30 p.m., in Recitation Hall. Several prominent scout leaders from this area will lead a discussion on the potentialities of an active chapter of Alpha Phi Omega on the Delaware campus. All men who are former scouts are cordially invited to attend.

Delta Sigmas Go To Fraternity Banquet

Founders Day Banquet Given by Delta Tau Delta

On Saturday, March 13th, six members of the Delta Sigma attended the Founder's Day Banquet of the Delta Tau Delta Fraternity at the University Club in Philadelphia. Headed by Allen Wise, president of the local fraternity, the six delegates acted as representatives to Delta Tau Delta, the national fraternity with which they hope to become affiliated. In addition to the president, those who attended were Dick Baker, Bob Day, Don Ewing, Carl Noetzel and Leon Stayton.

The purpose of the banquet was to commemorate the founding of Delta Tau Delta at Bethany College, West Virginia, in 1859. This event is celebrated by undergraduate and alumni chapters of the fraternity throughout the country.

After the introduction of the local group by their alumni adviser, Mr. Phil Robinson, who is a graduate of Tufts College, speeches discussing the purpose of the fraternity on the college campus were delivered by several well-known men. Among these was Dr. Piersall, a Delta Tau Delta alumnus and one of the most famous physicians in America today.

Following the banquet the representatives of Delta Sigma were entertained by the Omega Chapter of Delta Tau Delta at the University of Pennsylvania.

Future plans of the local group include a smoker to be held within the next two weeks, and a party at the home of its treasurer, Leon Stayton.

Brass Sextet And Choir Tours Del.

Concerts Being Given In Sussex County Schools

The University Choir and Brass Sextet is now touring downstate towns. Perhaps the largest undertaking of the Music Department this year, the tour commenced Wednesday afternoon with a journey to Ocean View, where an evening concert was given at Lord Baltimore School. Friday evening the groups will return to Newark, after presenting a program at Georgetown. Other towns slated for concerts during the three-day period are Selbyville, Millsboro, Rehoboth, Lewes, Laurel, Seaford, Bridgeville and Milton.

One interesting feature of the tour is that residents of the various towns have offered to be overnight and dinner hosts to the members of the Choir and Sextet. This hospitality should prove a welcome departure from the usual lack of personal contact between performer and audience.

The following students are taking part in the tour: Choir Personnel: Gertrude Baynard, Jane Barr, Temma Bell, Barbara Bowers, Barbara Boyer, Barbara Carothers, Roberta Carothers, Iris Clarke, Maida Frye, Jo Anne Garber, Mary Gladding, Wilhelmina Griffin, Jean Hillman, Virginia Loomis, Betty Maynard, Joan Swain, Onetia Tawes, Mary Wetzel, Alfred Carey, William Dick, Anthony Di Luchio, Whitney Dough, John Dunn, Edward Engel, Francis Gause, Jr., Harry Heyl, Joseph Newman, Irving Shuren, Everitt Smith, Leon Tabb and Keith Tracy. Brass Sextet Personnel: Lancy Boyce, John Clough, Whitney Dough, Robert Muhler, John Schmidhauser and Gordon St. Mary.

Advertising Exams Given Next Month

Aim to Attract Youth Into Advt. Profession

The second annual examinations to test aptitudes of college seniors and other young men and young women who seek careers in the advertising profession will be held throughout the United States next month. The tests are under auspices of the American Association of Advertising Agencies.

Examinations in the Philadelphia area will be conducted by the Philadelphia Chapter of the Association's Atlantic Council on two successive Saturdays, April 17 and 24, in the John Wanamaker Store, beginning at 9:30 a.m. on both days.

The purpose of the examinations is two-fold—to attract young people of high calibre to the advertising profession, and to give them an opportunity to receive expert appraisal of their aptitudes in seven major types of work upon which the chances of their professional success in advertising will depend.

Successful completion of the examinations is not a guarantee that the examinees will immediately be placed in jobs in advertising. Rather it will put them into a select circle from which advertising agencies may draw promising material to fill vacancies that may occur in their organizations. To that end the names of the successful examinees and the professional ratings of their aptitudes will be given to advertising agencies. The examinees, too, will be advised of the manner in which they acquit themselves in the two-day tests.

The Atlantic Council of the American Association of Advertising Agencies, of which Wesley M. Ecoff, of Ecoff & James, Inc., is chairman, has organized a special committee headed by A. Edward Morgan, vice president of The Richard A. Foley Advertising Agency, Inc., to formulate and carry out the details.

Cheerleaders Hold Contests For Posts

Schwind, Gordy, Perine Win in Final Tryouts

Wednesday, March 10, the University of Delaware cheerleading squad made final cuts for new members. Following the custom of previous years, preliminary tryouts were held shortly after football season and the candidates chosen were used during basketball season. In this way it can be determined whether the students possess the qualifications, coordination, learning ability, and personality, which are necessary for a cheerleader. The final tryouts resulted in the election of three regulars, Eleanor Schwind, Barbara Gordy and Park Perine, and one substitute, Jean Hemphill. The latter is a sophomore; all the rest are freshmen.

Present at the meeting were the co-captains of last year's squad, Ann Wise and Bruce Ayars; the new co-captains, Jane Gordan and Bauduy Grier; and five remaining regulars, Shirley Taylor, Janet Myers, George Glynn, Charles Leberg and Al Graves. After final selections were made, Bruce Ayars gave a short talk on the ethics of cheerleading and the new co-captains discussed plans for next football season. Led by Grier, who displayed such spectacular tumbling last fall, all the cheerleaders will be instructed in this phase of cheerleading in the spring practice. It is hoped that the added attraction of tumbling will spark the enthusiasm of the student body in what promises to be a terrific football season.

The Geyser

JIM REAGAN

They pulled a sleeper on us last week—"Thumbnail Sketches" made its debut without our getting a chance to say howdy. With weekly sketches of campus personalities and Bill Wright's special features about campus life we think this "school spirit" everybody's talking about will have a lot more chance to grow—the same thing should come out of this new Student Union. We need a chance to know our school, its people and its traditions, and a place where we can meet, talk, gulp cokes, and see more than the same twenty faces ornamenting the Deluxe every night. Maybe the mob will get around to starting a few traditions of their own.

Well, Delaware now has another national fraternity—Delta Eta local has formally become Delta Eta Chapter of Pi Kappa Alpha Fraternity. The Saturday afternoon serenaders were boys from George Washington University (Delta Alpha Chapter) and the University of Pennsylvania (Beta Pi Chapter) down to give the new members a royal send-off. Just as well our subdebs didn't stay long enough to meet them—Delaware males might have an even rougher time of it. Incidentally, with men who know beer the best, it's Washington House 2 to 1.

Story of the week—Remember last week we mentioned Ed Clark's ping-pong prowess. Well, never one for false modesty, the boy stated bluntly and clearly that he was champion of the school—and (after the smoke had cleared) he made it stick! We've never seen the bulletin board so full of comments, but Ed took on all comers and then proceeded to beat the Fraternity champion, Mark Jacoby. Just like a cross between Horatio Alger and Alexander Botts.

New look on campus—Carolyn Bullis and Joanne Stetser staked their claims . . . Joan McKinney and Horace Prall revealed that they've been Mr. and Mrs. since September 1. . . . Theta Chi beards finally heavy enough to see (we knew they bred men, but didn't figure it took that long). . . . Pi Kaps sporting their new pins—uniform of the day is sweaters. . . . Dick Lindsey's new Hudson. . . . Bob Gregory's orange and black suit. . . . Nightwear for that fire drill on lower campus—don't give up hope; they don't always look like that. . . . Ann Furth holding a red carnation. . . . Lee Perry answering in accounting via card (Seems as though he's Phi Kappa Tau and his instructor is Miss Tierney).

We're very pleased over the new seriousness on campus—behind some of the war discussion lies some intelligent thought. We can make the load a little lighter though with this quote from the "Quartermaster Review"—"For light sleepers, here's news. Science has taken the tickle out of feathers in the Arctic sleeping bag. Chemically-curved feathers do the tricks, and provide more warmth in the bargain."

Incidentally, Sigma Nu feels the same way we do—just to keep the right atmosphere in their bar they've lettered a beautiful sign—"The future of America lies in the hands of college boys—drink ginger ale." That must cost Canada Dry at least fifty bottles—and we hope it wasn't mixer.

And now, Kiddies, we turn crusader, so read on if you dare— Item number one on the docket is freshman regulations. We feel that they're a necessary part of the tradition in any school—and it seems as if the tougher they are the more spirit they build up. Why this is we don't know—but as long as that's the way it is, let's do the job right. Freshman-Sophomore rivalry is the big thing. So if you've got any ideas pass them along to Bill Nash—let's try to stay away from the namby-pamby remnants of the pre-war job.

Item number two is grass and paths. This campus is planned so that green grass is an integral part of the architecture. This calls for cooperation and adequate paving by the school and use of the paving by the students. The walks we now have were planned for about 700 students, and it's pretty rough bucking traffic at nine in the morning. There are a few places where that compulsory swimming comes in handy, too. Somebody ought to get hot on this, but soon!

Weather Angle

By WILLIAM M. BERGMAN, 3rd
March 18th to March 28th, 1948

March 18th to 20th will be overcast and warm with scattered showers likely. March 21st will be partly cloudy and windy with snow flurries likely in the early morning; much colder weather will take place.

March 22nd to 26th will be fair and cold with temperatures around 20 F. March 27th will have increasing cloudiness and warmer with light snow or sleet in the evening. March 28th, Easter Sunday, will have light snow or sleet which will change to rain.

"Could you wash it all but the cuffs?"

LETTERS TO THE EDITOR

Dear Editor:

I should like to inform the girls who are taking engineering that my poem last week was not written as an insult. If it was taken as such, I apologize.

My poem this week concerns those dreaded eight o'clock classes.

Eight o'clock classes are all right for some, But they won't mix with mid-night fun.

It's mighty hard to stay in your seat,

While the room keeps revolving around your feet.

And after those dates with that certain little stuff,

Those eight o'clock classes can really be rough.

Those all night cardplayers always blow their top.

When those early morning classes bring their games to a stop.

The "night owls," who have eight o'clocks, are continually beefing.

After all they should be back in their sacks peacefully sleeping.

I know the situation really isn't this bad,

But if they ever stop eight o'clocks I know I won't get mad.

Bill Hart.

Campusodes

By BILL WRIGHT

We walked into the Delta Pi House the other night in search of anything, and, by gum, we found it. . . . Sitting at a table, bathed in the soft light of the juke box, was a little fellow with a big bow tie, a glass of beer, and a loose tongue. He had a theory and we, a sympathetic ear, so that in no time at all we were being led through a maze of logical steps to a solution of a major problem on this campus—namely, how to get a date, with three guys to every gal.

He began his discourse with commonplace things such as appeal and personality, but gradually he led us up to the point where he could launch into his own unique logic. Abruptly he switched over.

"Listen, Joe," he said, "How many senses has a girl got?"

"Six," we replied, automatically.

"Right. And most guys that have dates only appeal to one sense, right?"

"Right!"

"Right. So, suppose you're ugly, you can appeal to the other five. Then you're in, check?"

"Check!"

"Right. Now—take the ear and ask yourself, 'Do you sound like a man?' If you don't you can fix it. Every night, before you hit the sack, cough for fifteen minutes. In no time at all your voice will be low, husky and as sexy as Charles Boyer's. That's number one. Number two—'Do you feel like a man?' Men are hard and bristly. So all you have to do is wear a tweed suit lined with leather and pull a Theta Chi. Number three—'Do you smell like a man?' That's the easiest. Just get a bottle of Gymnasium No. 5, or hang your suit in the locker room for a week."

We glanced at him quickly, but he was in dead earnest.

"Last of all," he continued, "'Do you taste—'" he stopped. "Speaking of taste," he said, "this beer is lousy."

Not being one to miss an opportunity, we agreed with him and excused ourself. Before we left, however, we had to ask what we considered a very pertinent question.

"Why," said we, "don't you have a date?"

He shook his head sadly, and all he said was, "I'm ugly."

CORRECTION

Dr. Oppenheim did not give a talk on Italy as was stated in last week's Review. This article on Italy appeared in the 1947-48 winter edition of the Public Opinion Quarterly.

SPORTS

In the Henhouse

By SCOTTY MURDOCK

This week the inter-dorm tournament will have reached its climax when the three top teams, New Castle, Sussex, and the Commuters vie for top honors. First game of the week will be Sussex vs. New Castle on Wednesday night at 7. The winner of the game will meet the Commuters on Thursday night at the same time. Everyone is invited to these games including the boys.

The swimming meet announced two weeks ago has undergone several changes. The final date has been set running from March 23rd and 25th to March 30th and April 1st. The meet will be run on an interclass basis with a minimum of two practices required. All interested parties are to contact their class representatives who are the following: Freshmen, Ruth Clements; sophomores, Mary Frances Gordy; juniors, Shirley Taylor; seniors, Beverly Deidrick.

Events of the meet will be centered around form events, novelty events, competition, and diving.

Hens Swim To 8th Place in Meet Sat.

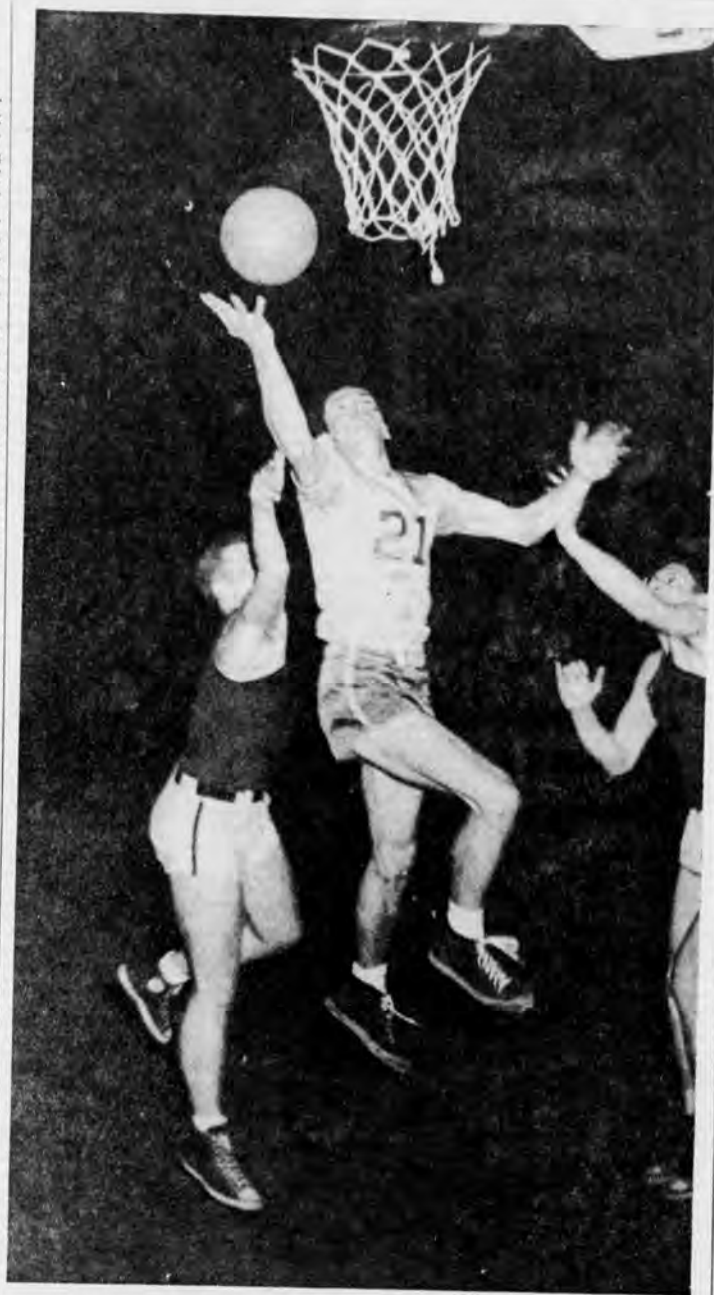

Cofer Sees Last Action As College Career Ends

Harry Rawstrom's Hen swimmers wound up a rather rough schedule last Saturday at the Rutgers pool by winding up eighth among the eleven teams represented, with a total of seven points. In their seasonal standings, the Birds copped three of eight dual meets, and finished fourth in the Middle Atlantic meet held two weeks ago in the F. & M. pool. This is the best showing a Hen team has shown since Rawstrom arrived after the war, and with only one departure scheduled from among this year's personnel, it is apparent that Rawstrom's building policy will be paying off next year.

Captain Bob Cofer saw his last action in the tank for the Hens last Saturday and along with most of the team, was eliminated in the afternoon preliminaries. On the basis of his point total this year, and his performances in past seasons, the husky Delaware City athlete remains as one of the finest swimmers in Hen tank history. He leaves with his name still on the record boards in Taylor Pool, sharing with Bob Bush and Jack Dougherty, the school 300 yard medley relay record. In addition, Cofer has cracked the existing school records in the 50 and 100 yard freestyle marks on several occasions, but failed to establish records in collegiate competition. Rawstrom anticipates quite a bit of trouble replacing Cofer both as a sprinter and a captain.

Back again next year will be the remainder of the team, including Baudy Grier, Lew Ward, Murray Campbell, Frank Craig, Bob Kelleher, Jim Crumlish, Jim Baird, Jack Smith, and Hugh Dougherty. Rawstrom has made it a policy to train his team on through the spring, and these veterans will be working three days a week till the term ends. The policy last year was instrumental in enabling most of the mermen to do a lot of paring on their times, and a proportionate improvement this year should pretty well fortify things for next season.

Rawstrom is anticipating assimilating most of his frosh team into the varsity next season. Several of his yearlings will probably be holding down starting berths, especially in the sprint department. Captain Fred Lewis, Cappy Bierman, Gary Carpenter, Max Karrer, Bill Duncan, Al Zabenko, and Dick Young show plenty of promise. Backstrokers Joe Moore and Dick Young, the latter a transfer student ineligible this year, should be a big help to Campbell and Ward, and Bill Brady and John Koch are both capable of earning starting assignments in the breast stroke. Koch especially looks like a future star, and may well turn out to be the man to crack Tom Weldin's 200 yard breast stroke record set in 1940.

Jim Thomas, No. 21, was the Freshman basketball team's high scorer this season, and is one of the top prospects for next year's varsity. Thomas is a 6:02 sophomore from P. S. duPont.

Court Prospects Bright For 1948-49 Campaign

The 1947-48 edition of University of Delaware basketball team deserves much praise and recognition. Coach Brunansky's courtmen supplied Delaware fans all the excitement and thrills of the game. This season's team had no individual stars. The boys combined brilliant ball-handling with dashing speed to set up scoring opportunities. Not once did anyone try to dope the headlines. Loyal Delawareans will mourn the loss of Captain Jerry Bowlus, "Beetle" Runcie, and Vic Wood all three contributed greatly to the past season's success. But, let us rest assured that such Hen standouts as "Reds" McFadden, Billy Cole, Bill Nash, Bob Gregory, "Ace" Hoffstein, and Bill Owen will be back to form the nucleus of another fighting Delaware aggregation next year.

A survey of the season's score books showed Vic Wood as individual high scorer with 150 points. Following close behind were McFadden, Runcie, Bowlus, and Cole—the Delaware ball-hawkers and playmakers—with 141, 139, 139, and 129 points respectively. Other consistent contributors to the scoring column include Nash, who shared the pivot spot with Wood with 100 points each, Hoffstein, the clutch man, with 31, and Bill Owen with 22 tallies.

Coach Bob Sieman's Freshman Basketball captured the new Freshman MASCA Conference title by virtue of a 9-1 record in league play. The chicks only conference loss was to Swarthmore on the Pennsylvania court 44-43. Non-league games brought the total vic-

tories to ten and the defeats to two, with Brown Prep in the season's opener taking the measure 61-47, and the Chick's rousing defeat of West Nottingham Academy 51-29.

Jim Thomas, former P. S. duPont star, supplied the spark to the yearlings as they amassed a total of 599 points to their opponents 481. Thomas personally accounted for 115 tallies.

Coach Bob Sieman expressed himself as well-pleased with the season's record, and credited much of the squad's success to the smooth-functioning teamwork exhibited by his troops. Coach Brunansky's varsity squad is expected to inherit a number of promising candidates next year from this season's freshman team. In addition to Thomas, the senior mentor will have his eye on centers Jim Middleton and Fred Kelleher, guards Joe Kwiatkowski, Dick Wells, and Curt Turner, and forwards Art Sullivan, Frank Albera, and Chick Daley.

Frosh Rifle Team Beaten by Maine U.

The U. of D. Freshman Rifle Team was beaten by the University of Maine Freshman Rifle Team 1775 to 1745, in a postal match. The team is practicing three afternoons a week—Monday, Wednesday and Friday from 2 until 5 p. m., and would welcome any additional members who have an interest in shooting.

SPORT SHOTS

DON REYNOLDS

With the arrival of warm breezes, more rain, robins, and football practice, spring is just around the corner. Coach Murray's troops captured Frazer Field Monday afternoon for their first scrimmage. Of course, this means that more and more students will be cutting those late afternoon classes for a gander at Mr. Murray's "new fangled" plays.

The first scrimmage saw the "white" team running a series of plays against the "blues," only this time the blues were out to stop those plays. The boys were tackling, and we mean they weren't fooling, either. Of course you can't say what combination will make up the first team, but some changes will be made. Tony Storti has been working out in the fullback slot along with "Marino" Stalloni and Ned King.

"Acadinnny" Smith continues to be the first string quarterback, as the team sweeps into its second week of spring practice, although Bill Otton, returning from last year's squad, Reds McFadden, and Frank Gutheridge have shown plenty of talent so far.

Meanwhile, Coach Joe Brunansky will have the problem of plugging the gap in the center of the line which resulted from the departure of Co-Captains Jack Messick and Moose Marusa. So far Jack Coulter and Teddy Youngling seem to be headed for the top spot in the battle for the right guard position, while Bob Glisson will probably get the call at the center post.

At the present time many of the boys are doing two things at once. They are dividing their time between football and either baseball, track, or lacrosse, and those who are plagued with afternoon classes have a tough time getting the time to practice for anything but football. Billy Cole, Reds McFadden, Phil Gutheridge, Larry O'Toole, and Tommy Silk are all trying to get in a few practice swings on the baseball diamond prior to the 4:30 football deadline.

With the possibility that Luke Selby and Freddy Schenck will not be going out to the baseball team, it looks like Reds McFadden may have a clear track towards nailing down the first base post, unless Lawrence Gillespie is shifted from catcher to the gateway sack. At second base, it may be a battle between Barney Runcie and Ace Hoffstein, since it seems altogether likely that Billy Cole will be shifted to third base, where he will have a struggle on his hands from "Newark's Own" Tom Silk. At the other infield spot, Bob Brodey, the soccer co-captain, is giving Jim Gilson

some anxious moments as the team goes through its first outdoor maneuvers.

The pitching staff is finding that these March winds don't help their control a bit. After getting the nack of putting that fast one in the right spot indoors they are finding the great outdoors an entirely different proposition. These boys face the problem of having to pitch 5 games in five days during the Southern trip. The team will probably leave Sunday night, the 3rd of April, in cars for Randolph-Macon, where they will play a game the next day. The following day they will play Lynchburg College in Lynchburg. The next two days they will be playing V.P.I. in Lexington, and they end up the trip at Richmond University on the 9th. Bob Sieman is trying to get another game for Saturday with a team in the Washington area, possibly Georgetown.

This means that these 15 players who will go on the trip will play plenty of baseball that week (providing Delaware's weather doesn't follow them south). The pitchers will really have a weak point, because Coach Martin will only be able to take four or five with the team.

Shifting over to lacrosse, the boys of slap and crack fame have also braved the great outdoors. Gordy Bierman faces the task of getting his boys ready for the opening game with West Chester on the 14th of April, football practice or not. Moon Mullen, Frank Gutheridge, and some more of the boys don't get enough of that rough stuff on the gridiron, they look around for more.

Meanwhile Coach Steer's track team, which failed to place in the big tournament in Baltimore last Saturday night, is busy preparing for their first meet, a little over a month from now. It is quite probable that Jack Miller will be trying out for the shot put, even instead of going out for baseball.

The latest scoop on the basketball team is the individual scoring records. The top man this year was big Vic Wood, who turned in a total of 150 points to give him the top spot over Jimmy McFadden and Barney Runcie, who tallied 141 and 139 points respectively. Captain Jerry Bowlus was a close fourth with 138 points. Of these top scorers, the Hens will lose three of the four top men, which will present quite a problem for the 48-49 season.

Wood	150
McFadden	141
Runcie	139
Bowlus	138
Cole	129
Nash	100
Hoffstein	31
Owen	22

Ed Clark Captures Ping Pong Diadem

The table tennis champion of the University of Delaware is Ed Clark, of Harter Hall, who won the 1948 title by defeating Mark Jacoby of Alpha Epsilon Pi 3 games to 2 last Thursday night at Taylor Gym.

Clark was victorious over Ben Hurd, Dick Edwards, Bob Gregory, Larry Phillips, and Ed Haines, and was picked to go into the finals against Jacoby, the fraternity champion, who had reached the finals by a 3-2 victory over Bob McHenry of Theta Chi, the frat runner-up.

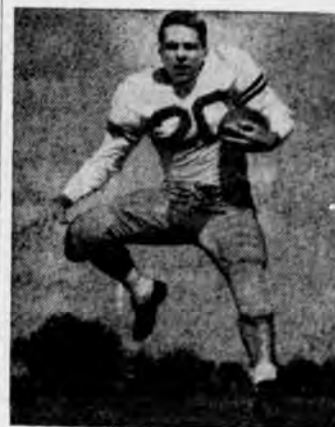

Clark's name will be placed on a plaque in the Field House sponsored by the Intra-Mural program. Jacoby's victory in the Inter-Frat playoffs will bring a I. F. trophy to the A. E. Pi house.

The I. F. Junior championship award of a dozen table tennis balls was won by "Buckie" Thompson of Theta Chi.

CONTESTANTS:

Dorms: Ed Clark, Ben Hurd, Dick Edwards, Bob Gregory, Larry Phillips, Ed Haines.

Frats: Mark Jacoby, Bob McHenry, Holton, Roland Young, Carl Noetzel, Jim Reagan, Joe Crampton, George Frederick.

Wee Willy Cole, Delaware's pocket edition of the famous Frank Merriwell, can be seen daily scampering between his turns with the willow in baseball batting practice, and his post in Billy Murray's varsity grid backfield. The camp's busiest man is a first string half-back as well as a regular infielder with the diamondmen. The pint-sized star will have to "keep his laigs moovin'", however, if he is to beat his buddy Bill Nash out for the grid role and Tommy Silk for the starting third base slot on the diamond.

Progress Made On Rubber Research

Reports on Work Done By Engineers Presented

Progress on a synthetic rubber program, particularly in research on extractive distillation, was reported last Tuesday at a conference at the University of Delaware, attended by more than a score of industrial representatives.

The University's research work, sponsored by the Office of Rubber Reserve, was begun during the war and has been continued because of its importance in accumulating fundamental scientific data which will permit more economic operation of the plants which produce the butadiene used in making synthetic rubber.

Arrangements for the conference were made by Dr. Robert L. Pigford, chairman of the University's Department of Chemical Engineering. Represented on the campus today to receive the progress reports were the duPont Company, Atlantic Refining Company, Houdry Process Corporation, Gulf Oil Corporation, Sun Oil Company, Phillips Petroleum Company, Neches Butane Products Company, Pure Oil Company, Lummus Company, and Socony-Vacuum Oil Company, as well as the Office of Rubber Reserve.

Reports were given on the distillation and vapor-liquid equilibrium work carried out by Delaware's Chemical Engineering Department, by Dr. Allan P. Colburn, assistant to the president of the University, and Dr. Jack A. Gerster, assistant professor of chemical engineering, who have directed the program, and by four research fellows. These include Edward W. Grohse, Donald G. Jordan, Robert F. McCartney and Harvey J. Hauer. Mr. McCartney and Mr. Hauer, having completed their work on the project, now are with the DuPont Company's Ammonia Department.

In addition to the Delaware work, a report was given on a companion research program, being conducted for Rubber Reserve at the University of Texas, by Dr. John Griswold, professor of chemical engineering at that university. His work is on the conjugate phase relationships of hydrocarbons, furfural and water.

The Delaware research work has included studies of plate efficiency during the extractive distillation of isobutane-1-butene mixtures in the presence of furfural, using a specially constructed pilot plant distillation column. This column is located in a 50-foot tower on the Newark campus, with five landings for operation purposes.

Both experimental and theoretical work have been included in the study of vapor-liquid equilibrium. Experimental work has been carried out by Mr. Jordan, Thomas S. Mertes, now with Sun Oil Company, and Earl J. Pearce. Dr. Kurt Wohl, professor of chemical engineering, has been responsible for new theoretical work on thermodynamics of liquid mixtures, and this development is being utilized in the work.

New Member Of Del. Business Staff

The appointment of J. Frederick Mitchell of Wilmington as an assistant to the business administrator at the University of Delaware has been announced by Charles E. Grubb, business administrator.

Mr. Mitchell's duties include management of the college book store and post office, and supervision of bookkeeping for various student organizations.

Before assuming the new position he was associated with the Wilmington office of the Veterans Administration.

As a student at the University of Delaware, Mr. Mitchell was sophomore class president and basketball captain. He also was a letterman in baseball. Mr. Mitchell was commissioned by the Army after his graduation in 1942 and served throughout the war.

The business staff under Mr. Grubb also includes John A. Hodgson, assistant business administrator, and two other assistants to the administrator, Miss D. Marie Gregg and Ernest Overbey.

Miniature UN Seen At ISC Party Sat.

The party given by the International Students Club in Brown Hall last Saturday night was cited as being one of the most successful affairs to be presented since that dormitory was built. Not only did everyone present seem to enjoy himself, but the club members, who represent many different nationalities from all over the world, were able to take the opportunity to become better acquainted.

"Come dressed in the costume of your native country" was the order of the day given by Alfredo Berguido, Social Chairman. The result was that Brown Hall resembled for a few hours a miniature United Nations assembly. Couples representing China and Mexico, France and Greece, Sweden and India, and England and Panama could be seen dancing in the Brown Hall foyer.

The ice was broken by the entire group dancing the Mexican Raspa, which was demonstrated by Al Berguido and Peggy Munoz. Party games followed this fast start, and whatever ice had survived melted in this congenial atmosphere. Several exhibitions of the tango, bolero and samba were given by the Latin American members, followed by general dancing to the music of U. S., Latin American, and European composers.

The highlight of the evening came at 10 o'clock, when the club was treated to refreshments a la Sweden. Smorgasbord, prepared by Elsie Foulsham with the assistance of Mrs. Patterson, club sponsor, delighted the palates of East and West alike. Many varieties of pastry, vegetables, fish, and other delicacies were prepared in the Scandinavian style. The rest of the evening was spent dancing to recorded music.

An estimated 45 people were present, representing at least half that number of nationalities. Among the faculty members present were Mr. and Mrs. Bohning, Dr. and Mrs. Kurt Wohl, Mrs. Kakavas, and Miss Wolfskohl. The faculty advisers, Dr. and Mrs. Carlson, were unable to attend, since they were out of town.

W. B. Smith Speaks At DSCA Meeting

Wilbert B. Smith, executive secretary of the Wilmington Council of Churches, was the speaker at the monthly meeting of the Delaware Student Christian Association at the University of Delaware on Tuesday, March 8. His topic was "Our Stake in Palestine."

It was Mr. Smith's contention that the real answer to the solution of the Palestine problem was in the hands of the "American Christian" who should allow free immigration of larger quotas of Jewish refugees. In this way, he explained, other countries would follow our example and thus relieve the situation. He believes that a small but well organized group of Zionists in this country wishes to block such a move in order to further their own interests.

In the business meeting of the group, with Earl Tull presiding, it was announced that a committee consisting of two members and a faculty advisor would go to a Student Christian Conference to be held in Reading, Pa., this weekend.

Notice

There will be a meeting of the Golf team in the Physical Education building, second floor on Friday 19, at 1 P. M. The team will have a good schedule this year, and Coach Joe Brunansky will be hoping for a big turn out. Anyone who can shoot anywhere from the low seventies on up to anything will be welcome. We're looking for a big squad. Just one hitch, No Pro's allowed.

Fellowships To Be Given To Faculty

Recommendations For Awards Made by Carlson

The first faculty fellowships to encourage University of Delaware staff members to spend a major part of the summer on their own research projects, will be granted this year in a move to spur independent research on the campus. Dr. Allan P. Colburn, assistant to the president, announced yesterday.

Dr. Colburn explained that in the coming summer seven or eight fellowships, worth about \$400 each, will be granted to faculty members under a plan developed by the combined efforts of the University's committee on research, which he heads, and the newly-formed Institute of Delaware History and Culture, whose president is Dr. John A. Munroe. Dr. William S. Carlson, president of the University, proposed the program.

Fellowships will be open to any member of the University faculty who has no other regular duties during the summer or who can obtain leave from the other assignment. Recommendations for the awards will be made to Dr. Carlson by the Institute's executive committee within the fields covered by that group, and the other recommendations will be made by the committee on research. Dr. Colburn will receive the applications for both groups before April 1.

"The Institute of Delaware History and Culture and the committee on research are enthusiastic about this plan of faculty fellowships," according to Dr. Colburn. "They feel that new opportunities are thus afforded for some members of the staff to make significant progress on creative work they already have under way, as well as for others to initiate projects they have been contemplating."

Freshman Dance A Closed Affair

Lois Deiss and Lancy Boyce, co-chairmen for the freshman class, announce that the frosh dance previously scheduled as open to the whole school will be closed to all but freshmen and their dates. After a joint meeting of the class and dance committee chairmen and consultation with Dean Rextrew and Dean Daugherty, the decision to close the dance was made. It is hoped that, by doing this, the tradition of class dances will be re-established on the campus and unity fostered within the freshman class.

The spring theme will be carried out and the decorations and music will be supplied by Ken Janney and his band. Ken Janney is well known around these parts for the prom music which he's played in various schools in Delaware and Pennsylvania. Tickets will go on sale shortly at \$2.40 per couple, tax included. The dance will be held April 2, 1948, in the Women's Gym.

NOTICE

Will all members of the publicity, decoration, and ticket committees of the Sophomore Class, please notify President Sam Talucci, Box 1107, of their campus address and phone number.

Parsons Speaks To Newman Clubbers

Communion Breakfast Given at Restaurant

Calling for "a sense of responsibility for something over and above ourselves," the Rev. Wilfrid J. Parsons, speaking at the University of Delaware Sunday, presented a challenge to Catholic college students to repair by example the damage done by the rising tide of secularism in the United States.

Father Parsons, professor of sociology and politics at Catholic University, spoke at a communion breakfast of the University of Delaware Newman Club at the Academy Restaurant in Newark.

"Secularism had its start in American colleges about 40 years ago," he said, "and today its effect can be seen in efforts to divorce education and religion. Dozens of decisions handed down by the Supreme Court," he said, "have stated in effect that this is a Christian country."

In conclusion he said that secularism is directly opposed to the ideals which we as Americans believe in.

The Most Rev. Edmond J. Fitzmaurice, a guest, praised the group and its faculty moderator, Miss Cecilia Tierney, for the work it is doing.

Red Cross Drive To Be Completed Sun.

Upper Campus Gives \$100 In Current Campaign

Over 438 men student residents contributed to the drive during the past week making it one of the most successful campaigns in the past few years. The fine response was due mostly to the excellent job of solicitation which was organized this year by Alpha Phi Omega, national scouting and service fraternity. This group undertook the job as part of their program to improve the university through serving worthwhile projects. The president of the local group, which was just organized a few weeks ago, is Bruce Ayars, while Morgan Homewood was special committee chairman in charge of the present Red Cross campaign.

The total amount raised by the men students was \$108.76. Groups which had 100% of their membership contributing are: Alpha Epsilon Pi, Alpha Sigma Delta, and Delta Sigma. Other groups making contributions are Sigma Nu, Sigma Phi Epsilon, Kappa Alpha, Theta Chi, Delta Eta, Phi Kappa Tau, Brown Hall, Harter Hall, Windsor Hall, Eaton Hall, Hanover Hall, and the Training House.

No report has come in from the Women's Colleges yet.

Dr. R. O. Bausman, 1948 Fund Campaign Chairman for the Newark area, expressed his gratitude to members of Alpha Phi Omega and to all solicitors of the groups contributing for their fine response in making the current drive so successful.

Added State Aid Need-Heuberger

Increased appropriations from the State to carry on agricultural research in Delaware are necessary if the work is to be maintained at its present level or expanded, Dr. John W. Heuberger, professor of plant pathology at the University of Delaware, told the Rehoboth Kiwanis Club Friday night, March 12, at its annual "Farmers' Night" program in the Traveler's Restaurant.

Dr. Heuberger, who also is research professor in the University's Agricultural Experiment Station and extension professor in the Agricultural Extension staff, pointed out that "the State of Delaware is not giving as much support to its State Agricultural Experiment Station as are other states."

"The national ratio of state money to federal money is approximately two-to-one," he explained, "whereas in Delaware the ratio is about one-to-two."

"Because outside sources of funds from interested non-government groups are beginning to 'dry up,'" continued Dr. Heuberger, "it is obvious that the State of Delaware must increase appropriations if our state agricultural services are to be maintained, let alone expanded."

"For the year 1945-46," he said, "income of the Delaware Agricultural Experiment Station was 35 per cent from Congress and 18 per cent from the state, with the rest from other sources. This ratio is approximately true now," he added.

"The University of Delaware," Dr. Heuberger said, "now has an agricultural organization that is ably directed and staffed with competent personnel. To do the job right, however, two major things are needed: More financial support from the state, and more personnel to give better service in solving the ever-increasing agricultural problem in Delaware."

"The training of agricultural leaders and workers to discover fundamental facts through research, which when applied in actual practice will solve agricultural problems, constitutes the University's agricultural work. Today's research project is the farm practice of tomorrow."

Dr. Heuberger, who, as chairman of the Department of Plant Pathology, is one of the few men to hold rank in the School of Agriculture, the Experiment Station and Extension Service simultaneously, outlined the history of the Morrill, Hatch and Smith-Lever acts which set up the land-grant colleges—including the University of Delaware—to carry on the agricultural work. "At the University of Delaware," he said, "as in all land-grant colleges, the agricultural work is divided into three parts, each supported by the others, and all three parts working together."

NOTICE

Student managers are needed for the baseball team. All students who are interested should contact Coach Martin.

Question Box

Question: What do you think of the series of film classics now being sponsored by the S.G.A.?

Johnnie Stetser: They are educational and entertaining. I'd like to see some time. Maybe this week—Orson Wells stars and he's so . . .

Al duBell: Movie classics are well worth while. They're especially entertaining if not burdened with heavy dialogue or if not too slow moving.

Jack Daly: A good idea and a swell means of entertainment without having to pay forty cents to see some movie at the State. Besides it's edifying. I might even find time to go one of these days.

Barbara Potter: They afford good entertainment, but maybe there could be more variety—there must be some movies of a lighter vein which can be considered classics. If not, I can suggest a couple of serious titles: for instance, *Rebecca* or *Wuthering Heights*.

Dave Scott: The three movies they've had so far I haven't liked, but the idea is great. Productions which appeal to the basic drives of both elements of the campus should be brought in. I mean, of course, such really great renditions as *The Outlaw* (unexpurgated) and *Frankenstein*.

Jane Lynch: A wonderful idea. For one thing, South Campus is given a chance to stay out after ten. But some of the subtler productions of Hollywood such as *Bugs Bunny* would be appreciated.

Language Tables Begin At Commons

The International Students' Club, under the chairmanship of Mr. Moises Tirado, is sponsoring language tables every Monday at dinner in the Commons of Old College. The purpose of these tables is to improve pronunciation and increase vocabulary in Spanish, French and German, and will afford an excellent opportunity to improve the accent of the foreign language students who may intend to use in the summer or after graduation.

One or two tables each were devoted to Spanish and French on Monday, March 15, at 5:45. If there are enough requests, there will also be a German table at a later date. All those interested in one of these three languages will sit together at one table and speak only that language. There will be one member of each table group who knows the language fluently and who will attempt to keep the conversation flowing smoothly.

Students assisting Mr. Tirado in making these plans are Nicole Guano, Al Berguido, Dolores Tondat, Elsie Foulsham and Stephen Ling. Those who would like to take advantage of this opportunity should notify one of this group or Mr. Tirado so that adequate arrangements may be made ahead of time.

Kent Hall

Pressing forward, surging onward,
In seemingly endless streams;
Moved as if by some great power,
Greater far than all our dreams.

Finally over, struggles ceased,
The force has spent its all;
The scene again regains its peace,
As thus we leave ye ole Kent Hall.
—Aggie Berger

Appoint Tomhave To Federal Agency

A. E. Tomhave, chairman of the Department of Animal and Poultry Industry at the University of Delaware, has been appointed to the Committee on Biological Sciences of an organization of federal agencies and colleges in this area.

The purpose of the organization is to develop more effective cooperation between colleges and federal agencies in the Third Civil Service region. At an organization meeting of the group in Philadelphia, the background and purpose of the committee was discussed, and plans outlined for doing something constructive to improve opportunities in the federal service in the fields of Biological Science.

As a result of the meeting, a committee was appointed by Dr. W. G. Hutchinson, chairman of the Committee on Biological Sciences, to make a general survey on the Biology curricula in the various colleges and universities in the Third Civil Service region. Dr. Basil W. Parker of Lehigh University was appointed chairman of this committee, assisted by Dr. W. G. Hutchinson of the University of Pennsylvania and Mr. Tomhave.

Gen. L. Jaynes

(Continued From Page 1)

upon graduation in June, will be commissioned in the Chemical Corps Reserve of the U. S. Army. In the fall he plans to start work on his master's degree at Washington University, St. Louis, Mo., where he has accepted a teaching fellowship.

During World War II he was an infantry-rifleman serving with the 406th infantry in its march across Europe. He was awarded the Bronze Star, Purple Heart with cluster, and the Combat Infantryman's Badge.

Last June he was awarded the Coast Artillery Association medal for excellent work in the Military Department through his junior year. He is a former acting editor of the REVIEW, and has participated in the Forum, Independent Students Association, track and soccer.

Fuller Now 2nd Lt.

Technical Sergeant Alfred E. Fuller, Jr., an instructor in the Military Department, has been commissioned a second lieutenant in the U.S. Engineer Reserve. Announcement was received by the University's Military Department from the Department of the Army.

Lieutenant Fuller entered the Army in 1942 through the ASTP at City College of New York. He joined the U.S. Engineers and served with them until his assignment at the University in 1946. He served in the Asiatic-Pacific Theatre, and wears that ribbon as well as the Philippine Liberation ribbon.

He is also attending classes at the University in order to complete the few credits necessary for a degree of BS in Education. He is acting as coach of the ROTC Rifle Team.

Advertising Exams

(Continued From Page 1)
of conducting the examinations in Philadelphia.

Because the Association is so thoroughly convinced of the tremendous value of the examinations, not only to the advertising profession but also to the candidates for the examinations, it is assuming a large part of the cost. The candidates pay \$15 each, which represents but a small part of the total expense.

Application for the tests must be made in writing and mailed to A. Edward Morgan, Chairman, Aptitude Test Committee, Room 1414, 1528 Walnut street, Philadelphia.

Munroe Addresses Dover Cent. Club

Dr. John A. Munroe, assistant professor of history at the University of Delaware, gave a talk to the Dover Century Club on Wednesday, March 10, on the historical background of the world crisis.

He discussed in detail the Palesinian and Czechoslovakian situations, emphasizing the role that the history of those lands now plays in their difficulties.

Dr. Munroe also stressed the importance of the coming Italian elections.

Physics Hall Has New Coat of Paint

Some of the old walls in Recitation Hall look younger this week because they have received a new coat of paint. On the first floor the halls, offices, and big lecture room got new faces of a bright shade of their former color, but the greatest change is that made in the walls that surround the staircase. Those red brick walls that could formerly be seen there were rejuvenated with a coat of light cream paint.

With the exception of a little work to be done on the third floor, the recent painting was the last of the renovation work which has been going on intermittently for the last few years. Last year some of the rooms on the second floor used by the Psychology Department were painted. Now the entire building is looking quite bright and cheerful.

NOTICE

The last two University Vesper Services sponsored by the D.S.C.A. for this year are on Palm Sunday, March 21, and Easter Sunday, March 28. Speakers will be the Rabbi Jacob Kraft of the Beth Shalom Congregation and The Rev. Mr. Ernest Hall, a retired Presbyterian Missionary, respectively.

This announcement is of interest to all at the University, especially those who will be unable to go to their homes for Easter Sunday. It is hoped that all will take advantage of this program.

The time is 6:15, the place is the Lounge of Brown Hall.

NOTICE

LOST: A dark blue, gold tipped Parker '51 pen. In the vicinity of Student Union. If found, contact Parke R. Perine, Box 803.

"THE BEST IS YET TO BE"

The telephone will be seventy-two years old this year. Its development within a single lifetime has been a modern miracle. Yet it is only the beginning.

There are any number of men in the telephone business today—some just starting out—who will see greater progress than the past has ever known.

Year by year the next half century will be increasingly theirs. New leaders will appear from among them. Step by step, rung by rung, they will mount the ladder to the top. For telephone management is

employee management and comes up from the ranks.

There will be more good jobs for qualified men in the telephone business in 1958 and 1998 than now. It just can't help being that way. For of all the businesses and professions, there are few more interesting and necessary.

So the future is bright for those who make telephony their life work. For them, "The best is yet to be."

STAR CLEANERS

47 E. Main Street

Newark, Del.

St. Pat Feted By Newman Club Tues.

About seventy-five members of the Newman Club met Tuesday night in Old College to welcome in St. Patrick's Day.

The fern was well plastered with shamrocks and green. The guests all managed to find something in the proper color to wear.

The Irish might not know how to read a calendar, but they did a fine job of welcoming St. Pat in. Ray McCarthy was in top form— but then he should know his Irish pretty well.

Dancing to the country's greatest music—stand by Petrillo—followed the show. Among the dreamy couples were Jim Gilson, beating Billy Cole's time, with Joanne Di Sabatino, and M'Liz Pettit with Ed Vaklyes.

Bill Wooley, Bill Owen and the rest of the Newmanites deserve a hand for a really fine evening. Patty must have been beaming down from the Irish corner.

STAB'D TACK

Would you like a complete course in sailing? The Quanset Sailing School on Cape Cod offers this service for a mere ninety (\$90) dollars.

For this said sum you will receive all the info on sailing a triangular course, knots and splices, reefing, getting under way and putting a boat to bed, and various other bits of knowledge on the subject.

Officers installed at the March 4th meeting were: Bill Osborne, commodore; Jim Burri, vice-commodore; Doris Goodley, rear-commodore; Joanne Bronson, secretary; Bernard Delch, treasurer; Les Riggs, first lieutenant.

A number of these are experienced sailors, but some have never sailed a boat. They liked boats and the idea of sailing, and took advantage of the training program set up.

Now they are well on the way to becoming racing skippers. You have the same opportunity. Come to the next meeting of the Yacht Club on Thursday, April 1st, when Dr. C. J. Rees of the Math Department will speak on piloting and navigation.

Officers installed at the March 4th meeting were: Bill Osborne, commodore; Jim Burri, vice-commodore; Doris Goodley, rear-commodore; Joanne Bronson, secretary; Bernard Delch, treasurer; Les Riggs, first lieutenant.

Prizes for Essays Offered Blue Hens

History Department To Give \$100 First Prize

Two prizes for historical essays, open to competition among students of the University of Delaware, have been announced by the University's Department of History. A prize of \$100 will be offered for the best original essay on some aspect of American constitutional or political history, and a \$25 prize will be offered for the best original essay on some phase of the history of Delaware or the Eastern Shore. All essays must be submitted to Dr. H. Clay Reed, by May 10.

Competition for the Thomas J. Craven Memorial Prize, that dealing with constitutional or political history, is open only to men students who have a "B" grade or better in the survey course in American history, including those who have a satisfactory grade if they now are completing the course.

All students are eligible for the competition dealing with Delaware-Eastern Shore history, which is known as the Old Home Prize contest. Other rules of the competitions are available from the department.

March 25 Means The E-52 Playbill

The E-52 Players, will sponsor a playbill program on Thursday, March 25, 1948, in Mitchell Hall at 8:15 p.m. The program will consist of three one-act plays, two to be presented by Delaware and a guest performance by a group from Temple University.

The production staff is now organized and the chairmen include: technical director, Mr. Harry Bidlake; production coordinator, Marjorie Fothergill; scenery construction, John Sedwick; stage crew, Frank Buck; lights, Spofford Beadle and Bob McFarland; sound, Dick Tyler and Steve Shaffer; business, Marcia Segel; costume, Vera Gould; publicity, Joseph McVey; make-up, Rita Patnovich; photography, Tony Fauerbach, and prompting, Molly Bechtel.

Tickets will be available at the door, first come first served. Student Theatre tickets will be accepted for all students. For an evening of entertainment at a minimum of cost see the playbill on Thursday, March 25.

ROTC Announces New Appointments

The Military Department of the University of Delaware announced student appointments as cadet officers and non-commissioned officers of the ROTC Battalion today. These appointments will remain in force for the remainder of the school year. They are directed by the PMS&T based on general all-around ability including academic records. Officers are chosen from among Advanced Corps students and non-commissioned officers are chosen from among the Basic students. Appropriate insignia are being issued to selected students who may wear them for the remainder of the year, barring any demotions or promotions due to attrition or general changes in aptitude of students.

Contest Sponsored By Swedish Line

Free Scandinavian Trips Offered for Winners

Only two weeks remain in which to compete in the essay contest commemorating the Swedish Pioneer Centennial, sponsored by the Swedish American Line. Manuscripts must be postmarked on or before April 1 to be eligible for one of eighteen awards including six free trips to the Scandinavian countries for the best essays on the subject of "THE INFLUENCE OF SWEDISH SETTLERS ON A COMMUNITY OR REGION."

The contest which has been running since last October, is open to three groups of contestants: 1. College undergraduates, 2. High School and Preparatory School students, and 3. Adults regardless of occupation.

The manuscripts, written in English, must not be more than 2500 words in length and should be addressed to the Contest Editor, Swedish American Line, 636 Fifth Avenue, New York 20, N. Y.

The announcement of the contest by the Swedish American Line last fall served as the opening gun in the coming celebration of the Swedish Pioneer Centennial, which will be commemorated throughout the Middle West, Philadelphia, and New York, this coming June. An official Swedish delegation headed by Prince Bertil and members of the Swedish Government will participate, as will the Archbishop of Sweden and other church dignitaries, coming to attend the centennial of the founding of the Augustana Synod. The Swedish Pioneer Centennial Association in the United States is headed by Dr. Conrad Bergendoff, president of Augustana College and one of the 14 judges in the essay contest.

In addition to the six free trips to Scandinavian countries offered by the Swedish American Line, twelve other awards will be made, including a \$200 trip to one of the Swedish Pioneer Centennial celebrations and nine U.S. Savings Bonds, varying in value from 25 to 100 dollars.

The essay should be a biographical presentation of a person, man or woman, of Swedish birth or descent, anywhere in the United States or Canada, who lived during the past 200 years. It need not be a person of prominence or historical importance, but one who has exerted an influence on a community or region; or the article may concern a colony, group, society or organization, past or present.

Earnest B. Bearnarth, Director of Public Relations of the Swedish American Line, is the contest editor.

U. of Del. Officers Attend Meetings

Three administrative officers of the University of Delaware have attended meetings of educational groups late last week. Dr. William S. Carlson, president of the University, attended sessions of the joint accrediting committee of the Association of Land Grant Colleges and Universities and the National Association of State Universities, in Chicago last Saturday and Sunday. Saturday night, Dr. Carlson was the guest at a special gathering of the Chicago area alumni club of the University.

Dean George L. Schuster of the School of Agriculture represented the University of Delaware last Thursday and Friday at the annual spring meeting of the northeastern section of deans of land grant colleges, at which delegates from 12 colleges in this part of the country participated.

Dr. J. Fenton Daugherty, dean of men, also attended the annual meeting of the National Association of Deans and Advisers of Men, in Dallas, Texas, the last three days of last week.

Pirate Party Held At Alpha Epsilon Pi

The Jolly Roger pennant flew at the mast of the good ship Black Swan which was docked at the Alpha Epsilon Pi fraternity Saturday night. The motley crew boarded ship by means of a gangplank which led into a window on the "starboard side." All hands were greeted by Bos'n Milt Isaacs, who handed out the "pieces of eight," and escorted the buccaneers to their tables.

The house had been transformed into a combination pirate ship and water-front cafe. Tables were set up in cabaret style, bedecked with red-checked tablecloths. A nautical atmosphere was created by means of marine props and a large net which covered the entire room.

Unique costumes were worn by all, with honors of the evening going to Norris "Peg-Leg" Stone and Mae Singer. Mess call was piped by Ship's Cook Harry Pollack, and food was served by Mess Boys (Chaperones) Mr. Nathan Weinstein and Mr. Max Kurman, assisted by their wives.

The buccaneer's band, led by Skipper Mark Jacoby, and with songs by George Stutman, highlighted the evening's entertainment. The many clever signs and cartoons were created by Henry Galperin, and the entire affair was produced by Social Chairman, Sam Spiller.

Dr. Dorn Speaks To Int. Relations Club

Economic conditions in relation to world peace was the topic of the recent meeting of the International Relations Club held last Tuesday, March 9, in Brown Hall Lounge.

A short business meeting led by the president, Dolores Tondat, preceded the main program. Dr. Herbert Dorn, of the Economics Department, gave a short talk on "The Importance of Economic Conditions in Relation to World Peace." An informal discussion was led by Dr. Dorn and refreshments followed the talk.

ASCE To Launch Activities Mar. 18

The student chapter of the American Society of Civil Engineers at the University of Delaware will launch its spring program of activities Thursday evening at a meeting in Newark.

Two members of the Junior Forum of the Philadelphia Section, A. S. C. E., Robert Diskant and Arthur Lookup, will speak briefly on "A Critical Analysis of Present Day Design" and "Cast-in-Place v. Pre-Cast Concrete." A. Barton Lewis, a University of Delaware graduate and also a member of the Junior Forum, will introduce the speakers, and there will follow a period of general discussion.

The meeting will be held at 8 p. m. in Room 308, Evans Hall. Carl Cantera, president of the chapter, said that members and friends of the society in the area are invited to attend.

Introducing . . .

Jerseyite Robert H. Winter was born in Salem in 1923. His elementary education was accomplished across the Delaware, graduation from Regional High School, Penns Grove, occurring in 1940. Bob spent his first year out of high school as a draftsman in the Wilmington office of the Engineering Department of the duPont Company. Concurrently, he was enrolled at Drexel Tech night school, studying subjects in mechanical engineering. Winter entered the University of Delaware in 1941, and completed two years of college before entering the army. While in the army, he served as a corporal in the 104th AAA AW Battalion, seeing duty in the South Pacific and later in the occupation of Japan.

Bob resumed his studies at the University in September, 1946, continuing with his ME work. Last spring he was elected Commander of the Sigma Nu Fraternity and has served in that capacity for the present year. In addition to this, he is secretary of the Inter-Fraternity Council, a member of the student branch of the ASME, and a Dean's List student. He expects to graduate this June and plans on entering mechanical engineering-design work in the summer.

Bill Conrad, the friendly merchant of Brown Hall, was born in Philadelphia in 1920. Preferring diamonds to keystones, he came to Delaware at the age of five securing his elementary and high school education in Wilmington. After graduating from P. S. duPont in 1939, Conrad returned to the Quaker State for a stay at the U. of P., but after a year of that, back he came to Delaware and a job in the engineering department of duPont's. Called by the AAF in 1942, Bill served 3½ years as a personnel sergeant major with the rank of Tech. Sgt.

He started his sophomore year at Delaware in September, 1946, following his discharge in March of that year. Last spring Bill was elected to the post of Chairman of Men's Affairs of the SGA, and has been busy this year with the task of rewriting the constitution of that body.

Salley Heinel, born and raised in New Castle, Delaware, is a well-known personality on campus. She attended public schools and graduated from William Penn High, New Castle, in '44. Sally then made her appearance at Delaware, as a History major, Education minor. Right now, she is one of those poor unfortunates who are practicing teaching; almost every afternoon around 5:00, we see her wearily trudging down campus from her job at P. S. duPont.

Sally has the normal ambition of every female—working for about two years and then—you guessed it—marriage. She would like to work as a hostess for the Chesapeake and Ohio R. R.

Her hobbies are numerous, but her favorites are: music—plays violin—and sports, particularly basketball and hockey.

Our gal Sal, an illustrious senior, has held quite a few offices while at school. Some of them are: Student Head of House (Warner); Sec. Treas. of Music Club; Sec., D.S.C.A.; Copy Editor of "REVIEW"—'45; Orchestra and A Capella Choir; Cheer Leader for three years; and she is winding up her final year at Delaware as Chairman for the Senior Weekend.

Everyone knows our friend, **Betty Loose**, who is just as much of a campus personality as her roommate, Sally. She too is a Delawarean, through and through. Born and raised in Wilmington, Betty graduated from P. S. in '44 and then came to the U. of D.

She is now a senior, majoring in English and minoring in Education; another practice teacher. Betty is more fortunate, however, for she is teaching at Newark High.

Her ambition is to get a really exciting job, preferably with T. W. A., or something connected with aviation, for a few years, and will wind up happily married.

Betty's favorite hobbies are: knitting, sports, especially swimming, dancing, and music.

Some of the many offices Betty has held during her successful four years here are: Chairman of Woman's Affairs Committee, '47, '48; Student Head of House '47 (Warner); Orchestra, and various positions in the W. A. A., among them manager of swimming last year when the W. A. A. had their water pageant.

"Acadenny was here!" "We live in the same room with Acadenny!" The training house is full of signs concerning the mysterious "Acadenny." We were in the training house the other day in quest to the key to all knowledge or the identity of "Acadenny" when we came upon a pleasant looking character, with a long pointed head, who was the spitting image of the comic character "Denny Dimwit."

"My name's **Charles L. Smith** and the L's for Lajack" said the husky youth, "and I came from Abington, Pennsylvania." Could this be "Acadenny." Who could tell?

Charley Smith, better known to his compatriots as "Denny" out of respect for his remarkable likeness to the comic hero, came to Delaware last fall as a virtual unknown in athletics, but since has established himself as a factor to be reckoned with the Delaware grid plans. Denny graduated from Abington High before a sojourn in the Marine Corps, during which he spent considerable time in the Pacific (some say he hasn't been the same since). After his discharge from the Corps, Smith, in the interest of better preparing himself intellectually for college activities, went to Pennington Prep, in New Jersey, where he established a reputation as a forward pass artist with the Pennington grid machine.

Last fall as a freshman he displayed promise of the best potential passer since Red Hogan who flipped them in 1941. However, playing a halfback position in the double wing offered little opportunity for Denny to display his prowess.

This year, Smith will be playing in the quarterback role in the new Murray T-Double Wing formation, which will feature Delaware's grid warfare next fall. This should offer the affable, good-looking Charlie a chance to really come through. "In Forty-eight, it's Denny Smith!"

Alice Marble Gives 'The Will to Win'

Faculty, students, and general public assembled to hear Alice Marble, the famous tennis star and American career woman, in an address entitled "The Will to Win", during University Hour (Thursday) at Mitchell Hall.

Miss Marble's lecture told a vividly interesting personal story. This discussion had the broadest implications for everyone who loves a success story and believes in the fruits of common sense and a willingness to work. In the difficult course of her achievements, Miss Marble pointed out that the lessons learned in tennis apply with singular force to life in general, and the principles which extend to all human activity.

As a speaker, Alice Marble showed great charm, a warm personality

and presented the vitality, freshness, and attractiveness of the young American woman of today. As an inspiring example of one who fought what threatened to be a mortal disease by sheer faith and tenacity, she is the personification of achievement on the distaff side.

Miss Marble spent the spring touring England and Sweden at the personal invitation of the British Government and King Gustav of Sweden. With Miss Mary Hardwick, Bobby Riggs, and Donald Budge, Miss Marble will play exhibition matches in tennis and introduce her modern methods of the game. Miss Marble has recently completed her autobiography, "The Road to Wimbledon," which has received extravagant praise from critics and public alike. From the pages of her book, she has emerged as one of the most outstanding examples of the modern career women.
