29 MILLION!

A record never before approached!

★When the 29,000,000th Ford rolled recently from the assembly line, an all-time record for the industry was set. 29,000,000 units built by the same management and all bearing one name—a name that has become one of the best-known trade-marks in the world!

It is significant that this achievement comes at a time when our country is making a mighty effort to re-arm swiftly. For to further that effort, to help speed it along in any possible way, we have offered the vast facilities of the Rouge Plant and every ounce of our experience.

As you read this, a new \$21,000,000 Ford airplane engine plant, started only last fall, is nearly completed. A new magnesium alloy plant, one of the few in the

country, is already in production on light-weight airplane engine castings. Work is right now under way on a new \$18,000,000 plant for mass production of big bomber assemblies. Orders have been filled for military vehicles of several types, including army reconnaissance cars, staff cars and bomb service trucks.

In the midst of this activity for National Defense, building the 29 millionth Ford car is simply one part of the day's work.

The public has acclaimed the 1941 Ford car as the finest in Ford history. Ford Dealers are enjoying their greatest sales and expecting their best year since 1937.

It is good to be producing the things America needs, and to be setting records on the way!

AIR CORP INSPECTORS NEEDED

No small part of the work of securing faster, more powerful, and safer airplanes and equipment is the inspection of aircraft materials. Parachutes, goggles, camera lenses, instruments, and all other equipment must be inspected by competent well-trained men.

Through an examination announced some time ago, the Civil Service Commission has been seeking experienced men for procurement inspection positions in the Air Corps of the War Department. The Commission has not been able to obtain enough men for these positions. On the contrary, the needs have been extended to other fields than those in the original announcement. Five new fields in which persons may qualify have been added, and the options now are: Aircraft, engines, instruments, parachutes, aircraft propellers, tools and gages, radio, aircraft miscellaneous materials, textiles, fur-lined clothing and optical.

In general, mechanical experience, which may include apprenticeship, is required in the field applied for. For only four options (aircraft, parachutes, propellers, and aircraft materials) need this experience be specifically on aircraft materials. College courses in engineering may be substituted for part of the experience. Applicants will not have to take a written test, but will be rated on their experience and education. For details concerning the amended requirements applicants should consult Announcement No. 6-249 Revised of April 22, 1941.

Original appointments will be made at salaries ranging from \$1,620 to \$2,600 a year. Opportunities for advancement are excellent. Applications may be filed until further notice with the Secretary of the Board of U. S. Civil Service Examiners at Wright Field, Dayton, Ohio. Qualified persons are urged to apply for details to the Secretary at Wright Field; to any first- or second-class post office; to the U. S. Civil Service Commission, Washington, D. C.; or to any of the Commission's District offices.

Safety Hints

HOUSEWIVES — Have you ever
 thought about what part of your job
 as manager of the home is most im-
 portant?

Would it be cooking good meals . . .
 or keeping the house clean . . . or
 rearing your children properly . . . or
 keeping the budget balanced?

All of those things are important, it's
 true—but how about protecting the
 members of your family from an acci-
 dent? The Delaware Safety Council
 points out that safety should be at the
 top of the list, because all the other
 things are unimportant if a member of
 your family is killed or badly hurt in
 an accident.

Housewives, remember that you are
 the safety manager of your home. Be
 sure the house and its equipment are
 in a safe condition, and see that the
 members of your family learn and obey
 safety rules.

THE GOOD OL' summertime means
 that about eight million bicycles will
 be rolling along the highways and byways
 of the United States.

And the bicycle season means, too,
 that motorists will have to watch out
 for bike riders, the Delaware Safety
 Council warns.

Bicycle-automobile collisions cause
 approximately 700 deaths and 34,000 in-
 juries a year throughout the United
 States.

Boys and girls sometimes forget to
 be careful. It's up to motorists to pro-
 tect them as much as possible.

 day afternoon by the
 Rev. H. Everett Hall-
 man, pastor of the
 First Presbyterian
 Church.

The ceremony took
 place at the bride's

 ded by members of the
 immediate families.

Mr. and Mrs. Thomp-

SPRAY NOTES OFFERED

With the second edition of Orchard Spray Notes recently supplied fruit growers by Delaware county agricultural agents went a large sheet containing eight color pictures of apple buds in different stages of development. The color pictures range from the green tip to the calyx or petal fall stage. Because the proper control of insects and diseases, mainly diseases at this time of the year, depends on applying pest-destroying sprays and dusts at the right time, it was suggested in the "Notes" that the sheet containing the bud development color pictures be tacked on the wall of the barn or spray shed for constant reference between now and the time the calyx spray or dust is applied. The pictures of apple bud development and future editions of Orchard Spray Notes may be obtained by requesting them from the county agent.

SPECIAL SERVICE T CHURCH

Mother's Day Is Observed At Stanton

May 15—Special Mother's Day services were held in the Stanton Methodist Church on Sunday, with the Rev. David W. Baker in charge. Rev. Baker had as his subject "Mothers". Mothers honored at the service were: Mrs. William Hastings; young Mrs. James Doughty; mothers accompanied by the greatest number of children were Mrs. Calvin Eastwood and Mrs. Wayne Abbott, both of whom were accompanied by seven Bouquets of flowers were presented to each of the mothers. There was also a class of thirteen young people received into full membership in the church. The Young People's Class of the Sunday School had charge of the evening service. Organized seven years ago, the group of young married women made up the graduating class of the school, accompanied by some of their parents and friends. Miss Lora C. Johnson, principal of the school, went to the church by bus on Saturday. The service was a sight seeing trip, visitation of interest in and near Washington. They returned to Stanton Saturday night.

Rev. J. S. Byrd, pastor of the Stanton Methodist Church, will serve a chicken salad and shortcake supper on June 15th in the basement. Mrs. Sue Smith is chairman of arrangements.

The Parish Aid of St. James P. E. Church has completed their Red Cross fund drive for the season, and now have 25 members, including dresses, handkerchiefs and ready to be turned into a fund drive in Wilmington. Mrs. James Jetties was in charge of the Red Cross activities.

A program known as "Bread Thrills" is presented on May 23rd at 7:30 in the basement of the Stanton Methodist Church, under the auspices of the Epworth League. HIGHWAYS VITAL TO DEFENSE

Value Expands Under Pressure

The importance of sound and adequately maintained highways is further emphasized as defense pressure brings about new conditions. H. V. Daniel, Secretary, Associated Petroleum Industries of Delaware, predicted today. "Delaware's defense production grows steadily in importance and in volume," Mr. Daniel stated. "This production, however, depends largely on highway transportation. Currently there is an indication that coastal shipping may be heavily restricted as more and more shipping is needed for Atlantic service, increasing the use of other existing transportation agencies. Should this condition prevail, highway transportation will become more and more important.

"The expenditure of our motor tax revenues must be concentrated on highway improvement if our great highway system is to be kept in proper condition to handle the potential demands. Diversion must stop. Delaware citizens feel that diversion will undoubtedly increase under the provisions of the 'One-Fund Act' and thereby motor taxpayers will be deprived of highway improvement which now becomes extraordinarily vital to national defense.

"The desirability of using motor tax revenues for highway purposes exclusively becomes more acute as highway construction and reconstruction costs are increasing at an alarming rate. Every patriotic and economy-minded citizen should be interested in this problem and its eventual solution through legislative action."
