University of Delaware

Newark, Delaware 19716

The University of Delaware is committed to assuring equal opportunity to all persons and does not discriminate on the basis of race, color, gender, religion, ancestry, national origin, sexual preference, veteran status, age, or disability in its educational programs, activities, admissions, or employment practices as required by Title IX of the Educational Amendments of 1972, Title VI of the Civil Rights Act of 1964, the Rehabilitation Act of 1973, the Americans with Disabilities Act, other applicable statutes, and University policy. Inquiries concerning these statutes and information regarding campus accessibility and Title VI should be referred to the Affirmative Action Officer, 305 Hullihen Hall, (302)831-2835 (voice), (302)831-4552(TDD).

INTRODUCTION

Background

The Pregnancy Risk Assessment Monitoring System (PRAMS) is a survey of the health of mothers who have had babies within the calendar year in Delaware. The survey was designed by the Centers for Disease Control and Prevention (CDC) for implementation by individual states. Typically, CDC provides the funds to the state after submission of a satisfactory application. Currently 32 states and New York City are participating in the survey. Delaware became a formal participant and grant recipient in the fall of 2000. Currently, 2001 data collection is complete and is currently being subjected to quality control procedures prior to analysis.

The data used in this report was collected in 2000 prior to Delaware's entry into the CDC program. The questionnaire design, methodology, and sampling procedures prescribed by CDC were followed although the project was initiated prior to CDC involvement. Funding for the analysis was provided by the Division of Public Health through the Maternal Child Health Bureau's State Systems Development Initiative (SSDI) grant.

This report is being provided as a resource for a variety of agencies that need to know about the health of new mothers and their babies. The objective of the report is to provide a broad spectrum of information without commentary. In this case the users of the information are expected to be subject matter experts in areas such as prenatal care, tobacco and alcohol use during pregnancy, and breastfeeding.

To aid those using the information, some general explanatory information about the construction of the tables is provided. In addition, a few samples of the type of analysis one might engage in are also provided. These sections will follow methodological information that sets the context of the survey itself.

Methodology

Each month, a stratified random sample is drawn from births occurring at least two months prior to the current month and not later than six months from the sampling date. Only births to Delaware residents where the birth occurred in Delaware are included in the sample. If it's a multiple gestation (twins or triplets only), then one is randomly selected. The Division of Public Health checks the sample to see if the address on the birth certificate is the most current one. In addition, phone numbers are added if they are available. If a baby was adopted, it too will be removed from the sample.

Initial contact letters are sent to each mother in the sample. This is followed by the survey package usually within three days. A reminder postcard is sent in 10 days if the survey has not been returned. A second and even third mailing of the survey package are sent if necessary. Those mothers that have not responded after three mailings are assigned to the computer-assisted telephone interviewing (CATI) facility in CADSR for further follow-up.

Sample Design

A simple random sample of the birth certificates would undoubtedly produce an accurate picture of the new mothers in the state. However, the ability to closely examine data by geographic area and race would be limited by the sample size. Since minority health and health issues in Wilmington as well as downstate are very important at this time, the decision was made to develop a more complex sampling design.

Two strata were envisioned. The first strata had four cells; Kent County, New Castle County outside of Wilmington, Wilmington, and Sussex County. The second strata had two cells. The first cell included non-Hispanic Caucasians while the last contained non-Hispanic African Americans, non-Hispanics of all other races, and Hispanics of any race. This 4*2 design of eight cells was used as the framework. The actual sample size assigned to each cell was sufficient to give equivalent measurement precision of +/- 5%.

The births by strata are shown in Figure 1. The final completed sample size is shown in Figure 2, and the response rates are shown in Figure 3.

**Figure 3
Response Rates by Strata**

	White non-Hispanic	All Others	Total
Kent	60.3%	42.6%	53.5%
New Castle	71.3%	42.2%	60.3%
Wilmington	61.3%	34.3%	39.8%
Sussex	62.7%	38.8%	51.6%
Total	64.3%	39.0%	52.4%

Source: Center for Applied Demography & Survey Research

The response rates shown in Figure 3 are worthy of further comment. First, the overall response rate of 52.4% is not atypical for this type of work although the CDC encourages response rates over 70%. The stratification used in this study, which over weights minorities, makes that goal nearly unachievable. Minorities respond at only 60% of the response rate of non-Hispanic Caucasians. The overall concern is the potential for non-response bias. The lower the response rate, the higher the potential for non-response bias. Such bias, if it exists, means that sample measures may not necessarily represent the characteristics of the population from which the sample was drawn. If the subject matter expert detects patterns in the data that belies known characteristics of the population, further weighting might address the problem.

USING THE TABLES

The tables in Appendix B all have the same format although the column headings will vary in content and number. In addition each table will contain one of four cross-tabulation variables; (1) Mother’s Race, (2) Area, (3) Mother’s Age, or (4) Source of Payment. Figure 4, below, is typical of the tables found in Appendix B.

Figure 4								
Insurance Before Pregnant by Area								
Q1	NO		YES		DK/REF		TOTAL	
	N*	Col (Row)%	N*	Col (Row)%	N*	Col (Row)%	N*	Col (Row)%
Total	2540	100.0 (24.2)	7941	100.0 (75.6)	16	100.0(0.2)	10497	100.0(100.0)
Area								
Kent	583	23.0 (30.4)	1332	16.8 (69.4)	4	23.8(0.2)	1919	18.3 (100.0)
New Castle	895	35.2 (15.7)	4801	60.5 (84.2)	8	50.4(0.1)	5704	54.3 (100.0)
Wilmington	373	14.7 (35.7)	672	8.5 (64.3)	0	0.0(0.0)	1045	10.0 (100.0)
Sussex	690	27.1 (37.7)	1136	14.3 (62.1)	4	25.8(0.2)	1830	17.4 (100.0)
Total	2540	100.0 (24.2)	7941	100.0 (75.6)	16	100.0(0.2)	10497	100.0(100.0)

ChiSQ=102.4 p=0.0*** N* is the number of cases estimated among all 10,500 mothers

The top box of the table contains both a general form of the question (Insurance before Pregnancy) and the type of cross-tabulation (by Area) that is displayed. The next line shows the actual question number (Q1) that can be found in Appendix A. Across the rest of the same row are found the possible replies to the question (No, Yes, Don’t Know, or Refused).

The next row of headings is critical to understanding the table itself. The first symbol N* refers to the weighted sample size. The population of new mother’s in 2000 was 10,505. The sample gathered was 1,982. Typically one would report the sample size but in this case the population the sample represents is of interest. N* effectively tells the program planner how many people have the characteristic of interest. For example, the table shows that 583 mothers in Kent County did not have insurance before becoming

pregnant. That is perhaps a more useful number than knowing that a sample of 162 responded NO to the question.

The next column header contains the symbols “col (row)%”. This simply means that the first number is the column percentage and the row percentage follows in parentheses. Which number is relevant depends on the question you are asking. If you want to know the percentage of mothers in Kent County that answered NO to the question, then the appropriate value is the row percentage (30.4%). On the other hand, if one wanted to know what proportion of the mothers who responded NO lived in Kent County the column percentage 23.0% is the correct value. If you were only interested in the percentage who responded NO in Delaware then you could use the row percentage in either the top row or the bottom row (24.2%).

If you want to compare one area against another, you would look at differences in the row percentage among the different areas. For example, while (30.4%) of mothers answered NO in Kent County, only (15.7%) did so in New Castle County. The values indicated for Wilmington and Sussex approximate those observed in Kent County. Is there in fact a relationship between Area and Insurance? The results for this statistical test are shown directly underneath the table. The Chi Square test statistic is 102.4. The probability that this result could have occurred by chance is $p=0.0$. The symbol *** following the p-value indicates that the probability is less than 1 in 100. The other symbols you will see are ** which is associated with $p=0.05$ or 1 chance in 20 and * which is associated with $p=0.10$ or 1 chance in 10. Typically, p values of .05 or smaller are considered statistically significant.

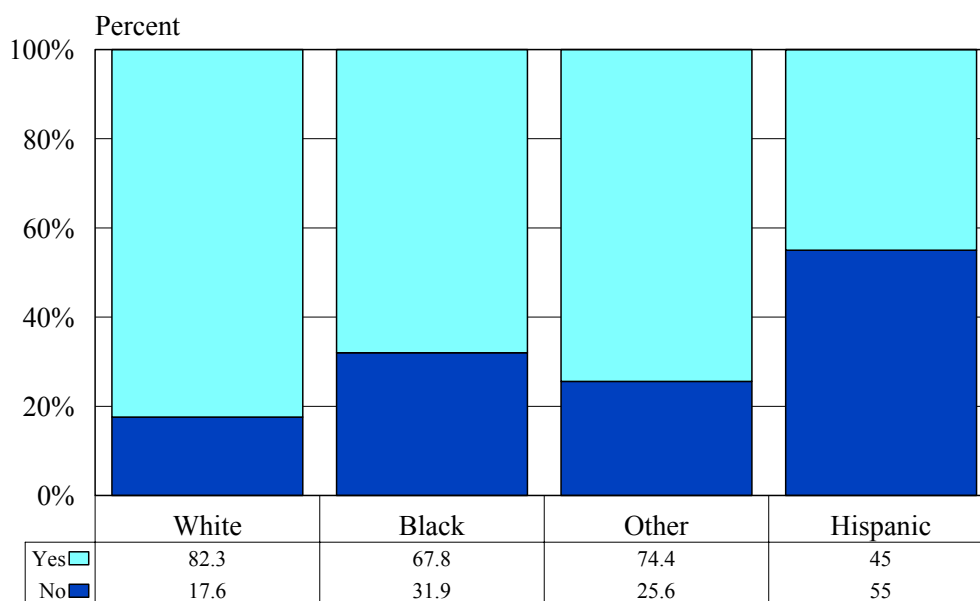

The calculation of Chi-square is affected by cell sizes. Cells with 0 observations are not permitted and even those tables where more than 20% of the cells have less than 5 *sample* observations make this form of the statistic inappropriate. For that reason, the DK/REF column is omitted from the test even though it is reported in the table for completeness. This will also occur on occasion within the Mother's race cross-tabulation. When you see a zero in a row or column, assume that row or column has been dropped from the analysis and the statistic only applies to the remainder.

EXAMPLES

In the next few pages, a selection of charts is offered as examples of the kind of analysis and the types of policy questions that can be addressed with these data. No attempt is made to be either comprehensive or programmatic in the selection. They are intended to encourage those with direct involvement in this area to explore the tables provided in Appendix B.

Access to health care is always an issue of concern for both the mother and the child. In Figures 5 and 6 below, the respondents' answers are provided. First, white non-Hispanic mothers are more likely to have health insurance prior to becoming pregnant than those in any other group (see Figure 5, below). In contrast black, non-Hispanic mothers are 15% less likely to have insurance and Hispanic mothers are more than 35% less likely to have insurance. Given that 88% of Delawareans overall have health insurance, new mothers are clearly at risk.

Figure 5
Had Health Insurance before Pregnant (Q1)
by Mother's Race/Hispanic Origin

Source: Center for Applied Demography & Survey Research, University of Delaware

Part of the reason new mothers are more likely in general to be without health insurance is the fact that they are younger. This relationship is shown quite clearly in Figure 6, below.

Figure 6
Had Health Insurance before Pregnant (Q1)
by Mother's Age

Source: Center for Applied Demography & Survey Research, University of Delaware

New mothers under the age of 25 are 20% less likely to have health insurance than either of the older groups and those mothers in the 35+ age group are almost 10% more likely to have health insurance than the 25-34 age group. These findings are consistent with data for the population of adult Delawareans in general. Overall these data suggest access to health care will be an issue for many of Delaware's new mothers.

Indicators of health behavior prior to pregnancy may be useful guides as to how the mother will care for herself and her child during pregnancy. Among the indicators measured in the PRAMS survey were use of a multi-vitamin, smoking, and drinking alcoholic beverages. These issues are addressed in Figures 7 through 10.

In Figures 7 and 8 below, the results for multi-vitamin use before pregnancy are shown. In the first figure which displays the information by mother's race/Hispanic origin, the pattern is similar to that found for health insurance, although the differences

are not as large. White non-Hispanic mothers were about twice as likely to take a multi-vitamin every day as black non-Hispanic mothers or Hispanic mothers. They also were the only group that had more than 50% indicating some use of multi-vitamins.

Figure 7
Took a Multi-vitamin before Pregnant (Q3)
by Mother's Race/Hispanic Origin

Source: Center for Applied Demography & Survey Research, University of Delaware

The pattern of multi-vitamin use by mother's age was also similar to that found for health insurance although the relationship was even more dramatic (see Figure 8, below). The proportion of mothers under age 25 using multi-vitamins every day is essentially one third of that reported for women 25 and older.

Smoking has been and will continue to be a health issue for new mothers as it is for the population in general. Currently about 23% of Delaware's population smokes and these data are not all that different. The results for smoking by mother's age are found in Figure 10, below. Not unexpectedly, the rate of smoking for the two younger age groups is roughly twice that for the two older age groups. At the same time the proportion smoking for these younger cohorts is significantly higher than for Delawareans in general.

Figure 8
Took a Multi-vitamin before Pregnant (Q3)
by Mother's Age

Figure 9
Cigarettes per Day before Pregnant (Q31)
by Mother's Age

Source: Center for Applied Demography & Survey Research, University of Delaware

Figure 10
Drinks per Week before Pregnant (Q35A)
by Mother's Age

Source: Center for Applied Demography & Survey Research, University of Delaware

The relationship between mother's age and drinking alcoholic beverages is shown in Figure 10, above. In contrast with smoking, drinking increases with age. This is influenced in part by the drinking laws in the state which presumably affect the behavior of the under 20 group. Still, 37% of the 20 to 24 age group report not drinking in comparison with 59% for the youngest group. There is little difference between the two oldest age groups. A small minority drinks every day (3%), and that is roughly consistent across the groups.

The impact of stress on pregnancy has been discussed at length in the medical literature especially with respect to infant mortality and low birth weight. The evidence is as yet inconclusive. The PRAMS survey attempts to measure the existence of a series of 13 stressful events (Q37 in Appendix A). For our purposes, only 11 are used. Death in the family and a sick family member were excluded because these events occur across all populations. The remaining 11 were combined into a simple index measuring the total number of events experienced. The results are found in Figures 11 and 12, below.

Figure 11
Number of Life Events 12 Months before Pregnant (Q37)
by Mother's Age

Source: Center for Applied Demography & Survey Research, University of Delaware

The number of life events experienced by the respondents is shown in Figure 11 by age of mother. These results clearly show that there is a relationship between age of mother and the number of life events. It is perhaps surprising that mothers under the age of 25 are almost twice as likely to experience at least one such event and the proportion experiencing five or more events is substantially higher.

This same life event index was examined for mother's race/Hispanic origin. Those results are found in Figure 12, below. The pattern is similar to what has occurred for other variables. White non-Hispanic mothers are far less likely to experience at least one such event than black, non-Hispanic mothers or Hispanic mothers. Similarly, the proportion of white non-Hispanic mothers who experience five or more such events is less than half of that experienced by the other two groups.

Figure 12
Number of Life Events 12 Months before Pregnant (Q37)
by Mother's Race/Hispanic Origin

Source: Center for Applied Demography & Survey Research, University of Delaware

One factor that could affect behavior and the preparedness of a woman for pregnancy is the degree to which the pregnancy was anticipated. Respondents were asked about becoming pregnant prior to learning that they were pregnant. The results obtained from that question are displayed in Figures 13 and 14, below.

The first thing to note is that about 10% of all of the babies born in 2000 were classified as unwanted (see Table 4A in Appendix B). This suggests that more than 1000 children and their mothers are starting down a difficult path.

Figure 13, below, contains results on timing of the pregnancy by mother's race/Hispanic origin. The chart shows that the proportion of unwanted pregnancies for black non-Hispanic mothers and Hispanic mothers is more than double the proportion for white non-Hispanic mothers. In addition, only 40% of black non-Hispanic mothers reported that the pregnancy was timely. This compares with 64% for white non-Hispanic mothers.

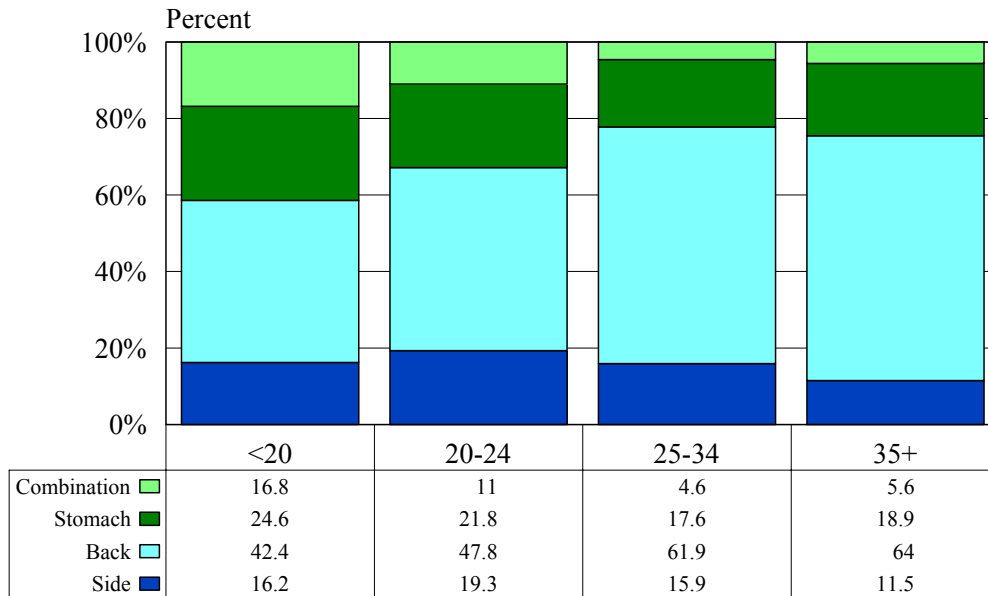

Figure 14
Timing of Pregnancy (Q10)
by Mother's Age

Source: Center for Applied Demography & Survey Research, University of Delaware

Figure 14 contains the results on timing of pregnancy by the mother’s age. The relationship is quite strong and is somewhat predictable. First, the youngest and the oldest age groups have the highest proportion classifying the pregnancy as unwanted. Second, less than 20% of mothers under the age of 20 classify the pregnancy as timely. That proportion increases substantially through the next two age groups until it stabilizes. The proportion of mothers saying that they wished the pregnancy had occurred sooner increases substantially and consistently with age.

Figure 15
Sleeping Position of Baby (Q59)
by Mother’s Age

Source: Center for Applied Demography & Survey Research, University of Delaware

Respondents were asked to describe the sleeping position in which they most often placed their baby. Those results are found in Figure 15 above and Figure 16 below. Sleeping position does vary by the mother’s age as is demonstrated in Figure 15. The most variation occurs within the youngest age group. As the mother’s age increases, the proportion placing the baby on his or her back increases from 42% to 64% while the proportion in all other categories declines. This probably is related to exposure to information about proper placement of the child.

Figure 16
Sleeping Position of Baby (Q59)
by Mother's Race/Hispanic Origin

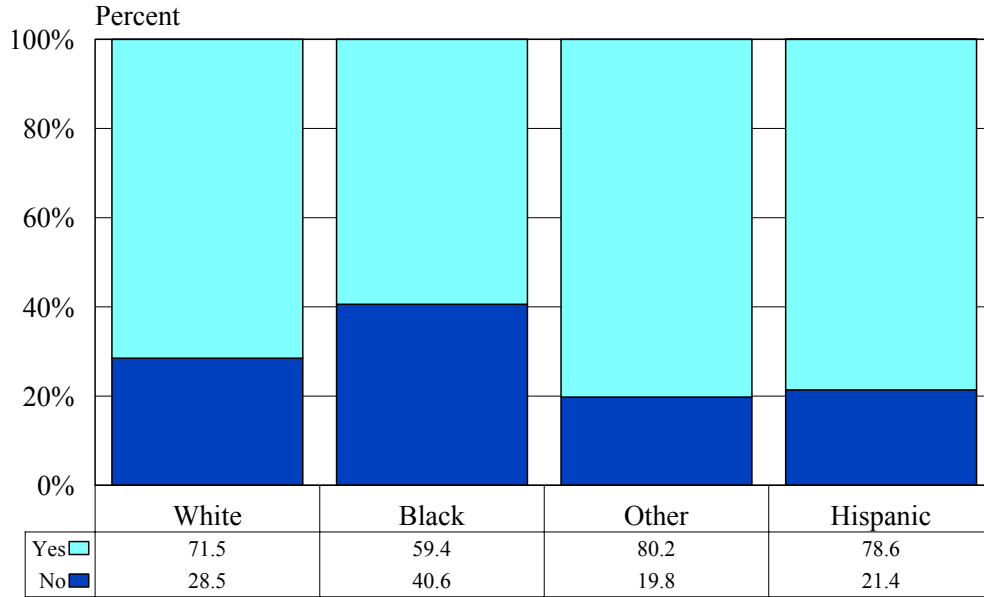

Source: Center for Applied Demography & Survey Research, University of Delaware

The most variation in sleeping position by mother's race/Hispanic origin occurs within the black non-Hispanic category. While over 60% of all other categories of mothers place the child on his or her back, only 37% of black non-Hispanic mothers do so.

The final two charts, Figures 17 and 18, further illustrate in a small way the diversity of the information found in the PRAMS survey. The first chart deals with breastfeeding (see Figure 17 below). It shows that breastfeeding is most prevalent among Hispanic mothers and least prevalent among black non-Hispanic mothers. This question was followed up in the survey by asking for reasons for not breastfeeding of which the most mentioned reason was simply not liking the procedure. Other questions addressed the reasons why the mother stopped breastfeeding. Taken together, PRAMS provides a substantial amount of information on this topic.

The final chart, Figure 18 below, addresses HIV testing. The PRAMS survey contains four questions addressing this issue. This chart addresses the issue of a reason for not being tested. It was one of a series of reasons that could have been selected.

Figure 17
Breastfed or Pump Breast Milk for Baby (Q52)
by Mother's Race/Hispanic Origin

Source: Center for Applied Demography & Survey Research, University of Delaware

Figure 18
Was Not Offered HIV Test (Q26)
by Mother's Race/Hispanic Origin

Source: Center for Applied Demography & Survey Research, University of Delaware

Overall, about 14% of the respondents reported not being tested for HIV. The most frequent reason mentioned (N*=689) was that they were “not at risk”. A somewhat smaller group (N*=505) indicated that they were “never offered the test”. The responses for that group are shown in Figure 18 by the mother’s race/Hispanic origin. The most interesting aspect of this chart is the difference between Hispanic mothers and all others. This may reflect the quality of healthcare received or it may be a communication issue.

These examples serve as a taste of the types of issues that can be addressed by the PRAMS survey. While some issues are not addressed by these tables, including more complex analysis, they are a good starting point. The data will be made available on the web for further analysis.

APPENDIX A

The PRAMS Questionnaire

First, we would like to ask a few questions about you and the time before you became pregnant with your new baby. Please check the box next to your answer.

1. *Just before you got pregnant, did you have health insurance?*

- No
- Yes

2. *Just before you got pregnant, were you on Medicaid?*

- No
- Yes

3. *In the month before you got pregnant with your new baby, how many times a week did you take a multivitamin (a pill that contains many different vitamins and minerals)?*

- I did not take a multivitamin at all
- 1 to 3 times a week
- 4 to 6 times a week
- Every day of the week

4. *What is your date of birth?*

____ Month ____ Day ____ Year

5. *Just before you got pregnant, how much did you weigh?*

_____ Pounds or _____ Kilos

6. *How tall are you without shoes?*

_____ Feet _____ Inches
or
_____ Centimeters

7. *Before your new baby, did you ever have any other babies who were born alive?*

- No
- Yes

8. *Did the baby born just before your new one weigh 5 pounds, 8 ounces (2.5 kilos) or less at birth?*

- No
- Yes

9. **Was the baby just before your new one born *more* than 3 weeks before its due date?**
- No
 - Yes
10. **Thinking back to *just before* you got pregnant, how did you feel about becoming pregnant?**
- I wanted to be pregnant sooner
 - I wanted to be pregnant later
 - I wanted to be pregnant then
 - I didn't want to be pregnant then or at any time in the future
11. **Which of the following statements is truest of your husband or partner during the 3 months before you became pregnant?**
- He wanted me to get pregnant
 - He partly wanted me to get pregnant and partly wanted me not to get pregnant
 - He didn't care one way or the other whether I got pregnant
 - He did not especially want me to get pregnant
 - He wanted very much for me not to get pregnant
12. **When you got pregnant with your new baby were you trying to become pregnant?**
- No
 - Yes
13. **When you got pregnant with your new baby, were you or your husband or partner doing anything to keep from getting pregnant?** (Some things people do to keep from getting pregnant include not having sex at certain times (rhythm), and using birth control methods such as the pill, Norplant®, shots (Depo-Provera®), condoms, diaphragm, foam, IUD, having their tubes tied, or their partner having a vasectomy.)
- No
 - Yes
14. **What were you or your husband or partner's reasons for not doing anything to keep from getting pregnant?**
- I didn't mind if I got pregnant
 - I thought I could not get pregnant at that time
 - I had side effects from the birth control method I was using
 - I had problems getting birth control when I needed it
 - I thought my partner or I was sterile (could not get pregnant at all)
 - My husband or partner did not want to use anything
 - Other -- Please tell us:

The next questions are about the prenatal care you received during your most recent pregnancy. Prenatal care includes visits to a doctor, nurse, or other health care worker before your baby was born to get check-ups and advice about pregnancy. It may help to look at a calendar when you answer these questions.

- 15. How many weeks or months pregnant were you when you were *sure* you were pregnant?**
(For example, you had a pregnancy test or a doctor or nurse said you were pregnant.)

_____ Weeks **OR** _____ Months

I don't remember

- 16. How many weeks or months pregnant were you when you had your first visit for prenatal care?** (Do not count a visit that was only for a pregnancy test or only for WIC) (Special Supplemental Nutrition Program for Women, Infants, and Children).

_____ Weeks **OR** _____ Months

I did not go for prenatal care

- 17. Did you get prenatal care as early in your pregnancy as you wanted?**

- No
- Yes
- I did not want prenatal care

- 18. Did any of these things keep you from getting prenatal care as early as you wanted?**

- I couldn't get an appointment earlier in my pregnancy
- I didn't have enough money or insurance to pay for my visits
- I didn't know that I was pregnant
- I had no way to get to the clinic or doctor's office
- The doctor or my health plan would not start care earlier
- I did not have my Medicaid card
- I had no one to take care of my children
- I had too many other things going on
- Other -- Please tell us:

- 19. Where did you go *most of the time* for your prenatal visits?** (Don't include visits for WIC).

- Hospital
- Health department clinic
- Private doctor's office or HMO clinic
- Community Health Center
- Military Facility
- Other -- Please tell us:

20. How was your prenatal care paid for?

- Medicaid
- Personal income (cash, check, or credit card)
- Health insurance or HMO
- TRICARE (formerly CHAMPUS)
- Military
- Other -- Please tell us:

21. During any of your prenatal care visits, did a doctor, nurse, or other health care worker talk with you about any of the things listed below? Please count only discussions, not literature or videos. (For each item, circle Y (Yes) if someone talked with you about it or circle N (No) if no one talked with you about it.)

- | | No | Yes |
|---|----|-----|
| a. How smoking during pregnancy could affect your baby..... | N | Y |
| b. Breastfeeding your baby | N | Y |
| c. How drinking alcohol during pregnancy could affect your baby | N | Y |
| d. Using a seat belt during your pregnancy..... | N | Y |
| e. Birth control methods to use after your pregnancy..... | N | Y |
| f. Medicines that are safe to take during your pregnancy | N | Y |
| g. How using illegal drugs could affect your baby | N | Y |
| h. Doing tests to screen for birth defects or diseases that run in your family..... | N | Y |
| i. What to do if your labor starts early.. | N | Y |
| j. Getting your blood tested for HIV (the virus that causes AIDS) | N | Y |
| k. Physical abuse to women by their husbands or partners..... | N | Y |

22. We would like to know how you felt about the prenatal care you got during your most recent pregnancy. If you went to more than one place for prenatal care, answer for the place where you got *most* of your care. For each thing, circle Y (Yes) if you were satisfied or N (No) if you were not satisfied.

Were you satisfied with.....

- | | No | Yes |
|--|----|-----|
| a. The amount of time you had to wait after you arrived for your visits..... | N | Y |
| b. The amount of time the doctor or nurse spent with you during your visits..... | N | Y |
| c. The advice you got on how to take care of yourself..... | N | Y |
| d. The understanding and respect that the staff showed toward you as a person..... | N | Y |

23. Had you been tested for HIV before this pregnancy?

- No
- Yes

24. When were you tested before this pregnancy?

- 6 months before you got pregnant
- 6 months to 1 year before you got pregnant
- More than one year before you got pregnant

25. At any time during your most recent pregnancy or delivery, did you have a blood test for HIV (the virus that causes AIDS)?

- No
- Yes
- I don't know

26. What were your reasons for not having an HIV test during your most recent pregnancy?

- I was not offered the test
- I did not think I was at risk for HIV
- I agreed to be tested but had difficulty getting the test done
- I was afraid of getting the result
- I had already been tested and did not think I needed to be tested again
- Other -- Please tell us:

The next questions are about your most recent pregnancy and things that might have happened during your pregnancy.

27. During your pregnancy, were you on WIC (Special Supplemental Nutrition Program for Women, Infants and Children)?

- No
- Yes

28. Did you have any of these problems during your pregnancy? (For each item, circle **Y** (Yes) if you had the problem or circle **N** (No) if you did not.)

No Yes

- a. Labor pains more than 3 weeks before your baby was due (preterm or early labor) N Y
- b. High blood pressure (including pre-eclampsia or toxemia) or retained water (edema) N Y
- c. Vaginal bleeding N Y
- d. Problems with the placenta (such as abruptio placental, placenta previa)..... N Y
- e. Severe nausea, vomiting or dehydration N Y
- f. High blood sugar (diabetes)..... N Y
- g. Kidney or bladder (urinary tract) infection..... N Y
- h. Water broke more than 3 weeks before your baby was due (premature rupture of membranes, PROM) N Y
- i. Cervix had to be sewn shut (incompetent cervix, cerclage) N Y
- j. You were hurt in a car accident N Y

29. Did you do any of the following things because of these problem(s) ?

- I went to the hospital or emergency room and stayed less than 1 day
- I went to the hospital and stayed 1 to 7 days
- I went to the hospital and stayed more than 7 days
- I stayed in bed at home more than 2 days because of my doctor or nurse's advice

The next questions are about smoking cigarettes and drinking alcohol.

30. Have you smoked at least 100 cigarettes in the past 2 years? (A pack has 20 cigarettes)

- No
- Yes

31. In the 3 months before you got pregnant, how many cigarettes or packs of cigarettes did you smoke on an average day? (A pack has 20 cigarettes)

_____ Cigarettes **OR** _____ Packs

- Less than 1 cigarette a day
- I didn't smoke
- I don't know

32. In the last 3 months of your pregnancy, how many cigarettes or packs of cigarettes did you smoke on an average day?

_____ Cigarettes **OR** _____ Packs

- Less than 1 cigarette a day
- I didn't smoke
- I don't know

33. How many cigarettes or packs of cigarettes do you smoke on an average day now?

_____ Cigarettes **OR** _____ Packs

- Less than 1 cigarette a day
- I don't smoke
- I don't know

34. Have you had any alcoholic drinks in the past 2 years? (A drink is 1 glass of wine, wine cooler, can or bottle of beer, shot of liquor, or mixed drink.)

- No
- Yes

35. a. During the 3 months before you got pregnant, how many alcoholic drinks did you have in an average week?

- I didn't drink then
- Less than 1 drink a week
- 1 to 3 drinks a week
- 4 to 6 drinks a week
- 7 to 13 drinks a week
- 14 drinks or more a week
- I don't know

b. During the 3 months before you got pregnant, how many times did you drink 5 alcoholic drinks or more in one sitting?

_____ Times

- I didn't drink then
- I don't know

36. a. During the last 3 months of your pregnancy, how many alcoholic drinks did you have in an average week?

- I didn't drink then
- Less than 1 drink a week
- 1 to 3 drinks a week
- 4 to 6 drinks a week
- 7 to 13 drinks a week
- 14 drinks or more a week
- I don't know

b. During the last 3 months of your pregnancy, how many times did you drink 5 alcoholic drinks or more in one sitting?

_____ Times

- I didn't drink then
- I don't know

Pregnancy can be a difficult time for some women. These questions are about things that may have happened before and during your most recent pregnancy.

37. This question is about things that may have happened during the 12 months before your new baby was born. (For each item, circle **Y** (Yes) if it happened to you or circle **N** (No) if it didn't. It may help to use the calendar.)

	No	Yes
a. A close family member was very sick and had to go into the hospital	N	Y
b. You got separated or divorced from your husband or partner	N	Y
c. You moved to a new address.....	N	Y
d. You were homeless	N	Y
e. Your husband or partner lost his job.....	N	Y
f. You lost your job even though you wanted to go on working	N	Y
g. You argued with your husband or partner more than usual	N	Y
h. Your husband or partner said he did not want you to be pregnant	N	Y
i. You had a lot of bills you could not pay.....	N	Y
j. You were in a physical fight.....	N	Y
k. You or your husband or partner went to jail.....	N	Y
l. Someone very close to you had a bad problem with drinking or drugs	N	Y
m. Someone very close to you died.....	N	Y

38. a. *During the 12 months before you got pregnant, did your husband or partner push, hit, slap, kick, choke, or physically hurt you in any other way?*

- No
- Yes

b. *During the 12 months before you got pregnant, did anyone else physically hurt you in any way?*

- No
- Yes

39. a. *During your most recent pregnancy, did your husband or partner push, hit, slap, kick, choke, or physically hurt you in any other way?*

- No
- Yes

b. *During your most recent pregnancy, did anyone else physically hurt you in any way?*

- No
- Yes

40. **How would you describe the time during your pregnancy?**

- One of the happiest times of my life
- A happy time with few problems
- A moderately hard time
- A very hard time
- One of the worst times of my life

The next questions are about your labor and delivery. (It may help to look at the calendar when you answer these questions.)

41. **When was your baby due?**

Month Day Year

42. **When did you go into the hospital to have your baby?**

Month Day Year

- I did not have my baby in a hospital

43. **When was your baby born?**

Month Day Year

44. When were you discharged from the hospital after your baby was born? (It may help to use the calendar.)

Month Day Year

I did not have my baby in a hospital

45. After your baby was born, was he or she put in an intensive care unit?

- No
- Yes
- I don't know

46. After your baby was born, how long did he or she stay in the hospital?

- Less than 24 hours (Less than 1 day)
- 24 - 48 hours (1-2 days)
- 3 days
- 4 days
- 5 days
- 6 or more days
- My baby was not born in a hospital
- My baby did not stay overnight in the hospital
- My baby is still in the hospital

47. How was your delivery paid for?

- Medicaid
- Personal income (cash, check or credit card)
- Health insurance or HMO
- TRICARE (formerly CHAMPUS)
- Military
- Other -- Please tell us:

The next questions are about the time since your new baby was born.

48. What is today's date?

Month Day Year

49. Is your baby alive now?

- No
- Yes

50. When did your baby die?

Month Day Year

51. Is your baby living with you now?

- No
- Yes

52. Did you ever breastfeed or pump breast milk to feed your new baby after delivery?

- No
- Yes

53. What were your reasons for not breastfeeding your new baby?

- I had other children to take care of
- I had too many household duties
- I did not like breastfeeding
- I did not want to be tied down
- I was embarrassed to breastfeed
- I went back to work or school
- My husband or partner did not want me to breastfeed
- I wanted my body back to myself
- Other -- Please tell us:

54. Are you still breastfeeding or feeding pumped milk to your new baby?

- No
- Yes

55. How many weeks or months did you breastfeed or pump milk to feed your new baby?

_____ Weeks **OR** _____ Months

- Less than 1 week

56. What were your reasons for stopping breastfeeding?

- My baby had difficulty nursing
- Breast milk alone did not satisfy my baby
- I thought my baby was not gaining enough weight
- My baby became sick and could not breastfeed
- My nipples were sore, cracked, or bleeding
- I thought I was not producing enough milk
- I had too many other household duties
- I felt it was the right time to stop breastfeeding
- I became sick and could not breastfeed
- I went back to work or school
- My husband or partner wanted me to stop breastfeeding
- I wanted or needed someone else to feed the baby
- Other -- Please tell us :

57. How old was your baby the first time you fed him or her anything besides breast milk?
(Include formula, baby food, juice, cow's milk, water, sugar water, or anything else you fed your baby.)

_____ Weeks **OR** _____ Months

- My baby was less than one week old
- I have not fed my baby anything besides breast milk

58. About how many hours a day, on average, is your new baby in the same room with someone who is smoking?

_____ Hours

- Less than one hour a day
- My baby is never in the same room with someone who is smoking

59. How do you *most often* lay your baby down to sleep now?

- On his or her side
- On his or her back
- On his or her stomach

60. Was your baby seen by a doctor, nurse or other health care provider in the first week after he or she left the hospital?

- No
- Yes

61. Was your baby seen at home or at a health care facility?

- At home
- At a doctor's office, clinic, or other health care facility

62. Has your baby had a well-baby checkup?

- No
- Yes

63. How many times has your baby been to a doctor or nurse for a well-baby checkup? (It may help to use the calendar.)

_____ Times

64. Where do you usually take your baby for well-baby checkups?

- Hospital clinic
- Health department clinic
- Private doctor's office
- Community Health Center
- Military facility
- Other -- Please tell us :

65. What type of insurance is your new baby covered by?

- Medicaid
- Private insurance/HMO
- Children's Health Insurance Program (CHIP)
- Other -- Please tell us :

The next few questions are about the time after you gave birth to your new baby and things that may have happened after delivery.

66. Are you or your husband or partner doing anything *now* to keep from getting pregnant? (Some things people do to keep from getting pregnant include having their tubes tied or their partner having a vasectomy, using birth control methods like the pill, Norplant®, shots (Depo-Provera®) condoms, diaphragm, foam, IUD, and not having sex at certain times (rhythm).)

- No
- Yes

67. What are your or your husband or partner's reasons for not doing anything to keep from getting pregnant *now*?

- I am not having sex
- I want to get pregnant
- I don't want to use birth control
- My husband or partner doesn't want to use anything
- I don't think I can get pregnant (sterile)
- I can't pay for birth control
- I am pregnant now
- Other -- Please tell us:

68. What kind of birth control are you or your husband or partner using *now* to keep from getting pregnant?

- Tubes tied (sterilization)
- Vasectomy (sterilization)
- Pill
- Condoms
- Foam, jelly, cream
- Norplant
- Shots (Depo-Provera)
- Withdrawal
- Other -- Please tell us:

69. Since your new baby was born, have you had a post-partum check-up for yourself? (A post-partum check-up is the regular check-up a woman has after she gives birth.)

- No
- Yes

70. At that visit, did a doctor, nurse, or other health care worker discuss family planning or birth control with you?

- No
- Yes

71. In the months after your delivery, would you say that you were..

- Not depressed at all
- A little depressed
- Moderately depressed
- Very depressed
- Very depressed and had to get help

The next questions are about your family and the place where you live.

72. Which rooms are in the house, apartment, or trailer where you live?

- Living room
- Separate dining room
- Kitchen
- Bathroom(s)
- Recreation room, den or family room
- Finished basement
- Bedrooms -- How many? _____

73. Counting yourself, how many people live in your house, apartment, or trailer?

Adults (People aged 18 years or older) _____

Babies, children, or teens (People aged 17 years or younger) _____

74. What were the sources of your household's income during the past 12 months?

- Paycheck or money from a job
- Aid such as Temporary Assistance for Needy Families, welfare, public assistance, general assistance, food stamps or Supplemental Security Income
- Unemployment benefits
- Child support or alimony
- Social Security, Worker's Compensation, veteran benefits, or pensions
- Money from a business, fees, dividends or rental income
- Money from family or friends
- Other -- Please tell us:

One important thing about getting good health care is your income. This information will help provide better services to all mothers and babies. Your answer will not affect any services you are now getting.

75. What was the total income before taxes for the people living in your household during the 12 months before your delivery? Check the box that was closest to your income

- \$7,999 or less
- \$8,000 to \$9,999
- \$10,000 to \$11,999
- \$12,000 to \$13,999
- \$14,000 to \$15,999
- \$16,000 to \$17,999
- \$18,000 to \$19,999
- \$20,000 to \$24,999
- \$25,000 to \$29,999
- \$30,000 to \$34,999
- \$35,000 to \$39,999
- \$40,000 to \$49,999
- \$50,000 or more

Thanks for answering our questions! Please use the space below for any comments you may have.
