NEWARK, DELAWARE, APRIL 14, 1920

NUMBER 23

Little Quakers Defeated 4 to 2

Second Game of Season Results in Blue and Gold Victory

Delaware defeated Haverford in baseball last Saturday by the score of 4 to 2. After the disastrous defeat at the hands of Penn State, the news came as a distinct relief to the followers of the blue and gold team who were afraid that the Delaware lads would be several weeks yet in hitting their stride.

"Lefty" Carll pitched good ball throughout the game, having only two bad innings, when the Quakers scored their two runs. His work was not flashy, he having only three strikeouts to his credit, but the Haverford lads could not seem to connect safely with his delivery. Rudy Taggart played good ball for Delaware, having three solid hits to his credit and fielding his position in almost faultless style. The batting of Brown featured the Haverford offense.

Although the main liners out hit their opponents, they failed to tally on several chances they had. Fast fielding broke up several of their opportunities and inside baseball spilled the rest and the Delaware boys were able to keep in the lead.

On Friday next the Chicks play Lafayette at home and on Saturday they go to Carlisle to try their luck against Dickinson.

The score:

Delaware		AB.	H.	O.	A.	E.
Robbins, 3b	5	0	1	2	1	
McCardell, 2b	3	0	5	0	1	
Marvel, rf	4	1	1	0	0

Total	34	9	27	16	4	

Runs—Burritt, Walton, Robbins, Madden, Stewart, and Taggart.
Umpire—Adams.

Miss Eleanor E. Todd Assistant Librarian

Miss Eleanor E. Todd has been appointed assistant librarian of Delaware College library to succeed Miss Mae Kerr. Miss Kerr, who performed her duties at the library for ten years, retired because of ill-health. Miss Todd was for four years, 1914-18, Registrar of Delaware College. She was well liked as Registrar, and should become popular with the students as assistant librarian. She has lived in Newark for a number of years and she has a lively interest in college affairs.

Sigma Phi Epsilon Holds Informal Dance

The Sigma Phi Epsilon gave their last informal dance of the collegiate year in Old College last Saturday evening. This dance was one of the most enjoyable informal affairs ever given by the fraternity.

The hall was simply but effectively decorated with the colors of the fraternity and with potted plants. Over sixty couples, including many out of town guests, were present. Music was furnished by Madden and White's Orchestra. At a late hour, the dancers retired to the Lounge where light refreshments were served.

The patronesses were: Mrs. S. C. Mitchell, Mrs. George Carter, Mrs. Walter Ritz, Mrs. George L. Townsend, Jr. Mrs. Harold E. Tiffany, Mrs. George Dutton and Miss Quaesita Drake.

Among the fraternity alumni present were: Dr. W. Owen Sypher, Mr. Robert Lewis, Mr. George L. Townsend, Lieut. Ephraim Jolls, Jay Robinson, J. M. Swing, Robert Barkley, and William Hoey.

Address About Public Water Supply

"Important Features in Public Water Supply" is the subject of an address to be given to the Engineering Society on Thursday evening by Mr. Frank Collins. Mr. Collins is an Electric Power and better Supply Engineer. He is an alumnus of Delaware College. For many years Mr. Collins was with the General Electric Company, working on their power developments in New England. His address tomorrow evening will be of wide interest and will be of value to every engineer.

An added feature of tomorrow's program is a short talk to be given by Professor H. K. Preston. Professor Preston is faculty advisor of the A. A. E. chapter, and his talk is sure to be of interest. An added element this time is the surprise that attends his talk. His subject has not been announced, and will not be announced.

All the engineering students are invited to be present at the meeting tomorrow. It is to be held in the west wing of Old College, and it will start promptly at 6:45.

Weekly Meets

The weekly meets are approaching their close and competition is tightening. Harmer now leads by more than 50% over his nearest opponent, Arbuckle. The men and their scores to date:

Harmer	69.5
Arbuckle	33.5
Loose	31.5
Twoes	27.
Lilly	24.
Wilson	23.
Harper	21.
Hoey	20.
Marconetti	19.5
Jacobs	19.5

List Of Graduates Now Completed

Dean E. Laurence Smith has just completed the quinquennial catalog of graduates. The last issue contained the graduating class of 1915. The present issue shows the positions of responsibility acquired by the grads in the last five years, as well as the positions of the younger graduates.

Learning to Live Is the Object of College Study

Educational Ideal Makes College an Avenue to the Best in Life

By E. N. Vallandigham
Delaware 1873

Education is the sole object of college life, as in a sense it is the sole object of all human life. Both living and earning a living are educative processes. We make them more or less effective as such according to the fashion in which we face both. Education at college as in life, is not alone of the head, not merely directed toward the essential of enabling the youth to earn his living in the market of the world. It is much more than that. It is much more than that plus the cultivation of an appreciative taste for the fine arts—of literature, music, and the rest. It is more than all these plus education in manners, carriage, and deportment, plus the development of a sound, well functioning physique. It implies also education of the emotions, education in morals and the development of the religious sense and feeling. Whatever we do at college promotes or retards our education in one or more of these things that go to mould the civilized man at his best.

Education of the intellect, whether in matters technical or in those of taste, guarantees nothing as to moral or religious education. The president of an American university, when asked whether a college education tended to raise a man above the immoralities of practical politics, answered that it at least tended to raise his price. That was a way of saying that the education of the head is not necessarily moral education. It is notorious also that many men of exquisite taste and skill in the fine arts have been essentially immoral, and some such men have been essentially non-moral, though great art is never immoral, and great artists are apt to be consciously or unconsciously great moralists, because it is impossible to present human life truly by means of the creative arts without teaching a moral lesson, just as it is impossible for a man to live without teaching a moral lesson to those who intelligently observe his life. Shakespeare is a great moralist, not because he sets out with direct intent to teach a lesson, but because he conceives of life as having a moral significance, and shows us men and women as they are.

If we come to college seeking merely such education as shall give us more butter on our bread than most men get, or hoping merely to acquire keener perceptions of taste, or in pursuit of fun, we shall lose much that college life should afford in the matter of education. Social contact, the athletic field, the classroom, the long walks and the long talks with congenial comrades, should all be educative. The honor system should be an education in the higher morals. These delightful spring days should be an education in aesthetics, and more, in essential religion, for serene joy in the aspects of nature tends to

Delaware Loses to Penn State

One Big Inning Spells Defeat; Final Score, 9 : 2

Loose playing accompanied by severe, cold winds reared the seven-inning contest with Penn State held on Frazer Field, April 6. One big inning, the second, was disastrous for the "Chicks," the visitors netting six runs.

Rothrock started on the mound, but his work was not up to standard and after he had walked three in the second inning he was relieved by Carll. The visitors reaped a six-point harvest by timely hits during the weak inning. Delaware tightened up in the

(Continued on Page 2)

Interesting Meeting Of Wolf Chemicals

The Wolf Chemical Society held a very interesting meeting on Thursday evening in the west wing of Old College. It was planned to make this meeting the biggest and best of the year, and those who were present were not disappointed. The two outside speakers who addressed the meeting proved to be well worth hearing.

The first speaker of the evening, R. Paul Kite, '20 gave a short talk on the method of preparing diazo compounds. "Kitey" was in this work last summer and was able to give some of his personal observations of this sort of work.

Mr. Thomas S. Carswell, of the class of 1918, was the next speaker. Since leaving college, Carswell has made an enviable record for himself in his work with the National Aniline and Chemical Co., at Marcus Hook, Pa., and is at present employed as research chemist for this company. The subject of his talk was "The Reduction of Aromatic Nitro-Compounds," and in it he showed the great importance of these compounds in the practical plant production.

The last speaker of the evening was Mr. Kenneth A. Horn, a graduate of the University of Pennsylvania, who holds a responsible position with the National Aniline and Chemical Co. Mr. Horn chose as his subject the "Control of Plant Operation in the Manufacture of Organic Intermediates," He showed several samples of the various products at the different stages of their production.

Following the speeches, refreshments, consisting of cocoa and cakes were served and the meeting took the form of an informal discussion.

bring men nearer to that great mystery called by all but gross materialists "God." If we leave college without having come to know that body, mind, and heart all share in education, without being better physically than when we came, keener in mind, clearer in moral perceptions, stronger in self control, broader and more generous in our social and individual sympathies, so that we shall escape the pride and prejudice, the intellectual and spiritual arrogance which are the besetting sins of the academic class, we have failed to make the college an avenue to what is best in after living.

Omega Alpha Dance Brilliant Affair

Second Annual Ball by Fraternity Enjoyable; Decorations of Japanese Style

Old College was the scene of gaiety and festivity on Friday evening when the Omega Alpha Fraternity gave its second annual dance. About sixty couples were present, including many Alumni and guests.

The scheme of decorations was Japanese, and the fraternity's colors, orange, black and white, were used with much success in producing the Oriental effect. Streamers were stretched from the bannister in the lobby to a large orange lantern suspended from ceiling. The fixtures at the sides of the walls of the lobby were decorated in orange, and added much to the attractiveness of the hall.

The floor itself was laid out to represent a Japanese garden and dancing pavillion. At the one end a lattice, covered with branches of laurel intermingled with cherry blossoms, was dropped from the balcony above. Behind the lattice, was a sort of "fuzzy corner," which was occupied by the patronesses. Colored lamps cast a soft glow over the garden and lent a pleasing touch to the scene.

The walls of the hall were decorated with panels of various design. A checker-board effect in the center of an orange background characterized some, while others were done in a Japanese design in black on an orange and white background. Large lanterns of orange surmounted by black figures of animals were suspended from the ceiling. Laurel was barked over the windows. On the front of the balcony, an enlarged duplicate of the Omega Alpha badge was suspended, surrounded by white frosted globes in a diamond arrangement.

During the intermission, refreshments, consisting of chicken salad, rolls, mints, ice cream, cakes, coffee and nuts were served in the West Wing under the supervision of Miss Hall. This room as well as the Lounge was tastefully decorated with the fraternity's colors and the banners of the several fraternities.

The patronesses were Mrs. Samuel C. Mitchell, Mrs. F. M. K. Foster, Mrs. C. A. McCue, Mrs. E. L. Smith, Mrs. C. O. Houghton and Dean Winifred J. Robinson.

Improved Lighting For Drawing Room

New indirect lighting fixtures are shortly to be installed in the Drawing Room in Mechanical Hall. The artificial lighting in this room has always been a source of trouble and inconvenience to those who have been compelled to work there in the evenings, and the installation of these improved fixtures will add greatly to the working facilities in this room. These improvements are being made under the direction of Professor Leo Blumberg.

Strong Student Sentiment

In his recent article referring to the force that might be made of the honor system, Dr. Vallandigham says "What shall we say of the short-cut paths running across the grounds behind Recitation Hall? A strong and sound student sentiment could stop the use of those short-cuts in a single week."

A fence has now been built from the corner of the athletic field to the Board of Health building, and from that building to Recitation Hall. The fence should undoubtedly bring the removal of the short-cuts, but nevertheless the point brought out by Dr. Vallandigham should not be lost sight of. The student body must show that it has the "strong and sound" sentiment of which he speaks; it must show that the honor system is a living force, and that more material supports are not really necessary to secure results that should come from the system.

As an initial step toward using the force of sentiment mentioned, let us see to it that paper and other rubbish is kept off the campus. Let us work to make the campus what it really ought to be!

Help Out

The Class of 1921 is about to launch a campaign to solicit subscriptions for the 1921 Blue Hen. How easy it is for us to pick up a "Blue Hen" and read it without a single thought of the hard work, time, and effort put upon it by the "Blue Hen Board." The best way to show appreciation for the work of the very few students, who year after year take a heavy load of responsibility upon their shoulders in order that in college annuals, at least, Delaware College may stand at the top, is to purchase a subscription blank with a smile on your face and the question on your lips, "Can't I help a bit?"

Council Dues

Every student should see to it that before the week is over, he has paid his second term dues to the representatives of the Student Council. Certain bills have to be paid and the credit of the council must be preserved. Every man who through small mercenary principles continues to withhold his second term's dues, is giving

the Council much trouble, is hurting the credit so graciously extended to the Council by the friends of the college, and is acting in a way which is inexcusable or unjustifiable.

A Possibility

"May time" is rapidly approaching. Whenever we hear the word May mentioned, we immediately think of "May Parties," "Maypoles," "May Dances," and "May Carnivals." Why should not the Student Body of the College hold a "May Carnival" on Frazer Field? Under proper management the affair would be a great success. It would be of great value in enabling the Student Body to raise a sum of money for any worthy purpose. Students continue to seek amusement elsewhere when amusement is not given here at the college over the week-end. Money is spent for amusement elsewhere and nothing is thought of it. A well planned, well executed "May Carnival" would be a great help to our college. Friends from all over the state would assemble to see and hear the side shows and the music, and there could be no doubt of the success of the affair. At least, the thought of a carnival is worthy of consideration.

Former Commandants To Attend Commencement

General W. H. Gordon writes that he will attend the Commencement of Delaware College on Monday, June 14. The General was formerly the Commandant of cadets at the College. His tenure in this office was cut short by the breaking out of the Spanish American War, into which he threw himself with great ardor. The letter states that he and Mrs. Gordon look back upon their tour of duty at Delaware College with fond recollection. General Gordon has just seen the ground plan for the development of the College which interested him very much and which he hopes to visualize on the campus during his visit at Commencement. He is drawn back to the College by reason of the fact that Commencement marks the fiftieth anniversary of the reopening of the College after the Civil War.

George Leroy Brown, Colonel U. S. Army, retired, writes likewise that he and Mrs. Brown expect to be present at the Commencement and adds: "My Grandfather, when he visited me at West Point, said in parting, 'Remember that the happiest man is the one that

can call up the greatest number of pleasant memories.' Certainly it has been a constant source of delight to me to recall the delightful friendships formed during the tour of duty at Delaware College."

The college is honored in having these two officers return for Commencement. It is gratifying to know that they look back upon their attachment to the college pleasingly, and that they still retain their interest in its welfare.

DELAWARE LOSES TO PENN STATE

(Continued from Page 1)

fourth and started a rally when George Madden "shot" one out to center. "Bess" Carter reached first on an error and Madden advanced to third, scoring on the throw to second. Gray scored Bess by a pretty single. Gramley then struck the next man out and Delaware's scoring ended for the day.

The contest, having been played under such unfavorable conditions offered very few indications of the relative playing abilities of either team. Considering conditions, Penn State evidenced a shade of superiority.

For the Blue and Gold, Gray Carter played his usual, consistent and heady game. Jimmy Robbins worked well at third base with Gray, securing three put-outs by the catcher to third route. Gray had two singles and Jimmy one.

For the visitors Ullery and Haines were the stellar performers.

The line-up:

Men of Force

There is always room for a man of force, and he makes room for many. Society is a troop of thinkers, and the best heads among them take the best places. A feeble man can see the farms that are fenced and tilled, the houses that are built. The strong man sees the possible houses and farms. His eye makes estates as fast as the sun breeds clouds.—Emerson.

| I-I. Fraternity House Group | Q. English | | | |

The new group plan, which has been prepared by Day and Klauder, is a revision of the one published in 1917. The new plan embodies a rare thoroughness and harmony of development, and indicates increased certainty of achievement over the plan of 1917. Whereas the 1917 plan presented something that was par-

tially an experiment, with many details lacking, and with others poorly balanced, this plan shows a positive and remarkably comprehensive program in which every detail has been worked out and made to balance with every other detail. In the group M to U changes have been made which include no

less than the addition of one more structure,—the engineering building M. The building S, which was formerly intended to be the engineering building, will be a liberal arts building,—something not provided for before. The auditorium U is designed to face both on South College Avenue and on the Green, thus forming a uni-

que and handsome entrance to the college. Changes have been made in the details of the plan of the library. As it is now designed, the building consists of a main building with two forward wings on each side, separate from the main building. The wings are intended for special collections of books. It is thought that one

might perhaps be given over to all rare books, and the other to books of history; these purposes are suggestive only, however. A notable feature on the new plan is the provision for an open-air theater, indicated by the acres just south of the central heating plant, W.

Informal Discussion of College Future

Student Discussion to be Held with Mr. H. Roduey Sharp

For some time there has been some doubt in the minds of the students as to the certainty of the future development of the college. Sensing this fact, and hoping to clarify some of the matters involved, the Review Board has arranged for an informal discussion of the matter on the evening of Monday, April 19, at 6:45. At the invitation of the Review, Mr. H. Roduey Sharp has consented to be present and to enter into informal discussion with the students about the college future.

The members of the two upper classes will remember that during 1918-19 Mr. Sharp often visited the college, and that he played a large part in keeping before the students the Delaware College of the future. As Delaware men, all the students are interested in the college, and are ready to work for its success. During the present troubled period, all should do constructive work, and should keep in mind the larger future which lies before the college. The meeting on Monday evening should do much to show just what that larger future is.

Mr. Sharp is chairman of the Buildings and Grounds Committee. He is an alumnus of the college, is now, and always has been a true friend of the college, and is in close touch with college affairs.

The students are concerned mostly with the immediate prospects. It is hoped that at the informal discussion on Monday evening between Mr. Sharp and the students, he may answer the questions that are in the minds of many students, and that he may give the outlook of the college as he sees it. All the students are invited to be present and to participate in the discussion.

Teaching Fellowships At Syracuse

For the promotion of graduate study and research, Syracuse University offers ten teaching fellowships of the value of five hundred dollars each. They are open for competition to graduates of any college of good standing, who have shown notable efficiency in the department in which they wish to study.

The holder of a fellowship may be working for the Master's or Doctor's degree and is expected to devote one-half time to study and one-half to assisting in the department to which he is appointed. He is required to pay no tuition, but if his work lies in departments where laboratory fees are charged, he may be required to pay such fees.

Candidates should send their applications to the Dean of the Graduate School before April 20th to receive consideration for the following year. The awards are made by the Executive Committee of the Graduate School not earlier than April 20th.

FIFTY SOLDIERS TO BE STATIONED HERE FOR VOCATIONAL GUIDANCE

Linden Hall to be Secured for Housing the Contingent which Arrives May 1

In keeping with the policy of Land Grant Colleges throughout the United States, Delaware College is arranging to provide instruction in agriculture for about 50 disabled soldiers.

Under the Rehabilitation Act the government is planning to give vocational training to a number of soldiers whose infirmities will not permit them to carry on their former trades or professions, and to those who are without specific training.

Negotiations were completed yesterday to rent Linden Hall, the Whittingham home, where the soldiers will be housed. The size of this dwelling and its proximity to the Experimental Farm make it a particularly desirable location for this purpose. The first contingent of these men is expected to arrive about May 1. Special instructions will be secured for this group.

Baseball—Friday, 4 P. M., Delaware vs. Lafayette at home.
Friday—Lafayette
Saturday—Dickinson
Let's have two victories.

Director Cullimore Joins Phi Kappa Phi

At a meeting of the officers of the Delaware College chapter of the Phi Kappa Phi Fraternity, held on Tuesday, April 6, Professor Allan R. Cullimore was initiated into honorary membership in the fraternity. Professor Cullimore was elected to membership last winter, when he was Dean of the Department of Engineering at Delaware College. He is now Director of the College of Technology at Newark, N. J.

Will Talk On "Modern Novels"

Dr. F. M. K. Foster will deliver a lecture on "Modern Novels," before the Faculty Club next Monday evening at 8 o'clock. An executive board meeting will be held at 7:30.

Many Calls This Year For Agricultural Teachers

During the past few weeks the department of Vocational Agricultural Education of Delaware College has been receiving a number of requests for Vocational Agricultural teachers for next year. The salaries offered range from \$1800 to \$2,000. Some of these requests come from our own State where the present agricultural instructors have definitely decided to leave Delaware at the close of the school year to go with other states paying higher salaries. Twenty or more agricultural graduates could be placed in teaching po-

sitions this coming June at attractive salaries if Delaware College could supply them.

The demand for high school agricultural teachers throughout the country has greatly increased since the passage of the Federal Smith-Hughes act providing for vocational education.

Delaware College is training fifteen young men for Vocational agricultural teaching positions at the present time. Only two of which will be graduated this coming June, however.

Newark Talent Helps With Entertainment At Stanton

Musical talent from Newark furnished a large part of the entertainment last Thursday evening at Stanton when the Sewing and Baking Club gave an entertainment in Stanton Hall. The Delaware College quartet sang and Miss Madeline Raby gave several readings.

The program follows:
Instrumental solo, Dr. C. F. Miller of Delaware College; reading, Miss Madeline Raby, "How Mrs. Puffer Celebrated Her Silver Wedding Anniversary;" selections, male quartet, composed of G. V. C. Houghland, R. O. Bauman, E. W. Kirkbride and G. E. Hancock, accompanied by Dr. Miller; reading, "Modern Cinderella," Miss Raby; selection, male quartet.

Who Plays Chess? --A Definite Class

A Study of Brandywine Club Shows Class of Men That Play

Just as there is a definite class of men who are athletes, so is there a definite class of individuals who play chess. A study of this class of individuals is not without interest, even to the person who does not play chess. In order to add interest to the study, the Brandywine Chess Club of Wilmington, Delaware, was selected for investigation. It is believed that the results obtained by this investigation are fairly typical.

To obtain definiteness, the field was narrowed down so that only the five men on the Brandywine Chess Team were considered. The education, personality, and work of each man was carefully investigated, and four facts were found to be outstanding: First, all five are college-bred; second, three are scientists (chemists), and two are business men; third, two are members of honorary fraternities; and fourth, one man may justly be recorded as internationally prominent in his profession, while at least two others occupy enviable places of distinction.

There is perhaps no better way to illustrate the class of men who play chess than to sketch briefly the personalities of these men, who may be said to be typical of the class.

The following statement concerning Dr. Thomas H. Norton, Consulting Chemist connected with the duPont Company, is made by a well-known chemical magazine: "Dr. Norton is a unique figure among American chemists. He combines with thorough scientific training, intimate experience as a teacher and industrial, executive and an economic perception that has made him a scientific scout and pathfinder in the vanguard of the expansion of the American chemical industries." Dr. Norton was graduated from Hamilton College, and from the University of Heidelberg. He studied under Wurtz at the University of Paris. There are few chemists who can boast of having studied under those classic teachers of chemistry, Bunsen, von Hoffman, and Wurtz! Dr. Norton holds the degrees of Doctor of Science and Doctor of Philosophy, and is a member of the honorary fraternity, Phi Beta Kappa. His honors could be distributed singly among the thirty "odd men" of the senior class, and there still would be several to pass on to the succeeding class! In 1905, President Roosevelt sent Dr. Norton on a special mission to Persia to recover indemnity and to see that murderers of Americans were properly punished. Dr. Norton lays the success of this mission to a game of chess which he diplomatically lost to the Persian Chancellor! His "Dyestuff Census" is regarded as the most important single factor in enabling the young American dyestuff industry intelligently and effectively to shape its plans for expansion.

Dr. H. H. Morris is another chemist who has obtained distinction. He obtained all of his de-

grees from the University of Wisconsin and is a member of the honorary fraternities Sigma Xi and Phi Lambda Upsilon. He is at present engaged by the duPont Company as Executive Chemist in the Miscellaneous Chemical Division. He also finds time to keep things stirring at the Brandywine Chess Club and serves in the capacity of Executive Secretary. Dr. Morris is an interesting American gentleman with whom it is a very distinct pleasure to associate.

F. C. Zeisberg is the third scientist discovered on the team. He was educated in the private schools of Virginia, and received his technical education at the University of Virginia. During the war, he was the duPont Company's nitric acid expert, assisting in the design construction, and operation of the nitric acid manufacturing and concentrating plants at Hopewell and Old Hickory, Tennessee. He has obtained several patents on nitric acid concentrating processes. At present he is Manager of the Intelligence Division, Chemical Department of the duPont Company.

C. L. Reid, and K. L. Emmons are the business men on the team. Mr. Reid is Vice-President of a Coffee Roasting firm in Philadelphia. He was born in Australia, and received his education at Nelson College in New Zealand, and St. Georges College, England. He has played chess with many masters.

Mr. Emmons is a former Delaware College student of the 1914 class. He later studied law at the University of Pennsylvania. He is now in the automobile business.

The facts brought out in the previous paragraphs should serve to show that the general chess player is not a "nut" who should be deposited in a padded cell, but an intelligent person who is doing useful work in the world and finds in chess the recreation he requires.

Trustees Hold Special Meeting Saturday

The trustees of Delaware College held a special meeting at the Hotel duPont on Saturday, April 10, at which the resignation of Dr. Samuel C. Mitchell as president of the college was accepted and the executive committee was authorized to take steps to fill the vacancy. However, no hint of the probable successor was given out, although several rumors have been afloat for some time.

Several trustees spoke in praise of Dr. Mitchell, and the board adopted a set of resolutions expressing the gratitude and appreciation of the college and those connected with it for his services during the six years he was connected with the college.

Engineers Volunteer For Work On Railroad

In answer to a call for volunteers to take the place of the strikers on the Pennsylvania Rail-

road on Tuesday, over thirty men from the Junior and Senior engineers responded, from which number twenty were selected and left immediately to report for work.

The call was received from Mr. Latrobe, General Superintendent of the Maryland Division of the Pennsylvania Railroad, at about ten o'clock yesterday morning. A special meeting of the faculty was

called immediately and it was decided to excuse twenty men from their college work for five days, or as much longer as they should be needed. Similar calls have been made to many of the neighboring colleges and it is understood that, in every case, more than enough volunteers have been forthcoming.

The nature of the work which will be required of the volunteers

is not definitely known, but, in all probability it will consist of work in the shops or such positions on the passenger trains as do not require a great amount of experience.

Many of the Juniors who were not fortunate enough to be chosen, are in readiness to go at a minute's notice, and, in some cases, have even secured work through their own initiative.

"Give Your Trees A Chance"

The work of our specialists will preserve the Lindens on the Old Campus at Delaware for many future generations.

The fact that we have been chosen to do this work should justify your confidence in us.

Mississippi River Power
Company, Keokuk, Iowa

Utilizing Nature's Power

ELECTRICAL energy generated by water power has grown to be one of our greatest natural resources — and we have only begun to reach its possibilities. It mines and refines our ores, turns the wheels of industry, drives our street cars and lights our cities and towns. The power obtained from Nature saves many million tons of coal every year.

At first the field of its utilization was limited by the distance electricity could be transported. But soon research and engineering skill pointed the way to larger and better electrical apparatus necessary for high-voltage transmission. Then ingenious devices were invented to insure protection against lightning, short-circuits, etc., which cause damage and interrupt the service. And now all over the country a network of wires begins to appear, carrying the magic power.

The General Electric Company, with its many years' experience, has played a great part in hydro-electric development. By successfully co-ordinating the inventive genius of the company and its engineering and manufacturing abilities, it has accomplished some of the greatest achievements in the production and application of electrical energy.

The old mill wheel of yesterday has gone. Today the forces of immense volumes of water are harnessed and sent miles away to supply the needs of industry and business and the comforts of the home.

A casting for one of the huge water-wheel driven generators installed in the Mississippi River Power Company's plant at Keokuk. This installation will ultimately consist of thirty of these machines, giving a total capacity of 216,000 kilowatts (300,000 horse-power). It is the largest hydro-electric development in the world. The General Electric Company builds generators for water-wheel drive in sizes ranging from 27½ to 25,500 kilowatts and the aggregate capacity of G-E units now in successful operation is in excess of four million horse-power.

Newark Inn and Restaurant

offers to visitors a pleasant resting and refreshment place. The hotel rooms are large, airy and immaculate, the beds comfortable, and the bath rooms convenient and modern.

The Restaurant has the best modern equipment and offers quick service and well-prepared food.

Intercollegiate

George Washington University
—The White Squires, a new organization whose object is to "infuse honor, spirit, and fellowship among the men of the three upper classes," has been formed recently.

Franklin and Marshall—A Herbert Hoover Club has been formed on a non-partisan basis for the purpose of crystalizing sentiment in behalf of the nomination and election of Herbert Hoover as the next President.

University of Illinois—President Edmund J. James has tendered his resignation as president of the University of Illinois, after serving in that office for fifteen years.

Cornell—A total of 298 students were dropped from Cornell University at the end of the first term. This is the largest number in the history of the University. The greatest number was dropped from the Arts course.

Penn State—It will be necessary to limit the Freshman class to be admitted next year to 750. This is the maximum number the class rooms, shops and laboratories will accommodate.

Syracuse University — Sixteen Chinese students, including one co-ed, at Syracuse University, are reorganizing the Chinese Students' Club.

Purdue—Plans are being perfected for a memorial building, honoring the 4000 men who saw service in the war.

Let's Be Gentlemen

The Editor of the Review:

In days of yore classes commenced around 9 A. M. Then a student could consider himself a gentleman, for no gentleman thinks of rising before the hour of eight, and much less of eating his breakfast at 7:20. If this "sunrise" system were a necessity, this article would not be, but the author believes that a remedy can be applied.

We now have an hour and ten minutes at noon—the same length of time, as our predecessor enjoyed, but in those days there was no Commons; many of the fellows ate at their fraternity, or boarding houses. A fair proportion of the noon hour was spent in going and coming, or to wait one's turn to be served. The Commons saves approximately 20 minutes at lunch, but in the morning the college dining hall deprives us of half an hour or more of our seance with Morpheus.

The writer believes that the present hour for dinner can well be reduced to 45 minutes. (In other institutions the time extends from 30 to 50 minutes.) This change would enable us to eat our breakfasts 15 minutes later, or combined with the following suggestions, 30 minutes later.

Most of the afternoon periods are devoted to laboratory work which covers from two to four hours. As many of these labs. run through two or more hours it is unnecessary to have the usual ten-minute intermission. We are not to lose sight of the fact that there are a number of afternoon recitations on the schedules of some of the men, but in this case, why not reduce the intermission between the periods held after dinner to five minutes, for who cannot get from one classroom to another in five minutes? Such an alteration of the present schedule would save us half an hour during the day which we could use very well before we begin our day's work, and at the same time classes would be over at the same hour as they are now (4:50 P. M.) This tentative arrangement works out the

same as in the case of the Irishman whose sheet was too short, so he cut a strip off the bottom and sewed it to the top of the sheet, only our result would be more successful. Where he cut a strip off of the bottom of his sheet and tacked it on to the top we would be cutting 0 minutes out of the middle of our schedule, and be putting it to the bottom.

We would furthermore be saving time, for we are not in the dining hall very long at noon; the remainder of the time is spent in lounging or in trying to cram in a little work before the first hour. Oftentimes we get so far into this work that we risk being late to class in our attempt to get to a good "stopping place." It is true that we need a little rest included in our daily program, but who will contend that 15 minutes of lounging is more beneficial to a student than half an hour more of real sleep in the mornings.

Twenty.

Annual Catalog Ready For Distribution

The College Catalog, which has been revised and enlarged under the direction of Dr. W. Owen Sypherd, is now ready for distribution. This edition contains the announcements for the 1920-1921 session as well as a cut showing the revised development plan for the college. Dean Graves of the University of Pennsylvania, after examining the catalogs of many colleges, highly praised the Delaware College catalog. He has made especial mention of the very desirable arrangement of the publication and its information for the students.

Classics

Home is naught without a mother
Church is dull without a preacher
Life is sad without a lover
But class is joy without a professor.

The Sophomores are taking up a collection to buy "Tillie" Lemmon a wheelbarrow in which to carry his books from one class to another.

Favorite Occupations

- Repp—Studying people.
- Jacobs—Arguing.
- Lemmon—Carrying ten or twenty books.
- Ayerst, Draper, and Hallett—Going to Dover.
- Sackett—Showing the Professor that he is wrong.
- Fletcher, "Bob"—Going down to the W. C. D.
- Rovnor—Going to the movies.
- Reed, A. C.—Studying Law.

Gilbert Christfield and Leopard Daly are commuting this week. They tell us that Boston and Syracuse are still on the map.

The members of the class of '22 wish to show their appreciation to those Freshmen who are proving faithful in the gym, during the past few weeks. A Freshman has everything to gain and nothing to lose in aiding others.

The class of '22 would like to have every Sophomore who has not done so to contribute his eighty cents to the Student Council and show the other classes that we are alive and are willing to help.

Who is going to be the next fellow to pay his class dues for the month of March?

Alumni Notes

E. Earl Dickey, '19, is associated with his father in real estate business at Stanton, Delaware.

Paul G. Swayne, '18, is with the duPont Motors Company, Wilmington, Delaware.

Francis L. O'Rourke, '19, is now located at Arlington, Mass., in the European Corn Borer Laboratory. His address is 19 Court Street, Arlington, Mass.

John H. Meredith, '19, is salesman for the Merridale Farms at Middletown, New York.

Omega Alpha Alumni Meet

A banquet and meeting was held on Saturday evening at the Lambros Restaurant in Wilmington by the alumni of the Omega Alpha Fraternity. About thirty of the alumni were present. The senior members of the fraternity were the guests of the alumni at the banquet. At the meeting which followed the banquet, reports were received concerning the fraternity, and there was discussion of fraternity policies.

A Detectif Story

(continued from last issue)

Chapter II

Duotres Unum, the beautiful daughter of the banker, was standing in the spacious parlor, not looking in the mirror. This was strange for our heroine, but she could not help it, for she was gazing intently into the barrel of a revolver.

"Aha, me proud beauty," sneered the villain. (This is not exactly grammatical, but no detective story is complete without these words.)

"You are very rude, to say the least," she exclaimed.

"You shall fly with me," laughed Olaf.

"I wont."

"You will."

"I wont."

"All right, then, you wont. Have it your own way," said the villain.

"I'll go just for spite," exclaimed Duotres.

"Fine," said the villain, "when will you be ready? It is 2 o'clock now."

"I shall be ready in fifteen minutes," replied Duotres.

"All right, but remember, the train leaves at 7 o'clock; so hurry."

"You know me Al," cried the heiress to millions.

(Aha, the plot thickens.)

Chapter III

"It must be him" exclaimed Thomas Clyde, the ramous detective, "yes, he!"

"It must be who?" asked E. Pluribus Unum, anxiously.

"That will have to be found out later," replied the detective as he helped himself to a cigar from the banker's vest-pocket. Just then the door-man staggered in and gasped how he had been overcome by the villain. Thomas Clyde listened calmly and intently. E. Pluribus Unum stood nervously shaking his left hand and listening anxiously. (to be continued)

LIGHT OF HISTORY ON CHRONIC KICKERS

Interesting Narrative Told of "Poor Food" at Delaware College

It might be well for some of the "chronic kickers" among the student diners to read pages 50 to 52 in Simon Newcomb's "The Reminiscences of an Astronomer." The book can be found in the library; its number is 925-N 58. For further convenience, the essentials of the story are given here.

In Maryland, Newcomb had a neighbor, "Billy Bowler" by name. Young Bowler had been "partly educated at Delaware College" (This was about 1855). In describing his college experiences to Newcomb, Bowler had complained that the students got miserably poor food. Newcomb assumed from this complaint that Bowler was a sumptuous eater, and, on the strength of his assumption, he contrived to be invited to his home. Although there was a fine garden with plenty of vegetables, and although chickens appeared on the servant's table, the host had only short-cake and fried

meat. Newcomb inquired of the cook, and this guardian of the table replied, "Mase'er Bowler don't like vegetable," and "Mase'er Bowler don't like chicken."

Newcomb investigated further. He asked Bowler what they had to eat at Delaware College, whereupon Billy described what seemed to be a fairly well provided student's table.

"What earthly fault had you to find with that kind of food?," asked Newcomb. "Oh," replied Bowler, "they had no short-cake there."

Chess Club Meets

The Chess Club held an informal meeting in Purnell Hall last Thursday evening which was largely attended. Doctors Foster and Moore engaged in simultaneous play with the entire assemblage. These two experts played sixteen games, winning fifteen and losing one. Swezey played a particularly fine game with Doctor Moore which he was forced to resign after over two hours play. Following the matches, the club members adjourned to Coverdales' where refreshments were served. It is likely that these informal meetings will be held in Purnell Hall weekly.
