VOLUME 58, NUMBER 25

NEWARK, DELAWARE, FRIDAY, APRIL 12, 1940

PRICE TEN CENTS

DELAWARE STATE DRAMATIC FESTIVAL TO BE HELD AT MITCHELL HALL ON APRIL 13

*Competitive Plays To Be Presented
By Various Groups Including Those
Who Participate From Other States*

The University will play host this Saturday to the first Delaware Play Festival, which is being sponsored by the University Dramatic Center in cooperation with the Delaware Dramatic Association. Almost fifty actors will trod the boards of Mitchell Hall Saturday in presenting the nine plays entered in the Festival.

The Play Festival is to a certain extent the culmination of the Renaissance in the amateur drama which has been taking place in Delaware during the past few years under the leadership of the University Dramatic Center and the Delaware Dramatic Association.

A special feature of the Festival will be the analysis of plays which will be made by the Critic Judge, Mr. Paul Randall. Members of the casts and directors of the various plays will be given criticisms of the performances at the close of the afternoon and evening programs. Mr. Randall is a graduate of the Yale School of the Drama and has directed a number of Summer and Community Theatres. For the past eight years he has been Director of Dramatics at Temple University.

In connection with this festival a questionnaire was sent out to the various schools and dramatic organizations throughout the state and the surrounding territory concerning participation in the tournament. The response to this questionnaire was so gratifying that it was found necessary to hold elimination contests to determine the plays to be held at the meeting. Last week seven plays were eliminated in tournaments held in Dover, Claymont and Wilmington.

The festival provides for the participation of two classes—school groups and community theatres. The first group includes public and private schools while the second pertains to all non-academic organizations that are not included in the first group.

Not more than four state schools will be represented on Saturday while one out-of-state school will

Melodramas To Be Lampooned At Smoke Talk Tuesday Eve In Lounge

Melodramas will be thoroughly lampooned at the Smoke Talk to be held in the Lounge, Old College, on Tuesday evening, when choice bits of "Hazel Kirke" are to be read by several faculty members and students.

"Hazel Kirke," written by Steele Mackaye, has been chosen by Dr. A. H. Able as one of the best examples of the melodrama, probably the worst genre in literature. This play is the familiar tale of the iron-willed father who insists that his young daughter fulfill her pledge of marriage to the aged family benefactor despite her love for a young nobleman.

Lampooners

The various parts in the play are to be read as follows: the iron-willed father, Dr. C. L. Day; the mother, Miss Jane L. Gardner of the Department of Fine Arts; the defiant maiden, Miss Barbara Alden of the Department of English; the rejected benefactor, Dr. N. B. Allen; the noble suitor, Mr. Fred

McDowell; his dying mother seeking to retain the honor of the family, Miss Harriet Baily, director of the Department of Fine Arts; the villainous servant, Dr. A. R. Dunlap; a flute-blowing, worthless lad, John Swenehart; and a giddy young punster, Joe Mendenhall.

Dr. Able will be the narrator. He will explain what takes place between the extremely melodramatic, climatic scenes which will be read.

Introductory remarks on the melodrama will be made by Dr. C. R. Kase. He will say something of the popularity of the melodrama a half-century ago. In fact, "Hazel Kirke" ran for two years on Broadway in 1880.

Dinner

Preceding the Smoke Talk, the Humanist Society, the Press Club, the Department of English, and several guests from the Women's College faculty, including Dean Golder, will have dinner in the Commons.

In Full Swing

Scene of polls at all-day election shows Joe First depositing ballot in wrong box. Election officials behind table are members of the Student Council.

Non-Fraternity Tickets Sweep Two Classes Completely, Rowlinson Wins Junior Class Presidency By Single Vote

Overwhelming Majority Elects Al Mock to Leadership In Class of June 1941

On Wednesday the Juniors voted for their class officers for the Senior year. Overwhelmingly elected were Al Mock, President; John Doodan, Vice-President; Robert Kee, Secretary; and Edward Lynch, Treasurer. All were on the Non-Frat ticket.

Fraternity Ticket

The fraternity ticket was headed by Martin Tannen for President, Alex Timme for Vice-president, Dave Buckson for Secretary, and Bill Wendle for Treasurer. The ticket in spite of its well known and popular men, ran some thirty votes behind the Non-Frat ticket headed by Al Mock.

The victorious party was carried to office by a large majority. By Wednesday noon the ultimate outcome was obvious. Whether or not the result would have been changed by a different Independent ticket must be left to conjecture, but as it was the election clearly expressed the popular tendency.

Dispute for Command of the Junior Class Results in Hard-Fought Battle

The most hotly contested of the elections was provided by the contest for the presidency of the Junior class. The office went to Gil Rowlinson, a non-fraternity student. He defeated Warren Grier of the Sigma Nu fraternity by the very scant margin of one vote.

This margin was decided in an unusual manner. When all of the ballots were counted it was found that each candidate had received exactly 62 votes. But in the counting of ballots for the Sophomore class it was found that three votes had been mistakenly cast in that box for the Junior class officers. Two of these ballots were for Rowlinson giving him the victory.

Non-Frat Sweep

Grier at least had the satisfaction of running well ahead of his ticket. The other three offices went to non-fraternity students decisively. Melvin Brooks won the vice-president's office, Amos Crowley received the treasurer's office and Jim Seivier was elected secretary. The defeated candidates were John Daly, Jim Harkins and Bob Decker.

Of all the class offices the presidency of the Junior class entails the most responsibility since it is his job to name a Junior Prom committee and to make the general arrangements incurred by that dance, the most important social event of the year.

Sigma Nu Formal To Be Held Tonight

Tonight, the Sigma Nu fraternity will begin a week-end of social activities with a Formal Dance to be held in the Commons of Old College.

A night at the circus, the theme for decoration, will feature Zaballa the Strong Man, Scarletti O'Hara, the man on the flying trapeze, Griergantus, most ferocious guerilla in captivity, Jordandi, snake charmer of India, Dan the Thin Man, Ernie the Midget, and Sigma NuKi, the wonder girl from the South Seas. Pink lemonade and hot dogs will be served during the course of the evening.

In an attempt to establish a custom, the fraternity's active chapter will wear summer formal clothes despite the early date.

Engineers To Hold Second Open House At Delaware Today

First Open House Was Held in 1935 When 1000 Viewed The School at Regular Work

Evans Hall opens its doors today from 1:00 to 5:00 and from 7:00 to 10:00 p. m. for visitors to its second Open House. Exhibits showing the work done by the students and depicting recent achievements in engineering will be shown to the several thousand guests expected to attend.

Dean Robert L. Spencer, dean of the school of engineering, estimated that approximately a thousand invitations have been sent out to high school students, science teachers, parents of students, employers and other friends of the school.

The first Open House at Evans Hall was held in 1935 with over a thousand persons attending. Then, as now, the need was felt to have such an occasion to strengthen the school's ties with high school students and to acquaint them with the type of work undertaken in a technical school like the School of Engineering.

Regular Classes Held

Regular work will be performed by the senior electrical and mechanical engineers in the laboratories and shops, thereby giving visitors an opportunity to see just how work in a laboratory is carried on. A similar procedure is to be followed by the chemical engineering department in its new Chemical Laboratory south of Evans Hall.

If they wish, the visitors may become the experimenters at many of the exhibits on display. A special opportunity for this will be provided by the physics department's exhibits where apparatus demonstrating fundamental laws of physics will be set up for them to manipulate.

Concrete Beam Smashed

Reinforced concrete and steel specimens will be tested in the materials testing laboratory. Of special interest will be the testing of

General Scholastic Averages Show Decided Increase In All Classes As Juniors Take Lead With 2.05

Because of a change in the index system, the scholastic report of the Dean and Registrar of Delaware College of the University of Delaware, for the first semester of 1939-1940, consists of two parts. The first part includes scholastic averages and the Honor Roll for the three upper classes—Senior, Junior, and Sophomore—whose indices are compiled under the previous system. The averages for the Freshman Class are compiled under the new system. Included in this report are explanations of the two systems.

The index numbers used in the report for the three upper classes are as follows: A equals three points per credit hour; B, two points; C, one point; D, no points; E, minus one point; F, minus two points. 3.00 is equivalent to an average of A (the highest possible average); 2.00, to an average of B; 1.00, to an average of C. No student who is taking fewer hours than those required in his curriculum is eligible for the Honor Roll (except students who have accumulated extra credits).

The index numbers used in the reports for the Freshman Class are as follows: A equals four points per credit hour; B, three points; C, two points; D, one point; E, no points; F, no points. 4.00 is equivalent to an average of A (the highest possible average); 3.00, to an average of B; 2.00, to an average of C; 1.00, to an average of D. No Freshman who is taking fewer hours than those required in his curriculum is eligible for the Honor Roll (except students who have accumulated extra credits).

Note: Students who were graduated from a four-year high school and attended another preparatory school before entering the University of Delaware are classified as representing the school from which they were first graduated.

FRIDAY, APRIL 12, 1940

You Are Reminded . . .

We have noticed that the walls just inside the main entrance of the New Administration building are being marked, unwittingly, by members of the student body. The paint below the two windows on either side of the entrance has been kicked badly and in other places the paint has been smudged.

Now we are absolutely certain that no student of the University of Delaware wants any part of this new addition to our campus defaced in any way. We feel, perhaps, that you just don't realize that in your leaning against the wall your head leaves a spot on it, that your hands leave greasy smudges, that wet shoes and wet raincoats leave dirt and discoloration.

Of course, you don't do these things on purpose. With most of us, leaning against a wall is merely a habit. But if this habit is going to ruin the appearance of the entrance to our classroom building, and this is exactly what is happening, then we are sure that you will agree with us when we say that this habit should be broken.

Though the benches recently placed in the front hall of the building ameliorate the situation somewhat, they are only a partial remedy. Some of us have to stand around and wait a couple minutes for each class. If you are one of these, before you lean against the wall with your head, hands, shoes, or wet clothes, remember that in so doing you will spoil the appearance of the building by adding that much more dirt, grease and discoloration, to the paint and woodwork.

We hope that by calling this matter to your attention we will have your cooperation in helping to remove this problem.

Honor Roll For First Semester Released By The Dean's Office

(Continued from Page 1)

The following named students were on the Honor Roll:

NAME	CLASS	COURSE	HIGH SCHOOL	STANDING
1. Lynch, E. H.	'41	Ch. E.	P. S. duPont	3.00
2. Mendenhall, J. A.	'40	A. & S.	Calvert Agr., Md.	3.00
3. Samuel, E.	'41	M. E.	Wilmington	3.00
4. Stearns, R. F.	'40	Ch. E.	Newark	3.00
5. Zeirinsky, E.	'41	A. & S.	Wilmington	3.00
6. Romel, R. H.	'42	Ch. E.	Wilmington	2.95
7. Rogers, T.	'40	A. & S.	Wilmington	2.92

READING ROOM ONLY

Tale Of The Road

The two commuters waited at the light up on Main Street last Monday afternoon. Thumbs were gesticulating in the downpour. Cars whizzed by—and so did the minutes. The rain got wetter and wetter. Twenty minutes, a half hour—the two Roads scholars were fast becoming saturated solutions. Choice epithets were freely conferred upon each abominable motorist who showed his exhaust pipe to the hydrated thumbers.

Finally a car pulled up—a rattletraphish model T. The two hapless hoppers heaved two simultaneous sighs of relief and piled in beside the driver—then rode all the way to Wilmington cussing savagely under their damp breaths. The Ford's discouraged roof gushed the rain into their faces like a sieve. All of which means, when it rains, it bores.

With generous intent, THEY have thrown a few wooden divans into the foyer of the Ad. building. Also a lonesome but reasonable-looking potted rubber plant. THEY call it a lounge . . .

We once knew a little man with ambition and delirium tremens, who threw a sardine into a teacup and called it an aquarium . . .

Political Utopia

No stump speeches—no blazing banners—no mud-slinging. That's the picture of elections at the U. of D. Such orderliness, such elan, such dispatch is seldom witnessed in conjunction with any elections, anywhere. No ill feeling between aspirant politicians. One freshman, the sole candidate up for Student Council, very graciously arises and nominates another man for the office. Everything is chummy and palsy walsy. Candidates quietly solicit their votes; civic-minded students quietly poll their ballots; and after it's all over—the officers elect go back to sleep.

We strongly recommend this system to the United States at Large. The dignified tranquility with which we organize our undergraduate government here at Blue Hen Junction is surpassed only by the smooth efficiency of the various political machines assiduously rampant on the campus. All is calm, all is peace and contentment.

Democrat and Republican Conventions please take note.

W.C.D. Rides Again

Two freshwomen from Turvy Dormitory (is that Turvy or Scurvy?) felt ambitious as all get out last Saturday. So they issued forth to the Wall and obtained a tandem from the enterprising bicycle hawkmen. The pert freshlets began peddling, set a blistering pace, and steamed into Wilmington in the amazing time of forty-two minutes, non-stop. Four hours after renting the wheel, they called back to say that everything was under control, they would be a little late, and don't worry. But the bicycle merchant, thinking the journey back to Newark might prove too strenuous for the adventurers, started into town to fetch the three tired frames. But sure enough, half way to Wilmington, he met them roaring back to Delaware in the gathering dusk—hair a-flying, skirts a-fluttering, and doing better than 32 miles per against a headwind.

Which is what we call super-charged women—with knee action and floating power.

Acknowledging

Extended handshakes to the professors who genially appeared on the Campus Color broadcast last week. Coming up to the REVIEW'S weekly offering over Wilmington kilocycles, the profs cheerfully submitted to one of those sinister question bees. Realizing how a modern trick quiz can defame character, alienate friends, and wreck home life, we laud the courageous Doctors and hope to see them tangle with the microphone again sometime.

Blue Hens Meet Washington Coll.

First of Annual Series to be Played on Sho'men's Field Tomorrow; Daly May Pitch

The first of the annual home-and-home baseball series will be played tomorrow afternoon on the Shoremen's diamond. The game will start at approximately 3:00 p. m., weather permitting.

Enthusiasm over a convincing triumph over Swarthmore on Wednesday, the Blue Hens will enter this battle in the proper frame of mind for victory. As was the case last week, a win will bring their average up to .500, the record now standing at two wins and three defeats. However, Washington College will field a strong team once more, and will no doubt be favored in tomorrow's affair. They opened their season this week meeting Hartwick College on Wednesday, and since this was their first contest of the season, the Blue and Gold will have the advantage of more extensive competition.

The Hens, under the watchful eye of Coach Doc Doherty, have been going through drills and will be in tip-top shape. Coach Doherty, following his usual practice, will not announce his mound choice until game-time, but the most logical one would seem to be John Daly, since both Bill Tibbett and Hugh Bogovitch were used against Swarthmore. However, the latter worked only the ninth frame, and may get the call, but Daly will most likely do the chores. For the Sho'men either John Selby or Lefty Copple, an old nemesis of the Delaware nine, will work in the box. Selby is the brother of Lew Selby, Blue Hens' first baseman.

Preparations For Track Stepped Up

First Dual Meet Scheduled in Less Than Two Weeks and Penn Relays on April 26-27

With the advent of spring-like days track workouts began in earnest this week. Although recent rains have left the oval in rather poor shape it should be at its best for the opening meet with LaSalle on April 24.

A substantial squad of about 30 has been drilling under the watchful eye of Coach Ed Bardo. While the season is yet too young to make predictions, a fairly strong squad seems assured once the early season epidemic of aches is over. In this week's drills Coach Bardo has been laying particular stress on proper technique in jogging and striding.

At the present time the Blue and Gold squad seems extremely well fortified in the half-mile with Captain Alex Timme, Bill Gerow, Del Stearns and Bob Bausman, promising freshman from Newark High School, as well as several other freshmen who may have a good deal to show once their chance comes. Ames Betts and Carty Douglass seem to have the hurdles situation well in hand while freshman Jack Phillips is showing good form over the low timbers. Douglass and Betts will also resume their high-jumping activities of last year. A line on other jump prospects cannot be ascertained because they have had no opportunity to show their wares as yet.

The weight men have been working strictly under wraps so far, so the same is true of their chances. Notable additions to their ranks is Norman Lord, a quarter-miler last year. Outside of Gene Vernon the distance events are somewhat of an uncertain quantity and must remain so until the candidates have received more conditioning. The sprints seem to present an average field with yearling Joe Tyndall among those who will bear watching. Jerry Dougherty and John Eliason are holdovers in the pole vault.

Crowley Scores Run

Amos Crowley, (shown crossing plate) had the honor of scoring the first run on Frazer Field this season when he counted in the initial inning of the game with Penn A. C. last Saturday. He registered on a single by Captain Earl Sheats.

Penn A. C. Defeats Delaware Nine, 6-3

The Delaware baseball team dropped its third decision of the season last Saturday when they were defeated by Penn A. C. 6-3, in a ten-inning game. The affair was staged on a wind-swept diamond, hampering the efficiency of both nines.

The game was marked by errors of both commission and omission on the part of the two aggregations, but this was to be expected so early in the season. Hitting was light in the early innings, but later in the battle the Pennacs began to tag the offerings of John Daly, Hen moundsman, especially one Herb Ogden, erstwhile University of Pennsylvania great, who amassed two triples and a single during the course of the afternoon. For the Blue and Gold Captain Earl Sheats and Amos Crowley collected two bingles each. The only other Hen hits were by Perry Burkette and Dutch Clark.

John Daly, Delaware pitcher, struck out the first three men to oppose him in the opening inning and added seven more before the game was over.

Father Miller Speaks At Newman Club

Father Miller of Christ-Ours-King's Church in Wilmington addressed the University's Newman Club at its bi-monthly meeting on Monday. The meeting was held in the Commons Room of the Women's College.

Father Miller's topic was "The Confessional." In this talk he reserved himself to some history of the confessional and its significance in Catholic life. At the conclusion of his address an open forum was held.

When all talk and questions had ceased a business meeting was held and the floor was turned over to Edith Counahan, chairman of the social committee. Miss Counahan explained that the social committee had decided to have a gathering of some sort in the last week of school. The next meeting of the club will be held on Monday, April 22. On that day Mr. Laurence Healey of the Modern Language Department will address the group on "Mexico."

Social Calendar

- Today: Sigma Nu Formal.
- Saturday: Baseball, Washington College, away.
- Monday: Faculty - Student Party, The Lounge 4:15 p. m. Smoke Talk, Old College, 7:00 p. m.
- Tuesday: Athletic Council Meeting.
- Tuesday: Athletic Council Meeting.
- Wednesday: Baseball, Dickinson, at home.
- Thursday: Tau Beta Pi Meeting, Evans Hall, 7:00 p. m.

Blue Hens Score Second Triumph

Trounce Swarthmore, 11-0, as Tibbett Limits Opponents to Seven Hits, all Singles

After being baffled by Henry McCone's change-of-pace delivery for three innings, the University of Delaware baseball team finally found the range in the fourth and went on to mark up an 11-0 victory over Swarthmore College Wednesday.

Bill Tibbett, Delaware starting pitcher, limited the invaders to seven scattered singles and was in trouble only in the first and third innings.

Held to Tibbett's infield single for the first three frames, the Blue and Gold tossers combined four safeties in the fourth, including a double by Howie Viden, for a total of four runs, then went on to score four more in the seventh, and three more in the eighth.

Earl Sheats, the second man to face McCone in the fourth, singled and then stole second. Apsley walked and Selby produced an infield single that scored Sheats. Viden cleared the sacks with a double into left field and then crossed the plate on Tibbett's single.

Amos Crowley, the Hens' lead-off man, started the fireworks in the seventh with a single. Tom Skripps' hit advanced him to third and the Delaware second baseman beat the throw to the plate as Sadowski grounded to Stan Cope. Sheats' single scored Skripps and Cope bobbed Apsley's ground ball, loading the bases. Sadowski scored after Clark's fly to left and Sheats tallied following Selby's long fly to right.

The box score:

DELAWARE		SWARTHMORE	
	ab r h o e		ab r h o e
Crowley, 2b	4 1 2 2 5	C. Elsele, cf	3 0 0 3 0
Skripps, rf, c	5 2 1 4 0	Cope, 3b	4 0 1 1 1
Sadowski, cf	5 1 0 2 1	Cruthers, 2b	4 0 1 2 1
Sheats, c, rf	5 2 2 7 0	Asinoff, 1b	3 0 1 6 0
Apsley, 1b	4 1 1 0 0	Warburton, 1b	2 0 1 2 1
Clark, ss	4 0 2 2 1	Huhn, c	4 0 1 6 1
Selby, 1b	5 1 1 2 0	Stetson, rf	4 0 0 2 0
Viden, 1b	3 1 1 2 0	Dietz, ss	3 0 1 2 1
Tibbett, p	4 1 3 0 0	McCone, p	2 0 1 0 2
Bogovitch, p	0 0 0 0 0	a.R. Elsele	1 0 0 0 0
Totals	39 11 14 27 9	Totals	35 0 7 24 8

a Batted for McCone in ninth.
 SCORE BY INNINGS:
 Swarthmore: 0 0 0 0 0 0 0 0 0
 Delaware: 0 0 4 0 0 4 3 2 11
 Errors: Cope 2; Cruthers, Selby. Two-base hit: Viden. Three-base hit: Tibbett. Strlen bases: Warburton, Crowley, Sheats, Apsley, Clark, Selby. Struck out: by Tibbett 5; McCone 6; Bogovitch 2. Bases on balls: of Tibbett 2; McCone 2. Hit by pitcher, by Tibbett (Warburton). Wild pitch: Tibbett. Umpire: McKaney. Time 2:30.

Duke University's baseball coach, Jack Coombs, once pitched a 24 inning game, longest in American League history. George Washington received an honorary degree from Brown University in 1796.

AGGIE NEWS

Monday evening in Old College the Agricultural Club held their monthly dinner meeting which was followed by the business meeting and entertainment in the Lounge. Jack Doordan was chairman of the meeting and announced the nominees who had been nominated by the committee which is composed of the executive officers. These follow:

- For President: Jack Doordan and Leroy Parker
- First Vice-President: Norman Lord and Gilbert Thornton
- Second Vice-President: Robert Bausman and Bernard Kreshtool
- Treasurer: William Hopkins and Burton Collins
- Secretary: Edward Legates and Edward Butler
- Editor: Clarence Brown and John Curtis.

Buckwalter

Jack Buckwalter's suggestion of a picnic and afternoon of sports at some pleasant, near-by spot was accepted with much enthusiasm and many comments as a good way to release that surplus energy known as spring fever. Dean Schuster said that the college farm could be the place, however this has not been definitely settled as yet. A committee will be ap-

pointed to make arrangements. Norman Lord wistfully queried whether or not any girls would be invited. The general opinion seemed to be yes. Mr. Phillips, horticulturist, says that these events are very successful at Penn State and he is sure that they could be made so here.

Picture

A sound picture followed the business meeting and was both instructive and entertaining. The title: "The Mosquito—Public Enemy No. 1." This was an USDA picture and was presented through the courtesy of Mr. John Amos of the Entomology Department.

Joseph First is preparing a program concerning the Ag. School to be used in the REVIEW broadcast on Friday the 19th at 7:45 p. m. Electric current consumption will surely go up for that 15 minutes when all of the Wolf Hall boys tune in. This will be the evening before the day of the banquet and the big event of the year. Plans are well underway.

The club welcomes any member of the University of Delaware faculty and staff and sincerely hopes that many will attend. Reservations may be sent to John S. Buckwalter.

**They "talk it over" ...
73,000,000
times a day!**

Every 24 hours the people of America make more than 73 million telephone calls over Bell System wires—settling business and social affairs, keeping close to distant friends. Each call is a separate transaction made to order for the individual who is calling. To give you such a highly personalized service, there are nearly 300,000 Bell System men and women in every part of the country, each doing his or her part to make your telephone service the finest in the world.

BELL SYSTEM

'Kiss-Meter' To Be Featured At Engineers' Dance

Boy Can Test Type of His Girl's Kiss With the Aid of Novel Registering Machine

On Saturday evening, April 13, at 8:30 p. m., the Engineers of Delaware College will hold their second annual ball in Old College Hall. This informal dance will climax the activities of the Engineering Open House week-end. It represents the only purely social activity on the Engineers' calendar, and much enthusiasm has developed throughout the whole College concerning the affair. While the dance is termed "Engineers' Ball," anyone will be admitted, whether he be an Aggie, A. & S., Phys. Ed., or special student, provided he produces one dollar or a ticket at the door. Come out and watch the Engineers dance!

Music

The music is to be supplied by "Les" Macklem and his Sophisticates, featuring a cute little brunette named Paddy Prentis on the vocals. This band is well known in and around Wilmington; was featured in the recent music concert at the Playhouse; and promises an enjoyable evening of special arrangements.

The theme for the decorations and programs for the ball are being kept a secret, but will undoubtedly concern some phase of engineering. It is thought best that they be made so novel that the thought of Monday's classes will be removed for the remainder of the evening.

"Kiss-Meter"

Electrical Engineer Lloyd Shorter is building a "kiss-meter" which will be installed in the lobby of Old College. With the aid of this device a boy can classify his date's kisses. If her kiss rings a bell, she's an expert; if a buzzer rings she's just average; and if the red light at the bottom of the meter lights up, you might just as well take her straight home after the dance—she's a novice.

Patrons

Patrons and patronesses for the dance will be Dean and Mrs. R. L. Spencer, Dr. and Mrs. J. F. Daugherty, and Professor and Mrs. T. D. Mylrea. Invitations have been sent to all members of the Engineering faculty.

Alex Cobb, Jr., is chairman of the Dance Committee. He will be assisted by Ed Douglass, Percy Cotty, Chester Benson, and Harvey Bounds.

Records Show Poor Student Attendance At University Hour

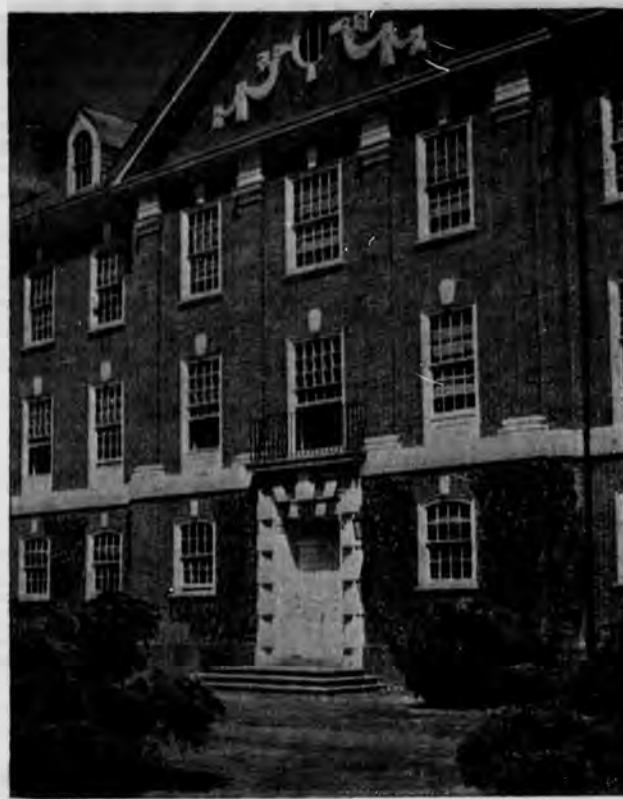

"Only 77 Delaware students attended Blanche Yurka's 'test' University Hour last Tuesday night in Mitchell Hall," declared John Schwind, president of the Student Council today.

He went on to say that the poor response to Miss Yurka's program practically prohibits the possibility of another sponsor for the lapsed University Hours. "By 5:30 on Tuesday night," he said "only 70 advanced sales had been made to the combined student bodies of Delaware and Women's College. Of these only 28 were to Men's College students." The total attendance did not exceed 180. Unless the next trial University Hour is a smashing success, says Schwind, University Hours will probably be discontinued.

Since this University Hour was a test to see whether students were genuinely interested in the programs, the small attendance precludes any possibility of continuance of the University Hours. John Schwind agreed that there is a dead element in the college which causes the stagnation of many student activities. It is this element which must be overcome.

Miss Yurka who had agreed to a 70 per cent cut of the box office receipts, gave a program of scenes entitled "The Arc of the Theatre"

Evans Hall, Natural Outgrowth Of Fast-Growing Engineering School Possesses Many Unique Features

Ten-Year-Old Building Houses all Engineering Departments Preventing Duplication of Equipment and Enabling Certain Specialties

Evans Hall was the natural outgrowth of a fast-growing engineering school.

This school was first established in 1898, sixty-five years after Delaware College was founded. It was in this year that the school was given its first home in the West Wing of Mechanical Hall. Additions were made to this building which continued to house the engineers. Finally, the school overflowed its banks, and in 1919 it became necessary to build three wooden shacks on the green between Harter Hall and Delaware Avenue.

Funds From Legislature

These lasted for eight years, but with floor boards rotting and paint chipping off everywhere. The Delaware assembly finally appropriated funds in 1927 for the construction of the first floor of Evans Hall. In 1929, funds for the building's completion were appropriated, and Evans Hall was built.

The present home of engineering at Delaware was very appropriately named in memory of George G. Evans, who served the University faithfully for forty-eight years as trustee and treasurer. This man, the father, and Charles B. Evans, the son, gave to the University efficient service on the board of trustees for eighty-eight continuous years.

Evans Hall was built for a cost of \$360,000, which includes \$30,000 donated by Mr. Pierre S. du Pont, \$15,000 spent for an addition to the boiler house, \$8,000 for landscaping, and architects and engineers' fees. The building designed for 250 students hence cost \$1,440 per student.

Evans Hall houses all the offices, classrooms, laboratories, and shops for the departments of Civil, Electrical, and Mechanical Engineering. In 1930, the Chemistry Department was confined to the top floor of Recitation Hall, but now has an impressive building of its own.

One of the features of Evans Hall is that it houses most of the engineers under one roof. This means a very close association of departments and prevents duplication of equipment. The laboratories of one department are always at the disposal of the rest.

In individual laboratories, several features not duplicated in other engineering schools may be found in Evans Hall. Twenty three hundred volts are run into the

Electrical laboratory, facilitating tests. An underground conduit in the Electrical laboratory carries current stepped down to 220 volts and 110 volts for the operation of laboratory machines. The switch board is so arranged that machines may be plugged in on any current with no possibility of cross connections.

In the Mechanical laboratory, every steam-using machine is equipped to be operated on either saturated or superheated steam, and the superheat may be regulated to any point between 0° and 100°. Every steam-operated machine is able to exhaust against pressure or vacuum, and the back pressure may be held at any pre-determined rate between a 28 in. vacuum and 30 pounds pressure per square inch.

The shops, too, are unique. The welding shop is very modernly equipped, and in the machine shops each piece of apparatus has its own power motor. There are no overhead belt systems.

In the past ten years, Evans Hall has been expanding. Many of the things which were incomplete in 1930 have been finished. Yet there are always new problems arising, and it is this continuity of work which keeps an institution modern.

Sigma Nu

(Continued from Page 1)

Invitations

Invitations have been extended to the faculty, other fraternity and non-fraternity men, and the Alumni. Two hundred guests are expected to be present.

Three o'clock Saturday afternoon will find the Sigma Nu enjoying a combination straw-ride and picnic. Upon their return from the picnic at Sunset Lake, an Old Clothes House Party will be held. The fraternity house will be decorated like a barn, and each guest will be presented with a favor characteristic of a farm.

Committees

Robert Snyder, newly-appointed social chairman, is in complete charge of the Sigma Nu week-end. Russ Willard and Bob Bishop have charge of decorations for the formal, while Harry Adams, house manager, is decorating for the House Party. Ned Cooch will sponsor the straw-ride.

Civils Display Testing Lab And Hydraulic Plant

Breaking of Two Ton Concrete Blocks to be Featured for Open House Visitors Today

The laboratories of the department of civil engineering will be in full operation for the inspection of visitors during Open House. Of special interest will be the testing of a concrete beam in the highway testing machine located outside of the materials laboratory. This will be the first time that such a test has been made for visitors.

Inside the materials laboratory numerous pieces of testing apparatus will be in operation. In addition to the testing of the concrete beams there will be tests made on concrete cylinders and steel bars in the smaller machines.

Shown in the laboratory will be the testing machines, the Brinell Hardness testing machine, tests on concrete, sand, gravel, steel, cast iron, and structural timber, and the Page impact machine.

In the hydraulic laboratory there will be featured experiments on the hydraulic ram, the hydraulic jump, the critical depth meter, and water power production by the Pelton wheel impulse turbine. There will also be on display current meters, water meters, orifice meters, and Venturi meters.

Delaware Student Awarded Zeisberg Chemistry Prize

Percy J. Cotty of Wilmington, a student at the University of Delaware, is the winner of the first prize in the F. C. Zeisberg Award of the Philadelphia-Wilmington Section of the American Institute of Chemical Engineers, it was announced by F. C. Mitchell, Chairman of the Section.

This award, instituted this year, was established by the local section in honor of F. C. Zeisberg, long active in the affairs of the Institute, and its reelected president at the time of his death here in November, 1938. It is given for excellence in the preparation of reports, in which Mr. Zeisberg had a keen interest, and is open to senior students in chemical engineering at the four schools giving courses in this subject in the Philadelphia-Wilmington area; namely, Bucknell University, the University of Delaware, Drexel Institute of Technology, and the University of Pennsylvania.

Mr. Cotty is the son of Percy C. Cotty, of 1022 N. Clayton St., Wilmington, and is a graduate of Wilmington High School. Second prize was awarded to Charles Andrew Dahlke, of the University of Pennsylvania, a graduate of Northeast High School, Philadelphia. Reports submitted by John M. Rhodes, Jr., of Talleyville, Delaware, a student at the University of Delaware, and a graduate of P. S. du Pont High School, were accorded honorable mention. The prizes took the form of books, chosen by the recipients, to the value of \$20.00 and \$10.00, respectively.

Open House

(Continued from Page 1)

several eight feet concrete blocks. These will be broken in the highway testing machine outside the materials laboratory.

Arrangements for the Open House displays have been made entirely under the leadership of students. Those in charge of the various departments are as follows: mechanical engineering, Edward Schwartz; electrical engineering, Lloyd Shorter; chemical engineering, Percy Cotty; civil engineering, Vincent Boyce. Clifton Sutton and Wilmer Benson are serving as coordinators between the various departments. Publicity is under Arvid Roach and Edward Samuel.

Guests Will See Original Dynamo In E. E. Laboratory

Experimental Ultra-Short-Wave Transmitter to be Exhibited by Electricals

Among the most lively exhibits at today's Open House will be the electrical engineering displays, according to Professor George Koerber. Actual experimental and commercial operations will be performed by the electrical students in the electrical and radio laboratories.

Instead of attending their scheduled Friday laboratory classes, the senior electrical engineers will carry out their assigned work under the surveillance of the Open House visitors. The experiments include the series and parallel operation of alternating current generators and motors, mercury arc rectification, and efficiency tests of power transformers.

Experimental Radio Show

Outstanding exhibit of the evening will be the operation of an experimental two-and-a-half meter short wave transmitter, invented and built by Leonard Yerger, senior electrical engineer. This transmitter is one of the few existent in the world.

The electrical engineers will also be responsible for the installation of novel photo-electric cell relays which magically open and close doors and operate drinking fountains.

Historical Dynamo

On display in the electrical laboratory will be the original Edison Dynamo. It will be operated with contemporary apparatus by the senior electrical engineers. This historical dynamo, one of the few still in existence is expected to prove very interesting to those interested in the history of electricity.

In the radio laboratory a display of lighting apparatus will be located. Entering the room, the spectator will encounter a dazzling flood of light. Sodium vapor lamps, fluorescent lamps, germ-destroying ultra-violet lamps, and high intensity street lighting units will provide the illumination.

Tennis And Golf Teams Inactive

Neither Able to Open Formal Practice Sessions Due to Uncertainty of Weather

Tennis and golf are sort of in a dead state so far, due to the continued uncertain weather. The racquetees have been practicing intermittently on an asphalt court on Orchard Road as have the golfers at the Newark Country Club, but since no formality has been introduced in the sessions nothing can be said as to the likely successors to the two open spots on the tennis team and the one on the links squad. Each still has a little less than two weeks to prepare for their opening encounters, and unless they can get out for some intensive practice sessions will be handicapped when they meet squads from Dickinson on April 24.

The complete schedules of the two teams are as follows:

Golf		
Apr. 24—Dickinson	Home	
Apr. 26—F. & M.	Away	
Apr. 27—Bucknell	Away	
Apr. 30—N. J. St. Teachers	Home	
May 3—Fordham	Away	
May 4—Seton Hall	Away	
Tennis		
Apr. 24—Dickinson	Home	
Apr. 26—West. Maryland	Away	
Apr. 27—Villanova	Away	
May 1—Washington Coll.	Home	
May 4—Temple	Away	
May 7—Drexel	Home	
May 10—West. Maryland	Home	
May 14—W. Chester Teach.	Away	
May 16—Washington Coll.	Home	

A pitcher is a catcher on the Bradley Tech ball team—Chuck Pitcher, veteran baseball and football player, will be behind the plate.

Student Council Selects Five Most Prominent Seniors At Meeting Mon.

Mendenhall, Humphreys, Schwind, Scott, And Green, Chosen By Governing Group As Leaders Of Senior Class

Five University of Delaware men were elected to "Who's Who in American Colleges" last Monday night at the weekly meeting of the Student Council. The five chosen were Al Green, Wils Humphreys, Joe Mendenhall, John Schwind, and Frank Scott. Two others who received honorable mention were Steve Saltzman and Reid Stearns. The men were selected on a basis of all-around scholastic activity with an emphasis on work done for the advancement of Delaware. Popularity on the campus was also considered.

Al Green, President of Sigma Tau Phi, is known around the campus for his interest in fraternity affairs. Al is president of the Inter-Fraternity Council and was responsible for the patriotic assembly at Mitchell Hall at which Father Tucker spoke. Al is also a member of Phi Kappa Phi and a captain in the R.O.T.C. unit.

Wils Humphreys is active in non-fraternity circles and is president of the Independent Men's Association which organization he helped found in 1937. He is also President of the Athenaeum Society and at the Middle Atlantic States International Relations clubs Convention was elected Vice-President for the school year '39-'40. He is a member of the Student Council

and was Managing Editor of the REVIEW.

Joe Mendenhall is important for the work he did as co-Editor of the REVIEW. It was to a large extent through his efforts that the REVIEW assumed once again the respected position on the campus that it had formerly held. Joe is a member of Phi Kappa Phi and is President of the Humanist Society.

John Schwind, President of the Student Council and member of Kappa Alpha fraternity, is principally responsible for the efficiency with which student activities have functioned during the present school year. John has used his experience gained as Treasurer of the Student Council in '38-'39 to coordinate all the various units which constitute student Delaware under one broad plan supervised by him and the Student Council.

Frank Scott, president of the Senior class and member of the Sigma Nu Fraternity, has been interested in activities at Delaware since the day he entered school. It was largely Frank's efforts as chairman of the Student Council Social Committee that led to the formation and adoption of our present student-faculty social program.

All of these men are seniors and are members of the Derelict Honor Society.

Concert Review

Last night, Thursday, April 11, rang the curtain on another year of Curtis Concerts at Mitchell Hall. We're sorry, extremely sorry, for all of things that come to us at the University these are the most consistently good, the richest.

In the soprano voice of Willa Stewart we found a rare combination of power, quality and control and in her program, a diversity that was as pleasing and beautiful as it was admirably suited to demonstrate her capacities. There was a sincerity to her interpretation that took us with her completely, whether we were in the emotional throes of Handel's "O sleep why dost thou leave me?", in the gracefully turned rhythm of his "Bel piacere è godere fido amor," or in the dramatic and religiously dignified "Sommi Dei." Whatever she sang, gay, sad, fast or slow, she put herself into it heart and soul. And yet there was remarkable restraint. Her notes, even her loudest notes, were not strained, were not forced. They were clear, sweet; they were music. Her soft notes, notes you could barely hear, were vibrant, clear; they too, were music. Never, for all her emotional interpretation, did Miss Stewart forget she was giving—music.

This is strong talk and you may ask, if it is true, why then is Miss Stewart still a student? Miss Stewart is not yet a Flagstad. She has some to learn—poise, assurance, for instance. But all in all she has a superb voice and we may expect to hear more from her in the future.

One of the nice things about the Curtis Concerts is that you do not feel that they are condescending to what they believe is your level. Brahms' "Concerto in A minor, Opus 102" is a lot for us to swallow and we dare say it is as much as most university audiences can understand. However, if we cannot understand it, we are willing to enjoy it and it is a relief to stretch up sometimes. Herbert Baume, "Violin," and Nathan Stutch, "Violoncello," worked competently with the accompanist, Leo Luskin and at times, rose to professional heights. Mr. Baume recovered admirably from the shock of a broken string in the third movement and after a brief intermission for repair, carried on in fine shape. And once you get over the feeling that string trio music is "intellectual," you realize that Brahms has slipped in some passages of very appealing and beautiful music.

Miss Stewart closed the program with the robust and stirring, "The Sleigh," by Kountz, a cheerful climax to any program.

The audience was about half capacity, the absence of college students being the only depressing note of the evening.

—R.W.M.

Lincoln Glee Club

The Lincoln University Glee Club, which was so well received here several years ago, will appear again in Mitchell Hall on the regular April College Hour Program, scheduled for 11:45 a. m. on Tuesday the 16th.

The Glee Club has a considerable reputation in music circles, particularly for its rendition of negro spirituals.

90 PER CENT OF ELECTORATE CAST BALLOTS AT ELECTION

By Dave Snellenburg

On Wednesday in Room 218 of the New Administration Building one of the largest election returns in the history of the school was registered. Of an approximate 450 eligible voters more than 90% cast their ballots.

The elections were something more than the mere selection of class officers. The Independent men were taking their stand against the Fraternity machine and the result was a Non-Frat landslide. The Independents carried every office in all the classes except the Sophomores. This discrepancy was obviously due to the fact that a considerable number of Freshmen failed to vote.

New System a Success

The marked success of the Independent group clearly indicates that the previous restricted time for voting was impartial in that it excluded a number of prospective voters. Under the new ruling the polls were open all day, and a much more comprehensive expression of student opinion was the result.

All the portents had indicated a bitterly contested struggle and they proved to be correct. The Fraternities turned out en masse to cast their ballots, only a handful neglecting to vote. But the well-organized Independents carried the day. The long-vaunted supremacy of the Fraternities on the campus seems at last to be at an end. The energy and foresight of a small group of Independent leaders has smashed a monopoly that was both

distasteful and unfair. Future elections under the improved system should evolve more truly accurate representation of the student body.

Junior Race Close

The election had its comic as well as its dramatic aspects. The presidency of the Junior class was won by the bare majority of one after much dissension and recounting of votes.

Rowlinson had been declared victor by one vote over his opponent, Grier. But that vote was condemned as invalid, making the election a tie. Then two votes for Rowlinson which had been accidentally placed in the Sophomore ballot box were found. Then another misplaced ballot for Grier was found. The eventual outcome of this comedy of errors was that Rowlinson once more was declared winner by a single vote.

Not the least interesting feature of the election was the impromptu stumping of the constituents of the various candidates. To cast a vote it was necessary to struggle through a storm of verbiage that spilled out the doorway and gushed down the resounding corridors. The wiser voters nodded knowing assent, made devout promises, and then voted as they chose. But the more vehement argued and harangued in complete abandon.

WHAT THE ENGINEERS ARE DOING

By Len-Yerger, Jr.

By the time you read this column Open House will have come and gone. The boys worked hard this past week, making everything ready for the visitors. Equipment of all kinds and shapes was brought out and put into operation. Even the seniors saw some gadgets that were new to their old and experienced eyes. Switches, were thrown, engines and motors were run, noises were made, sparks flew, chemicals bubbled, materials were crushed, and words were babbled—all to inform the uninformed, and to show the unshown. Taxpayers came to see what was done with their money, parents came to see what was done with (or to) their children, and children came to see what would be done with (or to) them. A happy time was had by all.

Les Macklen will be on hand tonight to entertain the boys after their Open House efforts. The billboard in Evans Hall was the subject of much engineering conversation. We suggest that the gals keep their eyes on their boy friends when Paddy Prentiss stands up to sing. Some awfully nice comments have been made regarding Miss Prentiss, and we'd hate to see any fellow go home with the wrong gal.

There had been some talk about an engineer's picnic in May. Originally, the party was to include only commuters, but we understand that the commuters have finally condescended to make it an open affair for engineers. The setting for the frolic will be somewhere along White Clay Creek and the fun will continue through the evening. If this idea sounds good to you, see A. T. Steelman and get the details. Naturally, dates will be invited. There will be no corkage charge.

The little man who appeared at the top of the column last week is not the author. He is what is known as a Civil Engineer; and he is looking through an instrument called a transit, or maybe it is a level. It doesn't make much difference anyway. I think we will be good friends—especially if he keeps that thing pointed in the right direction. Perhaps he is the elusive A. C. Raff, keeping his eye on the campus and his pals the commuters.

It is interesting to note that all of the Evans Hall engineering societies, with the exception of Tau Beta Pi, have as their presidents commuters. The latest to grasp the gavel is Facciolo, who is the new president of the A.S.C.E. We understand that his election came as sort of a surprise.

Cliff Sutton, Chemical Engineer '40, had received a scholarship to Cornell. Sutton has been a hard worker during his four years at Delaware, and he really deserved this honor. He is Tau Beta Pi, Phi Kappa Phi, and an officer in the R.O.T.C.

It's beginning to look as if spring is finally on its way. Soon the boys will be playing marbles and flying kites; they are already riding bicycles. We saw one chap go out on a two seater and come back later with a girl on the back. This is our idea of a real way of courtin', and we are heartily in favor of it.

Round Table To Be Inaugurated Here Tuesday, April 30

A University Round Table, sponsored by the Department of History and Political Science has been announced by Dr. George H. Ryden, head of the Department. The Round Table will be inaugurated on Tuesday evening, April 30, in Mitchell Hall at 8:15 o'clock with Professor Ernest M. Patterson, of Philadelphia, as the speaker.

Dr. Patterson, who is President of the American Academy of Political and Social Science and Professor of Economics in the Wharton School of Finance and Commerce of the University of Pennsylvania, will on this occasion address the audience on the subject of: "American Business and the War in Europe."

All students and faculty members of the University, as well as other residents of Delaware, are cordially invited to attend the Round Table.

It is the plan of the sponsors to hold a University Round Table periodically in order to afford students, faculty members, and other citizens of Delaware opportunities to hear speakers discuss vital questions of the day and to put pertinent questions to the speakers after the completion of their addresses. It is hoped that in this way interested persons will have an opportunity to get at first hand some light on the many perplexing problems confronting the people of the United States today, with a view to finding, if possible, some solutions.

Play Festival

be represented. These schools were chosen to represent the various regions proportionately through the regional elimination contests.

During the course of the afternoon a business meeting of the Delaware Dramatic Association will be held. The purpose of this meeting will be to elect officers and to make plans for the coming year.

The program will start at one thirty in the afternoon. The first play to be presented will be "Underground" which is to be put on by the Harrington High School. Other plays to be put on will be a portion of "What A Life" by the Claymont High School; "The Brink of Silence" by the Middletown High School, "The Marriage Proposal" by Conrad School and "Prom Date" to be done by the Kennett Consolidated School of Kennett Square, Pa.

During the intermission President Hullahen will deliver a welcoming address to the candidates. Dr. Kase will then make an announcement concerning elections for the coming year. Following this Mr. G. Taggart Evans the president of the Dramatic Association will announce the awards and prizes for the afternoon's work.

The evening's program includes "The Giants' Stair" by the "Y" players, "Where The Cross Is Made" by the Kennett Little Theatre, "The Boor" by the Wilmington Drama Group and "The Last of the Lowries" by University Drama Group of Newark.

Busiest Cigarette in the Country

...that's Chesterfield

Miss Aasta
Pedersen

... the smiling hostess who welcomes guests at one of New York's most famous hotels. She will tell you Chesterfield is the busiest cigarette in the place.

Going "two packs at a time" because Chesterfield is today's definitely milder, cooler-smoking, better-tasting cigarette

These three qualities—MILDNESS, COOLNESS, TASTE... are the sum and substance of real smoking pleasure. You enjoy all three in Chesterfield's right combination of the world's best cigarette tobaccos.

At over a million places where cigarettes are sold you can see these clean white Chesterfield packages going into more pockets and more handbags every day. All over the country smokers are finding out you can't buy a better cigarette.

Chesterfield

Today's DEFINITELY Milder, Cooler-Smoking, Better-Tasting Cigarette
