The Newark Post

VOLUME XIII — NEWARK POST, NEWARK, DELAWARE, JUNE 28, 1922. — NUMBER 21

Newark's Voters Want Better Schools Saturday's Vote Shows

At Referendum Local Persons Vote 276 For and 128 Against Bonding of District to Extent of $165,000

Local Board Wants To Get Work Started

Dr. Walt Steel, president of the local Board of Education, said last night, "We are certainly glad that things went the way they did at Saturday's referenddum election, the majority by which the bond issue question was passed shows that it was popular with the people." In continuing he said, "We consider a majority of 148 votes out of 404 cast a very favorable majority."

Dr. Steel was talking in regards to the election held in Newark Special School District on Saturday. At that time a referendum vote was taken as to whether or not this town would bond itself to the extent of $165,000 for the purpose of building new schools. There were 404 votes cast in the election and of this number there were 276 votes in favor of the bonding and 128 against it.

Although the number of ballots cast this year was not near as large as that of the last referendum the actual number of persons voting is thought to have been larger. This was brought about by the fact that at the last vote each person was allowed to vote in comparison to the amount of assessed real estate whereas at this election only one vote was allowed to each person and any person qualified to vote at a general election was eligible to vote on the bond issue.

One of the noticeable features of the election on Saturday was the heavy woman's vote. Although the figures of the number of voters is not accessible it is thought that there were nearly twice the number of women voted as men.

Two of the town's associations that have been working very hard for the passage of the bonding issue, the Parent-Teacher Association and the New Century Club, were very active at Saturday's election and many of the members of these two bodies had their automobiles in use all day bringing voters to the Academy. The members of these bodies have worked hard and effectively and their efforts were rewarded by the majority vote on Saturday.

Not since it was first advertised that the election would take place has there seemed to be any organized effort to try and defeat the bond issue and there was none evident on Saturday. The majority of persons who seemed opposed to the bond issue had as their cry that the tax rate would advance. This is admitted by those who worked for the success of the election. It is expected that it will be necessary to raise the tax rate about 40 cents on every one hundred dollars worth of assessed real estate, but those in back of the bond issue claim that the children of the town and district will benefit a hundred fold from the improvements that will result from the new school building.

The Board of Education held a special meeting last night at which time

(Continued on Page Four.)

Local Teachers Get Appointments

Majority of This Year's Instructors Will Return — Several Vacancies to Fill

The local Board of Education has announced the appointment of teachers for the Newark schools for the next term. There are several vacancies which must be filled but the local Board is of the opinion that there will be a sufficient number of applicants to fill these vacancies in a satisfactory manner.

Harry McDonald, who was the teacher of agriculture has resigned his position to return to college. His place will be filled by Joseph D. Wilson, a graduate from the University of Delaware. Mr. McDonald also had charge of the athletics at the High School and Mr. Wilson will take over this branch of the work.

Probably the hardest vacancy that the Board will have to fill will be that of Miss Edith Case, who was teacher of Home Economics. Miss Case developed this department very well and in the State contests this year two of her pupils won prizes of $100 due to their excellent work. Miss Case's mother is not in the best of health and this is the cause of her resignation.

Miss Gladys Chadsey, who came to the local High School at the middle of last term as Health Instructor has resigned and returned to her home in New York. It is understood that Miss Chadsey can receive more money in that State than here. At the present time she is located at the Summer House, Bath Beach, Long Island, N. Y., where she is tutoring.

Miss Ruth MacMurray, formerly teacher of the Fourth Grade here has accepted a position in Ardmore, Pa. Miss Margaret Purple, teacher of science in the High School, has resigned. Miss Lillian Sudler will be married and will not return to her position here. Miss Hobbs is not expected to return.

The new colored school being larger than the old one will necessitate the appointment of an additional teacher at this school.

The following appointments have already been made:

Primary School: Miss Pauline Rutledge, first grade; Miss Thelma Hines,

(Continued on Page Four.)

American Legion Wants Members

Lt. J. A. O'Daniel Post Out for New "Buddies"—Commander Dougherty Makes Appeal

Lt. J. A. O'Daniel Post No. 6, the local post of the American Legion is making a drive for new members and it is hoped by those in charge of the Post that by July 1st every eligible man of Newark will be a member of the Post.

This drive for new members of the Legion is being carried on throughout the country and many of the cities and towns are reporting many new members coming into the fold. It is the hopes of the local Commander J. E. Dougherty, that the local Post will be able to report to the National Headquarters a good size list of new members before the drive is over.

An honorable discharge from the Army or Navy is all that is needed to bring one into the Post and it is hoped of the local Post that every man having a discharge of this nature will step up and become the member of one of the best organizations in the world, which is doing all in its power to help ex-soldiers and sailors.

The local officers point out that it was not necessary for a man to go over sea to earn the right to become a member of the Legion, but that those who were retained in this country are also eligible and the legion includes all ranks from private to general.

The officers of the Lt. J. A. O'Daniel Post are in hopes that after this membership drive has come to a close that the Post will be among the largest and most active in the State. The Post is always ready to do its bit for the community and every eligible man should be interested enough in his buddies and his town to become a member.

J. E. Dougherty, of the Farmers' Trust Company, will answer all questions pertaining to the Post and will accept all appplications.

Commander Dougherty has issued the following statement.

"The preamble of the American Legion's constitution states that it is dedicated to God and country. The Legion, during its career of only three years has demonstrated that it is the best insurance policy the Nation has.

(Continued on Page Four.)

Summer School Opened Monday With Largest Registration

Over 300 Students Break All Records for This Branch—First Lecture on Saturday Night

Radio Service in Wolf Hall for Students

With the largest attendance in its history, the Summer School at the University of Delaware opened on Monday. It was early Monday morning when the students began to arrive and one would have thought that Newark's bus men certainly did a thriving business had they seen bus load after load of the students coming from the railroad station, and they are still coming., and the registration will go well over the three hundred mark from all indications.

The interest taken in tihs Summer School and the record enrollment is laid in a big part to the work completed during the year by the supervisors. County superintendents, supervisors and teachers all seem anxious to add points to their educational credit and therefore the large enrollment.

Last year the enrollment was so large that it was found that the dining facilities at the Women's College would not accommodate the students and as this year's enrollment is even larger than last year the same condition exists and Old College is again being used for a dining room.

The first lecture of the year will be delivered in Wolf Hall on Thursday night by Dr. Frank P. Graves, Commissioner of Education, State of New York. His subject will be: "The Use and Abuse of Intelligence Tests." The lecture course this year will be in charge of Miss Etta J. Wilson, of Newark, of the Service Citizens, who will be located here during the Summer School session and will look after the publicity work of the school.

One of the features of the school this year will be the use of a radio phone that is installed at Wolf Hall.

Up until noon today the enrollment was 311 and it is expected that there will be even more teachers enrolled before the week is over.

Last year the enrollment was larger than any previous year when there were 283 students in attendance at the Summer School.

Professor W. A. Wilkinson who is director of the school this year is one of the busiest men in Newark and has been since Monday. When the students started to arrive the matter of biggest importance was the housing of them and this took quite some time.

There is one vacancy in the teaching corps. At the present time efforts are being made to obtain an instructor in Primary Methods.

As a demonstration room the students at the Summer School are using the first grade room of the Newark Primary School. Last year the Opportunity Classroom was used but it was found to be to warm for the summer months.

One of the features of the Summer School this year is the demonstration classes being conducted at the primary school. Here work similar to that carried on in the sixth grade of rural schools is carried. Local children are attending these classes.

ewark Thriving In All Business

ntractors, Painters, Mills All Busy on Large Contracts at Present Time

Building operations in Newark on many houses that are being constructed are progressing rapidly and is doubtful if there is another town size of Newark that has any more ilding going on at this time. Some- ago this paper printed a pro- m of the building operations that re underway at that time and the ount of work that the various local ntractors were carrying on amount- to many thousands of dollars.

Since that time a number of new erations have been started and sev- l of the houses under construction e been completed and are now anted.

The apartment house being built by arles Greer on Cleveland Avenue is t nearing completion. This is one the biggest private dwellings in town and will house several fam- s. The plans of the house are very ique. It is built around a court d which gives all the apartments side exposures. Several families e already made application for rtments in this house and it is ected that by the time the building completed that all the apartments have been engaged. Mr. Greer several other building contracts which the work is progressing very idly.

Contractor Willis who has several usand dollars worth of building to completed is rushing his work. The rgest job that this contractor has is building of the new headquarters the Aetna Hose, Hook and Ladder at Academy Street and Delaware nue. The foundation for this ucture is being completed and by tember it is expected that the se will be completed and ready the housing of the apparatus. fire house will be one of the most plete and up-to-date in the State.

ot only are the builders busy but ewton Shaeffer, the painter, is busily engaged and at the present has eleven painters working for on jobs in Newark and vicinity.

ings are booming at the Con- tal and there is a day and night working there. Contracts are on that will keep this plant going ull capacity for many months to .

will not be long now till the Ritter t, now being operated by the ed Canneries Corp., will be in full swing. At the present time there are several persons employed there but this number will be greatly added to as soon as tomatoes and corn start coming in.

As a whole Newark is proving itself a thriving community and one well worth while living in.

SQUIRE AT HOME

Local Magistrate Shows Big Improvement After Operations

After two blood transfusions at the Homeopathic Hospital, Wilmington, Squire Lovett was brought back to his home here on Saturday.

The Squire shows much improvement and it is hoped that he is on the road to rapid recovery.

The blood for the operations was supplied by two of the Squire's sons, Delaware and William.

Squire Lovett's condition was so much improved today that he announced that he would attend to business at his home at Orchard Ridge.

GROCERIES DROP

Not in Price, But in Bulk Fulton Store Scene

The biggest drop in groceries that has taken place in Newark since way before the war took place at the Fulton store on Monday, when they dropped to the bottom. This is not a free advertisement but an item of news, for the drop came close to inflicting a serious injury to Mr. Fulton, and not to his pocketbook at that.

A row of the large shelves in the store built to display canned goods gave way and several hundred cans, bottles and jars came crashing to the floor. Had the accident happened a short time before it did Mr. Fulton would have been caught in the "landslide" and would, without a doubt, have been injured by the falling cans.

REHEARSALS FOR SINGERS

Community Chorus to Help Out Choral Club

Augmented by the Community Chorus, the Newark Choral Club will start rehearsals again next Monday night under the direction of Miss Dora Wilcox. The Community Chorus is to be a new organization to be made up of all singers of the town who have not joined the Choral Club.

The music to be practiced at the rehearsals now is that which will be presented at the Sunday evening concert in connection with the Summer School program on Sunday evening, July 30th.

Famous Soil Experts Visited Local Experiment Farm Last Week

Every State in Eastern and Southern Districts Was Represented at Large Conference

Dean McCue In Charge of Arrangements

Newark had about one hundred visitors last Thursday afternoon, when the conference arranged by the Soil Improvement Committee of the National Fertilizer Co. was held here. This conference was between the executives of the fertilizing industries in the Eastern States and the representatives of the experiment stations of the same district.

The conference held last week was one of the series which is being conducted each year in various parts of the country and just previous to one held here there had been a similar conference in Missouri. The purpose of these conferences is to give the fertilizer industries and the experiment stations a closer view of each other's problems in working out programs which will best benefit the farmers.

Those who attended the local conference proclaimed it to be one of the most successful that has ever been held and they were more than pleased with the conditions that they found at the experimental farm of the University of Delaware. Among those who attended the conference last week were representatives of both the fertilizer industries and experiment stations fro every state in the Eastern and Southern district.

Probably the most notable of those in attendance was Dr. J. G. Lipman, director of the New Jersey Experiment Station. Dr. Lipman is known the world over for his agriculture work and just last week returned from the World Conference on Agriculture held in Switzerland. Other men present who are nationally known among the farmers and fertilizer industries were Gustavus Ober, Jr., President of the National Fertilizer Association; W. D. Huntington, Vice-President Davison Chemical Co.; Walker Wallace, Vice-President Virginia-Carolina Chemical Co.; Frank D. Gardner, head of Soils Department Pennsylvania State College; Director R. W. Thatcher, Agricultural Experiment Station, Geneva, N. Y.; S. J. Bayard, editor of National Stockman and Farmer, of Pittsburgh, Pa., and Dr. A. J. McCall, of the University of Maryland. All these men are nationally known figures in their lines and it is seldom, if ever, that such a representative body visited this town.

The conference opened on Thursday morning at 10 o'clock, in Wolf Hall, with Dean C. A. McCue, of the University of Delaware, presiding. In the morning the conference was taken up with interesting addresses by various members of the University of Delaware faculty. Dean McCue talked on "What the Delaware Experiment Station is Doing Along Soil Fertility Lines." The dean brought out some very interesting points in his talk.

Professor George L. Schuster spoke on the subject "Plant Fertility Studies With Wheat."

"Relation of Fertilizers to Acid Tolerance of Plants," was the subject of the address given by Professor L. E. Tarr.

Dr. E. M. R. Lamkey talked on the subject "The Problem of Plant Nutrition."

All these talks were on the condi-

(Continued on Page Four.)

CONTRACT AWARDED

F. W. Lovett's Bid of $11,018 Gets Cleveland Avenue Job

Town Council met in a special session on Saturday night for the purpose of opening bids for the paving and curbing of Cleveland Avenue. There were several bids received.

The bid of F. W. Lovett, the local contractor for doing the work at a cost of $11,018, was the lowest and he was awarded the job. The avenue will be paved from Chapel Street to Creek Road and there will also be a curbing laid. The contract calls for the work to start in thirty days and it is expected that the paving will be completed by November 1st.

Lecture Series Starts Thursday

Dr. Frank Pierripont Graves, of New York, First Lecturer—Has Interesting Life

The University of Delaware Evening Lecture Series provided each year by the Service Citizens of Delaware in connection with the Summer School, will be opened on Thursday evening of this week with an address by Dr. Frank Pierrepont Graves, President o fthe University of the State of New York, and Commissioner of Education. Dr. Graves will return from a trip through the West only a few hours before furfilling his lecture engagement. His subject, "The Use and Abuse of Intelligence Tests," together with the prominence of the speaker, promises to attract to the University educators from all parts of Delaware. As head of the public school system of the State of New York, Dr. Graves when he speaks, commands the attention of the entire countrq The lecture is open to the public; all interested are invited to hear the distinguished guest of the University.

Dr. Graves was born in Brooklyn, N. Y., of Massachusetts colonial and revolutionary stock, fifty years ago. His father was a Harvard man and taught mathematics at Harvard before entering on the practice of law in New Pork, and was for many years a member of the Board of Education in New York. He was married in December, 1895, to Helen Hope Wadsworth, a descendant of Alden and Bradford of the Mayflower, a relative of Longfellow, and an A. B. of Boston University, and they have four children, one a graduate of Pennsylvania and another in the Sophomore year of the College.

Many Improvements Along Main Street

Business Houses Among Finest in State—More Stores Are Needed

The latest of improvements are those being made to the restaurant and dwelling of Walter Powell. It is understood that this improvement is being made for the purpose of making a suitable location for the Atlantic and Pacific Tea Company, which has been looking for a site here for several months.

I. Marritz, who has conducted a store on East Main Street for a number of years is also among those who is making Main Street more business like. Mr. Marritz is having the entire front of his store improved and has added the dwelling next door to his store and in this new place will operate a 5, 10 and 25 cent store. A store of this nature has long been predicted here and Mr. Marritz will offer some excellent bargains in this new department.

There is a strong probability that in a short time another improvement will be made to house a community grocery store. A young man who has been in busines in Newark for several years is known to have plans underway at the present time to organize a company and deal in groceries at cut rates. It is his idea to have every dealer a stock holder in the store. The young man is not yet ready to put his proposition up to the public, but states that he is thinking seriously of taking over a property on Main Street and remodeling it into an up-to-date store.

Another improvement that is noticeable on Main Street is that of several cement pavements being laid to replace those of rough brick.

It is a known fact that several persons have visited Newark in the past few months looking for business locations, but with the present conditions existing it is like looking for a tions existing it is like looking for a needle in a haystack to find a store on Main Street.

(Continued on Page Five.)

WEATHER FORECAST

Weather outlook for the period ending July 1: For Middle and North Atlantic States: Generally fair except local showers near end of week. Moderate temperature first part of week and warm thereafter.

Pencader Church Crowded At Reunion

About 300 Persons Attend Sixth Annual Affair of Pencader Cemetery Association

With about three hundred persons present the sixth annual reunion of the Pencader Cemetery Association was held in the Pencader Presbyterian Church, Glasgow, on Sunday afternoon. This is the largest turnout on record for this annual event.

Rev. J. Janvier Louderbough, M. A., of Holland Memorial Presbyterian Church, Philadelphia, preached the morning service at 10.30 o'clock and Rev. George C. Williams, of McCabe Memorial Church, Wilmington, was the speaker at the afternoon services held at 2.30 o'clock.

Dr. Louderbough's sermon was an interesting exposition of John the Baptist as a witness for Christ. People, then as now, he said, should become witness bearers.

The afternoon sermon of Dr. Williams delighted the members of the little church and its friends. He paid a glowing tribute to the rural churches as training institutions for preachers in preparation for the larger sphere of the city or world missionary work. The rural church, he said, should be a community church, and pointed out that the percentage of efficiency in the rural churches is larger than that in the larger churches in the city. He named a number of great Methodist clergymen who had started by preaching in small rural churches, which, he said, were conducive to clean minds and strong bodies.

Rev. John MacMurray, pastor of the Head of Christiana and Pencader Presbyterian Churches, presided.

A fine program of music was rendered at each service, led by Harry Frazer and a male quartet from Wilmington. Miss Palmer was soloist.

Numerous friends of the Pencader church, who had been urged to make the reunion a home-coming event, were present, including a large number from Philadelphia, Wilmington, Newark, Middletown and other places throughout the northern end of the State.

SUCCESSFUL FESTIVAL

St. John's R. C. Church Realized Goodly Sum

The festival held on the lawn of St. John's R. C. Church last week was a big success and over $800 was cleared on the affair.

The festival was held on Thursday, Friday and Saturday nights. The most interesting probably was Saturday at which time the awards were made. Some of the prize winners and their awards were: Six pound box candy from John Govatos, of Wilmington, was won by Miss Helen Rhodes; Miss Alice Boyd won a fancy towl; Paul Moore copped a rocking chair; Edward McCool won a traveling bag and a Mr. Rupp won a ten pound ham. The names of the other prize winners could not be learned.

The weather man was unusually good this year. For several years past those in charge have experienced rainy weather but this year they had no grounds for complaint.

AN OUTING

Local Men With School Masters' Clulb of Delaware

Prof. W. A. Wilkinson, J. Herbert Owens, superintendent of the local schools and R. W. Heim attended the outing of the School Masters' Club of Delaware, last Thursday and Friday.

On Thursday the club was entertained at "Longwood," the home of Pierre S. duPont. Mr. duPont had intended to be present at the entertainment, but was called to New York and was unable to stay over for the affair.

On Friday the party spent the entire day in Valley Forge. The trip was made in one of Stiltz's busses.

BAZAAR

A bazaar will be held Saturday evening on the lawn of the Welsh Tract School for the benefit of the school.

LAY FOUNDATION

Work on the foundation of the new firehouse of the Aetna Hose, Hook and Ladder Company, has been partly completed.

SHOT IN EYE

Master Cann Meets with Accident from Air Rifle

The son of Mr. and Mrs. J. Pearce Cann suffered a painful accident last week when he was hit in the eye with a shot from an air rifle.

The lad shot the rifle himself, but the shot struck a wall and glanced back and hit him in the eye. The lad was taken to Dr. Walt Steel at once and the injury did not prove serious.

Big Reception For Senator

Sussex County to Pay Tribute to Mr. and Mrs. duPont on Saturday

Georgetown is to be the scene of a big reception for Senator and Mrs. T. Coleman duPont next Saturday evening. Preparations for the event are about completed and a big time is looked forward to. The arrangements for the reception are being made by Joseph E. Holland, of Milford, and former Governor John G. Townsend, of Selbyville, who expect thousands of persons from all parts of the State to be present at the affair.

The reception is being given for the purpose of allowing the people of Sussex County to meet Senator du Pont and show their appreciation for the excellent roads that he has provided for that county.

The reception is scheduled to begin at 6 o'clock when the receiving line will take place in the center of the public square, where everyone may have the pleasure of greeting the guests of honor.

Following the reception a buffet supper will be served after which a concert will be given by a combination of bands under the direction of J. Norris Robinson. The asphalt street around the green is to be roped off and while the young people dance the evening away, their elders will recall the days happily passed when it was necessary for the family dearborn drawn by their best horse or a yoke of oxen to plow heavily through shifting sands of old Sussex for several hours before the county seat could be reached. As it is the purpose of those having the matter in hand to make this reception as informal as possible, no speech making has been arranged.

A great many persons in the upper part of the State having expressed a desire to be present, a committee is endeavoring to arrange for special cars to be attached to the Delaware Railroad train leaving Wilmington at 2.20 o'clock Saturday afternoon. The return trip is to be made on the Rehoboth Special which leaves Georgetown about 11 o'clock, connecting with the Norfolk express at Harrington which arrives in Wilmington at 2.06 a. m.

A large delegation of Newarkeans expect to go to Georgetown by automobile on Saturday. The duPont Highway to Georgetown is in excellent condition, the only rough section being through Frederica where a stretch of the new concrete highway is being constructed.

CATTLE SHOW

One of Features of Farmers' Day on August 3rd

Not the least of the features of Farmers' Day at the University of Delaware, August 3rd, will be the cattle show of the northern members of the New Castle County Boys' and Girls' Cattle Club. The club members of southern New Castle County will exhibit their heifers on the farm of B. V. Armstrong, of Middletown, August 2nd. Nearly one hundred members are now enrolled in the dairy cattle clubs of New Castle County and the competition promises to be keen. Attractive awards will be made for champion heifers, and competent judges have been secured.

These junior dairy cattle clubs are under the direction of the Extension Division of the University of Delaware and the New Castle County Farm Bureau. County Agent R. O. Bausman and State Club Leader A. D. Cobb, during the past several years, have given their personal attention to the organization and the direction of these clubs.

FAVORITE RESORT

Town's Point is one of the spots where many week-end visitors of Newark find relief on the hot Saturdays and Sundays that are now with us.

UNCLAIMED LETTERS

There are unclaimed letters at the post office for the following persons: Roosevelt Maith, Mose Wisher, Levine Price, Mrs. Hone Stephran, Leo Givens, James Jackson and John Seeaun.

VALUABLE ADVICE

The flashy townsman was swaggering round the farmyard imparting gratuitous advice to the old farmer.

Having criticised the poultry, the sheep and the rest of the ald fellows's possessions, the townsman visited the stables.

"Say, do you know how to make a slow horse fast?" he asked.

"Yes," said the farmer, "Don't feed him."—Philadelphia Bulletin.

IRA KILMON

Opposite B. & O.

The place in Newark where discriminating people eat and then return. Many special dishes for hot weather.

Piggly-Wiggly

Will Soon Be Located In

NEWARK

One of the country's leading economy stores will be located in this town as soon as a suitable location can be obtained.

Let us show you the economy of buying at Piggly-Wiggly Stores—

The satisfaction of self-service, and its time-saving advantages.

The wisdom of the Cash and Carry Plan.

The convenience to you of having the floor plan and arrangement alike in all Piggly-Wiggly Stores.

Consider the 1000 Piggly-Wiggly Stores in operation in 225 cities, in 44 states, with net earnings of $250,000 monthly realized from the sale of $5,000,000 worth of groceries each month.

Then consider the fact that the stock (no par value) of Piggly-Wiggly Stores sells around $45.00 on the New York Stock Exchange.

Piggly-Wiggly Stores will be opened here within a month—stockholders get two profits—why not be a stockholder?

An Investigation does not obligate you at all.

Elkton Man Hit By Auto

Paul Cameron is Seriously Injured on Newark Road

Paul Cameron, son of Henry S. Cameron, of this town, is in a serious condition in Union Hospital here, the result of being struck by an automobile along the Elkton-Newark road, Sunday afternoon. He had just stepped out of one machine and started to go across the road from the rear of the car in which he had been riding. In doing so he stepped in front of another car going north, bearing New Jersey license tags. He was knocked about ten feet. The driver of the car stopped and gave aid. About three weeks ago Mr. Cameron sustained a broken collar-bone in an automobile accident and had not fully recovered from the mishap.

Philip M. Groves, who will retire as Assistant County Treasurer of Cecil county, on Saturday, has been elected secretary of the Mutual Building Association of Cecil County, vice Irvin T. Kepler, resigned. Edwin T. Dorcus, of Port Deposit, who will succeed Mr. Groves as Assistant County Treasurer, has just returned from a three-month trip through Europe.

The large barn and hay barracks on the farm of J. Steele, near Andora, about five miles north of Elkton, were destroyed by fire at noon Monday. The residence also caught fire but the flames were extinguished by the volunteer firemen of Elkton, who responded to a call for help. All the livestock was saved, but a lot of hay and some farming implements were burned.

The Northwestern District of the Cecil County Sunday School Association has elected the following officers: President, H. H. Kirk; vice-president C. H. Hutchens; secretary-treasurer, Miss Virginia Abrahams; superintendent of children's department, Miss Albert Nickle; superintendent of young people's department, Miss Abbie Keen; superintendent of adult department, Rev. H. Keldo; superintendent of home department, Mrs. E. J. Abrahams; superintendent of teachers' training, Edwin Haines.

Francis Maloney, who was one of the pupils from Middle Neck public school, near Warwick, who participated in the track and field sports held by Cecil county schools in Elkton last month, under direction of the Public Athletic League of Maryland, and was injured, has been taken to a Baltimore hospital for treatment.

Thomas W. Williams, night superintendent at the Elkton pulp works here, owned by the Jessup and Moore Paper Company, of Wilmington, Del., who was seriously burned by acid while helping to unclod a pipe in the mill, is recovering. It is now thought he will fully recover his sight. A portion of the acid struck him near the eyes.

William H. Mackall, president of the Board of Town Commissioners of Elkton, has received notice from the State Roads Commission of Maryland, that work of building the concrete road out East Main Street, to Delaware Avenue, will be commenced in the very near future.

The records in the Elkton municipal cases of Messrs. Edward T. Lynch and Ellsworth N. Sweet vs. Mayor William H. Mackall, were sent by Clerk of the Court H. W. Lewis last evening to the Maryland Court of Appeals. It will come before that body, the highest court in Maryland, early next month in a special session. At the recent municipal election held in Elkton, Messrs. Lynch and Sweet were elected town commissioners for a one-year term without opposition. Mayor Mackall refused to administer the oath of office to them on the grounds that the terms of Commissioners Taylor W. McKenney and W. Frank Karl have not expired. This week Judge Lewin W. Wickes, presiding over the June term of Circuit Court for Cecil county, granted a mandamus to compel Mayor Mackall to administer the oath of office to Sweet and Lynch, as required by law. Counsel for Mackall took an appeal and gave bond. A previous injunction was granted by the Circuit Court compelling the Town Council to place the names of Messrs. Sweet and Lynch on the ballot at annual town election held here on May 22nd. The same contention was then put up by Mayor Mackall against Messrs. Lynch and Sweet as candidates for Town Commissioners. At first it was thought the case would not be decided by the Court of Appeals until October, but a special session already called for July 7th, gives an opportunity for an earlier settlement.

Providence Has Newsie Budget

Miss Eva Angle in Auto Smash-Up — Elkton Firemen Do Good Work

The Singerly Fire Company of Elkton was called out on Monday at noon when the barn on the farm of James Steel caught fire. The barn and all the other outside sheds burnt to the ground. The house caught fire several times, also the home of Mrs. Ella Baldwin. Both were saved by hard work of the firemen.

It is not known just how the fire started. Mr. Steel, who has been in poor health for some time, has broken down completely and is now in a serious condition.

Miss Eva Angle met with an accident Sunday evening, when the lights on her Ford car refused to work, and to avoid a collison with a team she turned her car in a ditch, throwing Mr. Sharp out and breaking his collar bone in three places. Mrs. Sharp was badly bruised, and was also Mrs. Angle. Miss Angle and two small children in the car were not injured. The car was somewhat damaged.

Mrs. Lewis Sprout underwent an operation at the Union Hospital on Tuesday. Mrs. Sprout is getting along as well as can be expected.

The Fourth District Auxiliary of the Cecil County Chapter of American Red Cross will hold a meeting at the home of Mrs. Fred Strickland on Monday evening, July 3, at 7 o'clock, standard time. Every one interested in the work is requested to be present, as this is a very important meeting.

Services at Rock Church July 2nd: Sunday school, 2 o'clock; preaching at 3 p. m.; Christian Endeavor 7.45 p. m. The Rev. Vaulstine, of Jersey, is to fill the pulpit as a candidate.

Taylor Brown has been in New York State on business for the Jessup and Moore Paper Co.

Mrs. Milton Null is spending a few days with friends at Barnsley, Pa.

Miss Gladys Scarborough is the guest of her aunt, Mrs. William Gregg, at Newark.

Mrs. Harry Malin has purchased a new Ford car.

Rev. Doelfield filled the pulpit at Rock Church Sunday. He was entertained at the home of Mr. and Mrs. George W. Biles.

Miss Jennie Scarborough was a recent visitor in Philadelphia.

Miss Elizabeth Mackie, of Coatesville, Pa., has been spending some time with Mr. and Mrs. Streaper Mackie.

Miss Julia Mackenzie and Ralph Morgan of Chespeake City, Md., were quietly married Wednesday evening, June 21st, at the Cherry Hill M. E. parsonage.

Mrs. George Racine and son Dallis, Mr. and Mrs. Percy Hardcastle, of Yorklyn, were Sunday guests at the home of Mr. and Mrs. Joseph Miller.

Mr. and Mrs. Arthur Willis called on friends at Elkton last Thursday evening.

Mrs. Helen Mackey and niece, Miss Lavinia Bye, of Newark, spent the week-end with Miss Helen Mackey.

Mrs. Ernest Armstrong, of Newark, spent the week-end with Mr. and Mrs. A. B. Creswell.

Edgar, the little four-year old son of Mr. and Mrs. Edgar Logan, had his tonsils removed at Union Hospital Thursday of last week. He seems to have fully recovered from the operation.

David Angle returned home Saturday from a camping trip with Company E of Elkton, and David is nursing a broken nose.

The Willing Workers of Rock Church will hold a meeting in the Session House Saturday, July 1st at 2.30 p. m.

PLEASANT HILL

The annual Harvest Home of Ebenezer M. E. Church will be held in Whiteman's Grove, August 10th.

Mr. and Mrs. Al Harkness were Sunday guests with the former's father, Wm. Harkness.

Robert and Eugene Prettyman, of Wilmington, spent a few days last week with their cousins, Katharine and Rebecca Buckingham.

Clarence Harkness, of Wilmington, visited his sister, Mrs. G. W. Dempsey, on Monday.

Mr. and Mrs. Warren Buckingham and daughters spent the week-end with Dudley Crossley and family at Clayton, Del.

Albert Mitchell and Miss Reta Hamilton, of Richardson Park, spent the week-end with the former's sister, Miss Rachel Mitchell.

Mr. and Mrs. Charles Saile, of Philadelphia, spent the week-end with Mr. and Mrs. Leslie Eastburn.

Mrs. Sue Whiteman of Wilmington, is visiting her daughter, Mrs. S. W. Pierson.

APPLETON

Mrs. Kincaid is the guest of her grandson, Albert George.

Mr. and Mrs. Daniel Simmons, of Elkton, were week-end visitors with her parents, Mr. and Mrs. George Hobson.

The Women's Club members are planning for a festival on July 11th at Appleton.

The newly-made concrete road will be opened for traffic on July 3rd.

Misses Ida and Evelyn Kimble, and Edith Zebley and Elwood Zebly attended the Howell-Brown wedding at Head of Christiana Church, on June 21st.

Mr. and Mrs. Wm. Colgaine of Galena, Mr. and Mrs. Clark Colgaine and daughter, and Miss Mary Colgaine of Wilmington, spent Sunday with Mr. and Mrs. Warren Johnston.

A number of Appleton folks attended Children's Day exercises at Flint Hill on Sunday, June 25th. They reported an interesting program, and a good attendance.

STANTON

Everything is in readiness for the festival to be given by the Community Association on the lawn of the Friends Meeting House, July 19, 20, 21, and 22.

Clarence Sparks is chairman of the various committees in charge of the affair.

The committees for the various booths are as follows:

Candy: B. L. Dickey and family: Children's: Mrs. C. P. Dickey; Ice Cream: Geo. Potney and family, C. P. Dickey, Hugh Lynsy, William Bradley, Clarence Taylor and Howard Sylvester; Hot Dogs: Wm. Narvel, Paul Wier, Frank Mitchell, Ralph Smith and H. Rothwell; Novelties: Cliff Mitchell, H. Mitchell, Clarence McVey, H. Dickey and Lawrence Knotts; Cake: Mrs. J. W. Mitchell, Mrs. Lewis Dickey, Maggie Duncan and Mrs. Knotts; Fancy Counter: Harold Mitchell, Mrs. Hitchen, Mrs. Sparks and Mrs. H. Dickey; Soft Drinks: Walter Hitchen, Ed Powell and J. Narvel and wife; Sports: Earl Dickey, H. Sparks, Charles Dickey, William Chambers, Joseph Chambers and Esler Powell; Tickets: William Sparks, J. W. Mitchell and Thomas Jefferies; Country Store: John W. Banks, Mrs. Banks and Mrs. Downey.

BOX SOCIAL

A box social was held last Thursday evening by the Clover Leaf Sewing Club at the home of Mr. and Mrs. Clark McCarns. Ice cream, cake, lemonade and candy were sold, and boxes auctioned. The evening was delightfully spent and the affair a financial success.

ROAD REPAIRS

Repairs are being made to the shoulders of Depot Road. These shoulders have been in a bad condition lately.

Axcy Todd is a very handsome stallion, rich bay in color, 15½ hands, weighs 1100 lbs., is a horse of faultless conformation and disposition.

Trade Your Old Furniture for New

TRADE it for new, but still keep the old. Thousands of people have done it, and are doing it every day.

They do it by doing over their old furniture with Vernicol varnish stain.

Vernicol comes in a can. Is quickly and easily applied with a brush. Made in all the popular finishes, one of which is sure to meet your fancy.

It stains and varnishes with each stroke of the brush. Makes old discarded furniture look like new. Anybody can do it.

No matter whether you prefer mahogany, walnut or oak, there is a Vernicol stain for each. And because it has such long-lastingness it's fine for floors.

Come in and see the sample panels and ask for interesting literature.

Soil Fertility Discussed By Dean McCue Last Thursday

Some of the Biggest Fertility Men of Country Hear Local Man in Opening Address

Dean C. A. McCue, of the University of Delaware, made the opening address at the conference of a Soil Fertility Conference held here last Thursday. The Dean's address follows. The subject on which Dean McCue spoke was: "What the Delaware Experiment Station is Doing Along Soil Fertility Lines."

"I feel that I should formally open the Conference by a word of welcome. The agricultural investigator and the fertilizer manufacturer have many problems in common. The investigator is anxious to ascertain what plant foods are necessary for economic crop production; to find out under what conditions plant food can be most economically furnished the growing crop; to determine under what soil conditions and crop rotations best results can be secured from the use of fertilizers, and what measures are necessary for the proper conservation of soil fertility. The fertilizer manufacturer is anxious to supply plant food materials that will give the best economic effects upon growing crops and permanent soil fertility under a great diversity of environmental conditions. It is especially fitting, therefore, that the investigator and the fertilizer interests should sit together about a common table and discuss this all important problem of Plant Food and Soil Fertility. It, therefore, gives especial satisfaction to bid you welcome to the University of Delaware Agricultural Experiment Station. All the resources of the School of Agriculture of the University are at your disposal today. The latch string out, the staff is at your disposal, and as they used to say at my old college boarding club, 'If you see anything you want and can't reach ask for it.'

"Before entering in a discussion of the work of this Experiment Station along soil fertility lines it might be well to devote a few moments to a brief survey of soil and crop conditions in Delaware. The major portion of the soils of the state are of alleuvial deposit and belong to the Atlantic Central Plains types, similar to those found in Southern New Jersey, Eastern Maryland, Eastern Virginia and the Eastern Carolinas. Only in the extreme northern part of the state do we find soils that were made in place, and these belong to the Peidmont Plateau Series. The Costal Plains types are largely loams, sandy loams, and sands. The Peidmont soils in the Northern part of the State are loams, chiefly of the Chester series. Unfortunately the fertilizer plots of the Experiment Station are located in a transitional zone, between the Peidmont and Costal Plain types and are really typical of only a small area of the State.

"The agriculture of the Northern third of the State is general farming and dairy farming, the principal crops being wheat, corn, hay, and localized trucking areas. In the southern two-thirds to three-fourths of the state we find a great diversity of crops, corn is grown everywhere in the state and the total production is above the consuming need, in other words Delaware is a surplus corn producing state. Wheat is grown on all soil types, excepting the light sands in the northern part of the state; other field crops are alfalfa, soy beans, cow peas, white potatoes, and sweet potatoes. A considerable portion of the southern-most county is strictly a sweet potato section. Among fruits and vegetables Delaware produces apples, peaches, pears, strawberries, cantaloupes, cucumbers and watermelons. Thus one may see that although Delaware is small, she has a great diversity of agricultural crops. Commercial fertilizers are used with practically every crop grown in the state, and the soil is wonderfully responsive in crop returns from the use of commercial plant foods.

"The staff of this Station is small, its resources are limited, and we feel that we are but barely able to scratch the surface of the many problems that present themselves. We have a Packard full of problems but only a wheelbarrow to support them.

"The bulk of the soil fertility problem we are undertaking to solve, naturally fall upon the shoulders of the Department of Agronomy, although it is our aim to have all Departments of the Station, in so far as they may contribute, share and aid in the solving of all experimental work. In the field trip this afternoon you will have an opportunity to see most of the work of the Agronomy Department, hence I will mention the work of that Department but briefly.

"The fertilizer work of the Agronomy Department began in 1908 and has developed along several lines which are more or less interlocking. Among these are first: To determine the value of a crop rotation as expressed in crop yields. This work is being conducted with wheat, corn, soy beans, and hay. The value of the rotation method is ascertained on wheat and corn by means of continuous cropping of a series of plots with these grains and another series in which rotation is practiced. The rotation used is corn followed by a cover crop, soy beans, wheat, and then a mixture of timothy and clover for one year. In contrasting crop rotation versus continuous culture, it has been found that crop rotation has increased the yield of wheat by 5 to 7 bushels per acre and of corn by 10 to 20 bushels per acre.

"The blocks used in the rotation experiment are 4 in number and each subdivided into 16, one-tenth acre blocks of which each receives a different fertilizer treatment. The continuous corn and wheat blocks are subdivided into 8 blocks each, of which each receives a different fertilizer treatment.

"Of the various fertilizer treatments, the one receiving all three plant food elements, i. e., potash, phosphoric acid, and potash, and the one receiving barn yard manure at the rate of 10 tons per acre, have produced the largest yields in corn, wheat, soy beans, and hay. The increased production of these plots over those plots receiving no fertilizer treatment has been from 35 to 40 bushels of corn per acre, 10 to 16 bushels of wheat per acre, 10 to 15 bushels of soy beans per acre and ¾ to 1½ tons of hay per acre. Taking into consideration the production response to fertilizers of all these crops for the past 14 years it has appeared that potash and phosphoric acid were the two limiting factors. Where these two have been supplied in sufficient quantities there has been but little increase in yield produced by the addition of nitrates. Often there has not been sufficient differences to pay for the nitrates used.

"An eleven year average of wheat in rotation, where 250 lbs acid phosphate and 120 lbs. of muriate of potash per acre were used shows an acre yield of 24.96 bushels when 125 lbs. of nitrate of soda is added the yield is increased to 28¾ bushels per acre. Estimating nitrate of soda at $50 per ton and wheat at $1.00 per bushel, this shows a net return of 84 cents per acre for the nitrate used.

"A seven year average yield of soy beans when 250 lbs. acid phosphate and 75 lbs. of muriate of potash have been used shows a yield of 23.38 bushels per acre, the addition of 100 lbs. of nitrate of soda has increased the average yield to 25.62 bushels, or a gain of 2.34 bushels per acre. Estimating nitrate of soda at 50 per ton and soy beans at $2.00 per bushel there has been an average net return of $2.14 per acre for the nitrate used.

"A thirteen year average of hay has been 4242 lbs. per acre from the residual effect of 250 lbs. of acid phosphate and 120 lbs. of muriate of potash applied to preceding wheat crop while the addition of 125 lbs. of nitrate of soda to the preceding wheat crop gave 4332 lbs. of hay, an increase of 190 lbs. per acre for nitrate.

"Fourteen years average on corn gives an increase of 3 bushels per acre for nitrate. Estimating corn at 80 cents per bushel and nitrate at 50 per ton the return for the use of nitrate has averaged a loss of 72 cents per acre.

"On corn for 14 years muriate of potash has given an average net money return of over $18 per acre while acid phosphate has given an return of approximately $4 per acre.

"On wheat we have an average net return of appriximately $4 per acre for the potash, and $6.50 per acre for the phosphoric acid used. (Applying the same units of value as before.)

Lime applications has in all cases increased the yield of hay regardless as to whether or not fertilizers have been used. In the four year rotation lime has been applied but once and that upon corn. Lime used with manure or muriate of potash has increased the yield of soy beans by about 6 bu. per acre. Lime with fertilizers or manure increases the yield of corn from 5 to 10 bushels per acre. Lime on corn without the addition of commercial fertilizers gives negative results.

"Nine years results of top dressing grass with fertilizers have been obtained and have been published as Bulletin 130 of this Station. The type of land and the nature of the pasture or hay desired will determine largely the fertilizers to be used. Most economical gains were made from the use of potash and acid phosphate.

"Experimental work is also underway with various forms of lime and various carriers of phosphoric acid carriers. The rotations involved are wheat, corn and clover. Eight years' results of this work have been completed. The results tend to show that one form of lime is as good as another when applied according to their respective neutralizing powers; that lime with complete fertilizer almost doubles the yield. Of the phosphoric

(Continued on Page Eight.)

AMERICAN LEGION WANTS MEMBERS

(Continued from Page One.)

"Our Post appeals to all eligible exservice men in this community to join the Legion and to aid our fight for Americanism. The blue and gold button of the American Legion marks its wearer as one who has not thrown away his patriotism with the uniform. It means that he has not "passed the buck" to someone else to see that the sick and disabled buddies get justice and to fulfill all those things that he desired to result from the war.

"Every man in the service hoped for better things after the war. More than two million doughboys, gobs and gyrenes realized that it was going to be a fight to bring to pass all the things that they dreamed of. The result of this prevailing sentiment was the information of the American Legion.

"Legion members are from every branch in the service, from those who were forced to remain at home to men who won the congressional medal at Chateau-Thierry and in the Argonne. It includes all ranks from private to general.

"Our Legion Post can be the most beneficial organization in this community. Its purposes are high; its ideals are untarnished. It deserves your support and the membership of every war veteran. Join Lt. J. A. O'Daniel Post of the American Legion and make it the best Post in your State."

LOCAL TEACHERS GET APPOINTMENTS

(Continued from Page One.)

second grade; Miss Harriet Wilson, third grade. There are still vancancies in the second and fourth grades.

Grammar School: Miss Susie Dean, Miss Mary Hoffecker, Miss Viola Cooper, Miss Andasia Reynolds, Miss Iva Griffith, Miss Francis Medill, Miss Ruth Brown and Mrs. Gertrude Hill.

There is still to be a teacher appointed to teach the Opportunity Class. It is doubtul if Miss Mary Hoey who was instructor of this class last year will return.

High School: Miss Mary C. Houston, English; Miss Anna Gallaher, History; Miss Olive Heiser, French; Miss Esther Maxwell, Latin; Miss Vilena Brownhill, Mathematics; Joseph D. Wilson, Agriculture. Vacancies exist in the science and home economics departments.

Colored School: Miss Alma R. Davis, Miss B. Doreen Jolly and Miss Pauline Stricklin. One additional teacher is to be appointed.

SOIL EXPERTS VISITED LOCAL EXPERIMENT FARM LAST WEEK

(Continued from Page One.)

tions as found in this immediate section and, of course, of great interest to those in attendance as it is this part of the country that they are the most interested.

Dean McCue had charge of the arrangement for the local entertainment of those in attendance and was ably assisted by William D. Hurd, Director Soil Improvement Committee, of Washington, D. C.

Luncheon was served in the University Commons.

In the afternoon a trip was made to the University Farm, and a study of the field crop and orchard fertility plots at that place was made. Each of the plots on the Experiment Farm are marked with placards showing the amount of the fertilizer used and the crops planted and those at the conference could make a thorough study of the growth of crops under the different conditions. Several photographs were taken of the various crop plots and orchards.

In the evening those in attendance went to Wilmington where the conference was continued and carried on through Friday. On Thursday night there was a dinner and smoker at the Hotel duPont and several interesting addresses were delivered. On Friday addresses of an interesting nature were delivered by several of those in attendance and one that caused a great deal of favorable comment was made by Dr. A. E. Cance, of the Massachusetts Agriculture Colllege, who spoke on "What Constitutes a Sound Basis for Conducting Business with Co-operative Organization?"

NEWARK'S VOTERS WANT BETTER SCHOOLS

(Continued from Page One.)

it was expected that it would be decided what the rate of interest on the bonds would be and that advertisements for the sale of the bonds would be given out. But when the members of the Board got together it was decided that it was too early to go ahead with this work. Before action along this line can be taken the State Board of Education will have to issue a certificate of election and it is the hope of the local Board members that this action will be taken at an early date by the State Board.

At the meeting last night the success of Saturday's election was discussed and it was decided that before further action is taken by the local Board that further inquiry shall be made into the matter of putting the bonds on the market.

Dr. Steel and other members of the Board had arranged to have a conference with Dr. Odell and the architect of the Service Citizens in Wilmington today, but this conference has been postponed as the architect was called away yesterday. The Service Citizens have offered to the local Board the use of an architect for the drawing of plans for the new school. This offer has been accepted by the local Board and will save a big item of expense.

The new school will be built on Academy Street on the site of the present athletic field of the High School. It is the plan of the Board to build as much of the new school as possible with the money realized from the sale of the $165,000 worth of bonds and to complete the work when the amount of money promised by the Delaware School Auxiliary is forthcoming. At the present time the latter body is making no contributions for school buildings, but Newark school authorities have been assured that this district will be the first to receive a contribution when the body starts making these donations again. It is thought that the Delaware Auxiliary will donate more than $200,000 to the local Board.

TO THE EDITOR AND READERS OF THE NEWARK POST

No public service in recent years has been of greater worth, perhaps, than the gift of the Coleman duPont Highway. This road, which has linked the whole State as never before, was started in Sussex County. In addition to the road, the gardens so generously given by Mrs. duPont, planted along the Highway, have added a touch of beauty that appeals to the sentiment of all.

In appreciation of these gifts, the friends of General and Mrs. duPont, residing in Sussex County, have planned an Old Fashioned Sussex Party to be given in their honor at the County Seat at Georgetown, on July first, at six o'clock P. M., Standard Time.

The affair will be in keeping with cutsom here long established—absolutely informal. In view of the fact that there will be no formal invitations, this opportunity is taken of inviting you as Editor and your readers to be present to show your appreciation for this wonderful gift which means so much to the Civil, Economic, Educational and Social life of the County and State.

(Signed)
JOSEPH E. HOLLAND
JOHN G. TOWNSEND, JR.
Old Associates on Highway Commission.

NEWARK OPERA HOUSE

PROGRAM WEEK BEGINNING

Thursday, June 29th--

Elliott Dexter and Mary Alden in "The Witching Hour." Adapted from the celebrated stage success by Augustus Thomas.

Friday, 30th--

Betty Compson in "For Those We Love." A human story of a girl who fights for the happiness of those she loves. The story abounds in homely episodes and intimate glimpses of small town life. Harold Lloyd in "Next Aisle Over."

Saturday, July 1st--

Wallace Reid, Agnes Ayers and Theodore Roberts in "The Love Special." Adapted from Frank H. Spearman's celebrated novel, "The Daughter of a Magnate." The beautiful Yosemite Valley, one of the famous garden spots of the world, forms the background for many of the exterior scenes of this picture. News and a Sunshine comedy.

Monday, 3rd--

A Paramount Special—title to be announced later.

Tuesday, 4th--

Closed on account of Holiday.

Wednesday, 5th--

A Paramount Special—title to be announced later.

HANARK THEATRE

"All that is worth while--in Photoplays!"

Thursday, June 29th—

All-Star Cast

HYPOCRITES

A glorious romance, fairly seething with passions. Mellow with homely joys. A thrill with a fighting spirit of adventure. You cannot afford to miss this wonderful love romance.

Comedy—**"A Dumb Waiter Scandal"**
News Weekly

Friday, June 30th—

Mr. and Mrs. Carter DeHaven
IN
TWIN BEDS

There is an abundance of clean, wholesome comedy in this farce which shows this well-known comedian to best advantage. If you wish to enjoy a good hearty laugh, come!

Ben Turpin in **"Love's Outcast"**

Saturday, July 1st—

J. L. Forthingham's
THE TEN DOLLAR RAISE

A moral lesson with great heart appeal to old and young. A play worth going miles to see.

ALSO THE GREATEST COMEDY YOU HAVE EVEN SEEN—ENTITLED
"Mutts"

After July 4th this Theatre will run only on Saturday evenings, running two shows at that time. Watch for the special Saturday evening bookings.

Admission.....10 and 20 cents

Personals

Miss Marjorie Rose spent the past week at her aunt's, Mrs. W. M. Coverdale.

Miss Dorothea Rose is spending the week with friends in Wilmington.

Mr. and Mrs. James Mackenzie and Mr. and Mrs. William Scott, of Newark, spent the past Sunday with Mr. and Mrs. William Mackenzie, of Chesapeake City, Md.

Mr. and Mrs. Arville Cloud spent Sunday with Harry Scarborough and family, of Chesapeake City.

Mr. and Mrs. Charles Dunsmore, Mr. and Mrs. Henry Dunsmore, and Mildred and Henry Dunsmore, Jr., motored to Wilmington, on Sunday, and spent the day with Mrs. William Hartmann.

Mrs. Alice Durham, of Fayetteville, N. C., and Miss Nettie Downing, of Wilmington, are the guests of their sister, Mrs. W. H. Evans.

Charles H. Jarmon is spending some time with his daughter, Mrs. William Holloway, at Newark, Md.

Mr. and Mrs. Wm. Jarmon and Miss Margery Jarmon, of Wilmington, spent Sunday with Mrs. Charles Jarmon.

Dr. and Mrs. Lee Warren, of Berlin, Md., spent Monday and Tuesday with Newark relatives.

Miss Irene Wilkinson, of Wilmington, spent the week-end with Miss Sara Steele.

Mrs. P. E. Hutchins, of Newport News, Va., is the guest of Miss Sarah Campbell.

Mrs. Adeline Fye and Miss Grace Fye, of State College, Pa., are spending several weeks with Mr. and Mrs. R. W. Heim, of Delaware Avenue. They are the mother and niece of Mrs. Heim.

Mr. and Mrs. H. D. Reynolds spent the week-end with their daughter, Mrs. Pierce Law, of Richardson Park.

Miss Lillian Aiken spent the week-end with friends in Chester.

Handy M. Long has returned after several days spent in Lewes.

MANY IMPROVEMENTS ALONG MAIN STREET

(Continued from Page One.)

There are not many, if any, towns on the Peninsula which have shown more improvements on their business streets than Newark has in the past few months.

Probably the biggest of these improvements was the department store erected by Louis Handloff. This store is one of the largest outside of Wilmington in Delaware and is up-to-date in every way. Mr. Handloff further added to the improvement of Main Street when he changed his old store into a motion picture house. Both these structures are a credit to Newark and Mr. Handloff should be congratulated on his progressive spirit.

ADVERTISEMENT FOR BIDS

Sealed proposals will be received by the State Highway Department, at its office, Dover, Delaware, until 2 o'clock P. M., July 26, 1922, and at that place and time publicly opened, for the construction of State Highway, involving the following approximate quantities:

CONTRACT 25-A
Smyrna Bridges

250 cu. yds. Excavation
2000 cu. yds. Borrow
570 cu. yds. Class A Concrete
150 cu. yds. Class B Concrete
49600 lbs. Steel Reinforcement
2300 lin. ft. Concrete Piles
3500 ft. B. M. Sheeting
120 lin. ft. Test Piles

Performance of contract shall commence within ten (10) days after execution of the contract and be completed on or before December 15, 1922.

Monthly payments will be made for 90 per cent of the construction completed each month.

Bidders must submit proposals upon forms provided by the Department.

Each proposal must be accompanied by a surety bond, certified check, or money to the amount of at least ten (10) per centum of the total amount of the proposal.

The envelope containing the proposal must be marked "Proposal for the Construction of State Highway under Contract No. 25-A."

The Contract will be awarded or rejected within twenty (20) days from the date of opening proposals.

The right is reserved to reject any or all bids.

Detailed plans may be seen and index plans and specifications may be obtained upon deposit of ten dollars ($10.00) which amount will be refunded upon return of plans and specifications in good condition at the office of

STATE HIGHWAY DEPARTMENT,
DOVER, DELAWARE.

MORGAN-MACKENZIE

On Wednesday, June 21st, Miss Julia B. Mackenzie and Ralph E. Morgan, of Chesapeake City, Md., were quietly married at the Cherry Hill M. E. Parsonage, by the Rev. Gray.

The bride wore a periwinkle traveling suit and hat to match and carried a bouquet of sweet peas. The only attendants were Miss Mabel Mackenzie, of Germantown, Pa., who wore brown satin and carried sweet peas, and John Rhodes, of Altoona, Pa.

Immediately after the ceremony the couple left for Washington, D. C.

VISITS HIS CAMP

Dr. Walter Hullihen, president of the University of Delaware, left on Monday for a visit to one of his southern camps.

Music Students Give Concert

Pupils of Miss Wilson Present Excellent Program—Much Talent Shown

The music pupils of Miss Nellie Wilson gave their annual recital at her home on East Main Street last Saturday afternoon. An excellent program was rendered by the pupils and it was thoroughly enjoyed by those present.

The program follows:

Dorothy Armstrong
In Solitude
Mildred Steel
Mandoline—Loeb-Evans
Ruth Vinsinger
Shower of Stars—Wachs
Lydia Kenning
Under the Leaves—Thomi
Eleanor Townsend
Liebestraeume, No. 2—Liszt
Evelyn Dorrall

PENINSULA HORTICULTURAL SOCIETY IN MEETING

Harrison's Nurseries have invited the Peninsula Horticultural Society and the Maryland Society to hold their meeting this summer at Harrison's orchards at Berlin, Md., on Friday, July 14, and the invitation has been accepted. The Harrisons will serve lunch as soon as the noon train arrives, and immediately afterwards the visitors will be taken to see their large commercial orchards around Berlin and vicinity. There are a number of these orchards and a visit at this time will be very interesting and instructive. At the close of the trip the train will be taken to Ocean City where the evening will be spent enjoying the ocean waves and such entertainment as will be provided.

Those who have experienced the Harrison hospitality will know that nothing will be left undone to make every one welcome and happy during every moment they are there, and those who have never been to Berlin have the surprise of their lives before them. Everybody will be welcome and everybody will be entertained in the most pleasing manner.

WALTER JOSEPHS VISITING HERE

Walter Josephs, who was a student at Delaware College for several years about 15 years ago and who has spent much of his time since then in Europe, is visiting Newark and renewing old acquaintances. Mr. Josephs, who is a brother of Mrs. Cummings of Smyrna, only returned a few days ago from France. He is the guest of Norris N. Wright.

Mr. Josephs is an artist of great promise and has been studying art since he left Delaware College. After leaving Delaware he first went to the Academy of Fine Arts, Philadelphia, as a student, and after a few years there he went abroad to continue his studies and was in France when the war broke out. He then returned to this country and entered the air service and in a short time was back in France again where he saw active service. At the close of the war Mr. Josephs returned home and resumed the study of art. He was awarded a fellowship for the study of art abroad by the Academy of Fine Arts and spent two more years in France. Mr. Josephs brought about 50 of his own canvasses home with him last week that he painted while in France which, however, he is having some difficulty with the Custom authorities to get in.

Used Rain Barrel For Banking Money

Nearby Lad Pulled the Wool Over Father's Eyes—Buys Auto With Savings

A certain young man who does not live far from Newark doesn't have much faith in banks. That he should have is the claim of his parents, for they have drilled it into him since he was a small child that the banks are the safest place in which to place money.

To help his son along this line the father of the lad started a bank account for him and every week the lad was supposed to place so much in the bank. Sort of a "rainy day" fund. The father thought that when the young man went to town that he was taking care of this item of thrift.

But the other day the lad proved that his father's thought was wrong.

According to the story the family has its horse and carriage to make the trips into Newark and to other places near their home, but the boy thought that an automobile would be much more up-to-date and put the subject up to his father. The elder man thought that it would be a worth while investment and the lad sallied forth to get his money to make the purchase. But he did have to take a bank book or make out a check and, to the surprise of his father, went to the rain barrel near the house and from under this took eight hundred dollars. The boy makes no explanation why he kept his money there instead of at the banks, but he is being "kidded" over the fact by his many friends in Newark, but he should worry, for he is "rambling right along" in his car which was bought with the money that was saved under the rain barrel.

REPUBLICAN STATE CONVENTION

Joint Committees Fix Date at Recent Meeting

When members of the women's and men's committees of the Republican State Committee met in joint session at the Hotel duPont, Wilmington, on Saturday, it was decided to hold the Republican State Convention, to nominate a Senatorial, Congressional and State ticket on August 22nd.

The date for the primary election for the delegates to the convention was set for Saturday, August 19th.

Opera House Offerings

Elliott Dexter, who was absent from the film colony in California for over a year, due to a serious illness, is back at work once more, and now so far recovered that he no longer needs even a cane for support. He has the leading role in the great William D. Taylor production of "The Witching Hour," which will be seen at this theatre, tomorrow. It is a Paramount picture.

Betty Compson's beauty reigns supreme upon the screen—her loveliness, plus a wealth of personality and charm, are more radiant than ever in her third starring production, "For Those We Love," to be shown at this theatre Friday.

A pictorial melodrama made of the stuff that life itself is composed. In deep disgrace, the father a suspected embezzler, the daughter displaying open friendship for a gambler, and his son a fugitive from the law. The story abounds in homely glimpses of small town life.

Wallace Reid comes to the Opera House Saturday in another big virile outdoor role—that of a railroad construction engineer in a mountain division. The picture is "The Love Special" an adaptation of the railroad written by Frank H. Spearman. The story, "The Daughter of a Magnate," suppoprting company headed by Agnes Ayres is a brilliant one.

STOCKHOLDERS' MEETING

Newark Trust and Safe Deposit Co. to Elect

The annual meeting of the stockholders of the Newark Trust and Safe Deposit Co. will be held at the bank on July 10th, at 11 o'clock, daylight saving time.

At this meeting an election of directors for the ensuing year will take place.

All is Vanity

Crabshaw—I think it's bad business to mortgage the house just for the sake of an auto.

Mrs. Crabshaw — Talk common sense, my dear. Nobody will know about the mortgage, while the car will speak for itself.—New York Sun.

Methodist Picnic On July 13th

Big Time at Augustine Pier on that Date—Busses to Carry Those Attending

The annual picnic of the Methodist Church will be held at Augustine Pier on Thursday, July 13th. Those attending will go by bus, the first of which will leave the church at 8.30 o'clock and the last at 9 o'clock. The returning busses will leave the pier at 6 o'clock.

Each member of the Sunday School, Home Department and Cradle Roll will receive a ticket for the outing free of charge and this ticket will also carry the mother of the child. For those having to buy tickets and to obtain transportation the following committee has been appointed: J. F. Elliott, Francis Lindell, John W. Moore, Henry F. Mote and Earl F. Dawson.

This committee is looking for an unusually large crowd to make the trip this year and request that all private car owners who are going to make the trip and have room for additional persons get in touch with them.

That there will be a big time all day long is assured by the following committee: T. F. Manns, C. A. Short, R. M. Upton, M. O. Pence and Rev. Frank Herson. This committee is to look after the games, sports and programs for the day. Already an excellent program has been arranged and there will be something doing every minute for young and old alike. The only thing needed now for a perfect day is to have Old Sol working on that day.

There is going to be eats, in the advertisement of the picnic the following is said:

"Dinner:

"Each family is to provide their own dinner and is urged to put in a little extra for any one who may not be provided for. There are numbers of tables and we can all get together, visit each other, and get acquainted. Each one providing any dinner is a committee of one to look out for the other fellow."

This is the spirit that prevails on all local Methodist picnics so it is no wonder that those who attend have a good time.

CONGRESSIONAL CANDIDATE

Formal annoucement has been made that Colonel Robert G. Houston, of Georgetown, will be a candidate for the nomination of congressman on the Republican ticket.

ATTRACTS ATTENTION

New Colored School on New London Road

Many local persons have recently made a visit to the new colored school on New London Road. The persons who have gone to look over this new building have been more than surprised with the many improvements that this new school building has been installed with.

The new school will be ready to receive pupils at the Fall term. The work is about completed at this time. ART 16

A YEAR AGO

It was a year ago this week that the new Stutz engine of the Aetna Hose, Hook and Ladder Co. was housed in the company's headquarters on Academy Street.

It seems a coincident that just about this time work should be underway on the company's new house.

DR. J. WILLARD CROSSAN

Dr. J. Willard Crossan died on Monday at his home in Centreville after several motnhs' illness. The deceased had many friends here in Newark.

The deceased was an active working member of I. O. O. F. and served for one year as Grand Master of the Grand Lodge of Delaware, and for four years as special representative to the Sovereign Grand Lodge.

New Castle Wins Over Local Team

Fishtown Nine Sure of First-Half Pennant—Steedle Features Game

Newark had a chance to keep the fight going for the championship of the first half of the New Castle County League on Saturday but failed. The New Castle team walloping the locals 6 to 2. This victory gives New Castle the pennant for the first half of the league.

The locals went to the Fishtown on Saturday, full of confidence that a victory would be theirs, and until the last innings of the game they put up a wonderful battle. The score at the start of the seventh inning was 2 to 2, and then New Castle came in and sent over a marker, breaking the tie, and in the next inning the game was put on ice when the champions sent three runners over the rubber.

Newark's fans could not complain of the article of ball their team put up on Saturday, for the team played without an error and touched Willeys, the league's leading hurler for six hits, but the New Castle pitcher kept these well scattered. Steedle batted well, landing on the ball for three safe blows, including a three-bagger, two-base wallop and a single. Joe Effing also came across with a double and a single.

Ramsey was on the mound for Newark and allowed ten hits, including three triples and a double. He fanned two. Twelve of the Newark lads took the short course to the bench by the strikeout route.

All around playing of Steedle on Saturday was the feature of the game for not only did he hit hard but he also played a wonderful game in the field having eight chances without a slip.

The scores:

LEONARD FOULS

Britton Has Best of Lightweight King in New York Bout

One of the biggest surprises of the boxing world came on Monday night when Benny Leonard fouled Jack Britton in their fight in New York.

Britton, who is the welterweight champion of the world, is 38 years old and Leonard, who is the lightweight title-holder, was the favorite to win the fight. The foul came in the thirteenth round. The majority of the rounds, according to the sport writers of the country, were in favor of the "old maan." The foul came when Leonard struck Britton when the latter was down on one knee taking a count.

It was the hope of Leonard to win the decision over Britton and thereby carry two world's title.

YAP AND WILSON ARE GOING WELL

Friends of Al Yap and "Skeets" Wilson, both members of the University of Delaware baseball team this year, will be glad to hear that these two lads are going great with the Pocomoke team of the Eastern Shore League.

Yap and Wilson are leading this club in batting and have both featured with home run drives.

SPORTITORIAL

Sport writers all over the country are wondering just how long Babe Ruth is going to get away with his umpire baiting.

At the close of last season the Home Run King was suspended by Judge Landis for taking part in exhibition games and this suspension was not lifted until after a month of play this season. The Babe had no more than returned to the game when he threw dirt in the face of an umpire and this time he was not suspended but fined and relieved of the captaincy of the Yankees. This brought a storm of protest from sport writers who were of the opinion that such action should have drawn a suspension.

Just last week the Bimbo had a clash with umpire Dineen in Cleveland and according to the umpire the idol of the Polo Grounds called him the vilest name that could be uttered. President Ban Johnson on hearing of the trouble suspended Ruth for two days, but when on the next day he learned that Ruth had started a fight with the umpire again he tacked on three extra days of suspension and fined the record clouter $1500.

William H. Rocap, of the Public Ledger, one of the best-known sport writers in the country writes as follows on the Babe's action: "Men of the Ruth type who cannot control their tempers, who cannot be good losers as well as good winners, are not a credit to the national pastime. They are a detriment to the sport. They only stimulate and encourage disorganization. Players with more mental balance quickly recognize the latitude given Ruth and the condition is sure to breed discontent. The game would be better without such rowdies as the Ruth type and it would be a good guess to make that the Yankees would keep up a winning stride without Ruth. He is simply a boxoffice attraction. He helps to sustain the commercial side of the game.

When men like Billy Rocap write in this manner you can rest assured that a thorough study has been made of the situation and that there is more truth than poetry in it.

It was also announced last week that Ruth had a yearly salary of $46,200. More than many of the biggest government officials draw down, in fact more than any except the President. Maybe the Home Run King is getting too much money to think seriously of baseball. It is a sure thing that something has spoiled him, for in past years when the Babe was a member of the Boston Red Sox and his first years with the Yankees he was not known as an umpire baiter and you seldom heard of him having any trouble with the umpires. But money and popularity often have a lot to do with the size of the hat that the man wears.

Health education was added this year to the list of studies at the Newark High School. Health education, in other words, is the studying of the advantages of athletic exercises.

This study went over big at the High School, both with the girls and boys, and all of them showed a great interest in the work. Miss Gladys Chadsey had charge of the girls and Harry McDonald was the instructor for the boys.

Every morning and afternoon some of the classes of the school had periods of this line of study and the lawn in the rear of the school was dotted at all times, when weather permitted, with boys and girls playing tennis, volley ball, hand ball, baseball, and other games.

This line of education in the years of the fathers and mothers of many of the present day students was not on the schedule of studies and many of them when it started here frowned on it as unnecessary, but the results started showing in a short time and it is doubtful if any parents would not endorse this line of education now.

TURF KING

Whiskaway, Harry Payne Whitney's sensational colt, stands today as the acknowledged king of three-year-olds on the American turf. The sturdy son of Whisk Broom II, decisively defeated his two most prominent rivals, Morvich, winner of the Kentucky Derby, and Pillory, victor in the rich Preakness and Belmont stakes—in the first running of the $50,000 special at Latonia, Ky., Saturday.

The winner was given his hardest test in the final drive by Thibodeaux, a rank outsider, who was only a half length behind at the finish.

Wirt Willis Stages Big Sport Event

Entertains Colored Sportsmen on His Estate at Glasgow—Racing a Feature

J. Wirt Willis, of Glasgow, put on a most unique and successful sporting event on Saturday when he entertained the colored sportsmen at his farm. Mr. Willis, who is the owner and breeder of many first-class race horses, has built a half-mile mill on his estate and the colored owners of racing horses were invited to bring their horses over for a workout.

Interest in the affair grew rapidly and it was decided to include in the program baseball, picnic lunch and dancing in the evening. Over 500 persons attended the outing. A good time was had by all those present.

The racing which was the feature event of the day resulted as follows:

First race:

Geltsie Ring, b. g. (Boyle)	1	1
Georgia Donna, c. m. (Dutton)	2	2
Orphan Girl, b. m. (Frisbie)	3	3

Time—2.34; 2.29.

Second race:

Mumbo Moko, b. g. (Irons)	1	1
Ella B., b. m. (Anderson)	2	2

Time—3.32; 3.02¼.

J. Wirt Willis acted as starter and William P. Rheuby as clerk of the course. The timers were John Hohmon, of Felton, Pa., and Joseph Conk, of Chester.

The committee in charge of the entire affair included: Charles Dutton, Frank Wilson, Estelle Taylor.

Frank White's orchestra of Wilmington furnished the music for the barn dance, which was held in the evening.

Maurice Elliott, of Fort Wayne, Indiana, Grace Layfield, of Porter, Mr. and Mrs. A. D. Smith and Mr. and Mrs. William P. Rheuby, of Wilmington, were week-end guests of Mr. Willis and occupied seats in the judges' stand.

LOCAL PROFESSIONAL PLAYING WELL

Alfred Ginther, the professional at the Newark Country Club, is keeping the name of the local club before the golfing world. The local pro has taken part in several tournaments in Philadelphia and has had good scores in the majority of events.

CHURCH TEAM LOSES

Locals Play Loose Game and Stanton Wins

After holding Stanton in check for seven innings, Newark decided to have a game of marbles and let the Stanton boys romp away with the game. Next week's game will be again in Newark on the Re-Hab. diamond. Saturday's score:

Newark

	R.	H.	O.	A.	E.
Crompton, ss	0	0	0	0	2
Marrs, lf-3b	1	2	0	0	1
C. Hopkins, 1b	2	3	10	0	0
Roberts, cf	0	2	0	0	1
Tarr, 2b	0	1	3	6	1
J. Hopkins, rf	1	1	0	0	0
Moore, 3b-ss	0	0	2	2	0
Rhodes, c	2	3	11	0	2
Yocum, p	1	1	1	3	0
Jackson, lf	0	0	0	0	2
Totals	7	13	27	11	9

Stanton

	R.	H.	O.	A.	E.
Boulden, ss	1	2	0	4	1
Wingate, c	0	1	18	0	0
Royston, 1b	1	0	6	0	0
McVey, 2b	2	3	3	0	1
Mitchell 3b	0	0	0	1	1
Mitchel, 3b	2	3	0	0	0
Michel, rf	1	0	0	1	0
Peiazza, cf	0	0	0	0	0
Lee, p	1	0	0	2	2
Totals	8	9	27	8	5

Score by Innings

Newark .....2 2 0 1 1 0 0 1 0—7
Stanton .....0 1 0 0 0 1 0 5 1—8

Other Games

Brack-Ex defeated Ebenezer, 6 to 4.
Cedars defeated Hockessin, 7 to 2.

COUNTRY CLUB

Big Events Scheduled; Many Visitors Expected

Saturday will be known as Opening Day at the Newark County Club and everyone is invited to attend the affair. On this day the course will be opened to all members of the Wilmington Country Club and it is expected that many persons from that club will come here and shoot the local sporty course. The local course is in the best of condition at the present time.

Albert Ginther, the local professional, is now trying to arrange for a tournament of some nature on this date and it is probable that some of the best professionals in this section may be on hand to play on this day. The course will be open to members of the Wilmington Club from July 1st to 8th inclusive.

RAYMOND-BARNES FIGHT

State Championship Match to be Staged at Kennett Square

A great number of local boxing fans will go to Kennett Square on the evening of July 4th to witness the bout there for the welterweight championship of Delaware. The contestants will be Ralph Raymond and Battling Barnes, both of Wilmington, who are well known in this section of the country due to the fact that they have taken part in many hectic battles.

There is quite a card arranged by the Kennett Square Club and the first bout will start at 8.30 o'clock.

DEMPSEY MAY FIGHT

From reports coming from New York, Jack Dempsey, heavyweight champion of the world will meet Harry Wills, the Negro fighter this winter. Although there is much opposition to this mixed bout, Wills seems the only logical opponent for Dempsey.

RED MEN'S SERVICES

Divine services were held at the Red Men's Fraternal Home on Sunday afternoon. The services were held under the auspices of the Massasoit Tribe No. 56, Imp. O. R. M., of Claymont.

SELECTED FOR CAMP

Floyd G. Hubert and R. O. Hayes to Go to Camp

Floyd G. Hubert and Robert O. Hayes have been picked by the Board of Selection, Governor's Island, New York, for the Citizens' Military Training Camps.

Both of these young men are well known in Newark and were both members of the baseball team of the Newark High School this season.

Estate of Joseph T. Laws, Deceased. Notice is hereby given that Letters of Administration upon the Estate of Joseph T. Laws, late of Pencader Hundred, deceased, were duly granted unto Charles V. B. Laws and Norman H. Laws on the Third day of June A. D. 1922 and all persons indebted to said deceased are requested to make payments to the Administrators without delay, and all persons having demands against the deceased are required to exhibit and present the same duly probated to the said Administrators on or before the Third day of June A. D. 1923, or abide by the law in this behalf.

How did your neighbor's last bargain tire turn out

PROBABLY you know at least one car-owner who is always on the look-out for the cheapest tires he can find. He likes to get them by mail or at a sale or at some place where they have big red bargain signs over the door.

It would be fine if he could get "the edge" in every tire trade.

But the dealer can't afford to let him have it.

* * *

Even if a man saw any slight percentage in tire shopping at all—it disappeared when the "Usco" brought the price down.

A standard product—and the dealer sells it with pride.

A good tire. The dealer has no desire to trade you into a larger profit for himself.

An out-in-the-open tire. The dealer sells you confidence, not price. He wants you satisfied with performance and value. The only way he knows to get your business is to deserve it.

This is the "Usco" idea.

* * *

Compared with the ten-minute thrill of the bargain appeal, the "Usco" is just plain common-sense.

No tax charged on this **30×3½ "USCO"**

SOIL FERTILITY DISCUSSED BY DEAN McCUE

(Continued from Page Four)

acid carriers basic slag, acid phosphate, and bone meal produce much better yields than bone black or ground rock phosphate.

"In the majority of the soils of this State it is all important to maintain a desirable humus content. Consequently, cover crops and green manure crops are quite commonly used. For the most part these cover crops are legumes and thus added to the total available nitrogen content of the soil. One of the aims in the use of green manure is to cut down the amount of nitrogen usually purchased in commercial fertilizers. Two phases of this problem are being studied by the Department of Agronomy.

"1. The effect of various types of lime upon the decomposition of green manures. This is a laboratory experiment and the apparatus used is, I believe, unique. The decomposition of the green manure is measured by the quantity of CO_2 gas liberated from the soil over a period necessary to establish equilibrium for all soils and conditions tested. This work is as yet incomplete, but present results show that ultimately all treatments reach the same rate of decomposition as measured by CO_2 output. Decomposition of green manures take place at a more rapid note with hydrated lime than with other forms of lime. 2. A similar experiment is being conducted, using ground limestone of different degrees of fineness; while the experiment is as yet unfinished, the indications are that ground limestone of a 100 mesh to the inch degree of finenss will give approximately the same rate of decomposition of green manure in the soil as does burned lime. Coarser degrees of fineness are correspondingly slower in their action on decomposition of green manures.

"The Departments of Chemistry and Soil Bacteriology are co-operating on these green manure and lime experiments. The Chemistry Department is determiinng changes in soil acidity as measured by hydrogen in concentrations, and the Department of Soil Bacteriology is ascertaining changes in soil organisms which may or may not be beneficial to plant production.

"The Department of Chemistry is conducting investigations on the tolerance of plants to acid conditions. This work will most likely have an important bearing upon the efficient utilization of plant food by the growing plant. Prof. Tarr will later on in the morning go into details regarding this work and I will say no more about it at this time.

"The Holticultural Department has since 1908 been conducting fertilizer experiments with peaches and apples.

"The peach work started in 1908. I will later give the results to you in more or less detail, as the greater portion of the orchard has been destroyed and the field conditions can not be observed this afternoon.

"In 1921 a new fertility experiment was begun with peaches with the object in view of ascertaining if possible the most desirable carrier of nitrogen and peach fertilization. The trees were planted in 1921 and fertilized for the first time in 1922. There are 10 plots of twenty trees in each. The entire area, with the exception of one block where cow peas are to be grown as a cover crop, will be fertilized each year with acid phosphate and muriate of potash. Nitrogen will be applied each year at the rate of 50 lbs. of actual nitrogen per acre.

"The various carriers of nitrogen used are nitrate of soda, sulphate of ammonia, dried blood, tankage, cyanamid and barn yard manure. Two plots are left for checks upon which no nitrogen is applied.

"The work with apples was started in 1908 at which time the orchard was planted. The trees are just nicely in bearing in 1921 and 22. The set of fruit was injured by late frost. This complication has made it rather difficult to interpret data in hand.

"You will be given an opportunity this afternoon to see the orchard for yourselves and many of the effects of fertilizers on tree growth can best be presented in the orchard. The treatments given are duplicates of those given in the peach orchard in the ten-year experiment just finished.

"A study of the figures given shows that the Stayman and Rome trees are too few in number under each treatment to attempt to draw definite conclusions.

"A study of the Jonathan and Yellow Transparent yields shows that these two varieties behave differently in their response to plant food. The Yellow Transparent apparently being capable of producing good crops under conditions that approach starvation for Jonathan.

"Yellow Transparent does not react favorably toward phosphoric acid while Jonathan is marked in its response to this element. (See Plots 29, 30, 22, 26, and 19. Yellow Transparent sheet, and Plots 29, 30, 22, and 19 in Jonathan sheet.) Jonathan apparently reacts unfavorably after a certain limit is reached in phosphoric acid. (See Plots 26 and 20.)

"Jonathan reacts favorably toward combinations of nitrogen and phosphoric acid, but like Yellow Transparent reacts unfavorably when too much phosphoric acid is applied.

"Potash is necessary but not likely to become the limiting factor as quickly as N. or P.

"Fertilizer combinations that keep the foliage in a vigorous healthy condition are a protection against spray injury and against frost damage.

"Fertility experiments are largely local in their interpretations, especially so with tree crop, unless there are some distinctly outstanding features, that overshadow local environmental conditions, such for example as the value of a quickly available source of nitrogen for peach production.

"Fertilizer work on fruit trees should not be interpreted too closely or one may be lead astray. Such work is of greatest value when the results can be applied to soil types similar to those upon which the experiment was conducted.

"In addition to the fertility work already discussed the Department of Plant Physiology is working upon changes in the physiology of the metabolism of the peach under different fertility conditions and the Chemical Department is endeavoring to ascertain periodical chemical chagnes in peaches during the growing season when grown under varying conditions of fertility.

"In the brief time that I have had I have endeavored to present to you a bird's eye view of our work in soil fertility and crop response. I have gone somewhat into details with those problems with which I have had most intimate contact. I leave it for others to elaborate the details of other phases of the work."

The Point of Interest

these days in clothing is comfort as well as style and appearance.

Genuine Palm Beach, $12 to $15.

Silk Finish Mohairs, $15 to $25.

Tropical Worsteds, $15 to $30.

Lightweight Serges, $20 to $50.

Neat Silk Mixtures, $25 to $50.

Every size from 34 to 52 chest; men's and young men's models.

Straw Hats, $2 to $5.
Low Shoes, $5 to $10.
Soft Shirts, $1 to $5.
Facny Sox, 25c to $1.50.

Take no chances when you can come here and get style, comfort, service, and all at low and moderate prices.

What's The Price of Good Clothes?

The public today will not buy if they believe the article offered is "high priced." Unfortunately, many stores have taken this to mean that people want only cheap merchandise.

That is not our belief. Our customers want fair prices, the lowest prices possible for quality merchandise. But they know we cannot sell good clothing at the same price as cheap clothing.

There is nothing the public buys in which quality is so important as in clothing. Nor is there anything in which cheap workmanship can be so easily concealed from the casual observer.

Good clothing is made up of three things — good fabrics, good design and good tailoring. Skimping any one of them will cheapen clothing in price, but it will cheapen it far more in quality. You can buy cheap clothing which may look well when you first put it on, it may be made of good fabric, but the real test will come after you wear it—that's when quality will begin to show up. The difference between the cost of good clothing and poor clothing is small. But the difference in value—in satisfaction to the wearer—is great.

We sell good clothing. The price represents the quality that's in it. The kind of clothing that makes satisfied customers—and that's the kind we want.

Our Society Brand Clothes are the kind that deserve special consideration from any man who thinks well of his appearance. Good style—good tailoring—and good fabrics.

The price depends on the fabric and trimming—the workmanship is the same.
