"THE LEADING DELAWARE NEWSPAPER."

The Oldest! The Largest! The Best!

It is not merely the best paper in Delaware, but the best paper printed in any city of the size of Wilmington in the United States.

It receives the full telegraphic service of

**The New York Associated Press**

over special wires running directly from Every Evening's office to the main office of the Western Union Telegraph Company at Philadelphia. Every Evening is

The only Evening Paper out of the Large Cities

having the full service of the Associated Press, and is one of but a very few papers in the whole country having leased wires operated by its own telegraph operators.

It would be a reflection on the intelligence of the people of Wilmington to suggest that they do not appreciate and support such a paper, and, as a matter of fact, all the people, with the intelligence to prefer real news, and the taste to appreciate an ably-edited, thoroughly-equipped newspaper, do take Every Evening

**As an Advertising Medium**

it is unequaled, for the simple reason that it is unequaled as a newspaper, and is therefore the paper depended on and taken at their homes by the great body of well-to-do people. It pays merchants to use the best papers for making their announcements, and no one presumes to question the superiority of Every Evening.

The remarkable substance manufactured in all its various forms by this company is made in two varieties, known as Hard and Flexible Vulcanized Fibre, and in an endless diversity of forms and shapes. Hard Vulcanized Fibre occupies an intermediate place between hard wood and the softer metals in hardness, density, and lustre. It has a specific gravity of about 1.3; it is one of the best known non-conductors of heat and electricity. This quality renders it exceedingly valuable for electrical purposes, for which it is being largely used, especially for Electric Light machines. Its admirable anti-friction qualities render it valuable for bearings, slides, gib, etc. It is also slightly elastic under all conditions, which gives it great value for many purposes where hard rubber has heretofore been used, such as packing, nut-locks, track-bolts, washers, shoe tips, etc.

Flexible Vulcanized Fibre closely resembles the best quality of sole leather in appearance, and is largely used as a substitute for it in mechanical applications. It can be made of any reasonable and of uniform thickness, which gives it a very decided advantage over leather in economy, by lessening the waste caused by uneven thickness, a serious cause of loss wherever leather is used. Flexible Vulcanized Fibre is used for many of the purposes for which leather has heretofore been exclusively applied; being unaffected by heat or oil, it is peculiarly adapted for carriage washers, car box washers, compression cock washers, packing, gaskets, and the thousands of uses in connection with the mechanic arts. Both Hard and Flexible Vulcanized Fibre are insoluble in all known solvents.

Vulcanized Fibre has also been most successfully used in the making of roving cans, cop boxes, shuttles, spools, etc., for cotton and woolen mills. Trunks, valises, etc., have also been made from it. Its applications are continually increasing, and are destined to become as general as those of any of the great staples of the world.

Wm. D. Pickels is pleased to correct mistakes, 407 King Street.
THE STANDARD
PORTABLE HEATERS.

We make these heaters of the best charcoal bloom iron, of very heavy grade. The riveting and general workmanship is so thorough that we can guarantee them gas tight.

So great is the radiating surface that the fire does not ordinarily need urging by means of a strong draft. Between the outer casings and the body of the heater are corrugated linings of wrought iron, which absorb heat that would be likely to escape by direct radiation from the sides of the Furnace, and the cold air current which enters from below takes up all the heat given out in the combustion of the fuel.

Dining Room Refrigerator

WATER COOLER COMBINATION.

Highly Finished in Walnut and Ash. Suitable for Hall or Dining Room.

Porcelain-Lined Iron Tank, for Ice Water.

Also, Upright Refrigerators and Ice Chests in great variety. Water Coolers, Ice Cream Freezers, Cooler Stands, etc.
