Dear Bonnie -

Marian + I appreciated so much your calling last Friday evening. We're pretty much house bound. I have had a bad depression now for over 3 weeks. I seem to have caught 3 bugs that are hard to get rid of. My doctor here, an old friend, is taking care of me, + I have told or told in Houston of the treatment it is + he says if I use in Houston it would be the same treatment. It is a very persistent type and seems to be current in Texas, and in Mexico for some months. There is I think only one thing to do + that is to be patient - but it is very wearing + weakening. It is too bad for all us going so well after the operation on the stomach. They tell me it often

1388

takes 5 to 6 weeks to get rid of it.

This is just 1 word before I go to the
doctor this morning, but I wanted you
to know why you have so little word
from me. I take a lot of anti-biotics
and they are almost bad as the disease.

Main love in much love to you all,

Faulty July
