

NEWPORT ELECTION IS HELD

J. W. Wetherell Again Selected Town Alderman

Newport, Jan. 21 — The annual town election took place this week. There was elected an alderman, treasurer, assessor and three commissioners. The incumbents are: Alderman, John W. Wetherell; treasurer, Arthur T. Groome; assessor, Audrey Blansfield. Commissioners are Harrison M. Day and George D. Baldwin each elected for a period of two years, and Horace Ingram for a one-year term. Judges of the election were Mrs. Anna Thompson, Thomas Draper and Robert Elliott.

Officers-elect of Delaware Grange were installed at the meeting this week, by Joseph Mitchell of Harmony Grange, who was assisted by his staff, including Mrs. Mitchell, Miss Wanda Gillmore, Miss Twila Porter and Mrs. William Naudain. Guests of honor present included Edward Megginson, worthy master of the New Castle County Pomona Grange, and Mrs. Megginson; and Leon Gillmore, past master of Harmony Grange and Mrs. Gillmore. Delaware Grange has planned to confer the first and second degrees on a class of candidates on Feb. 9, and to confer the third and fourth degrees on this class on Feb. 16.

First-Aid and Home Nursing Classes have been organized in the town of Newport, under the Civilian Defense Activities. The classes are being held in the Woman's Club Building.

The Woman's Society of Christian Service of the Newport Methodist Church will conduct its installation service on Sunday evening, Jan. 25th, with Miss Lela A. Lynam in charge.

Plans are being made by the Ladies' Auxiliary of the Minquas Fire Company to celebrate its 15th anniversary with a banquet at the Silview Inn on Feb. 10. Mrs. Edna Pordham is chairman of arrangements, and is being assisted by Mrs. Mary Steward, Mrs. Rachael Rawlinson, Mrs. Dorothy Hall and Mrs. Blanche Mahan.

The Krebs School P.-T. A. held its monthly business meeting Thursday evening in the school auditorium, with 100 parents present. Mrs. Frank R. White presided.

Dr. Martin Pennington, of Wilmington, was presented by Mrs. G. D. Baldwin, health chairman. Dr. Pennington made a plea for blood donors to meet the present emergency.

Mrs. Raymond Grubb, program chairman, introduced Judge Bayard W. Allmond of the Juvenile Court.

Nelson Cannon, recently appointed chairman of the committee to organize a cub pack of Boy Scouts to be sponsored by the Krebs P.-T. A., reported that two groups had now been organized.

The cafeteria committee reported that considerable new equipment and supplies had been purchased for the Krebs Cafeteria.

The P.-T. A. will sponsor a card party on Feb. 19 in the Krebs School auditorium. Mrs. Darrell Long is chairman for the party. The P.-T. A. will also sponsor a musical and dance program to be given under the direction of Miss Mildred Bryan, dancing teacher, who has been asked to arrange such a program for the benefit of the Red Cross. Mrs. Frank R. White, president, is chairman of arrangements.

GLASGOW WOMEN ORGANIZE

Club Elects Mrs. Palmer President At Session

Mrs. H. S. Palmer was elected president of the Glasgow Home Demonstration Club at a meeting held recently at the home of Mrs. Amanda Johnson. Mrs. Robert Reed, vice president, was in charge of the session.

Other officers elected were: Secretary, Mrs. Edward Wilson; treasurer, Mrs. Julian Laws, and council members, Mrs. J. A. Correll and Mrs. H. S. Palmer. Committee chairmen were appointed as follows: publicity, Mrs. J. L. Ford; safety, Mrs. T. D. Wright; annual reports, Mrs. Norman Slack; community work, Mrs. C. M. Lynch; recreation, Mrs. F. Thaddeus Warrington; health, Mrs. Warrington; parliamentarian, Mrs. Amanda Johnson; sunshine, Mrs. Clarence Webb; historian, Mrs. T. D. Wright; program, Mrs. J. L. Ford; defense, Mrs. J. A. Correll; Red Cross, Mrs. C. M. Lynch and Mrs. Amanda Johnson.

Mrs. Warrington and Mrs. Reed were named leaders for the February session, when "Various Ways of Serving Canned Foods" will be discussed. At the January meeting, Mrs. Kate Henley Daugherty, county home demonstration agent, spoke on "Saving Money Through More Economical Planning."

R. R. Robins of Woodward, Ia., has been collecting buttons for 30 years, and now has more than 15,000, no two of which are alike.

NEWS IN THE WORLD OF RELIGION BY W. W. REID

By W. W. Reid

Luzon, the largest of the 7,000 islands comprising the Philippine Archipelago now under attack by Japan, is predominantly Roman Catholic in religion—dating from the Spanish conquest 400 years ago. Protestant missionaries arrived there first at the close of the Spanish-American War, and the Independent Filipino Church (the Aglipayan Church) has grown rapidly since 1902 when it broke away from the established Catholic hierarchy. The Disciples of Christ, Methodists, United Brethren, Protestant Episcopal, Presbyterian and Seventh Day Adventist churches are the evangelical groups with missionaries on Luzon Island. Evangelical churches enroll a total of 500,000 members; the Independent Filipino Church about 2,000,000; the Roman Catholic about 12 millions; while there are large groups of Moslems, Buddhists, and Shintoists.

The largest Gothic Cathedral in the world, America's greatest cathedral, and ranked by competent authorities as the finest example of religious architecture built within hundreds of years—the Protestant Episcopal Cathedral of St. John the Divine—has been in the course of erection since the beginning of this century, and is still incomplete. Built on Cathedral Parkway, in upper Manhattan, New York City, it is a mecca for sightseers and worshippers from all over America. Last week Bishop William T. Manning was in its great pulpit at the opening of a new unit which revealed the full length of the Cathedral—520 feet from the great west doors to the altar. From the 7,000 pipes of the organ swelled the opening hymn "Now thank we all our God." The edifice is now about two-thirds finished; two towers, transepts, and great arch are still in the plans that may take until 1950 or later to complete.

The famous "Brook Farm", established one hundred years ago at West Roxbury, Mass., as a social and cooperative experiment by some of New England's leading literary leaders, is now the site of the almost equally noted "Martin Luther Orphan Home." The colony of the intellectuals lasted only seven years; since 1870, when it was purchased and presented to the "Association of the Evangelical Lutheran Church for Works of Mercy", Brook Farm has been father and mother to hundreds of orphans. The Rev. Carl T. Olinger is the present superintendent.

"Sixty-three per cent of the population of the United States is outside the membership of the Christian churches," says the Rev. Dr. George A. Wieland, head of the Episcopal Church's department of domestic missions. Dr. Wieland says further that thirty million American children have no religious background or instruction. "Is there possibly some relationship between these figures," he says, "and the fact that our national crime bill is fifteen billions per year—\$120 for every man, woman and child?"

"In 1820, the American Board of Commissioners for Foreign Missions (Congregational) sent from Boston fourteen missionaries to begin Christian work in Hawaii. The group included two ministers, a physician, two teachers, a printer, an agriculturalist, and their wives. Two years later these missionaries had reduced the Hawaiian language to writing, and printed the first book. In 1829 the entire Bible was printed in this "new" language. Today the Hawaii Evangelical Association, Congregational in organization, is the successor to the American Board's work; while the Protestant Episcopal Church, the Roman Catholic Church, the Methodist Church, and the Church Army (Church of England) have churches, schools, and hospitals in the islands. Practically all Hawaiians are now Christians, but there are many thousands of non-Christians from other immigrant Asiatic stocks.

This year as never before we will want to keep the losses from insects in our gardens down to a minimum. The annual loss in garden products alone due to the ravages of insects would feed a good many families and rural families will want to produce for themselves all the foods they need.

Much of the losses caused by garden insects could be avoided, entomologists say, if gardeners would learn to recognize the pests causing the trouble early and set right to work killing the first generation of them. The best way to do this is to recognize the insects that appear in the early spring, and dispatch the harmful ones immediately.

In many instances Amos points out that insects are the most serious problem confronting the farmer and the homemaker in their efforts to have a good garden.

Speaker At Seaford

A. E. Tomhave

TOMHAVE SPEAKS AT SEAFORD

Breeders And Hatchers In Regular Session

The annual banquet of the Official Breeders and Hatchers of Delaware was held at the Sussex Hotel, Seaford, recently.

In the absence of President Vernon Steen, Jr., the meeting was presided over by Vice President J. E. McIlvaine who gave a few words of greeting to members and guests and then introduced Prof. A. E. Tomhave, animal and poultry husbandryman at the U. of D.

Prof. Tomhave told of the work that is being done at the University of Delaware Experiment Station, such as, improvement of breeds and strains of birds to obtain a more desirable broiler; a study in management factors which influence hatchability; the space required for broilers; range crops; feeding of laying hens as to formulas and methods; and, a study of frequency of gathering eggs during warm weather. He also told of developments of the sub-station in Sussex County.

Election of the following officers for 1942 was held: Preston Townsend of Millsboro, president; Hugh Davis of Millsboro, vice president; and, George Bringhurst of Viola, secretary and treasurer. In addition to the above officers the following directors were elected: Louder Mitchell, of Millsboro; W. J. MacLucas, of Smyrna; Elton Hitch of Laurel; John Pitkin, of Dover; and Harold Short, of Milford.

H. R. Baker, poultry pathologist of the State Board of Agriculture, summarized the pullorum control work that had been done the past year. Mr. Baker also urged poultrymen and hatcherymen to save all of the aluminum leg bands that are taken off birds in order that the bands can be sent in to have them made into wing bands for pedigree work of breeders.

Mr. McIlvaine introduced Paul B. Zumbro, senior poultry coordinator of the National Poultry Improvement Plan, who told of the scarcity of aluminum, formaldehyde and cheesecloth and urged that the poultrymen save these materials necessary to hatcherymen. He also stated that an effort is being made to allow tires to be rationed to poultrymen.

Mr. Zumbro emphasized the tremendous importance of efficient production. He stressed testing breeders for pullorum disease, breeding for early feathering and rapid early growth of broilers.

FOOD TO BE DISCUSSED BY WOMEN

The first in a series of meetings for Newark homemakers will be held in Recitation Hall, University of Delaware, on Tuesday evening, at eight o'clock when Mrs. Kate Henley Daugherty, county home demonstration agent for the university, will give a demonstration on various ways of using canned vegetables in the diet. Mrs. Daugherty will demonstrate how to pep up canned foods by using various sauces and combinations to give flavor and greater variety. She will also discuss the wise buying of these foods.

These meetings are especially planned as a war-time service for local homemakers and are being sponsored by the Mother's Club of Newark, headed by Mrs. Gunnar A. F. Winckler. Sessions are open to the public and all homemakers are urged to attend.

"In times of war when one must count every penny, it behooves every woman to learn ways to feed her family well to insure good health and at the same time do it as economically as possible," Mrs. Daugherty pointed out.

Parents Corner

Pets For Children

Variety in pets add a charm to stock raising, on a small scale, which no child should miss. Although the size of the animal chosen to join your family life is necessarily reduced by the limited space in the modern home, nevertheless, there are many delightful small pets still available for children of today.

After we have agreed to make this small addition, we are immediately confronted with the problem of what pets to have. Birds, fish, reptiles and even insects all make delightful pets and may be chosen in place of the smaller animals. Our selection will be guided, of course, by the space available, the age and interests of the children who are to care for them.

Small children are most interested in pets which can be cuddled without harm to themselves or to the animal. A pet which will trot about happily on its own missions, wash its face, eat with gusto and play light-heartedly.

Of all the pets, none seem to come closer to these requirements than the mild guinea pig. Their very shape, compact, no tail to tempt pulling and short ears seem to be made for children to handle with ease and kindness. These amusing animals are quiet, neat and content in small quarters. Their diet consists mostly of hay, lettuce and carrots.

Other small animals suited for pets are rabbits, whose care is much like that of the guinea pig. Kittens are darling creatures, and if it is a female, when it is grown let Mother Nature teach a lesson in biology. The last we will mention, but surely not the least, is the dog. He has proved himself a faithful and intelligent companion for any child. A variety of breeds do not limit us to one size, but anything from a handful to a roomful can be chosen. Thus, we can select the dog to fit the environment.

Do not deny your child a pet. In every household there is room for one of the smaller animals, and children love them. Even the names that children chose for their pets are interesting because they show so clearly in their choice that they recognize a distinct difference in animal personalities. The care and responsibility assumed by youngsters for these creatures are invaluable in developing the finest qualities of character.

FOR VICTORY

Never Too Soon To Battle Garden Pests

The days when we have the urge to get out in the garden with a hoe and a rake may seem a long way off, but if we take the advice of John M. Amos, assistant entomologist for the Delaware Agricultural Extension Service, we will start thinking now about those garden insects that will largely be on hand later.

This year as never before we will want to keep the losses from insects in our gardens down to a minimum. The annual loss in garden products alone due to the ravages of insects would feed a good many families and rural families will want to produce for themselves all the foods they need.

Much of the losses caused by garden insects could be avoided, entomologists say, if gardeners would learn to recognize the pests causing the trouble early and set right to work killing the first generation of them. The best way to do this is to recognize the insects that appear in the early spring, and dispatch the harmful ones immediately.

In many instances Amos points out that insects are the most serious problem confronting the farmer and the homemaker in their efforts to have a good garden.

The Newark Post

The Newark Post, Newark, Delaware, Thursday, January 22, 1942

Flashes By Bill Fletcher

THE "ALL QUIET" ON THE UNIVERSITY of Delaware sports front is just a prelude to the Blue and Gold's biggest battle of the year and no matter how well the boys are prepared for the skirmish, the master strategist, Mid-Year Examinations, always inflicts a few casualties which costs some Delaware team a player or two—maybe more.

This happens to be an opponent who can't be "mousetrapped" out of position, nor does a zone defense stop him from running hog wild and running up counters in his own inimitable way.

ALL THE DOWN-field blocking technique the Hen gridders learned under Bill Murray will have to be tucked away in mothballs until a later date for this haunting specter just can't be moved out of the play, and his versatility has been proven time and time again. He can cope with a cager just as easily as a griddler and has a particular liking for swimmers to which Ed Bardo will readily attest.

With a staff of masterminds behind him, he could send Joe Louis, heavy-weight boxing king, reeling with one punch; fan Joe DiMaggio with three pitched balls, and run up a score against the Chicago Bears that would dwarf the 1940 Washington Redskins flasco.

Emery Adkins' cagers will need more than a knowledge of zone defense, quick breaks, and double pivots—he dotes on athletes who know more about their sports than they do about reading, riting, and 'rithmitic. He cuts his men down with the methodical precision of the Grim Reaper—only much more quickly and the only way to lick him is to toss off the answers just as soon as he throws the question.

ITS ALL QUIET ON THE DELAWARE sports front right now, but that's just the calm before the storm and it won't be long before you'll hear weeping and gnashing of teeth.

HENS DROP DECISION TO TERRORS

Western Maryland Hands Blue And Gold Fourth Loss

The University of Delaware basketball team absorbed its fourth defeat of the season last Saturday night when Western Maryland emerged with a 37-27 conquest.

With Hang Magowski leading the attack, the Terrors assumed a big early advantage and had little trouble gaining the verdict. The Hens trailed 26-11 at intermission, but staged a mild rally in the second half, which, however, fell short.

Magowski was the individual scoring leader with seven field goals and four fouls for 18 points. Barlow and Sadowski led the Blue Hens by tabbing eight and seven points, respectively.

The Terrors outscored the Hens 15-12 from the field and led 7-3 at the penalty mark.

Scoreboard table for Delaware vs Western Maryland basketball game, showing individual stats and totals for both teams.

Waterfowl Sure Of Arctic Nesting Place

As long as the rivers flow in the far North so long will the waterfowl have ample breeding grounds in the Arctic.

No Indian prophecy, this prediction is made by naturalists of the Fish and Wildlife Service who have explored the waterfowl habitats of the far North.

Studies on the flats of the Yukon, Porcupine, and Old Crow Rivers and the deltas of the Athabaska and Mackenzie show that the most productive waterfowl areas are associated with the rivers. The rivers, say the naturalists, not only make the waterfowl habitats but also maintain and replenish them against encroachment by natural factors.

"As long as these rivers flow there will be ample nesting and feeding grounds in the Arctic for as many ducks and geese as the United States can send back," say the investigators.

Mrs. Lydia Gydesen of Mt. Holly, N. J., recently celebrated her 101st birthday anniversary by getting a permanent wave at a beauty parlor.

JACKET CAGERS CRACK VICTORY COLUMN WITH 28-23 WIN OVER RIVALS

Middletown Is First Victim As Newark Team, Led By Lefty Riley, Stages Fourth Period Rally To Annex Initial Win Of '42 Campaign

Handed a one-sided setback in their opener last week with P. S. duPont, the Newark High School cagers dropped a 31-28 verdict to A. I. duPont on the home floor last Friday, but finally broke into the victory column Tuesday night when they came from behind in the final period to hand Middletown a 28-23 defeat.

A 20-point offensive in the initial half enabled the Kenneth Pike quintet to eke out the narrow victory, as it pulled away to a 10-3 lead in the opening period and outscored the local team 10-5 in the second quarter to hold a 20-8 advantage at half-time.

Both teams accounted for six points each in the third period, but the Yellowjackets rallied in the final session, outscoring the invaders 14-5. The spurt fell three points short, however.

Bill Smith, of duPont, was the scoring leader of the contest with 14 points, while Harry Morrow was high for Newark with 10.

A. I. duPont Jay Vees nosed out Newark's Jay Vees in the preliminary attraction, 27-26.

Lefty Riley led the Jackets to their first win of the campaign as a fourth-period rally finally enabled the locals to dent the victory column.

Off to an 8-5 lead in the opening quarter, the Newark quintet faltered in the second stanza and trailed 18-17 at the intermission. Both clubs accounted for three points in a slow third period, but the Jackets came on in the finale to outscore the invaders, 8-2, and walk off with a 28-23 decision.

In the preliminary, Newark's reserves handed Middletown a 29-12 reverse.

Scoreboard table for Newark vs Middletown basketball game, showing individual stats and totals for both teams.

BLUE HEN TANKMEN TRIUMPH

Delaware Hands Gettysburg Team 58-16 Reverse

Bouncing back from a close defeat at the hands of Swarthmore, the University of Delaware swimming team balanced its 1942 record on Friday night by handing Gettysburg College a one-sided 58-16 reverse.

Capturing all but two events, the 220-yard free style and the 100-yard sprint, the Hens completely dominated the competition and walked off with seven top spots to roll up the triumph.

Don Weldin, who copped the 60-yard freestyle event and the 200-yard breaststroke and swam in both the 300-yard medley and 400-yard relays, paced Coach Ed Bardo's charges to the victory.

Summary table for Delaware vs Gettysburg swimming meet, listing individual event winners and times.

NEWARK COURTMEN IMPROVING

Mentor Expects Quintet To Reach Top Strength Soon

Newark High School's basketball coach, William K. Gillespie, stated this week that his charges will show their ability sooner or later, but as yet no turning point has been reached despite the victory over Middletown, Tuesday night.

He emphasized that inability as individual players has resulted in a series of poor seasons. Physical handicaps have also proved a drawback to the Jackets in recent years.

Proving that they can overcome the "defeatist" attitude, they bounced back after two straight losses, however, to take Middletown into camp. Although the invaders have failed to show anything sensational on the court this year, their mentor announced following the game that his team did its best playing against Newark.

Capped by Joe Moore's brilliant ball-handling (whom experts claim is the best in state scholastic circles) and the high-class scoring ability of Charles (Lefty) Riley, the Jackets have displayed their ability to win and a more profitable future is expected.

Riley, with eight field tosses, is pacing the Jacket scoring with a grand total of 16 points for the three games thus far. Harry Morrow, who has dropped in five action shots and three fouls, is running a close second with 13 points.

While George Schaefer, who has dropped in six double deckers for 12 points, is a close third.

Other scorers are as follows: Wally Dunsmore, 11; Joe Moore, 7; Angie Caldwell, 4; Herb Slack, 3; Don Huston, 4; Andy Cothorn, 1, and Bob Davis, 1.

Paul Whiteman, a member of the fourth-place Businessmen's team, walked off with individual honors in the Wednesday Night League by marking up a 47-game average of 182, it was reported yesterday by Morris Adams, manager of the American League Alleys. Jack Barrett, Wolf Hall, accounted for a 177-pin total in 45 games, along with B. Marquess and T. Rudolph, both Elkton, to tie for second honors.

NATURE LEARNED IN SCHOOL

Barefoot Boy Had Nothing On Students

When Whittier, writing "The Barefoot Boy," described "Flight of soul and habitude of the tenants of the wood" as "Knowledge never learned of schools," he certainly failed to anticipate the country's educational developments, according to the Fish and Wildlife Service.

With the resumption of graduate courses in wildlife management at 10 land-grant colleges, the Federal Service points out that now-a-days the barefoot boys who really get interested in wildlife often end up as graduate students still studying.

"It is not only a matter of advancement in educational facilities," says Dr. W. B. Bell, chief of the Service's research division, "but also a result of great progress in knowledge of wildlife, especially in how to manage it for human benefits."

It takes long study now-a-days, according to Dr. Bell, for an individual to catch up with the wildlife facts already known. In fact, he says, one of the difficulties wildlife-management agencies have is finding qualified employees for positions that require technical training.

Designed to meet these needs, the courses at the land-grant colleges were established by the Service in cooperation with the American Wildlife Institute, the colleges, and the State conservation commissions. The States included are Oregon, Utah, Texas, Iowa, Missouri, Alabama, Ohio, Pennsylvania, Virginia, and Maine.

Last year, according to the Service, these courses gave training to 56 graduate students, and the work included the completion of 25 major projects which not only trained the students but also resulted in important reports on wildlife management.

JIM DUFFY COMPLETES STUDIES

James A. Duffy, Jr., son of Mr. Mrs. James Duffy, 22 East Street, has completed a 16-week training course at the Naval Training School, Detroit, it was announced last week by Capt. R. T. Bradford in charge.

Duffy, a football and baseball player at Newark High School, was assigned to active duty as an aviation machinist mate with the fleet at an early date. During the past year of training, he was quartermaster of the unique Detroit Naval Armory ship constructed on nautical lines and outfitted with a full size engine, destroyer complete with guns, torpedoes and operating instruments.

Mrs. Helen Wright, chairman of the Victory Book Drive at the school urged people of the community to contribute their books for the men in service.

Mrs. Ada B. Helmbreck, chairman of Red Cross activities at the school urged parents to assist in the work being undertaken here.

The Parent-Teacher Association voted to install a telephone in the school due to the present emergency, air raid warnings, etc.

Mrs. J. O. Hedlicka, ways and means chairman, reported \$19.50 from activities of the committee.

The membership committee reported the association had 82 members.

OUTLET FOR DEFENSE WORKERS IS SOUGHT

Elkton Housing Problem Acute; Canvass To Be Made By Club

Plans to canvass Newark for rooms in an effort to absorb the overflow of defense workers from Elkton, Md., were presented to members of the Newark New Century Club by Mrs. Ray Baldwin, of Elk Mills, a member of the women's division of the Cecil County Housing Committee.

Mrs. Herman Handloff was appointed chairman of a committee to head the canvass by Mrs. Alex D. Cobb, club president, and she will appoint her own crew to make the investigation.

Mrs. Baldwin urged the women of Newark to open their homes to the defense workers who cannot find places to live. "More than 2,000 more workers are coming in almost immediately," she said, "and there is no place to put them."

Construction work was started last week at Elkton on an emergency defense housing unit by contractors of the Farm Security Administration. This is the thirteenth such development. FSA is engaged upon in the 11 north-eastern states.

Three dormitories will be erected, housing approximately 150 persons, all single. Two of the dorms will be for women and one for men, all employees of the explosive plants in Elkton. Only persons certified as employed at these essential defense industries will be accommodated.

Construction work is being done by J. A. Johnson and Sons, Inc., of Brooklyn, N. Y., and is expected to be completed within eight weeks. The dorms are constructed of patented composition wallboard trimmed with wood and erected on a wooden and concrete frame. Each is complete with sanitary facilities, heating unit, and recreation room.

Farm Security officials said today that the housing will serve as protection to the community as well as providing living space for essential workers. The extra supply of housing will remove part of the demand which has forced a rise in rents and penalized persons engaged in industries which have not experienced any defense boom, and consequently have not increased wages with the same speed that housing costs have risen.

VOLUNTEERS ARE SOUGHT FOR C.A.P.

Ruling To Prevent Remuneration Has Been Amended

A final drive for enlistments is being conducted by Delaware Wing, Civil Air Patrol, according to Wing Commander Holger Hoiris.

It is hoped that all pilots in the state will sign up for duty with the patrol, Commander Hoiris asserted.

"At a time when new American heroes are appearing in the line of combat duty throughout the world," Commander Hoiris asserted, "the least that civilians can do for their nation—and themselves—is to volunteer for some form of civilian defense work."

"The C.A.P., which is under the national Office of Civilian Defense, is the organization through which fliers can contribute the most to their country," he asserted.

Meanwhile, it was announced that the Civil Aeronautics Board, which has heretofore prohibited pilots with private licenses from receiving any remuneration for aircraft operation, has amended its ruling to allow those fliers to be paid for C.A.P. duty.

At present, however, there has been no money appropriated by either the national or state government for this purpose. The status of the C.A.P. would assume under the civilian defense appropriation bill now pending in Congress is not yet clear.

Meanwhile, Commander Hoiris and his Wing Staff are proceeding with organization of squadrons and flights for the Delaware organization.

According to present plans, Flight Group One, New Castle County, will have two squadrons, one based at duPont Airport and the other at Bellevue Field, New Castle. Flight Group Two, Kent and Sussex Counties, will probably have one squadron, which will be based at Dover Airport.

Pilots are being assigned to squadrons as their applications return from Washington, D. C., and the members are being sworn into the service.

It is expected that uniforms will be issued for patrol members within the next few months. It will be required that members wear the uniforms and observe the rules of military courtesy while on duty.

Mrs. E. Townsend of Crisfield, Md., found a dollar bill in an oyster.

IN REVIEW

January 10, 1917

Aetna Elects

The Aetna Hose, Hook and Ladder Company at a meeting last Friday elected the following officers for the ensuing year: President, S. B. Herdman; vice president, Charles L. Medill; secretary, Charles W. Colmery; treasurer, A. L. Beale; fire recorder, W. C. Jester; chief, E. Clifford Wilson; assistant chief, Elmer J. Ellison; second assistant chief, Wilmer Renshaw; pipeman, I. C. Shellender; assistant pipeman, C. E. Ewing; Ralph Barrow, John Steel, Daniel Stoll, and T. R. Jacobs; directors, Joseph H. Hossinger, Ernest Frazer, H. H. Herdman, Edward Bailey, Frank M. Lutton.

Obituary

Miss Francis E. Wood, aged 71 years, died at her home on Chapel Street, Tuesday morning, January ninth, after a long illness. Funeral services will be held from the late residence on Saturday at two o'clock. Interment, Newark M. E. Cemetery.

The Misses Wood have made their home in Newark for many years. One sister survives.

Anna Mary Wilson

Anna Mary Wilson, widow of Edward R. Wilson, for many years a resident of Newark, died at her home "Oaklands," this morning after a lingering illness, following a stroke several years ago. Funeral services will be held on Saturday, January 13th. Interment in White Clay Creek Cemetery.

Three daughters, Misses Martha, Elizabeth, and Alice Wilson survive.

Miss Ella T. Naudain

Miss Ella T. Naudain, aged 74 years, died at her home, East Newark, on Monday, January 8th, after a short illness. Apparently in her usual health, Miss Naudain was packing a box for friends the day after Christmas, when she lost the power of speech. By evening all signs of the attack had disappeared, which returned, however, in a more severe form, the following day, from which time she grew steadily worse.

Funeral services will be held at the late residence on Thursday, January 11th at one o'clock. Interment, Red Clay Creek Cemetery. Two sisters, Miss Elizabeth Naudain of Newark, and Mrs. Mary Clair of Milltown, and one brother, Arnold P. Naudain, of Marshallton, survive.

Joseph Dean

Joseph Dean, aged 75 years, a lifelong resident of Newark, died on Sunday, January 7th, at the home of his son, William H. Dean, at Claymont, Delaware. Mr. Dean made his home in Newark. Last Thursday, his son, in town for a few hours, found his father suffering with a severe cold, and urged him to go home with him to recuperate. Mr. Dean became suddenly worse on Sunday, dying before the physicians, hastily summoned, arrived.

Mr. Dean was the oldest son of an English family prominent in Newark since 1845, when the grandfather of the deceased purchased the old grist mill on the banks of White Clay and converted it into a woolen mill. William Dean, father of the deceased, was admitted into the firm which was known for many years as Joseph Dean & Son. On the death of Joseph Dean, before the Civil War, John Pilling was taken into the company. Some years later the firm name was changed to the Dean Woolen Mill. This company was allotted large contracts during the Civil War.

On Christmas Day, 1886, a large portion of the woolen mill was destroyed by fire and it was never rebuilt. Joseph Dean, who died on Sunday, for many years was employed in the woolen mill. He served a term as magistrate in Newark and although never holding office, has been keenly interested in town affairs during his long residence here.

Mr. Dean is survived by three sons, William Dean at whose home he died, Archie Dean, who graduated from Delaware College as a mechanical engineer several years ago and now located in New York and Frank Dean, who is in his senior year at the Naval Academy at Annapolis. One brother, Kershaw Dean, of Philadelphia; and three sisters living at Zion City, also survive. The body was brought to Newark today for interment.

PERSONALS

Mr. and Mrs. Henry B. Blair recently celebrated their fiftieth wedding anniversary at their home near Red Clay Creek Presbyterian Church.

Dr. Bayard Murray left last week for Cuba, where he will spend the winter.

W. A. Reynolds of the class of 1912, Delaware College, who is connected with the Goodyear Rubber Co., St. Louis, visited friends in Newark this week.

Robert J. Crow, rural mail carrier, who was ill last week, is able to resume his work.

Dr. G. S. Counts of the Department of Education, addressed the Home and School Association at New Castle last Friday evening on the subject, Recent Tendencies in Education.

Miss Hattie Cannon and Miss Emma Watson of Marcus Hook, Pa., spent the week-end with the former's grandfather, Mr. F. J. Merrick.

Miss Bertha McKee and Miss Minnie Armstrong spent the last weekend with Mrs. Leo A. Rossell, Wilmington.

Mr. Stephen R. Choate has gone to visit friends in Smyrna, Del., after spending the past month with his sister Rena (Mrs. J. M. Cochran), at her home in Philadelphia. Mrs. Cochran is confined to her bed with double quinsey.

Continental

(Continued from page 1)

beth H. Grime is in charge of the medical department, and Carl S. Rankin heads the engineering division. Auxiliary police operate under the supervision of the fire chief.

In selecting the personnel for positions in the setup, the chief warden explained, only veterans from the standpoint of service have been assigned to the responsible posts. Many of them have been employed by the company for more than ten years and have been under instruction for at least three years.

Nine emergency fire units organized three years ago, are ready for action during the first shift, the busiest part of the day; four have been appointed for the second shift, and three for the third. As the number of units decrease, however, the staff of men increases so that sections of the plant which have been closed down for the night are given adequate protection.

"Emergency police, guards, and watchmen, are under the supervision of the fire chief, and are called on to keep order in all departments, both inside the buildings and out. It is also their duty to close off dangerous areas in case of a bombing, bar strangers, and supervise the evacuation of other workers."

The engineering division, manned by crews of men from the mechanical and repair departments, has complete charge of power, light, heat, water, and sewage during an emergency and will handle all necessary repairs in order to keep the plant in operation.

The Continental plant and office is divided into 12 zones, each one supervised by a warden and two assistants who handle the evacuation of other employees from points of danger to safe places in the building. These safety zones have two more exits. There are 32 exits in three directions in the building so that evacuated workers will not be crowded at one spot. All wardens are attending chemical warfare classes and they in turn will instruct their assistants.

Plans for a blackout have also been drawn up by members of the engineering department and provisions made to keep vital parts of the plant in operation through shielded lighting.

Under the supervision of Miss Grime, chief medical warden, the Continental's first aid unit is one of the most modern in the state and all necessary equipment is available for use in an emergency.

Three men, Norman Tuttle, James Hicks, Jr., and Walter Wassmer, have completed the instructor's course in first aid; 41 are enrolled in the standard course, and ten are taking the advanced course. A large group has already met the standard first aid qualifications.

Praising the spirit of cooperation shown by the workers, Miss Grime pointed out that Continental employees are assisting in all forms of defense work. A group of 30 women work at the Newark New Century Club twice a week on surgical dressings; others are doing home knitting and sewing, while many of the men are attending chemical warfare classes, or are engaged in auxiliary police work or plane spotting.

The Continental's hospital unit is always in charge of a competent person experienced in first aid work. Miss Grime is in charge of the first shift; Arthur Bedell the second, and Walter Miller the third.

Equipped to supply its own electricity if the town's power lines are destroyed, Continental officials have realized the importance of the plant to Newark and have taken necessary steps to reduce to a minimum the damage that might be caused by an air raid.

Of the 900 employees, 250 are under special instructions and the splendid cooperation is consolidating the plant into a compact unit capable of not only turning out defense materials, but protecting itself in times of peril as well.

Draft

(Continued from page 1)

day of February, 1942, between the hours of 7 a. m. and 9 p. m.

2. Every male citizen of the United States and every other male person, except those exempted by the President's proclamation, is hereby required to present himself for and submit to registration before a duly designated registration official or selective service local board in the area in which he has his permanent home, or in which he is in his senior year at the Naval Academy at Annapolis, or in which he may happen to be on that day, if such male citizen or other male persons on Dec. 31, 1941, has attained the twentieth anniversary of the day of his birth, and on Feb. 16, 1942, has not attained the forty-fifth anniversary of the day of his birth, and has not heretofore been registered under the Selective Training and Service Act of 1940, and the regulation thereunder.

3. I call upon the people of the State of Delaware and officers and agents of the state, and any of its political subdivisions, to give all necessary aid and assistance to the selective service local boards of the state in conducting a successful registration.

4. I shall deem it a discharge of a patriotic obligation if all newspapers, radio stations, and other disseminators of public information give full and complete publicity to the facts of registration on Feb. 16, 1942, in order that all eligible males will place their names on the selective service lists.

5. In order that there may be complete cooperation, I urge all employers and governmental agencies of all kinds to give those under their charge sufficient time in which to fulfill the obligations of registration.

By the Governor: Walter W. Bacon. Secretary of State: Earle D. Willey.
