

DELAWARE COLLEGE REVIEW

VOLUME 36

NEWARK, DELAWARE, OCTOBER 1, 1919

NUMBER 1

Athletic Outlook for Coming Year

Stiff Schedules and Bright Prospects Characterize All Sports

With the largest Freshman Class in the history of the College to choose from, and with many varsity men back from service both overseas and on this side, Delaware faces what will undoubtedly be its greatest athletic year. Heavy schedules are being arranged in every sport, and from all indications, Delaware is about to climb out of the class of small colleges, and take her place among the larger colleges and universities of the country. The football schedule includes games with Penn, Swarthmore, Georgetown, Haverford, and Dickinson. The basketball schedule is being arranged to include all the best teams in the East. Coach Shipley and Manager Gordy are after games with Penn, Yale, Princeton, Harvard, Navy, Georgetown, and

(Continued on Page 4)

Initial Smoker A Great Success

The first smoker of the year was held in Old College on Monday evening. The "pepper pot" virtually overflowed throughout the fiesta, and due to the efforts of the orchestra and Dr. Miller, the good old Delaware spirit was kept at high tension the whole time. "Bess" Carter presided with his usual snap, and most of the time was spent in the practice of old-time songs as well as the new Victory song.

Coach Shipley was greeted with a great outburst of cheering. He addressed the men in a plain-spoken manner and stated his policy, at the same time expressing his gratitude for the excellent response to his call for candidates. He warned against the lagging of interest after the opening game. "Now you are all back of me, and so I can't say anything," said he. "But let me see some of you drop out after the first few games, and then you'll here from me for certain. It won't be long before I'll be on your neck."

In order that competent cheerleaders might be selected a call was made for candidates to lead cheers. Six or seven men responded. Official selection will be made at the smoker on Friday.

The "session" was completed with a hearty singing of the Alma Mater. "Smokes" had been provided by the Athletic Council, but the customary hat-holders stood at the exits. It is hoped that the harvest more than balanced the smoke cost. There will be another big gathering on Friday evening before the F. and M. game. Cram your old "jimmy-pipe" jam-full of "smoke-joy" (to speak Prince Albertically) and be there with the boys, for it's that kind of a pow-wow that wins the games.

MORE PRODUCTION TO REDUCE H. C. L.

Professor Hoyt Gives Views In Interesting Chapel Talk

In chapel yesterday, Dr. Homer Hoyt discussed the "High Cost of Living." Dr. Hoyt's address contained a statement of facts concerning the High Cost of Living, with its resulting consequences; and a resume of suggested remedies together with the real remedy. Increased production was clearly demonstrated to be the only permanent relief from this perplexing question.

Dr. Hoyt showed that the 1919 dollar had so declined in purchasing value as to be equal only to a 1915 half dollar. This shrinking of the purchasing value of money has compelled New England widows and orphans, who were dependent upon the fixed income from bonds, to apply for charity. The police strike in Boston, and other forms of social unrest were also shown to be directly due to the rising cost of the necessities of life.

Of the suggested remedies for the high cost of living, Dr. Hoyt thinks that the outcry against profiteers is largely a popular delusion, and that price fixing and the seizing of hoarded goods are only temporary expedients. Professor Irving Fisher's proposal for preventing price fluctuations, by varying the amount of gold in the dollar from month to month, Dr. Hoyt feels, will ultimately be adopted altho it does not completely solve the present problem.

More production, Dr. Hoyt believes, will solve the problem in its entirety. It is not a question of getting a paper increase in wages or in making a paper reduction in prices, the real problem is to enable the average man or woman to get a larger income in terms of bread, butter and automobiles! In this country, there is a fixed capital invested in building, machinery, and railroads of about 50 billion dollars, and it is necessary to pay the interest on this capital even if the factory doors are closed, the machinery idle, or the freight cars empty! High prices stimulate production and if production is increased, the markets are flooded with goods and prices decline.

Freshies Victors In

Tug-Of-War

Much to the surprise of the entire student body, the freshmen came across in fine style and pulled the sophomore huskies off their feet in the tug-of-war on Wednesday. Up to the time the starter's gun went off, everything seemed to point to a Sophomore victory, but the lanky "down-staters" lost all respect for their elders as soon as the fray commenced. It was anybody's fight for a couple of minutes, but then the Sophomore cohorts slowly began to lose ground till the seesaw became a land-slide of desperate Sophs, which was stopped only by the timer's gun. The triumphant Freshies then attempted to give a yell, and bloodshed was narrowly avoided by the timely intervention of "Bess" Carter. Although the rush was given little publicity, there was quite a crowd of spectators out to witness the carnage, including a liberal sprinkling from the W. C. D., which gave plenty of local color to the scene.

1919 Blue Hen Soon To Appear

The 1919 Blue Hen of the Class of 1920 will make its appearance in October. The publication is long overdue, but no fault can be found with the work of the Blue Hen Board. The work was accomplished under many handicaps. With a short session in which to work, with scholastic work in need of immediate attention, with no opportunity to launch an advertising campaign on a large basis, the Blue Hen Board has progressed slowly but surely. Due mainly to the efforts a few men who gave their whole summer to the work, the book will soon appear. The patient wait of the subscribers will be rewarded. The book is perhaps the best Blue Hen ever published, and it should act as a milestone to mark the beginning of still better Blue Hens.

Those upperclassmen who have not already subscribed to the Annual are urged to reserve a copy at once as the supply is quite limited. The Freshmen, too, should subscribe for a copy of the "Hen." By carefully reading its pages they will be enabled to gain a knowledge of the college such as they can get in no other way.

Subscriptions to the book should be given to "Bess" Carter, the editor, to Carswell, Anderson, Blair or Loose within the next week to insure the subscriber's receiving his copy promptly.

New Chapel System Center of Interest

Semi-Weekly Meetings Meet With Favor Among Students

The new system of semi-weekly chapel exercises promises to be the center of student interest. The committee in charge, consisting of Dr. J. R. Moore, Dr. C. F. Miller, and F. Bayard Carter, has arranged for a number of lectures on Literature, Art, Business, and the Professions. These lectures will be given by men of prominence in their special fields.

The orchestra, reorganized under the direction of Dr. C. F. Miller, is one feature of interest in the meetings. A large number of students have already displayed an interest in this organization and in the near future it should become one of the prominent features of the college. It has already proved its worth in the chapel.

New song books, containing hymns and songs appropriate for college exercises, have been ordered by the Student Council. It is planned to have a number of new Delaware songs. One such song has already been presented and has met with immense favor. The committee hopes that several more good songs may be written by members of the student body and adopted for use.

The committee has arranged programs for the next three meetings that are of special interest. The second of these is to be a type meeting. It will be conducted en-

(Continued on Page 4)

MILITARY PLANNED TO SUIT CONDITIONS

Real Military Instruction This Year; Many Excused From Drill

The present collegiate year opened with the military side at Delaware College entirely different from anything previously experienced at the college. The country has just emerged from war and there are very few men in college who have not served in some branch of the military forces. In consequence the men are tired of "Drill," for there is apparently no reason for it. The country is not besieged nor does it seem probable that we will be forced to mobilize again for years.

A second thing to be considered is the number of men who have held commissions in the army, and those who have served long periods overseas, or in this country. The officers should know far more about military tactics by virtue of their ability to hold commissions than the student officers who would command them. But it would not be doing justice to the officers of the battalion, who have risen to their positions more or less on their merits, to give these other men their places.

Major Coulter, the Commandant of the College, has carefully studied the existing conditions and he has fitted the military to suit them. To remedy the unrest and the feeling against "Drill," Major Coulter has changed the course from "Drill" to "Military Instruction"—not only in name, but in fact. The student at this college is to spend only enough time on the drill field to enable him to be thoroughly instructed in those rudiments of the military game which are absolutely essential and which cannot be taught in the classroom, or gathered from lectures. The Battalion will assemble twice a week for this instruction. The remaining time assigned to the Military Department will be spent in attending lectures and recitations on assigned military subjects. The Commandant has met the second condition by excusing from drill all men who held commissions, and all others whose service war rented.

With the amount of practical military knowledge already possessed by the men composing the battalion, this year should indeed be a banner year.

Delaware Men To Take Part in Harlan Meet

Many of the college track men will go to Wilmington this Saturday to take part in a meet held by the Service Dept. at the Harlan plant, Bethlehem Shipbuilding Company. The meet will begin with a marathon race from the B. & O. Station to the Harlan athletic field on the south side of the city. This meet will serve as a tryout for the cross country squad at Delaware, and should prove of especial interest on account.

College Enrollment Larger Than Ever

287 Men in College; Largest Freshman Class Yet Entered

It is interesting to note that two hundred and eighty-nine men are enrolled in the college this year. This is a decided increase over the enrollment of former years, due partly to the return of men from the service, and partly to the large freshman class. In fact this is the largest Freshman class that ever entered Delaware College. According to the present figures this class numbers one hundred and twenty-six men, of whom seventy-eight, or about sixty-two percent, are enrolled in the Engineering Department. The Arts and Science Department comes next with

(Continued on Page 3)

Pledges Announced By Fraternities

The following pledges have been announced by the respective fraternities.

Sigma Nu—
F. Harmer, N. S. Lilly, T. Collins, E. Murphy, Humes Grier, F. B. Harvey, E. Jones, W. M. Gilbert, H. F. Crawford, C. Underwood,

Sigma Phi Epsilon—
T. Armstrong, J. Rowan, P. Wintrup, W. Gray, F. Strickler, R. Murray, H. M. Lund, J. B. France, J. F. Challenger, T. M. Cloward, M. J. Baxter.

Kappa Alpha—
H. C. Draper, E. R. Barnard, W. S. Jackson, H. R. Cole, W. D. Boyce, J. S. Tatnall, H. F. Haines, G. D. Lebo, W. K. Meyers, J. G. Elliott, C. W. Howard.

Omega Alpha—
H. C. Repp, H. Ivory, S. Lwoes, F. R. Deppe, E. Brandt, E. Pitman, L. Owens, I. Mather, H. Carter, R. Betty, C. N. Wade, H. Dorsey, W. Swezey.

Help make the Review truly representative. Write your letter today.

Do your bit to get that 100 per cent subscription list!

Working early is better than working hard.

Another Scholarship Given For Next Year

Mr. Clarence Hodson, President of the Delaware Society of New York has given another Scholarship for the year 1920-21 to Delaware College for a Freshman from this State. The Scholarship is worth \$250, of which amount \$200 will be paid to the successful candidate in his Freshman year and \$50 at the beginning of his Sophomore year. Mr. Hodson desires that this be known as the President's Scholarship.

The Faculty have under consideration several worthy men who are candidates for this Scholarship for the present session, and it may be expected that award will be made within a few days.

WEDNESDAY, OCTOBER 1, 1919

PLANS AND PROSPECTS

With this issue, the Review assumes new dress. For the new heading, replacing our former title of printers' type, we are indebted to the old and second, it beneficial in two ways at least. First, it is a more attractive head-form to be more attractive. It gives more character and individuality to the paper. A second change in form is seen above in the use of the double column name in place of the single column formerly used. This change is made because we believe the press to Alex Blair, Jr. The change is has the advantage, too, of print for any especially important editorial discussion.

This year we plan to make a determined effort to better the standards of the paper. With the present enrollment larger than ever before, the prospects for success in this effort are very bright. The size of the college is such now that a larger Review,—a regular six page paper, should soon be the established order. This is our present aim, and, once this is accomplished, the time will have come to consider a semi-weekly publication,—an ambition which should find realization within another two years at most.

Above all, the Review aims to be truly representative of the student body. Communications and contributions of all kinds are earnestly desired. All letters must be signed by the writer, not for publication but as evidence of good faith. In recognition of news contributions we shall publish a list of special contributors to each issue.

The prospects for the Review for the coming year, then, seem most bright. Cooperation to the fullest possible extent is asked of every student. Help your paper by subscribing, help your paper by contributing, help your paper by securing more advertisements and the Review will automatically become the best among college papers.

COMPETITION NEEDED

One thing which still seems to be lacking around college is a spirit of competition for the positions on the Review Board. Instead of starting in his Freshman year and bending all his energies toward gaining a position on the Board, as he must do to gain recognition in sports, a man holds back and pays no attention to the repeated invitations to write up an

article for the Review. Therefore when the time comes to choose the new staff, it generally happens that the editor must hunt up his men and ask them to serve, rather than choose them from a number of applicants who have worked hard in order to be considered. It seems as though most of the undergrads take the Review for granted and do not realize the work and responsibility which lies behind it.

The Review can never be the power and strength that it should in the student body unless the entire college is behind it and working for it. Every man who has a grievance or a suggestion for the improvement of present conditions should use the Review as a medium for expressing these views. By doing this he reaches not only the student body, but the Faculty and Alumni as well.

There is news enough to be found around college to warrant putting out a much larger and better paper than we now have if only the students would realize that it is their paper and not merely one published by a small number of fellows making up the staff. Think it over, fellows, and turn in the results of your thoughts.

Succor! Save Epicurus!

That wise old philosopher, whose teachings all men love, has a foot in the mire at Delaware. Who is there to throw him a rope? And what form of endeavor should the rope exemplify?

After a week and a half of successful caravansary at the Commons it can be said that every student likes the service. And there are no loop-holes. Who can gainsay Miss Stuart's capable management? We remember a major we once had, who, upon inspection day said to the mess sergeant "whatever you do, don't starve 'em; just bean 'em to death." The next day we had kidney beans for breakfast, white beans for dinner and lima beans for supper. Could not Miss Stuart apply the same principles of economic saving? Certainly she could. But she doesn't. Indeed, her motto might seem to be, "Sugar 'em to death." At any rate our appetites for Coverdale's disjointed service, Ewing's tolerable grub and Wilmington's Homeric restaurants, have died. And that is a happy death.

The Commons then is a success; from all viewpoints but one. I speak now for the waiters at the

Commons. They are the feet of Epicurus; else how could his jollity be shuffled in from the kitchen? Yes the waiters are his feet; and one foot is in the mire at Delaware.

I am a waiter and I make these statements for all the waiters. The waiters do not receive sufficient compensation for their services. That they render a stalwart service, cannot be doubted; any novice who tries to wait on a table for the first time can vouch for that. That they do not receive sufficient compensation was made clear at a meeting of all the "Self-aid" students, held on Thursday evening September 25. A set of figures was presented which showed that each waiter recovers by his work \$2.90 of the \$6.25 that he is obliged to pay for board; that each waiter is paid at the rate of \$1.9 an hour; and that each waiter pays for service that he doesn't get. The waiters believe that they are entitled to their board for their services; and they know that at \$3.0 an hour, (the rate paid by the Student Self-aid Committee for other student work), instead of at \$1.9, their work would wholly cover their expense for board.

A committee composed of Leon Gordy, Phillip Marvel and Leonard Daley consulted Mr. C. B. Evans, Secretary of the Board of Trustees, about the matter, and he promised his support.

But meanwhile Epicurus holds entangling relations with the mire—and who of his followers will save the beloved sage?

Some Changes Made in College Faculty

Eleven New Men Join Ranks This Year

Eleven new men have joined the ranks of the Faculty. Some of these men will do new work made necessary by the growth of the college, others will take the places of Professors who have resigned.

Professor Roy Kegerreis takes the place of Professor Koerber as Professor of Electrical Engineering. He comes well prepared to take the work so ably cared for by Professor Koerber. He was graduated from the Ohio State University in 1911, and in 1916, Harvard University awarded him the M. A. degree for work in Mathematics and Physics. Research work requiring almost two years was done at Columbia University. After three years of practical work, Professor Kegerreis went to the University of Pennsylvania as instructor in the Department of Electrical Engineering.

Homer Hoyt, Professor of Economics and Business Administration, did his undergraduate work at the University of Kansas. He pursued graduate study at the University of Chicago, where he received the degree of Doctor of Jurisprudence. He was then called to Beloit College, Wisconsin. At the outbreak of the war, he was summoned to Washington for work with the War Trade Board, where he had to do with the lumber interests of the United States. Dr. Hoyt has contributed numerous articles to the Economic magazines

and textbooks. He is a member of the Phi Kappa and Delta Sigma Rho fraternities.

Dr. F. C. Miller, Professor of Chemistry, was graduated from Wesleyan University, Connecticut. He spent four years in the Chemical department of Cornell University, receiving the Ph.D. degree. He was then called to the Agricultural and Mechanical college of North Carolina, as Associate Professor of Chemistry. He comes directly from this institution to Delaware College. Sigma Xi elected him to its membership.

Major C. Coulter, Professor of Military Science and Tactics, is a graduate of West Point. He has recently returned from a military tour of inspection in France, and is now actively engaged in improving the work of the Military Department.

J. J. Thone has come to the college as instructor in Engineering. He is a graduate of the Rennsaeler Polytechnic Institute, and has had two years practical experience in Engineering work.

R. J. Friant, Asst. Prof. of Agronomy, is a graduate of the Pennsylvania State College. He taught at the Oregon State University, at Cordallis, and comes from the west highly recommended.

Dr. Partridge, Research Horticulturist, received all of his degrees from University of Illinois. He came primarily to work on the nutrition of fruit trees and will prepare accumulated data for publication. Probably, Dr. Partridge will also do a small amount of teaching. During the war, he served in the A. E. F. with the rank of

Captain and took part in a number of great battles.

Thomas A. Baker succeeds Dr. F. A. Hays as Asst. Prof. of Animal Husbandry. Prof. Baker is a graduate of Cornell University and served on the instructing staff at this University for two years. Shortly after we entered the war, he joined the Marines and served overseas with credit.

J. A. Skoogland is now Asst. Chemist in the Experiment Station. Mr. Skoogland was graduated from the Pennsylvania State College and comes to Delaware College highly recommended for research work.

Mr. R. W. Heim, the director of vocational education under the provisions of the Smith-Hughes Act, is also a recent addition to the educational forces of Delaware College. Mr. Heim, specialized in vocational education at the Pennsylvania State College and for some time has been inspector of Smith-Hughes work in the eastern part of the United States. He was brought to this state by the State Board of Education, to whom he is directly responsible.

Dr. A. G. McGougan has resigned Professor of Physics to accept a similar position at Saskatchewan University, Canada. His removal is a distinct loss to the college. Prof. Walters, of the University of Missouri, but now engaged in work at the Bureau of Standards, will take Dr. McGougan's place, temporarily at least.

Dean Smith is at present engaged in seeking an additional instructor for the Modern Language department.

REVIEW RUST

Remarkable Remark; Dr. Foster: "This class will meet at 9 o'clock on Tuesday morning, and at 1 o'clock on Thursday."

Dr. Foster: "What is the unit of English Verse?"
Jacobs: "The Meter."

Although Freshman Carter was unable to locate the necessary scrimmage line in Newark, a sufficient quantity of rope was obtained for the tug-of-war.

It is said that Coach Shipley is expected to send Carter to New York for more scrimmage lines sometime this week.

The first meeting of the waiter's guild was held last night at ump-teen o'clock. Having developed a proficiency above all others during his summer dinners at the McGougan home, Doctor J. R. Moore was elected faculty adviser to the guild. The election was 19 to 1 in his favor over his opponent, Black Susie of the Commons.

'22—"Have you been working for a photographer during the summer?"

'21—"No, Why?"

'22—"Well you're so stout I thought you must have been developing a great deal."

Cole—When does Bus 3 come?
Graves—Don't know. Better call Stiltz for that.

Damn that decimal point!

COLLEGE ENROLLMENT LARGER THAN EVER

(Continued from Page 1)
thirty-six students, while the Agricultural Department is last in favor with an enrollment of twelve men in the new class.

The figures for this year are indicative of several things. For one thing they show that a large number of former students who have been in the military service have returned to complete their education. But more important than this, they show that Delaware College is becoming more and more widely recognized, and that a constantly increasing number of high school graduates are selecting this college for their training for life work. Both facts are extremely gratifying, and both speak well for the present standards of the college.

The enrollment for the courses and classes is as follows:

Engineering	
Seniors	24
Juniors	31
Sophomores	37
Freshmen	78
Total 170	
Arts and Science	
Seniors	10
Juniors	17
Sophomores	14
Freshmen	36
Total 77	
Agriculture	
Seniors	8
Juniors	12
Sophomores	8
Freshmen	12
Total 40	
Special Students	2

Student Societies Briefly Explained

Review Presents Information About the Student Organizations

For the benefit of the men just entering college, the Review presents the following information about student organizations:

The Engineering Society aims to help each individual engineering student by bringing him into close contact with the engineering faculty and with successful practicing engineers. Meetings will be held every other Thursday, at which addresses will be given on many phases of current engineering work. In view of the fact that one hundred and seventy men, fifty-nine percent of the whole college are engineers, it would seem that this Society should serve a very useful purpose this year.

The Chess Club defeated Haverford 3-1 last year although it had only been organized a short time before the match was played. Dr. Foster is foster-parent of the organization and with his aid the members plan to invade college chess circles, thus representing Delaware in another branch of Inter-Collegiate activities. Much interest is shown by all the students interested in chess during the Inter-Class tournaments held during the year.

The Orchestra, under the direction of Dr. C. F. Miller, expects to furnish musical entertainment for all student meetings, particularly the chapel exercises. The orchestra also hopes to make several trips, one down State and others into neighboring States. Everyone who can play an instrument is urged to join this organization.

The Mandolin Club is especially anxious to have all men who play string instruments turn out in full force. Under Professor Cumming's direction this club is expected to furnish even better entertainment at chapel exercises than it did last year.

The Glee Club is an organization open to all those men in the student body who have talent in this work. Although the club was not so active last year as it was the previous year, there are hopes that it will be put firmly on its feet this year.

The Footlights Club is one of the foremost, if not the first, in rank of the organizations in college at the present time. It is open to all those interested in the dramatic art. The purpose is to cultivate such talent as may be found in the student body, with the end in view of helping both the men and the college. It is one of Dr. Moore's prodigies. Last year two plays were successfully presented. Membership fees are \$1.00 per year.

The Varsity Club is one whose significance is not generally realized by the the student body. Every man you see on the campus wearing a blue D mounted on a circular lapel button of gold, is a varsity man. He has made his "letter" in some branch of sport here at Delaware. The members of the Varsity Club can do a great deal for the college by inducing athletes to come here and also by inducing Alumni or friends of the college to give scholarships which could

be used to help deserving athletes. It has already been active in this field.

The "Ag" Club represents the agricultural students. It will soon be organized in preparation for the work of the year. Its goal is, in part, the same as that of the Engineering Society, i. e. to bring the student into closer touch with the men who are teaching him and also to familiarize him with the work he plans to follow after leaving college.

EDWARD S. CANNON GOES TO HARVARD

Delaware College Alumnus Receives University

Edward S. Cannon, graduate in Arts and Science in the class of 1919, well-known in Wilmington as a newspaper man, and popular at the college as "Eddie," founder and president of the League of Nations Club, has received the scholarship offered by the Harvard Club of Delaware, and has already registered in the graduate school of Harvard University for courses in Economics, Political Science and History, looking towards the degree of Doctor of Philosophy. The scholarship carries \$300, a sum intended by the donors to cover tuition and incidental expenses.

Cannon made a name for himself at the college by his versatility and push. Earning his way by active connections with Wilmington dailies, he found time not only to take so many courses that he graduated with a large surplus of credits, but also to engage in many student activities already established, and to take the initiative in establishing others. He was Business Manager of both the Blue Hen of 1919, and the Delaware College Review. He founded the League of Nations Club last spring, which enrolled a large proportion of the students, made the college an active factor in the national liberal movement, and attracted to Newark several well-known speakers. He was one of the charter members of the Derelict Club. Perhaps his most notable achievement was in pushing the movement for a quickening of intellectual ambition among the students, which gained considerable headway under Eddie's energetic and tireless leadership.

Cannon expects to spend at least one year at Harvard, and is working for the degree of Doctor of Philosophy, which he hopes to combine with a degree in law.

Engineering Society Meeting

The initial meeting of the Engineering Society was held last Friday in the west wing of Old College. Charles Carswell, president of the Society, outlined briefly the aims and purposes of the Society. The meeting was primarily one of organization and a committee consisting of Carswell, Yacoby, Mulrooney, Anderson, and Colpitts was appointed to revise the Society's constitution and present it at the next meeting, to be held on Thursday, October 9. Dean, A. R. Cullimore spoke of the immense benefits to be derived by the engineering students from the Society. Prof. Miller emphasized the value of social gatherings in the building up of the Society. The interest manifested at this initial meeting such as to insure the success of the Society this year. An excellent program is being prepared for the next meeting on October 9.

THE LIGHTHOUSE

Well boys, we open the football season Saturday when we play Franklin and Marshall on Frazer Field. Thus far we have had no dope poked at us. Coach Shipley, Captain "Bill" Stewart, and the rest of the team have had very little to say. Even "Big Bess" Carter who has to talk on everything from Student Council to Blue Hen has kept mum on the football outlook. "Big Mark" and Harry Loose have played the Sphinx thus far. Of course "Mike" and "Sank" have kept quiet, they always do. George, "Foulkie," "Johnnie," Gray, "Laddie," "Gravvy" and all the rest have been working along steadily on the football field. The editor gave me the job of getting the advanced dope on the game.

At present I can only see a big "Win." With such veterans as "Bill" Stewart, "Bess" Carter, "Mike" Plam, Harry Loose, "Dick" Holton, "Sank" McCaughan, George Tonkin, Bob Foulk, and Reed Graves from the 1917 varsity, and with Gray Carter, Johnnie de Luca, Wilson Lattomus, from the 1918 season we should have a winning combination. Then of course we have the Coach with his ever ready bag of tricks and his wonderful "pep" and push. He is putting the fight into the team while drilling them in the rudiments. At this early date his work is already visible on Winthrop, the former Wilmington High School fullback, who comes to Delaware with a long period of overseas service behind him. His work has already attracted attention. Murray, a big rangy tackle is showing up well and will no doubt see service with the varsity. "Dick" Barnard of basketball fame is also developing into a fine lineman. Harry Jones is a valuable asset and should help Coach a lot this season. In the back field Ivory and Howard Alexander are showing up to good advantage.

The team could use a lot more men both in practice and in games. But we will pin our faith in those "vets" who have played season after season to carry our colors through a good year. Watch the F. and M. game and see our team go to Penn and battle for us. And we may all give them a start by rooting for them when they beat F. and M. this Saturday.

P. S. Don't forget the mass meeting Friday evening at Wolf Hall at 7:00 P. M.

Yours Truly,
The Look Out

tirely by the students and it will be devoted to a discussion of student affairs. It is planned to have meetings of this type frequently, probably once each month. The programs for the meeting tomorrow and for those next week follow:

- Thursday, October 2,
Dr. F. M. K. Foster,
"The Business Of Being A College Man"
Tuesday, October 7,
Student Meeting.
Thursday, October 9,
Dean Allan R. Cullimore,
"The Value Of A General Education For Engineers."

ATHLETIC OUTLOOK
FOR COMING YEAR

(Continued from Page 1)

many other big teams. The same ambitious program is being observed in regards to baseball and track.

The football prospects are especially bright. Captain "Bill" Stewart has returned from France (and is in togs once more. Stewart's wonderful playing two year ago attracted much attention among the football critics of the East and it is predicted that he will be even better this year. "Mike" Plam, varsity half-back, also just returned from overseas, is back in his old berth. Plam is exceptionally fast and is valuable because of both his defensive and offensive work. Marconetti, also of the 1917 team is holding down his old job at right guard. "Mac" played on his division team in France and is in fine trim for the heavy season ahead of him. "Bess" Carter, last year's all-Maryland tackle, will be playing this year. Carter made a name for himself with Maryland State last year and it is expected that he will do the same this year with Delaware. Besides the men already mentioned, there are the "D" men from the 1917 team. MacCaughan, Foulk, Holton, Tonkin, Loose, Graves, "Little" Carter, Lattomus, and many others are back on the job fighting it out for varsity berths. Promising material has entered in the Freshman Class. Winterys, a half-back and Murray, a tackle, are working hard and they are sure to make someone hustle. Taken all in all, the football prospects brighter than they have ever been at Delaware College. Manager Lattomus has arranged a stiff schedule and the football fans expect a treat when their college starts against F. & M. this Saturday.

The prospects for a successful basketball team are no less bright than are those for a good eleven. Five "D" men from last year's team will be back in uniform, ready to work through a season which will exceed, for stiffness the coming football season. "Big" Carter, "Little" Carter, Sank McCaughan, "Big Aleck," and "Dick" Barnard will be on the floor when the referee's whistle opens the year. Coach Shipley has correspondence out with the leading universities of the country and it is hoped that contracts will be signed with some of them in the near future.

Baseball and track, though some months distant, demand a word or two. Baseball will undoubtedly have a big year. Material has come in in the Freshman Class to make varsity men look to their laurels, and this material, together with the old men who are back, will make a wonderful team next spring. A Southern trip has been planned and two games with V. P. I. already scheduled, practically assure that it will come about.

Track and tennis with the acquisition of new men, have been strengthened considerably and good seasons are predicted.

ALUMNI NEWS

Rev. Charles W. Clash, '05 becomes rector of Immanuel Church, Wilmington, Del., today. Rev. Clash is a graduate of the General Theological Seminary of New York. During the war he was Red Cross Chaplain in Base Hospital No. 4. His home is 822 Adams St., Wilmington.

Eugene Ross Woodman, '15 has recently become connected with the New Castle County Highway Dep't. as chief of the field party.

Ernest M. Marks, '18 is now with the National Aniline and Chemical Company at Marcus Hook, Pa.

W. Arthur Wise, '19, who upon graduation became Editor of the Delaware Magazine, has resigned this position to take up studies in the College of Accounting at the Detroit Institute of Technology. He will receive the B. C. S. degree in two years, having been given credits for work at Delaware College. His address is 118 McDougal Ave., Detroit, Mich.

Major J. P. McCaskey, '08, 51st Artillery, U. S. A. is now stationed at Fort Hamilton, N. Y.

The Home For The Students

Dear Editor:

It is rather early in the college year to start making complaints; but I feel that what I write about is of vital interest, reflecting the sentiments of many and hence, I take the liberty of using your paper to bring this matter before those interested.

During the past two years at Delaware College, we have heard much grandiloquent talk of the wonderful Old College student centre. According to report this building was to be devoted entirely to student life, with a lounge, commons, locker-room, meeting-rooms, and rooms devoted to the various organizations. To quote from the college catalogue, Old College is "especially equipped with all comforts including Lounge and Club Rooms." It appears to me, however, that this statement is somewhat of a fallacy, for outside of the dining-hall, lounge and locker-room, but little remains of the "comforts" mentioned.

The Students-Societies Room is now the office of some sort of an intelligence bureau; the Trophy Room is dismantled, and a few of the remnants decorate the walls at the entrance of the Lounge; the Music Room, one of our most needed rooms, is now a military office; the old Chapel Room is used as a class room. With these inconveniences we could well put up, but the Faculty Club usurps, with a true autocratic spirit, one of the best wings of the building devoted to Student use. It would not be so bad if the newly formed club were content with a single room, but they must needs have the only remaining "comfort" in Old College, that of the Lavatory. True, the Students have a Lavatory, a remnant of war days and a poor one at that; but the war is over now, and the Faculty are no longer officers. We need the convenience of this lavatory for visiting teams at least, with its showers, lockers, and so forth, and I can see no reason why it should not be shared by both Faculty and Students alike. I should like to hear what other students think, and for the present I'd suggest that we stop calling Old College a Student Centre; rather call it a Student Centre for the Faculty.
