NEWARK POST.

VOLUME 1 | NEWARK, DELAWARE, WEDNESDAY, APRIL 13, 1910 | NUMBER 12

DIRECTORY

NEWARK TOWN LIBRARY

The Library will be opened:

Monday .....3 to 5:45 P. M.
Tuesday .....9 to 12 M
Friday .....3 to 5:45 P. M.
Saturday .....9 to 12 M.
Saturday .....7 to 9 P. M.

NEWARK POSTOFFICE

MAILS DUE:

From points South and Southeast: 6:30 A. M., 10:45 A. M., 4:15 P. M.

From points North and West: 6:30 A. M., 8:30 A. M., 0:30 A. M., 5:30 P. M.

For Kembleville and Striekersville: 7:45 A. M., 4:15 P. M.

From Avondale: 10:45 A. M., 6:30 P. M.

From Landenberg: 10:45 A. M.

From Cooch's Bridge: 8:30 A. M., 5:30 P. M.

MAILS CLOSE:

For points South and West: 8:00 A. M., 10:45 A. M., 4:30 P. M.

For points North, East, and West: 8:00 A. M., 9:00 A. M., 2:30 P. M., 4:30 P. M., 8:00 P. M.

For Kembleville and Striekersville: 9:30 A. M., 6:00 P. M.

Rural Free Delivery—
Close: 8:00 A. M.
Due: 2:30 P. M.

LODGE MEETINGS—Opera House.

Monday—Knights of Pythias, or K. of P. 7:30 P. M.

Tuesday—Imp. Order Red Men, 7:30 P. M.

Wednesday—Heptasophs, or S. W. M., 7:30 P. M.

Thursday—Ladies' Circle, S. W. M., 7:30 P. M.

Friday—Modern Woodmen of America, No. 10170 7:30 P. M.

ODD FELLOWS' HALL.

Monday—Jr. Order American Mechanics, 7:30 P. M.

Saturday—Knights of Golden Eagle, 7:30 P. M.

Thursday—I. O. O. F., 7:30 P. M.

Town Council—1st Monday night of every month.

Aetna Fire & Hose Company—1st Friday night of the month.

Presbyterian Church

(Rev. W. J. Rowan, Ph. D., Pastor)
Sabbath Services:

Sabbath School, 9.45 a. m.; Preaching, 11 a. m.; Praise and Song Service, 7.30 p. m.; Christian Endeavor, 9.45 p. m. Wednesday evening Prayer-meeting, 8 o'clock. Teachers' and Officers' Meeting, 7.30 o'clock. A cordial invitation to all.

April 12—Inter-Society Debate Athenaean and Delta Phi Society.

May 3—Annual Oratorical Contest in competition for W. C. T. U. Prizes. The prizes offered are $15 and $15 respectively.

Oratorical Contest At The College

The annual Sophomore-Junior Oratorical contest will be held in the Oratory, Thursday evening, April 14

Inter Society Debate

The Inter-Society Debate between the Athenaean and Delta Phi Society will be held in the C-lege Oratory on Tuesday evening, April 19th at 8 o'clock. The subject is: "Resolved, That Labor Unions are, on the whole, detrimental to the best interests of the working man in the United States." The speakers representing the Societies are:

Delta Phi—
Affirmative—Egmont Horn, '10, Samuel N. Tammany, '12; W. J. Bratton, '10. Alternate, Benjamin W. Ward, '12.
Athenaean—
Negative—W. P. Shakespeare, '11; H. T. Ennis, '12; J. V. Ennis, '11. Alternate—P. Walker, '11.

The Election

The election of Town Councilmen passed off very quietly yesterday. In the Western District there was a contest between D. C. Rose and Joseph Thomas. In the middle District the candidates were Dr. Steele and Mr. Brooks, while in the Eastern District, Mr. Jacobs was unopposed.

The result of the election was as follows:

Western District—
D. C. Rose 61
Joseph Thomas 43
Middle District—
W. H. Steele 34
George Brooks 17
Eastern District—
L. B. Jacobs 17

Dr. Rowan Will Read Paper

Dr. Rowan will read a paper before the Public Speaking Conference held at Swarthmore College on Thursday and Friday of this week. The Conference is made up of the instructors of Public Speaking, in the colleges of Pennsylvania, Maryland, New Jersey, Delaware, District of Columbia and Southern New York.

PERSONAL

Mrs. M. E. Kirk, Mr. and Mrs. W. L. Kirk and daughter, all of Philadelphia, and Mr. and Mrs. F. T. Grier, of West Chester, were the guests of Mrs. Rebecca Wilson on Saturday and Sunday.

Invitations are out for the sixth annual dance to be given by the Kappa Alpha Fraternity on Friday evening, April 29th, in the Opera House.

Miss Ethel Keyser, of Wilmington, spent Sunday with Miss Bertha Pyle, of Newark.

Miss Adelaide Vandegrift, of Philadelphia, is visiting her aunt, Mrs. Lane.

Mrs. Corkran, of Philadelphia, spent Sunday with her mother, Mrs. Choate.

Misses Lena Waters and Laura Fader will attend the Missionary Convention of the Presbyterian Church, to be held in Wilmington, this week.

James Stradley and family, of Wilmington, visited Wm. Heavelow, on Sunday.

Mrs. Walter Cox, of near Ruthby, had as her guests on Sunday, Miss Florence Cox, of Delaware City, John Hopkins, of St. Georges and Lea Cannon, of Glasgow.

John and Vaughn Heavellow visited Port Penn friends on Sunday.

Louis DuHadway, of Philadelphia, visited old friends here over Sunday.

Mr. and Mrs. Paul Pie, Mr. and Mrs. John Jeks, and Leo Pie, visited Mrs. Steele, on Sunday.

Miss Carrie Witworth, of Elkton, was a Newark visitor this week.

Miss Mary J. Kane, of Elsmere, visited the Misses Heiser over Sunday.

Miss Lola Jones is spending some time with her aunt, Miss Tigue, of Philadelphia.

Miss Cornelia Pilling, of Westtown Seminary, spent Sunday with her parents.

Little Miss Kathryn Pie, of East Orange, is visiting her aunt, Mrs. Steele.

State Board Of Agriculture

In compliance with the new ruling of the State Board of Agriculture, to the effect that veterinarians are required to make a monthly report, Dr. H. B. McDowell, of Middletown, submitted the following for March:

"On March 17 I was called to the farm of Walter C. Money, near Townsend, where I found one horse that had died suddenly and two that were down. These two and two others died within the next forty-eight hours, a loss of five horses in two days. The sixth horse was taken sick on the 20th and died on the 21st of March. I reported these facts to Mr. Shallcross and asked that Dr Dawson and Dr. Eves be called in consultation. They both agreed in confirming my diagnosis of forage poisoning. After the death of the sixth horse, Dr. Eves and myself held a post mortem which confirmed our diagnosis. Many of the farmers of the neighborhood were present and previous to the post mortem we explained the exact condition that we expected to find. The examination proved exactly as we anticipated. This allayed any feeling that we had a dangerously contagious disease to deal with.

"Forage poisoning is a disease which we believe has its origin in mouldy feed, such as corn fodder, mouldy straw, mouldy hay, or any other mouldy feed. In this instance the trouble was probably caused by some mouldy straw and old stack-bottom that had just been hauled into the barnyard. The active principle is supposed to be ptomaine eating on the nerve centers causing, first, a paralysis of the muscles of deglutition and later a general paralysis. No treatment is known that is effectual when once the animal is infected. The most we can do is to find the source of the infection, remove the infected material and thus save the animals remaining on the place. In Mr. Money's case there are six horses remaining on the farm that will probably escape owing to our recommendation to take them off the infected food."

Mr. Jones' Case Dismissed

R. T. Jones appeared for trial last Wednesday at the office of Squire Gilpon, in Elkton, to answer to warrant served on him by Cecil county authorities for officiating at funeral services without burial permit.

Mr. Jones explained through his attorney, John Strahorn, that he was unfamiliar with the law in this respect.

Dr. Mitchell, Secretary of County Board of Health, a representative of the State Board and Mr. Vinsinger, of Elkton, were among the witnesses in the case.

The explanation given by Mr. Jones was satisfactory, and after a consultation between his lawyer, Mr. Strahorn, and State's Attorney Constable, it was decided at Mr. Jones' suggestion that the case be dismissed and he pay minimum fine and costs. This was done. Mr. Jones paid this, amounting to $26.10.

Oratorical Contest

The annual Sophomore—Junior Oratorical contest will be held in the Oratory, Thursday evening, April 14th. There will be two orations delivered, "The Story of the Struggle for Liberty," by Mr. Jeritiv Wainer, and "Higher Education for Delaware Girls," by John Vaughn Ennis. In addition to the orations, there will be a fine musical program. Everybody is invited.

Around Town

"You get even with people, not by doing to them what they have done to you, but by doing something better."

To get a correct idea of a man—ask his opponent—then believe the opposite.

"I love you because you love the things I love."

If you'd like to take a holiday,
And go fishing in the BROOKS,
And you find it is election day
And you've neither line nor hooks,
Just lay aside your POLL and reel
And travel down the street
And buy some good ones made of STEELE.
You'll find them hard to beat.
So take advice from one who knows,
Don't be a doubting THOMAS,
And you will find a hardy ROSE
Is far better than a promise.
If you ever have a wrestling match
Like old JACOB'S for the cup,
You'll find that eggs are hard to hatch
If your hen sets standing up.
Please COUNCIL, give this town a boost,
Make it pace in BOTH its legs.
But do not squeeze the poor old goose
That lays the golden eggs.

—Scotty.

An Open Letter To Delaware Corn Growers

At a recent meeting of the Delaware Corn Growers Association plans were completed for the fourth Annual State Corn Show to be held in Dover, Del., December 8-9, 1910. Preparations are being made to make this the greatest event of its kind ever held in the State. Prizes in cash and merchandise, amounting to several hundred dollars will be offered. It will be so arranged that those farmers exhibiting at the State Corn Show may also compete at the National Corn Exposition at Columbus, Ohio, February, 1911. Many thousand dollars will be offered as premiums at this Exposition.

Every farmer in the State is eligible to compete in these contests. The object of the Delaware Corn Growers' Association is to extend among corn growers a better understanding of the principles underlying corn improvement, with a view to securing increased yields of high quality at a minimum cost per acre.

Large yields depend largely upon three conditions. First, a variety well adapted to your soil and season. Good ears of this variety should weigh from 12 to 14 ounces, and shell 85 per cent corn. Prompt maturity is most essential in selecting variety. To find a better variety, grow two or three rows of each new variety along with the rest of the field. Husk separately and compare yields. Home-grown seed, if of the right type, is generally preferable to seed grown in a distant State. Test a new variety on a small scale for a year or two before adopting it. There is no difference in the feeding value of white corn and yellow corn.

Second, a perfect stand of plants. Large yields depend directly on the stand of corn. Test your seed corn. Know that every ear will grow. The most vigorous plants make the best yields.

Third. Plant food. If possible, plant on a sod, preferably clover sod. Take care that available potash is supplied, as this element of plant food determines largely the maturity and soundness of the grain. The best results from the use of fertilizer can be realized only when accompanied by the proper cultivation to return moisture.

Improve your strain of corn by testing individual ears by the new method, by which the more prolific may be selected and bred. Particulars in regard to the methods of the improvement of corn by selection and breeding, varieties, fertilizers and methods of culture will be cheerfully furnished by the Department of Agronomy, Delaware Experiment Station.

Inquiries regarding the State Corn Show should be addressed

A. E. Grantham, Agronomist,
Del. Experiment Station.
Sec'y Del. Corn Growers' Assn.,
Newark, Del.

Reception In Honor Of Prof. And Mrs. Carleton Brown

A reception was given Professor and Mrs. Carleton Brown by Dr. Sypherd at 4:30 Monday afternoon. There were about fifty guests present which included only members of the College circle. Dr. Sypherd was assisted in receiving by Mrs. Penny, Mrs. Ferguson, Miss Harter and Miss Cooch.

To Hold Joint Meeting

"Grain Farming versus Fruit Farming" will be the topic of the joint open meeting of the Delaware College Agricultural Club and the Newark Grange to be held at the College next Monday evening. There will be several speakers from both the Club and the Grange. An interesting meeting is expected, and all who are interested in farming are cordially invited.

Phi Sigma Entertains

The Phi Sigma Fraternity of Delaware gave a dinner at their home on Tuesday evening in honor of their guests, Messrs. Wilson, Spencer and Gilette, Sigma Nu men from New York.

NEWS
Here and There

Mr. Jacobs has purchased a fine car of the Courier type.

Dr. Murray, with Messrs. McMullin and Lewis, took an auto trip to Baltimore, on Sunday.

The Bachelors' Club was pleasantly entertained by Miss Eleanor Bowen on Monday evening. The Club will meet at the home of Miss Alice Kerr next week.

He is not Grandpop Strahorn now. Chauffeur, if you please—at your service. You are doing nicely. No joy rides, please.

Who said election?

Several of Newark's people will attend the Fifth Annual Ball of the 45th Infantry U. S. A. at Fort Dupont, on next Wednesday night, April 20th.

Dr. Murray will take his string of thoroughbreds to Pimlico next week.

The streets have been in better shape this week than at any time this year.

J. B. Crossan is improving his property with a coat of paint.

The Newark Transfer—the car purchased by Charles W. Strahorn is being appreciated by our people. It is not only a car giving the maximum service but is something that the town may well be proud of. Mr. Strahorn made the purchase at the recent automobile show held in Philadelphia. It is an exact duplicate of this car which won such favorable comment at the Boston show. It is perhaps the finest car of its kind on the market to-day.

Several auto parties of our sporting men went to the fight last night at the Springs.

—The inter-collegiate rifle match, in which cadets of Delaware College participated, was won by the team of the Massachusetts Agricultural College at Amherst, with a score of 1,848 out of a possible 2,000. Washington State College was second with 1,843 points; Columbia University, New York, third with 1,814, the Idaho University fourth with 1,805 and Iowa University fifth with 1780 points. Twenty-two colleges competed.

College Notes

The College base ball team left this morning for Swarthmore, where they play the Swarthmore College team this afternoon. An interesting game is expected, as Swarthmore has a fine team, and the College team is in good shape.

On Saturday the Delaware nine was defeated by Franklin and Marshall College at Lancaster. Delaware was ahead until the eighth inning, when F. & M. scored ten runs, making the final score 10—9.

As the game with Western Maryland was cancelled at the last moment the game with Mt. St. Josephs to be played here on Saturday will be the first home game of the season.

The Cadet Corps is at present preparing for the annual government inspection to be held next Wednesday.

WATER VS. OIL

The citizens of Overbrook have petitioned their Council against the use of oil. A long article in the Philadelphia Record sets forth their objections.

A citizen hands us the following from the "Swarthmore Republican." This was written by George A. Hoadley, who is Vice-President of Swarthmore College.

TAR BETTER THAN OIL.

To the Editor of the Swarthmore Republican:

Dear Sir:—Your editorial on the need of a new surface to our borough roads leads me to give the results of my observation of the comparative values of tar and oil for the purpose.

Both these materials keep down the dust when first laid. Somemonths later, however, the oil covered road will give off an oily dust that is difficult to remove; the tar covered road will not. At this spring the oil covered road has been covered with a disagreeable mud that tracks into the house and oils the floors and carpets. Another important feature is that the tar acts as a permanent binder for the small stone on the surface of the road, and tends to keep it in shape. The oil does not, and the surface is being destroyed by the constant loosening of these stones by heavy traffic. Then, twice a year these loosened surface stones are cleared off and taken away, and the roads are being destroyed. I believe the tar to be much better, and that it is a matter of economy to use it.

Very truly yours,
GEO. A. HOADLEY.

High School Girls Interested

THE NECESSITY OF A STREET SPRINKLER.

The use of a street sprinkler is almost, if not altogether, a necessity. By its use our streets are kept free from dust, which with ordinary team travel, not mentioning the ever increasing automobile travel, during the hot weather become a cloud of dust. This is most annoying to our townspeople, and to some it proves quite injurious. Our merchants suffer to some extent on account of their displayed goods, being covered with dust daily. In the interior of our homes the dust finds its way and causes injury to various household articles. Property owners also suffer on account of the dust settling on the paint on their residences, necessitating more frequent painting. When our streets are properly sprinkled all these annoyances are avoided, traveling is pleasant, and the few hours spent on our front porches during the sultry days and evenings are more enjoyable and refreshing.

ANNA E. GALLAHER.

THE NECESSITY FOR STREET SPRINKLING.

Street dust is of the greatest menace to public health and every effort should be made to eradicate it. The town of Newark has been very dusty during the last few weeks and from the standpoint of public health the streets should be sprinkled often enough to keep the dust down. Some of our most dreaded diseases may be spread by means of dust. Tuberculosis is an example of such a disease. Every effort should be made to persuade the town council to provide some adequate means of doing away with the dust nuisance. There are also other arguments that could be put forth as a reason for keeping the streets sprinkled, such as cleanliness of houses, and the cooling of air during warm, dry weather, but prevention of disease outweighs all others. Whether the dust is kept down by oil or water it matters not. Do away with the dust!

ESSIE B. WILLIS.

WATER VS. OIL.

The use of oil as a means of settling dust on our streets has many disadvantages, while water seems to have but one, and that is the supply. When oil is first put on it is very objectionable to traffic, especially to automobiles. Objections from this source are not made to water. House-keepers say that oil makes a stain which they are unable to remove. Water does not stain. It is said that after using oil upon the streets the summer heat is intensified. After using water there remains a pleasant, refreshing odor, and the air seems greatly cooled. However, it is agreed that "anything is better than dust."

MILDRED S. McNEAL.

Editor of POST:

It seems to me that it would be a good idea to try an experiment with this oil and see how it works. Every one will agree with me in saying that the sprinkler was not satisfactory last summer. Let's try the oil.

P. D. Q.

STILL ANOTHER VIEW.

Why don't you take a stand against this oil proposition. No one who has ever seen it work satisfactorily. Wherever it is used to any degree of success, it is put on every month during the summer. In several New Jersey resorts, where it is used in this way, the sprinkler is used constantly in connection with it. Someone at the Council suggested making an experiment. May the Gods of Council forbid! Remember the water meters. That was an experiment. Remember the crushed rock on the street from the College to the Rand O—that was an experiment. Newark will become the Laboratory of Public Improvements, where experiments are carried on at the expense of the tax-payer and the delight of promoters with schemes for making Newark the haven of rest.

We have the sprinkler. Let it be run as it should be, and all will be well. And when some other town has experimented and found out what is best, we will try it out. We have experimented enough for awhile.

TAX-PAYER.

THE SOUL OF THE VIOLIN

Scene—(A dingy attic in a wretched tenement.) A bit of candle in an old bottle gives a faint, gloomy light, uncanny shadows move about the room, a table, a rickety chair, a pile of straw serves for a bed. A man standing by the table, lifts a violin. He touches it as men touch things they love. He holds it against his hunger wasted face, and talks to it as if it lived and understood all he said. "It has come at last, old comrade, it has come at last when you and I must say goodbie. God knows I wish I could sell myself instead of you, but I am worthless. While you, my beauty, do you know a Shylock down the street, the man who has all else I own save you, has offered me five hundred dollars for you. Five hundred dollars to a man who has not a coat to wear, a roof to cover him or a crumb of bread to eat. WHY do I hesitate? You are only some bits of wood, a few trumpety strings—not much for a man to starve for. I have only to run down the stair with you—a few steps more—hand you over the counter—the thing is done, and I have five hundred dollars. I can leave this wretched rat-ridden hole. I can have food to eat, I can mingle with the friends I used to know and be one of them. Five Hundred Dollars! and all for you—you, thing without a stomach. You cannot know hunger, you body without a soul.

Stay—am I sure of that? The man passes his fingers slowly over the strings and bends his head to listen. The soft vibrations follow each other like sweet half forgotten thoughts. "Your E string is a trifle flat."

About to thrust the violin inside the case he stops—a faint tremor of sound is still audible. It seems almost like a whisper of pain. The man lifts the violin again in his arms and lays his cheek upon it. "What cold comrade) does it hurt you, too? Ah, I have wronged you. You have a heart, you can feel. I almost believe you can remember. Let me see now, how long has it been? Twenty, thirty, thirty-five years, the average life-time of man we have been together. And I knew you long before. You were in a funny little shop, kept by a man that had owned you longer than I have. He would allow the people passing to look at you and read your inscription—(Cremona, "1731")

But he would not sell you. Ah, he was ever hungry. One day, the old man sent for me and said, "Bring me your old violin and you shall have Cremona." "To keep?" "Yes, to keep, I am old. Some one else will soon take possession here, and Cremona might fall into some strange hands. I should not like that. I should rather give it to you." So I carried you home with me that day, and sat up half the night drawing the bow softly over your strings. I was the happiest boy in all the world, and would not have taken a kingdom in exchange for you. Ah, but then I was not hungry. What animals we men are, after all! Thirty-five years! And we have seen the world together. We have tasted its bitter and sweet. Kings and beggars alike have listened to you and both have loved you.

Do you remember the night in Berlin when we played "The Dream" and the beautiful woman in the box at the right, threw a red rose? It caught upon one of your strings—caught and hung by a thorn. And when I tried to release it, the blood-red petals fell in a shower at my feet. Then we played "The Last Rose of Summer." There were tears in many eyes when we had finished! and she—why I think the music had taken possession of her. For she rose, crying out, "No! No! it is not the last rose, the world is full of roses. See—and she threw a great armful of red and white blossoms. I wonder if she loved me best or you? It was in the time of roses when she, the rose of all the world, lay dead. When it was dark—all the rest had gone and left her, you and I went to say good-bye. The world was of roses, and I heaped them all about her. Then you sang, O, how you sang! I have always believed her soul was borne to heaven on the music of your song, carrying the perfume of roses with it.

The next time we played, some one threw a rose and I set my heel upon it. What right had roses to bloom, when she, the rose of all the world was dead!

Ah we have done badly since you and I, and somehow things ceased to seem worth striving for. And you have been dearer because you were the only one who knew and understood. And yet, I said you had no heart. Forgive me, old comrade, a man is not to blame for what he says when he is hungry.

Ah! what a fool I am! Away to an old fiddle! when I might be getting something to eat. The strings still quivering from his rough handling, he bears a sign, faint as the farewell breath from the lips of a loved one dying.

"No, no, I cannot! I will not! it may be folly, yes, it, yes, is folly. It is madness, no matter, I'll not do it. I'm not hungry now. Come, sing to me, and I shall be altogether happy. Sing to me of the rose and of her. See! She is in the box yonder, all among her blossoms. She is smiling and throwing us handfuls of the red and white blossoms. We must do our best, our very best, when she listens. Hark! Hear!

Bravos! ! ! Encores! ! !

Ah we have conquered the world tonight. This is ecstasy! This is heaven! One more rose, my beauty, my queen of all the world. The lights are growing dim, my sight is failing, I can see only you—only—only—only—only—only—you.

The Old Gods In A New Guise

In his very interesting lecture in the College Oratory, last Monday evening, Professor Carleton Brown showed how the Christian literature of the Middle Ages was permeated with pagan conceptions. The pagan deities of the Celtic and Germanic peoples, not to any great extent of the Romans and Greeks, are retained in a modified form in the most representative kind of mediaeval literature—the romance of love and adventure. The pagan gods are in many of the Middle English romances, for instance, relegated to a much humbler position. They have become the demons, who in one way or another, have power over mortals. Such conceptions as these of the demonic influence of these creatures were believed in firmly by the people of the Middle Ages and such belief is responsible for the widespread popularity of the romance.

THE NEWARK POST

Published every Wednesday at Newark, Delaware.

WEDNESDAY, APRIL 13, 1910

ABOUT BEING TOO SERIOUS

I CAN tell you for your comfort that, when your life seems dark, the chief cure for it is to interest yourself, to lose yourself, in some issue not personal to yourself—in another man's trouble, or, preferably, another man's joy. But if the dark hour does not vanish as sometimes is doesn't; if the black cloud will not lift, as sometimes it will not; let me tell you again for your comfort that there are many liars in the world, but there are no liars like our own sensations. The deepest gratification awaiting, because there is for you nothing irremediable, nothing ineffaceable, nothing irrevocable, in anything you may have said or thought or done. If for any reason you cannot believe, or have not been taught to believe in the infinite mercy of Heaven, which has made us all, and will take care we will not go astray, at least believe that you are not yet sufficiently important to be taken too seriously by the powers above or beneath us. In other words, take anything and everything seriously except yourself.

—Rodyard Kipling.

Quality Folks

The old Southern darkies recognized those who were above them by the name—quality folks. To us quality folks are those who do better work, who render better service than the ordinary run of folks. Heinz qualifies for that with his 57 varieties; the Studebaker Wagon Company, the Oliver Plow Company, John Wanamaker—all these and others in their class are quality folks. But one doesn't have to be of national importance to be reckoned in this class. One can be "quality folks" in a small community. All you have to do is to do a certain kind of work a little better than the best. That is the open sesame to that society.

Jones, out in Wisconsin, is making better sausage than any one else, while Mary Elizabeth makes those who like good candy bend the knee to Syracuse. Out there in Pittsfield, Mass., is the Caxton society. These lovers of good printing are publishing a series of brochures which are filled with the best in literature. Thomas Mosher, of Portland, makes the best books in the country. One can caress a Mosher book, and always be sure that within the covers one can find something high grade. The Roycrofters came into existence because Elbert Hubbard stumbled into William Morris and caught the germ. Out in Los Angeles James Griffis has set up the Golden Press among the orange trees and roses. He sends out his beautiful little magazine "Everyman" to try to bring folks to see that the Golden Rule is really greater than the majority think, and that a laugh is worth ten frowns in every market.

An ideal we have is that some day there will be a little shop in Newark that will do good things in printing. It is a dream—not of a country job office, but of a little art shop. A dream perhaps—but that the Newark Post some day will be considered and loved as a little weekly paper at Newark, Delaware, that is good, that is doing good, that is different and that we may be classed among the QUALITY FOLKS—because we are doing good work, a little better than the other fellow can.

Fry Oysters In Pure Olive Oil

Then you can tickle the palate with your half dozen or more, without inviting a protest from the stomach.

Pure Olive Oil is vegetable. It can't turn rancid and doesn't lie heavy on the stomach. Lucca Tosconia Olive Oil pressed from choice Italian olives under the strict modern sanitary conditions is the finest, purest in the world. For sale at

CELIA'S,
Newark.

Fire Blight Of The Pear And Apple

As the name implies, a diseased tree has the appearance of being burned or scalded with hot water. The fire blight is a serious menace to the growing of pears, apples, quinces and many other fruits. This disease is known as blossom blight, twig blight, and canker blight, all of which are caused by the same parasitic organism.

The fire blight is a bacterial disease. The organism (Bacillus amylovorus) feeds on the starch of the tree. The result is a weakening, and a gradual starvation of the plant. The organism is carried over winter in the cankers of the older limbs of the affected trees. These cankers are manifested as large wide dead areas which are bordered by large cracks in the bark. The cankers of the fire blight offer a smooth appearance, and this helps us to distinguish it from the black rot canker, the dead areas of which are very rough to the touch. In the spring, when the pears and the apples are in blossom, the fire blight cankers exude a yellowish sweetish substance. When examined microscopically this substance is found to be swarmed with the bacteria of the fire blight. Bees and wasps are very fond of this exuding liquid. It is easy to conceive how these insects carry the organisms from flower to flower, and from tree to tree. The bacteria have no difficulty in penetrating the tender parts of the blossoms and of the young leaves. Man, too, serves as an agent in disseminating this disease. In pruning infected trees, the pruning shears are thus contaminated. In pruning healthy trees with these same tools the former readily contract the disease.

The fire blight usually appears as an epidemic in wet seasons, but it is commonly found on neglected trees even in dry seasons. It is useless to attempt to spray, for spraying will not control this disease. There are however, other preventive means. Early in the spring our attention should be directed to the hold over cankers, which as we have seen carry the organism over winter. The first step is to carefully cut out these cankers. It is necessary to cut out to about six inches below the infected area. The cut surface should immediately be disinfected with a solution of one part of corrosive sublimate to a thousand parts of water. Beside this, soon after blossoming, inspect the orchard at least every two weeks, and cut out every twig which infection. In following out these directions, the blight can be reduced to its minimum, since in cutting out the young infected twigs the organism is prevented from working down into the older limbs which thus remain a source of infection for the coming spring. It is hardly necessary to impress the importance of disinfecting the pruning tools and even our hands. The best disinfectant known is the corrosive sublimate. Failure to take these necessary steps will result in direct money losses. The fruits growers cannot afford to remain indifferent. They cannot long remain content with poor crops and small returns for their labor. It is easy to justify our own neglect, to put the blame on present abnormal conditions, or on present evils; but all this will not compensate for the heavy losses which annually sustain.

Mike Saves The Day

Patty—the world's renown cow dealer—and Mr. J—— had a great experience last week while ringing a pig. Mr. J—— while holding the pig, and Patty endeavoring to ring the pig was interrupted by a very beautiful dog belonging to Mr. Thompson. The dog got the pig by the tail, and the pig got Patty and his friend in the corner, but was rescued by Mike, who by his Celtic quickness, pulled the pig away.

Fly Bulletin

Are you doing anything to make the world better for your having lived in it?

SCREENS

God bless the man who first invented screens. The device that has at once brought the greatest degree of personal comfort, cleanliness of household and individual safety is the door and window screen. No other invention of the last quarter of a century can compare with its worth and utility as a life and health saver, and yet, until recently, screens were used principally to exclude the fly and mosquito solely on the ground of personal comfort.

Heads of families who are looking for an investment may be assured of one that is certain of enormous returns through the prevention of sickness and maybe death by the early and effective screening of every outside door and window of their home. It is much easier to keep flies out by proper screening than to get them out once they get in. *Screen your house!* Scientists of all countries are agreed on one point—that the fly is carrier of disease germs—therefore, screen your house!

Flies love to feast on filth, and then get into the house and wipe their feet on your cake or baby's bottle. *Screen the house!* It is true they are nature's scavengers, but they spread filth and very often disease in doing their work: besides it is better to do your own scavengering by keeping clean than to have the fly do it for you; for not only is the fly a dangerous companion, but clean people are beginning to suspect that those who have flies about them are dirty housekeepers, else flies would not be there. If, therefore, you wish to bear the reputation of cleanliness in your neighborhood, be sure that your trash and manure heaps are frequently removed, and that **your house is properly screened!**

(Extract from Kansas State Board of Health Bulletin.)

Quality considered you get the best screen goods for your money at THE DEAN CASH STORE.

Newport Events

A musical will be given at the M. E. Church on April 21, by Wilmington talent. Proceeds to go towards furnishing electric lights in basement.

Mr. Edward Woodward, of Roselle, is at the Philadelphia Hospital suffering with tuberculosis of the hand.

Mrs. Sarah E. Winn spent the week's end with her daughter, Mrs. James Polk, of Wilmington.

Mr. and Mrs. D. W. Chandler, of Oxford, Mr. Harvey Gregg and family of Newport, and Mr. and Mrs. Mahlin Betts, of Wilmington, were guests of Mr. Louis Bail on Saturday and Sunday.

The chairs were filled by the ladies at Delaware Grange on Monday, 11th. Quite an interesting program was held. The men were agreeably surprised, and complimented the ladies on filling them so well. The Grenge will take in a class of twelve on next Monday night. The following Monday evening, April 25, they will give an entertainment in their hall. They hope to have a large attendance.

Mr. John Scarborough returned yesterday from the hospital in Philadelphia, where he has been undergoing an operation for his eyes. He was a very happy man when he left yesterday to come home unattended. He visited the barber-shop and had a shave and came down alone. Many friends called to rejoice with him last evening at his home.

Milford Cross Roads

Sunday School opened on Sunday, April 10th, at 2.30 p. m.

The annual election was held and H. M. Whiteman our former Superintendent was re-elected.

Sunday School hereafter to be held at the school house at 2.30 p. m. All are cordially invited.

Mr. Charles Grier and Mr. Fred Potter, of Concord, spent Sunday with the former's father and aunt.

Mr. Frank Buckingham and family, of Newark, spent the week end with Mr. F. E. Hitchens.

The teacher and scholars of Milford Cross Roads school are to be congratulated on the appearance of the inside and outside of the building.

Bouquet—One of your subscribers up here was heard to say here would rather give up the Wilmington paper than the Post.

Strickersville

Benj. Singles, U. S. S., spent Sunday at home before departing for Asia.

Miss Bessie Wilson, Philadelphia, was entertained at Frank Singles' on Sunday.

J. S. Barnett spent Sunday with friends at North East.

Miss Sarah Taylor spent last week with Mr. and Mrs. David Stewart, of Newark.

Miss Anna L. Singles spent Saturday with Wilmington friends.

Mr. and Mrs. Draper were entertained by Mr. and Mrs. J. C. Vansant on Sunday evening.

Charles Singles, Wilmington, spent Sunday at home.

G. N. Vansant spent Sunday with Newark friends.

Wm. S. Montgomery has accepted a position with John Powell, of Newark.

Barksdale Briefs

Sparks from the B. & O. R. R. set fire to the woods and fields west of Barksdale, on Sunday, and burned over thirty acres of woodland and fields of the farm recently purchased by Mr. Huber, of Newark.

Mr. W. E. Hayes lost a valuable cow and heifer last week.

The Little Elk tribe of Red Men of Cherry Hill attended services at the Latter Day Saints Church at Elk Mills, last Sabbath.

There will be a bake for the benefit of the Sewing Society of Head of Christiana Church on Saturday evening the 15th, at the home of Miss Libbie M. Hayes, at Barksdale. Come out and enjoy yourself.

Pleasant Hill News

Miss Rebecca Moore, of Yorklyn, Del., and Miss Mamie McCormick, of Iron Hill, spent the week-end with their cousin, Bessie Moore.

The Pleasant Hill base ball team was defeated by the Victors of Newark, last Saturday afternoon, the score being 15 to 4.

Mrs. J. T. Moore has been spending a few days in Philadelphia.

Pleasant Hill base ball team chanced off a watch last Saturday afternoon, the proceeds being for the benefit of the team, the lucky one being Raymond McNeal, of Newark.

William Lanham and Howard Little spent Sunday with John E. Buckingham.

Lee Lewis, of Newark, spent Sunday with relatives on the Hill.

Mrs. Elizabeth Moore, of Yorklyn, has returned home after spending several days with Mrs. J. T. Moore.

Miss Mamie McCormick, of Iron Hill, is visiting her cousin, Louise Harkness.

Grover C. MacNamee, of Elsmere Del., spent the week-end with his cousin George W. Dempsey.

William Harkness spent Sunday with relatives at Pleasant Hill.

OVERLAND
IS THE CAR

A 40 h. p. Overland with 112-inch wheel base Price with single rumble seat, $1,250—double rumble seat, $1,275—with 5 passenger Touring or Close-Coupled body, $1,400

The Reason

The car is amazingly simple. Three of the models operate by pedal control. Push a pedal forward to go ahead, and backward to reverse. Push another pedal foreward to get on high speed. It is as simple as walking. A 10-year-old child can master the car in ten minutes.

The Overland has less parts than any other highgrade car. One invention alone does away with 47 pieces. The car is almost trouble-proof.

OVERLAND "Model 38" is the first real car for $1000. Built by the same expert mechanics who made famous the costly Pope Toledo cars. It is the only car at the price that gives plenty of room everywhere; that is really comfortable either on long or short rides or country tours; it is the easiest car in the world to drive—barring none; and it will stand up and give absolutely perfect service under conditions which none except the most expensive and carefully constructed cars will endure.

Like all our Planetary Models, the well known Overland Motto applies—"Only pedals to push and no noise but the wind."

The Reason

The Overlands' supremacy—wherever known—is due to the following reasons;

The Overland engine is a wonderful creation. It is so automatic, so silent and powerful, so free from the usual troubles, that it appeals to the average buyer.

The OVERLAND stands the test.

There may be stronger and more serviceable cars than this—but no one around here knows which one it is.

Look for the "Story of an Overland" in next weeks issue.

Overland Model 38—Price $1,000. 25 h. p.—102-inch wheel base. With single rumble seat, $1,050—double rumble seat, $1,075—complete Toy Tonneau, $1,100

All prices include Magneto and Full Lamp Equipments.

A. F. FADER, - - Newark, Del.

Medical Inspection In The Schools

Address By Prof. Messersmith Before New Century Club

(Continued from last week)

GENERAL HEALTH.—The heart, the liver, and the kidneys are subject to derangements important from the point of view of the school. A pupil with heart trouble must be kept from taking part in the more exhausting plays and sports and must be guarded against undue excitement or exhaustion. A deranged liver is the explanation of listlessness and inattention in may pupils, ad the medical inspectors report enables the teacher to deal with the child properly. Kidney diseases explain frequent requests to leave the class room, and a torpid or dull attitude of the pupil.

All the school can do in these cases is to inform the parents of the results of the medical examination, and instruct teachers to be guided in their instruction and discipline by the report.

Tuberculosis is a disease not easily detected in its first stages among children. Tuberculosis of the bones gives use to stigmata that the medical inspectors will detect. Rickets, the awkward gait, stiffness, are some of these. Intestinal tuberculosis has much the same stigmata as malnutrition. Lung and bronchial tuberculosis may be detected by the bent shoulders, flat chest, improper breathing, and always with certainty by the bacteriological examination of sputum.

Cases of tuberculosis not acute, need not be excluded from the schools. Pupils with lung tuberculosis must be instructed in the accepted method of treatment, simple foods, plenty of sleep, outdoor bedroom, cleanliness, and in the measures they must take to safeguard the health of themselves and others. The boards of health in some states, and the education authorities in others, have issued booklets for the teachers and set of rules to be memorized by the pupils, the aim of which is to prevent the progress and the spread of this great scourge.

Recently school authorities have come to the conclusion that acute cases of lung tuberculosis must be excluded from the school. The difficulty in getting young pupils to take proper preventive measures to protect the other pupils, and the changes to which the confinement of the school room subject the afflicted pupils themselves, rather than the inherent nature of the disease, have led the authorities to this attitude.

It is evident, however, that acute cases cannot with justice be denied of the school privilege. In many cities, notably in New York City, and in several New England towns, special open air schools are provided for these cases. I would like much to tell you of the nature of these schools and of how the cure and education of these unfortunates go on simultaneously, but the limits of my paper forbid it.

In large centres of population there is an alarming number of pupils who suffer from malnutrition. Even in our small towns we are not without such cases.

Malnutrition may be due to a lack of sufficient food, to a lack of nourishing food, to the eating and drinking of substances that derange the child's digestive powers, and as I have already stated, to crowded teeth, improper mastication and insalivation, and to intestinal tuberculosis. In many families, and this is notoriously true of our large cities, there are many children who come to school without any or with a very insufficient breakfast. At noon they eat practically no lunch, but roam the streets, buying perhaps with a penny or two some indigestible candies or cakes. Many who do go home snatch from the meagrely spread table a morsel or two and make their way off. Their only real meal comes when father comes home from his daily moil. Father and mother, older brother and sister, have probably been well nourished. They are a bit wiser and better able to help themselves in the struggle for existence. Little Annie and Charlie have in the meantime been in a school room for five and one half hours with little or no nourishment. It is of course obvious that from the very necessity in any social organiation there will be families too poor to provide proper and sufficient food, and when I say "any social organization," I am not excluding the favorite dream of a socialistic Utopia. But it is obviously true that many children are improperly nourished because of the parents carelessness or ignorance, or in their indulging the child to the extent of allowing it to lie abed until the last minute—too late to eat any breakfast.

It is not only a lack of food that brings about malnutrition but the eating and drinking unsuitable materials. Bread and coffee may be a breakfast for grown-up—if he ikes sufficient of the bread and not too much of the coffee—but it is hardly a breakfast for a young child. There are thousands of children who know no other breakfast. Coffee and tea are a harmless refreshment for grown-ups, but they are hardly a drink to be consumed by a child in large quantities, especially if that child gets little and poor solid food. And while there are those who believe that beer though not a necessity, may be a pleasing and nutritious addition to the evening meal of an adult, it is undoubtedly true that thousands of children in the families of many of our foreign element are badly injured in their mental and physical growth by its consumption.

A child improperly nourished, cannot make proper mental and physical growth. We are now confronted by a situation that is more difficult of solution than any other connected with medical inspection. I have dwelt on it at length because in the solution arrived at, the schools have been accused of socialistic propaganda. "You begin by furnishing tooth brushes and end by furnishing breakfasts", is what the alarmists say. I am ready to contend that the school breakfast is no more socialistic than the State asylum for the insane. Both are humanitarian and conventional institutions.

I shall again refer to New York as the type of city in solving this problem. In the higher schools, a lunch served by the school may be had for 5 cents. This is ample and nutritious. In some east side schools breakfasts are served free. In others, breakfast institutions supported by private benefaction, serve free breakfasts. There are private charitable breakfast and lunch associations that serve brekfasts and lunches for a penny, and for two pennies the child may have a veritable feast—for the child! Miss Alice C. Broughton, connected with the Starr Centre Association in Philadelphia, says:—"The first year after the reorganization 63,000 penny luncheons were sold, with a profit of $3.50. Last year nearly 89,000 were sold with a profit of $2.50. This year it is hoped over 100,000 will be sold with no profit.

I need not say that this problem cannot be neglected by us in the villages. For on a smaller scale, though in no unimportant way, we have the problem right here at home.

CRIPPLED CHILDREN.—This is a class of children that have been much neglected even in our best regulated school systems—and by the State as well. I do not refer to those unfortunates whose physical defect merely hinders normal movement, for they are able to attend the regular grades. I have that large class in mind, who through some congenital defect, or through disease or accident, are unable to move about with ease. As a rule they receive tender care in the home and their life is made as pleasant as possible. But they do not receive any real and systematic educational training, either mental or muscular. In the homes of the workers, most of these cases are found, the unproductive member of the family often becomes a heavy though a loved charge. It seems to me that it is the duty of the city and the State to provide special schools where these children may receive adequate training. The special aims of this hospital school, as it might be termed, should be to give orthopedic treatment that may bring back greater powers of movement, and to train the children in some useful trade or art by which it may be able to support itself, and not be a permanent charge on society or on the family. When Mr. Widener established his beautiful and well equipped home for crippled children in Philadelphia, he showed his intelligence and discernment as well as his public spirit. The school and the State can no longer neglect this class of children as they have in the past.

(To be Continued.)

A Thoroughbred

Did you ever ride a "hunter?" Were you ever astride a Kentucky thoroughbred, or his equal, one that could do his mile around the two minute mark? And some fine morning did he ever take the bit in his teeth, suddenly grow a set of wings, and fly—as if the devil were behind him? Have you been there?

Well, then, you know the sensation of wonderful, boundless power that you feel when a swiftly rushing thing instantly obedient to the touch of a finger or the pressure of a foot, bears you through the air at railroad speed, with always more in store, though ready, if need be, to crawl, in humble servitude, or more seldom at your command.

Mind you, I said at your command. It's the Overland Automobile.

Some cars there are that require a course in engineering to run them.

It has not an equal here. A man can step from the plow and run it.

Like this. Push one pedal—and you go ahead. Push another—and you go to the high speed. Push the first pedal back and you reverse.

Isn't that easy and a noise like the purring of a cat.

It's a car that the amateur can run. And he can hold his own with the $3500 car.

Don't take my word for it, nor Fader's—go to the people that have owned both kinds—they will tell you. Ask to see their garage. That's the way to prove it.

And you'll see a beauty. Simple—graceful—strong—

AND IT'S AN "OVERLAND."

—The remains of Mrs. Mary Beck, formerly of this county, were brought to the home of her niece, Mrs. James Shellender, in Newark, last week, for interment in Head of Christiana cemetery. She died at a sanitarium in Philadelphia, on April 4, aged 74 years.

—The funeral of Ralph, the 13 year old son of Mr. and Mrs. George W. Murray, of Newark, was held on Saturday, with interment in Lombardy Cemetery, Wilmington. He died in Delaware Hospital, on the previous Wednesday, after an operation for appendicitis.

—Mrs. Hester Wells, died at her home in Townsend, Del., on April 3, of a lingering illness, aged 44 years. Her funeral was held on the following Wednesday. Her husband, Thos. Wells, and two daughters survive her.

—W. L. Habbart, of Claymont, Del., is showing Lily of Kent apples in perfect condition, despite the cold winter.

STORY

OF A

Business Growth.

This month 3 years ago I started here at 34 New London Avenue just above B & O.

From a very small stock of groceries I have now a full line of general supplies.

My store is considered a little out of the way but some one has said, you know, that if a man make a better mouse trap or sell a better article the world will make a beaten path to his door. I am getting that path

I buy from the leading firms and my goods are fresh and of the first quality. I positively refuse to hold goods. So I sell at a small profit.

I carry full line of flours and feeds of leading brands.

A line of Shoes and Working Men's Furnishings of all kinds.

I am very proud of my store.

I am grateful to my patrons. I have built up this business and hope to continue.

I have purchased this property during the last year; have improved it and am ready to give you my best service.
