Prefatory Note

This is the sixth series of Delaware Notes. The plan of publication has been to issue each year a volume of studies made by members of our faculty. Scientific and humanistic interests are emphasized in alternate years. It did not prove possible in 1929 to collect a sufficient number of correlated articles for the formation of a volume, and so there was no volume issued in that year. It has been thought best to include in this issue one article of purely scientific interest, as this article completes a series initiated in our first volume. A further departure from our plan is the inclusion in this volume of the addresses made at the dedication of Evans Hall, our new engineering building.

EZRA B. CROOKS,
Editor.
