EXPLANATION

• Well

−2 Elevation of the base of the Pleistocene or Pliocene(?) series, in feet, above (+) or below (−) sea level. The downward arrow (↓) indicates that full thickness of the Pleistocene series was not penetrated.

−−−−− Contours indicate approximate elevation of the base of the Pleistocene at sea level or below. Contour interval 50 feet.

SCALE 0 5 10 MILES

Plate 9.—Generalized contour map of the base of the Pleistocene series in Delaware. The series is deposited in channels in the pre-Pleistocene erosion surface, and these contours only represent the trend in a general way.
