VULCANIZED FIBRE CO.,
Sole Manufacturers of
HARD & FLEXIBLE VULCANIZED FIBRE,
Tenth and Walnut Sta., Wilmington, Del.

The remarkable substance manufactured in all its various forms by this company is made in two varieties, known as Hard and Flexible Vulcanized Fibre, and in an endless diversity of forms and shapes. Hard Vulcanized Fibre occupies an intermediate place between hard wood and the softer metals in hardness, density, and lustre. It has a specific gravity of about 1.3; it is one of the best known non-conductors of heat and electricity. This quality renders it exceedingly valuable for electrical purposes, for which it is being largely used, especially for Electric Light Machines. Its admirable anti-friction qualities render it valuable for bearings, slides, gibbs, etc. It is also slightly elastic under all conditions, which gives it great value for many purposes where hard rubber has heretofore been used, such as packing, nut-locks, track-bolts, washers, shoe-tips, etc.

Flexible Vulcanized Fibre closely resembles the best quality of sole leather in appearance, and is largely used as a substitute for it in mechanical applications. It can be made of any reasonable and of uniform thickness, which gives it a very decided advantage over leather in economy, by lessening the waste caused by uneven thickness, a serious cause of loss wherever leather is used. Flexible Vulcanized Fibre is used for many of the purposes for which leather has heretofore been exclusively applied; being unaffected by heat or oil, it is peculiarly adapted for carriage washers, car box washers, compression cock washers, packing, gaskets, and the thousands of uses in connection with the mechanic arts. Both Hard and Flexible Vulcanized Fibre are insoluble in all known solvents.

Vulcanized Fibre has also been most successfully used in the making of roving cans, cop boxes, shuttles, spools, etc., for cotton and woolen mills. Trunks, valises, etc., have also been made from it. Its applications are continually increasing, and are destined to become as general as those of any of the great staples of the world.

Wilmington Carpet Cleaning Works.

With newly improved machinery, I am fully prepared to thoroughly clean Carpets of every description, Church and other Cushions, and Feather Beds. Feather Beds renovated by the "Air Process," no steam being used, as the ticking remains unopened.
